N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Dredging work at Drum Head, N.S. Name of contractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, August 24, 1936. Amount of contract, approximately \$14,719.74. The General Fair Wages Clause was inserted in the contract.

Dredging work in the North Arm of the Fraser River, B.C. Name of contractors, British Columbia Bridge and Dredging Co., Ltd., Vancouver, B.C. Date of contract, August 3, 1936. Amount of contract, approximately \$63,000. The General Fair Wages Clause was inserted in the contract.

Dredging work at Caissie's Cape, N.B. Name of contractor, Mr. Philip M. Leger, Mount Carmel, N.B. Date of contract, August 3, 1936. Amount of contract, approximately \$3,800. The General Fair Wages Clause was inserted in the contract.

Dredging work at Byng Inlet, Ontario. Name of contractors, Canadian Dredge and Dock Co., Ltd., Midland, Ont. Date of contract, August 7, 1936. Amount of contract, approximately \$8,640. The General Fair Wages Clause was inserted in the contract.

Dredging work in harbour, Toronto, Ont. Name of contractors, National Sand & Material Co., Ltd., Toronto, Ont. Date of contract, July 28, 1936. Amount of contract, approximately \$11,962.50. The General Fair Wages Clause was inserted in the contract.

Dredging work in the harbour, Liverpool, N.S. Name of contractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, August 6, 1936. Amount of contract, approximately \$12,920. The General Fair Wages Clause was inserted in the contract.

#### *Contracts in Group "B" (Interior Fittings, etc.)*

Construction and installation of interior fittings in the public building, Kingsville, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, July 30, 1936. Amount of contract, \$1,666. The "B" labour conditions were inserted in this contract.

Construction and installation of interior fittings in the public building at Watrous, Sask. Name of contractors, W. H. Cushing Ltd., Regina, Sask. Date of contract, August 13, 1936. Amount of contract, \$754. The "B" labour conditions were inserted in this contract.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Food, Drink and Tobacco

WINNIPEG, MANITOBA.—CERTAIN BAKERIES IN THE NORTHERN SECTION OF WINNIPEG AND THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION, LOCAL NO. 292.

Agreement to be in effect from July 15, 1936 to April 30, 1937. Notice to be given by either party desiring a change in the agreement, thirty days before the expiration date.

(A strike over the violation of this agreement is reported on page 775 of this issue.)

Only union workers to be employed, if available. Others employed must join the union and the union may withdraw from work any worker who violates a union rule. The union label to be used on all products and it will be withdrawn by the union in case of violation of the agreement. Where a worker has been employed for two weeks, he cannot be dismissed except for flagrant misconduct or by the consent of both parties.

Hours: 8 per day, a 44 hour week.

Overtime not to be permitted while there are unemployed members of the union. Overtime to be paid at time and one-half.

Minimum wages per week: head bakers \$25, dough men \$19, bench men \$16, helpers \$13, cake bakers 40 cents per hour. (These are increases of \$1 per week in weekly wage rates and of 5 cents per hour for cake bakers from the wage rates in effect in the former agreement with the Food Workers' Industrial Union).

During the slack season there shall be equal division of work among employees as far as possible.

Where an employer, manager or foreman does any kind of work, the same regulations as to hours of labour and division of work to apply.

Grievances to be first taken up with the shop committee and union representative. No strike to occur during negotiations of any dispute.

### Manufacturing: Textiles and Clothing

TORONTO, ONTARIO.—CERTAIN MANUFACTURERS OF BOYS' CLOTHING, WOMEN'S SUITS AND DRESSES AND THE NATIONAL CLOTHING WORKERS OF CANADA.

Agreement in effect in one establishment from July 24, 1935 and in others from January and March 1936. The agreement may be changed by agreement in writing between the firm and the union.

Only union members to be employed except new employees who must join the union. No employee to be discharged without just cause or without the employer consulting with the union executive.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Wages: Wherever possible all work to be done on a wage basis which is not to be less than the rate set by the Minimum Wage Board. The employer and the union to confer from time to time regarding wage rates, and if there is any dispute which cannot be settled between them, it shall be referred to the general board of directors, and, if disputed, to an independent party whose decision will be accepted. Wage rates paid must be at least equal to those paid in establishments where work of a similar nature is performed. No deductions to be made from wages unless agreed to between the employer and the union.

WINNIPEG, MANITOBA.—CERTAIN WOMEN'S CLOAK AND SUIT MANUFACTURERS AND THE INTERNATIONAL LADIES' GARMENT WORKERS' UNION.

Agreement to be in effect from July 15, 1936 to July 15, 1937.

This agreement amends the previous agreement which was summarized in the LABOUR GAZETTE, November 1935, page 1061, as follows:

Hours: 42 per week divided into 5½ working days, provided that during the slack season, that is between November 15 and January 15 and between May 15 and July 15, no work to be done on Saturdays.

Wages being paid employees under the October 1935 agreement to be increased \$2 per week for all those receiving \$12 or less per week and \$1.50 for those receiving over \$12 per week.

WINNIPEG, MANITOBA.—CERTAIN MEN'S WORK CLOTHING MANUFACTURERS AND THE UNITED GARMENT WORKERS OF AMERICA.

This agreement was reached following a strike reported in the LABOUR GAZETTE, August 1936, page 693, and the current issue, page 775. A similar agreement with another firm has been in effect for several years.

Agreement to be in effect from various dates in July and August, 1936.

The employers acknowledge the right of the workers to organize and to deal collectively through a representative chosen by and through the union and there shall be no discrimination against any employee for union activity. The union agrees not to interfere with the employers' proper factory discipline and management, not to limit output, restrict employment nor curtail production.

Hours: 8 per day, a 44-hour week.

Overtime: all work before regular starting time or after regular quitting time, time and one-quarter; work on Sundays or legal holidays, double time. Piece workers to receive prices increased similarly for work done outside regular hours.

Minimum wages are the union piece rate schedule.

### Construction: Building and Structures

TORONTO AND DISTRICT SOCIETY OF DOMESTIC, SANITARY AND HEATING ENGINEERS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL No. 46.

Agreement in effect from March 24, 1936, to March 1, 1937, and from year to year thereafter unless sixty days' notice prior to February 28, 1937, is given by either party, in which case the Joint Conference Board shall convene within thirty days and come to a decision.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, August, 1935, page 776. Wages remain the same at 90 cents per hour for journeymen plumbers.

TORONTO, ONTARIO.—BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION OF TORONTO AND THE SHEET METAL WORKERS' INTERNATIONAL ASSOCIATION, LOCAL No. 30.

Agreement to be in effect from September 1, 1936, to April 30, 1937, and thereafter from year to year until notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, July, 1935, page 692, with the exception that the minimum hourly wage for journeymen sheet metal workers is raised from 75 to 82½ cents per hour.

Hours remain unchanged, with an 8-hour day and a 40-hour week.

TORONTO, ONTARIO.—A CERTAIN WRECKING COMPANY AND THE INTERNATIONAL HOD CARRIERS', BUILDING AND COMMON LABOURERS' UNION OF AMERICA, TORONTO WRECKERS' LOCAL.

Agreement reached after a minor dispute reported on page 774 of this issue.

Agreement was signed on or about August 4, 1936, and is effective for one year. Notice of any proposed change in the agreement must be given thirty days before the expiration of the agreement.

The union agrees to supply the company with competent help and the company agrees that no worker shall be employed unless he is a union member.

Hours: 8 per day, but in cases of special need, 9 hours' work shall be permitted at the regular rate; all work in excess of 9 hours to be paid at the rate of time and one-quarter.

Wages: ground worker labourers 35 cents per hour and barmen 40 cents per hour until March 1, 1937, when these rates shall be increased by 5 cents per hour. These rates not to apply on any work done for the city, provincial or federal government for which minimum rates have been set.

A shop steward elected by the employees shall take up any complaint which the company may have against any employee. No employee shall be discharged before the matter of his dis-

charge has been taken up with the union and the consent of the union has been obtained.

TORONTO, ONTARIO.—CUT STONE SECTION OF THE BUILDERS' EXCHANGE AND THE TORONTO LOCAL OF THE JOURNEYMEN STONECUTTERS' ASSOCIATION OF NORTH AMERICA.

The agreement which was summarized in the LABOUR GAZETTE, July, 1932, page 819, and amended as shown in the LABOUR GAZETTE, July, 1933, page 733, has been renewed from May 1, 1936, to April 30, 1937.

Wages for journeymen stonecutters remain at 87½ cents per hour, with a 44-hour week.

### Transportation and Public Utilities: Electricity and Gas

HAMILTON, ONTARIO.—THE HAMILTON HYDRO-ELECTRIC COMMISSION AND SUCH OF ITS EMPLOYEES WHO ARE MEMBERS OF LOCAL UNION No. 138, INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS

Verbal agreement to be in effect from July 1, 1936, to July 1, 1937, and thereafter from year to year until notice.

This agreement is based on the recommendations of a Board of Conciliation under the Industrial Disputes Investigation Act given in July, 1933, and published in the LABOUR GAZETTE August, 1933, page 759. These recommendations were accepted verbally by employer and workers, and with the exception of the wage rate clauses, the present agreement is the same as that recommended in the above report. The present agreement does not deal with the meter department as did the Board's report.

Wages per month in the sub-station operating department: electrical workers with 3 years' experience or over \$155, with 2 to 3 years' experience \$130, with 1 to 2 years' experience \$115, with less than one year's experience \$100.

Wages per hour in overhead line department, underground and maintenance department and trouble department: first class linemen 81 cents, second class linemen 76 cents, cablemen 81 cents, foremen 91 cents.

### Transportation and Public Utilities: Water Transportation

VICTORIA, BRITISH COLUMBIA.—CERTAIN STEVEDORING COMPANIES AND THE VICTORIA LONGSHOREMEN'S ASSOCIATION.

Agreement to be in effect from June 15, 1936 to June 15, 1941, and from the year thereafter until either party gives 60 days' notice prior to June 15 of any year.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, April 1936, page 369, with the following changes and additions:

Saturday afternoon is hereafter to be classed as overtime.

The association undertakes to maintain in its membership only workmen capable of doing a fair day's work. It also agrees that strikes will not be called on sympathetic grounds.

As heretofore, base rates in the Port of Victoria shall be governed by the rates prevailing in the Port of Vancouver.

### Service: Hotels and Restaurants

TORONTO, ONTARIO.—CERTAIN HOTELS, MEMBERS OF THE ASSOCIATION OF HOTEL PROPRIETORS AND THE HOTEL AND RESTAURANT EMPLOYEES' INTERNATIONAL ALLIANCE AND BARTENDERS' INTERNATIONAL LEAGUE, No. 280, (BEVERAGE DISPENSERS).

The agreement covers hotel beverage and tap rooms.

Agreement accepted August 26, 1936 and earlier dates, to be in effect until June 30, 1937. A strike to obtain this agreement in some of the hotels is reported on page 778 of this issue.

Only union members in good standing to be employed. Any others employed must join the union. The union agrees to use its influence with organized labour and its friends to patronize only such places as display the union card which is to be supplied by the union.

Hours: 54 per week to be performed within six days.

Overtime to be paid at 50 cents per hour.

Minimum wage rates: \$18 per week for waiters handling beverages and \$21 for tap men. Where an employee is employed as tap man and waiter, the rate is \$21. For ten Class B hotels, the wage scale is \$16 per week for waiters and \$19 for tapmen. Extra help or sparemen to be paid 50 cents per hour and must be paid for at least three hours. If employed a full 9 hour day, however, the wage rate for the day to be \$3.50.

Where by mutual agreement meals are supplied, a maximum of 25 cents per meal and of \$3 per week may be charged by the employer, and a maximum of \$2.50 per week for room.

Uniforms for waiters and tapmen to be supplied and laundered at the expense of the employer.

Waiters and tapmen to be properly insured against accident under the provisions of the Workmen's Compensation Act or other liability insurance at the expense of the employer.

### Industrial Standards Act of Nova Scotia

The following schedules have been made binding by Order in Council and the terms summarized in this issue in the article beginning on page 832:

Electrical Workers, Halifax and Dartmouth.  
Plumbers and Steamfitters, Halifax and Dartmouth.

Carpenters, Halifax and Dartmouth.  
Bricklayers, Halifax and Dartmouth.

### Quebec Collective Labour Agreements Extension Act

The following agreement and amendments to agreements have been made obligatory by Orders in Council and are summarized in the article beginning on page 833 of this issue:

Glove cutters (work gloves), Province of Quebec.

Building Trades, Lake St. John District (Amendment).

Building Trades, Quebec (Amendment).

Longshoremen (Inland and Coastal Navigation), Montreal (Amendment).

Glove cutters (fine gloves), Province of Quebec (Amendment).

Furniture workers, Province of Quebec (Amendment).

### Industrial Standards Act of Ontario

The following schedules have recently been made obligatory and the terms summarized in the article beginning on page 838 of this issue:

Millinery Industry, Province of Ontario (Cancellation).

Bricklayers, Stonemasons and Plasterers, Kitchener.

Building Labourers, Kitchener.

Carpenters, Kitchener.

Painters, Kitchener.

Plumbers, Windsor.

Electrical Workers, Windsor.

Building Labourers, Windsor.

Plasterers, Windsor.

Carpenters, Windsor.

Bricklayers, Windsor.

Carpenters, Ottawa.

Plumbers, Ottawa.

Brewery Workers, Province of Ontario.

### Industrial Standards Act of Alberta

The following schedules have recently been approved and made binding by Order in Council and are summarized in the article beginning on page 838 of this issue:

Electrical Workers, Wetaskiwin.

Tinsmiths and Sheet Metal Workers, Wetaskiwin.

Plumbers and Steamfitters, Wetaskiwin.

Bricklayers and Plasterers, Wetaskiwin.

Building Labourers, Wetaskiwin.

Painters, Wetaskiwin.

Carpenters, Wetaskiwin.

Electrical Workers, Calgary.

Tile and Marble Layers, Edmonton.

An historical outline of occupational diseases, industrial hygiene and surgery traced from early antiquity to the depression of the twentieth century appears in the July issue of *Industrial Medicine*. The writer, Dr. Robert T. Legge, professor of Hygiene, University of California, devotes particular attention to the early period of occupational hygiene following upon the advent of modern industrialism.

The value of imports brought into Canada, free of duty, from the United States by Canadians under the \$100 exemption clause since May 1, when the regulation went into effect, until July 31 was \$751,885. The following is the classification of items: clothing, \$393,457; furniture and household appliances, \$90,735; boots and shoes, \$73,992; automobile accessories, \$29,763; automobile tires and tubes, \$20,133; foodstuffs, \$1,559; miscellaneous articles, \$142,246.

## INDUSTRIAL STANDARDS ACT OF NOVA SCOTIA

### First Schedules of Wages and Hours Approved by Orders in Council

**T**HE Industrial Standards Act of Nova Scotia, which was summarized in the LABOUR GAZETTE, July, page 604, is similar to the Industrial Standards Act of Ontario as noted below in the first paragraph of "Industrial Standards Act of Ontario." It is, however, restricted to the building and construction industry in Halifax and Dartmouth and excludes employees of the provincial government or municipalities and also excludes any employee performing temporary work or service the total amount of which does not exceed one hundred dollars.

The following are the first schedules to be put into effect through Order in Council under this Act.

**ELECTRICAL WORKERS, HALIFAX AND DARTMOUTH.**—An Order in Council dated September 1 and published in *The Royal Gazette*, September 2, makes obligatory a schedule of wages for all those engaged in the electrical industry in the city of Halifax and the town of Dartmouth.

The schedule is to be in effect from September 12, 1936, to April 30, 1937, and thereafter from year to year until either party gives the required notice.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Where more than one shift a day is worked, on the second and third shifts, 8 hours' pay for 7 hours' work.

Overtime: time and one-half for first five hours, double time thereafter. Double time for work on Sundays, seven specified holidays and civic holidays. No work on Labour Day except for the protection of life and property.

Minimum wage rate for electrical workers: 80 cents per hour.

Not more than one apprentice or helper to be allowed to any journeyman. Apprentices to be paid 20 cents per hour during second year, 30 cents during third year, 40 cents during fourth year and 50 cents during fifth year.

**PLUMBERS AND STEAMFITTERS, HALIFAX AND DARTMOUTH.**—An Order in Council, dated September 1 and published in *The Royal Gazette*, September 2, makes obligatory the terms of a schedule for all those engaged in the plumbing and steamfitting industry in the city of Halifax and the town of Dartmouth.

The schedule is in effect from September 12, 1936, to April 30, 1937, and thereafter from year to year until either party gives the required notice.

This schedule is similar to the one noted above for electricians at Halifax and Dartmouth, with these exceptions:

Civic holidays are not listed with the holidays for which double time is to be paid.

Minimum wage rate for plumbers and steamfitters: 75 cents per hour.

No wage rates are specified for apprentices.

In case of extra high or heavy work, any help required, in addition to the one apprentice or helper per journeyman, are to be labourers who will not be required to do any mechanical work.

**CARPENTERS, HALIFAX AND DARTMOUTH.**—An Order in Council, dated September 1 and published in *The Royal Gazette*, September 2, makes obligatory the terms of a schedule for all those engaged in the carpentry industry in the city of Halifax and the town of Dartmouth.

The schedule is in effect from September 12, 1936, to April 30, 1937, and thereafter from year to year until either party gives the required notice.

This schedule is similar to the one noted above for electricians at Halifax and Dartmouth, with these exceptions:

Overtime to be paid for at the rate of time and one-half for the first five hours following the first shift and the first three hours following the second and third shifts and double time thereafter. Civic holidays are omitted from the list of holidays for which double time is to be paid.

Minimum wage rate for carpenters: 60 cents per hour. No wages rates are specified for apprentices.

**BRICKLAYERS, HALIFAX AND DARTMOUTH.**—An Order in Council, dated September 1 and published in *The Royal Gazette*, September 2, makes obligatory the terms of a schedule for all those engaged in the bricklaying industry in the city of Halifax and the town of Dartmouth.

The schedule is in effect from September 12, 1936, to April 30, 1937, and thereafter from year to year until either party gives the required notice.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Where shifts are being worked, 8 hours' pay for 7 hours' work for the second and third shift.

All overtime and work on Sundays and seven specified holidays double time. No work on Labour Day except for the protection of life and property.

Minimum wage rate for bricklayers: 97½ cents per hour.

It is expected that the Royal Commission on the Textile Industry, which adjourned in Montreal on June 22 will begin its fall session on or about September 15, and continue for several weeks.

Questionnaires sent to textile mills late in June and early in July requesting detailed information regarding production costs, trading profits, and other relevant matters concerning the past 10 years' operations have been completed and returned to the Commission's accountants.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

**R**ECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include: the extension by Order in Council of an agreement affecting glove cutters (work gloves) throughout the Province, which is summarized below; amendments to Orders in Council affecting five other agreements which are also noted below. In addition, a request for an amendment to the Order in Council affecting building trades at Montreal was published in the *Quebec Official Gazette*, August 1, and a request for the extension of a new agreement affecting printing trades at Chicoutimi was published in the issue of August 8.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526, and July, 1936, page 607. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreement have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**GLOVE CUTTERS (WORK GLOVES), PROVINCE OF QUEBEC.**—An Order in Council, approved August 1, and published in the *Quebec Official Gazette*, August 15, makes obligatory the terms of an agreement between certain glove manu-

facturers and Le Syndicat Catholique National des Gantiers de Montréal, section des gros gants (The National Catholic Union of Glove Makers of Montreal, Work Gloves Section) and Le Syndicat Catholique National des Gantiers des Trois-Rivières, section des gros gants (The National Catholic Union of Glove Makers of Three Rivers, Work Gloves Section).

The territorial jurisdiction includes the whole Province of Quebec.

The agreement is in effect from August 1, 1936, to July 1, 1937, and for another year if neither party gives the required notice of objections to its renewal.

Hours not to exceed 48 per week. If it is necessary for any manufacturer to employ his workers for more than 48 hours per week during a certain period, an agreement as to this must first be reached between such manufacturer and the Joint Committee.

The minimum wage schedule contained in this agreement is a schedule of piece rates and it is provided that in towns of a population of 15,000 or less these minimum rates are 10 per cent less than in the larger towns and cities.

One apprentice allowed for every 10 cutters or fraction thereof in any shop.

Apprentices to be paid \$7 per week during first six months and \$9 during second six months and the regular piece work rates after one year.

The joint committee appointed under the Act to fix wages for any other type of glove not now provided for, but such rates before becoming obligatory must be approved by an amendment to this Order in Council.

**BUILDING TRADES, LAKE ST. JOHN DISTRICT.**—An Order in Council, approved August 7 and published in the *Quebec Official Gazette*, August 8, amends the previous Order in Council for these trades (*LABOUR GAZETTE*, January, page 88, and March, page 275) by including from August 1, 1936, the county of Saguenay and providing that for contracts exceeding \$10,000 in this county overtime work not exceeding two hours per day be paid at regular rate and the following hourly wage scale to be paid: bricklayers and masons, 70 cents, enginemen—shovel (steam, gas) 65 cents to \$1, electricians 50 to 60 cents, blacksmiths 45 to 55 cents, enginemen—hoisting 55 cents, carter (two horses) 50 cents, carpenters and joiners (finishing) 45 to 50 cents; plumbers and steamfitters, cement finishers and painters 40 to 50 cents; carpenters and joiners (repairing and concrete forms) and compressor oper-

ators 40 to 45 cents, enginemen—gas mixer 35 to 45 cents; riggers, carter (one horse) and powdermen 40 cents; truck driver and drill operator 35 cents; helpers, stationary firemen 30 to 35 cents; carters and common labourers 30 cents. It is also provided that clearing operations comprising the cutting and scouring of wood and road building are not governed by this Order in Council.

**BUILDING TRADES, QUEBEC.**—An Order in Council, approved August 1, and published in the *Quebec Official Gazette*, August 8, amends the previous Orders in Council for these trades (LABOUR GAZETTE, June, page 545 and July, page 660) by providing for Thetford Mines in a separate zone with the following minimum hourly wage scale: bricklayers, masons and plasterers 60 cents; carpenters and joiners, metal lathers 50 cents; wood lathers, drillers, stationary enginemen and mechanics, enginemen—steam shovel, enginemen—hoisting, enginemen—gas mixer, enginemen—compressor 45 cents; painters, tinsmith roofers, joint pointers, cement finishers, marble setters, tile setters, terrazzo setters, men working on machines for polishing the terrazzo, 40 cents; building caulkers 35 cents; mortar makers, celanite mixers, plaster pourers, hod carriers and common labourers 30 cents.

**LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.**—By an order in Council, approved August 4 and published in the *Quebec Official Gazette*, August 8, the Order in Council relating to these workers which was summarized in the LABOUR GAZETTE, August, page 751, is rescinded and the original Orders in Council (LABOUR GAZETTE, May, page 460 and July, page 661) are declared to be in force.

**GLOVE CUTTERS (FINE GLOVES), PROVINCE OF QUEBEC.**—An Order in Council, approved August 1, and published in the *Quebec Official Gazette*, August 15, makes an addition to the piece rate list in the agreement which was summarized in the LABOUR GAZETTE, June, page 545.

**FURNITURE WORKERS, PROVINCE OF QUEBEC.**—An Order in Council, approved August 7 and published in the *Quebec Official Gazette*, August 15, amends the previous Orders in Council for this industry (LABOUR GAZETTE, November, 1935, page 1064, December, page 1157, and January, 1936, page 87) by making the following changes:—

The agreement is to be renewed each year on August 31 unless "a preponderant group of employers or the contracting parties of the first part give notice to the other parties hereto of their intention to revoke same at least ninety days before the date of expiration of the said contract."

The party of the first part is changed to "the manufacturers of furniture of the Province of Quebec, representing the following employers" instead of the association previously a party.

The minimum rates for employees over 21 years of age are to apply also to common labourers.

#### Safety Measures Employed by Sherwin-Williams Co. of Canada

Reference was made in the July issue of the LABOUR GAZETTE, to the fact that the Sherwin-Williams Company of Canada, Limited, had won the Hon. C. J. Arcand trophy for industrial plant safety. By this achievement, this Company wins, for the second time during the last four years, the handsome trophy donated in 1932 by the Hon. C. J. Arcand.

In accepting this award the company is justifiably proud of its record of operating 2,772,444 man-hours in 1935 without a single lost-time accident. In order to accomplish this, the Sherwin-Williams Company adopted and developed modern methods in accident prevention. All motors, drive-shafts, cog wheels, belting, etc., are installed close to the ceiling, while any machinery on the floor is guarded and kept painted and clean. Good housekeeping is the rule in every department. Floors are swept every night and washed once a week. Staircases are well-lighted, painted regularly, and all corners are painted white for better visibility; plant inspections are held regularly; suggestions for improvement are always welcome and where feasible put into effect at once. Co-operation between foremen and superintendents in carrying out any betterment of working conditions with a view to the prevention of accidents, insures the well-being of the employees. Warning signs are posted at strategic points; and a fully equipped first-aid man is always on hand to give immediate treatment for minor injuries which might otherwise become serious if not attended to immediately.

Employing such accident preventive measures, the Sherwin-Williams Company stated that it looked forward confidently to another year of operation without a lost-time accident.

## INDUSTRIAL STANDARDS ACT OF ONTARIO

### Agreements Recently Approved by Orders in Council

**T**HE Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the *LABOUR GAZETTE*, summaries are given in this article of the schedules which have thus been approved.

**MILLINERY INDUSTRY, PROVINCE OF ONTARIO.**—The schedule for this industry which was summarized in the *LABOUR GAZETTE*, June, 1936, page 549, has been rescinded by an Order in Council which was published in *The Ontario Gazette*, August 15.

**BRICKLAYERS, STONEMASONS AND PLASTERERS, KITCHENER.**—An Order in Council dated August 6, and published in *The Ontario Gazette*, August 15, and corrected in the issue of August 22, makes obligatory the terms of a schedule governing the bricklaying, stonemasonry and plastering trades in a zone which includes the city of Kitchener, the town of Waterloo and surrounding district.

This Order in Council is in effect from September 1, 1936, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: from 5 p.m. to 10 p.m. on the first five days of the week and on Saturdays from noon to 5 p.m., time and one-half, except where two or more shifts are being carried on when any 8 hours will be considered

straight time. All other overtime and work on Sundays and six specified holidays, double time. If required to work in order that concrete may be poured on Saturday afternoon and in cases of actual emergency, straight time to be paid.

Minimum wage rate: 80 cents per hour, to apply also to night work which cannot be done during the regular working day. In case of shift work, for work on the night shift, the minimum is 90 cents per hour or 8 hours' pay for 7 hours' work. A special minimum rate of wages may be established by the Advisory Board for any person who is handicapped by age or disability.

Apprentices to be governed by the Ontario Apprenticeship Act.

The schedule does not apply to work contracted for and accepted prior to July 13, 1936.

**BUILDING LABOURERS, KITCHENER.**—An Order in Council, dated August 6 and published in *The Ontario Gazette*, August 15, makes obligatory the terms of a schedule governing common labourers in the building industry in a zone which includes the city of Kitchener, the town of Waterloo and the surrounding district.

This Order in Council is in effect from August 25, 1936, "during pleasure."

Hours: 9 per day, 48 per week.

Overtime: all time in excess of 9 hours per day or 48 per week to be paid at time and one-half.

Minimum wage rate: 40 cents per hour. A special minimum rate may be established by the Advisory Board for any handicapped person.

The provisions of this schedule are not to apply to persons engaged on work contracted for and accepted prior to July 13, 1936.

**CARPENTERS, KITCHENER.**—An Order in Council, dated August 6, and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the carpentry trade in a zone which includes the city of Kitchener and the town of Waterloo and adjacent district. Maintenance men permanently employed in industrial or manufacturing establishments are not included.

This Order in Council is in effect from August 25, 1936, "during pleasure."

Hours: 9 per day, for first five days of week and as many hours between 7 a.m. and 12 noon Saturdays as are required to make up 48 hours in the week.

Minimum wage rate for carpenters: 60 cents per hour.

All other provisions as to hours, overtime, apprenticeship, etc., are the same as provided for bricklayers, stonemasons and plasterers in this same zone, as noted above, except that there is no higher rate of wages provided for work on night shifts.

The schedule does not apply to work contracted for and accepted prior to July 13, 1936.

**PAINTERS, DECORATORS, PAPERHANGERS AND GLAZIERS, KITCHENER.**—An Order in Council, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the painting, decorating, paperhanging and glazing trades in a zone which includes the city of Kitchener, the town of Waterloo and adjacent district. Maintenance men permanently employed by industrial or manufacturing establishments are not included.

This Order in Council is in effect from August 25, 1936, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44 hour week. Where two or more shifts are being carried on, any 8-hour shift to be paid at regular rate and no overtime allowed.

Overtime: from 5 p.m. to 10 p.m. on first five days of the week and from noon to 5 p.m. on Saturdays, time and one-half. All other overtime and work on Sundays and five specified holidays, double time.

Minimum wage rate: 50 cents per hour, which also applies to night work of not more than 8 hours where such work cannot be done during a regular working day. A special minimum rate of wages may be established by the Advisory Board for any handicapped person.

Apprentices to be governed by the Ontario Apprenticeship Act.

Any work contracted for and accepted before July 13, 1936, is to be exempted from this schedule.

**PLUMBERS AND STEAMFITTERS, WINDSOR.**—An Order in Council, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the plumbing and heating trade in a zone which includes the city of Windsor and the adjacent suburban area.

This schedule replaces the schedule which was summarized in the *LABOUR GAZETTE*, January, page 90, and this Order in Council is in effect from August 25, 1936, "during pleasure."

Sprinkler fitting and maintenance work performed by permanent employees of an industrial or manufacturing establishment are not included under this schedule.

Hours: 8 per day during first five days of the week, from 8 a.m. to 5 p.m. with one hour for lunch or from 8 a.m. to 4.30 p.m. with one-half hour for lunch; a 40 hour week.

Overtime: all work performed at any time except during the regular working day and regular working week, between 1 a.m. Monday and 8 a.m. Saturday to be paid at time and one-half, with the exception of work on Saturday morning required for the protection of life or property and the setting of sleeves and inserts which will be done at regular rate, and except for shift work. Whenever work is being carried on in two or more shifts, for work on the night shifts, 7 hours to be worked and the wage rate to be \$1.15 per hour. No overtime permitted where shift work is being carried on. Work after 8 a.m. Saturdays, except as provided above, all work on Sundays and six specified holidays, double time.

Minimum wage rate: \$1 per hour; fifth year junior mechanics two thirds of journeymen's rate. A special minimum rate may be established by the Advisory Board for handicapped workers.

Apprentices to be governed by the Ontario Apprenticeship Act.

**ELECTRICAL WORKERS, WINDSOR.**—An Order in Council, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the electrical repair and construction trade in a zone which includes the city of Windsor and the adjacent suburban area.

This schedule replaces the schedule which was summarized in the *LABOUR GAZETTE*, November 1935, page 1065, and this Order in Council is in effect from August 25, 1936 "during pleasure."

The schedule excludes maintenance work performed by permanent employees of industrial or manufacturing establishments and also excludes work done on the assembling, testing, inspecting, rebuilding and repairing of any electric motor or machine or household appliance in licensed electrical repair shops or in industrial or manufacturing establishments.

Hours: 8 per day, between 8 a.m. and 5 p.m. with one hour for lunch or between 8 a.m. and 4.30 p.m. with one half hour for lunch, on the first five days of the week; a 40 hour week. Whenever work is of such a nature that it cannot be done during a regular working day, it may be done at night, with regular pay for 8 hours.

Where work is being carried on in two or more shifts, an 8 hour shift to be considered a regular working day but employees working on the night shifts to be paid \$1.14 per hour or 8 hours' pay for 7 hours' work. No overtime permitted where shift work is being carried on.

Overtime to be paid for any work in the trade except as provided for above, the overtime rate to be double time. Double time also for work on Saturdays, Sundays and six specified holidays.

Minimum hourly wage rate: \$1 per hour. A special minimum rate may be established by the Advisory Board for any handicapped person.

Apprentices to be governed by the Ontario Apprenticeship Act.

**BUILDING LABOURERS, WINDSOR.**—An Order in Council, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing common labourers in the building trade, in a zone which includes the city of Windsor and adjacent suburban area.

This schedule replaces the previous schedule which was summarized in the *LABOUR GAZETTE*, December 1935, page 1159, and this Order in Council is in effect from August 25, 1936 "during pleasure."

Hours limited to 9 per day and 48 per week. Overtime: time and one half; work on Sundays and six specified holidays, double time.

Minimum wage rate: 50 cents per hour. A special minimum rate may be established by the Advisory Board for handicapped persons.

**PLASTERERS, WINDSOR.**—An Order in Council, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the plastering trade, in a zone which includes the city of Windsor and the adjacent suburban area.

This schedule replaces the previous schedule which was summarized in the *LABOUR GAZETTE*, December 1935, page 1159, and this Order in Council is in effect from August 25, 1936 "during pleasure."

This schedule is the same as the one summarized above for electrical workers at Windsor, with this exception:

Minimum wage rate for plasterers: 90 cents per hour. Where shift work is being carried on, plasterers working on night shifts to be paid \$1.03 per hour or 8 hours' pay for 7 hours' work.

**CARPENTERS, WINDSOR.—An Order in Council**, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the carpentry trade in a zone which includes the city of Windsor and the adjacent suburban area.

This schedule replaces the previous schedule which was summarized in the *LABOUR GAZETTE*, December 1935, page 1159, and this Order in Council is in effect from August 25, 1936 "during pleasure."

This schedule is the same as the one summarized above for electrical workers at Windsor, with these exceptions:

Minimum wage rate for carpenters: 80 cents per hour. Where shift work is being carried on, carpenters working on the night shifts to be paid 90 cents per hour or 8 hours' pay for 7 hours' work.

One hour of overtime may be added to any regular working day at the rate of time and one half. Workers required to work on Saturday mornings to permit the pouring of concrete or on work necessary for the protection of life or property to be paid at regular rate.

**BRICKLAYERS AND STONEMASONS, WINDSOR.—An Order in Council**, dated August 6 and published in *The Ontario Gazette*, August 15, makes obligatory the terms of a schedule governing the bricklaying and stonemasonry trades in a zone which includes the city of Windsor and adjacent suburban area.

This schedule replaces the schedule which was summarized in the *LABOUR GAZETTE*, December 1935, page 1158, and this Order in Council is in effect from August 25, 1936 "during pleasure."

This schedule is the same as the one summarized above for electrical workers at Windsor, with these exceptions:

Minimum wage rate for bricklayers and stonemasons: 90 cents per hour. Where shift work is being carried on, bricklayers and stonemasons on the night shift to be paid \$1.03 per hour or 8 hours' pay for 7 hours' work.

Workers required to work on Saturday mornings to permit the pouring of concrete or on work necessary for the protection of life or property to be paid at regular rate.

**CARPENTERS, OTTAWA.—An Order in Council**, dated August 6 and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the carpentry trade in a zone which includes the city of Ottawa and surrounding area which is defined in the Order in Council.

This Order in Council is in effect from August 25, 1936 "during pleasure."

The schedule excludes regular employees of industrial or manufacturing establishments doing repair and maintenance work and work on new structures, alterations or extensions which are of a minor nature, in or to the plant or equipment used by such establishment.

Hours: 8 per day on first five days of the week, between 8 a.m. and 5 p.m. with one hour for lunch or between 8 a.m. and 4.30 p.m. with one half hour for lunch, 4 hours on Saturdays, from 8 a.m. to 12 noon; a 44 hour week. Whenever work is of such a nature that it cannot be done during a regular working day, it may be done at night, with regular pay for an 8 hour shift. Employees required to work on Saturday afternoon to permit the pouring of concrete or on work necessary for the protection of life or property, to be paid at the regular rate.

Whenever work is being done in two or more shifts, any 8 hour shift to be considered a regular working day, but employees working on the night shift to be paid 80 cents per hour or 8 hours' pay for 7 hours' work, and no overtime allowed.

Overtime between 5 p.m. and 10 p.m. on the first five days of the week, between noon and 5 p.m. on Saturdays, to be paid at time and one half. All other overtime including work done on Sundays and five specified holidays, double time.

Minimum wage rate for carpenters: 70 cents per hour. A special minimum rate may be established by the Advisory Board for handicapped workers.

Apprentices to be governed by the Ontario Apprenticeship Act.

**PLUMBERS AND STEAMFITTERS, OTTAWA.—An Order in Council**, dated August 6, and published in *The Ontario Gazette* August 15, makes obligatory the terms of a schedule governing the plumbing and heating trades in a zone which includes the city of Ottawa and surrounding area which is defined in the Order in Council.

This Order in Council is in effect from August 25, 1936 "during pleasure."

The schedule does not include regular employees of industrial or manufacturing establishments who are engaged in manufacturing processes or in work in connection with the repair, servicing or upkeep of the plant and its equipment or in new installations, alterations or extensions of a minor nature in such establishment; the work of sprinkler fitting is also excluded.

Hours: 8 per day for the first five days of the week, from 8 a.m. to 5 p.m. with one hour for lunch, or from 8 a.m. to 4.30 p.m. with one-half hour for lunch; a 40-hour week. When work is required on Saturday morning for the protection of life or property and the setting of sleeves and inserts, regular rate to be paid.

Whenever work is being carried on in two or more shifts, persons on the night shift to work 7 hours and be paid 91 cents per hour until September 30, 1936 and 95 cents thereafter. No overtime permitted on shift work.

Overtime worked between 1 a.m. Monday and 8 a.m. Saturday, time and one-half. All other overtime including work on Saturdays (except as provided above), Sundays and eight specified holidays, double time.

Minimum wage rate: 80 cents per hour until September 30, 1936 and 83 cents thereafter.

Apprentices to be governed by the Ontario Apprenticeship Act. Whenever this Act does not apply to fifth year junior mechanics they shall be paid a minimum of two thirds of the journeymen's rate.

**BREWERY WORKERS, PROVINCE OF ONTARIO.**—An Order in Council, dated August 6 and summarized in *The Ontario Gazette*, August

15, makes obligatory the terms of a schedule governing the brewing industry throughout the Province of Ontario.

This Order in Council is in effect from August 25, 1936, "during pleasure."

The terms of this schedule are similar to the schedule previously in force which was summarized in the *LABOUR GAZETTE*, July 1935, page 633, with no change in the hours or wage rates.

## INDUSTRIAL STANDARDS ACT OF ALBERTA

### Schedules of Wages and Hours Recently Approved by Orders in Council

**THE Industrial Standards Act of Alberta, 1935**, is similar to the Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, 1935, page 534, where are also noted the minor differences between the Ontario and Alberta Acts. The Act provides that the Minister of Trade and Industry for Alberta, may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees or employers in the industry in any zone or zones, to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant Governor in Council may declare such schedule to be in force for a period not exceeding twelve months, and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Alberta Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Previous schedules under this Act have been summarized in the *LABOUR GAZETTE*, September, 1935, April and July, 1936.

**ELECTRICAL WORKERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for the electrical industry in a zone which includes the city of Wetaskiwin and the surrounding district which is defined in the schedule.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: 8 per day, Monday to Saturday inclusive, a 48-hour week and no man to be employed for more than 48 hours per week

except in case of emergency. Country work (outside the city of Wetaskiwin) to be left to the discretion of the employer but hours limited to 48 per week.

Overtime: all time worked after midnight and all time worked in excess of 48 hours per week, and all work on Sundays and statutory holidays to be paid at time and one-half.

Minimum wage rate: 75 cents per hour for journeymen and 50 cents for helpers.

Employees engaged in country work to be provided with their board, and in addition one journeyman and one helper to receive transportation both ways and travelling time during regular working hours and a berth if travelling at night.

No employer may employ any employee not resident in the zone when capable resident employees are available.

**TINSMITHS AND SHEET METAL WORKERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for the tinsmithing and sheet metal industry in a zone including the city of Wetaskiwin and the surrounding district which is defined in the schedule.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

This schedule is similar to the electrical workers of Wetaskiwin schedule summarized above with this exception:

Minimum wage rate for journeymen tinsmiths and sheet metal workers: 90 cents per hour; helpers 40 cents per hour.

**PLUMBERS AND STEAMFITTERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for the plumbing, steamfitting, gasfitting and pipefitting industry in a zone including the city of Wetaskiwin and the surrounding district which is defined in the schedule.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

This schedule is similar to the electrical workers of Wetaskiwin schedule summarized above with this exception:

Minimum wage rate for journeymen: 95 cents per hour; helpers 45 cents per hour.

**BRICKLAYERS AND PLASTERERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for

the plastering, bricklaying and cement industry in a zone which includes the city of Wetaskiwin and the surrounding district which is defined in the schedule.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: within a radius of 10 miles of the city of Wetaskiwin, 8 per day, 44 per week. On country work beyond these limits hours per day to be determined by the employer and the employee according to conditions prevailing on the job. Emergency work that can be done only at night to be paid at the rate of 8 hours' pay for 7 hours' work.

Overtime: time and one-half, but no employee to be permitted to work overtime while competent men are available. Work on Sundays and five specified holidays, double time.

Minimum wage rate for journeymen: 80 cents per hour until December 31, 1936, and 90 cents thereafter. Aged or handicapped employees may petition the Board for permission to be employed at a reduced wage rate, such rate to be determined by the Board appointed under the Act.

No employer may employ any employee not resident in the zone when capable resident employees are available.

Transportation to be furnished to all points outside the city limits, travelling time to be paid at regular rates.

No employer may employ more than one junior apprentice, that is, one serving the first two years of apprenticeship, and one senior apprentice, that is, one serving his third or fourth year in apprenticeship, the wages of apprentices to be 30 per cent of journeymen's rate during first year, 40 per cent during second year, 50 per cent during third year and 70 per cent during fourth year.

All work contracted for and accepted prior to this schedule coming into force to be completed at a rate set by the Board.

**BUILDING LABOURERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for labourers in the general contracting and building industry in a zone which includes the city of Wetaskiwin and surrounding district.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: 44 per week from Monday to Saturday noon. Emergency work which can be done only at night to be paid at 8 hours' pay for 7 hours' work.

Overtime: No employee to be permitted to work overtime when there are competent men available and there is room on the job for such men. Overtime to be paid at time and one-half. Work on Sundays and five specified holidays, double time.

Minimum rate of wages for labourers: 40 cents per hour.

No employer may employ any employee not resident in the zone when capable resident employees are available.

All work contracted for and accepted prior to this schedule coming into effect to be completed at a wage rate set by the Board.

**PAINTERS, DECORATORS, PAPERHANGERS AND GLAZIERS, WETASKIWIN.**—An Order in Council dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms

of a schedule for the painting, decorating, glazing and paperhanging industry in a zone which includes the city of Westaskiwin and surrounding district.

The Order in Council is to be in effect August 10, 1936, to August 9, 1937.

Hours: 8 per day from Monday to Friday, a 40 hour week. Emergency work only to be permitted on Saturday morning at straight time when job already started can be completed in four hours or less. When weather conditions do not permit continuous operations from Monday to Friday, work may be continued on Saturday at straight time if not more than 24 hours' work has been obtained by the employee during the week. When work cannot be done in the day, it may be done as a night shift of not more than 8 hours at straight time, but if such work continues for more than three nights, the rate of pay to be 8 hours' pay for 7 hours' work.

Overtime: not more than four hours' overtime in any one working day. Overtime to be paid at time and one half. Work on Sundays and statutory holidays, double time.

Wages: 65 cents per hour until January 1, 1937 and 70 cents thereafter. Aged or handicapped workers may petition the Board for permission to work at reduced wage rates, said rate to be determined by the Board appointed under the Act.

No piece work to be permitted.

No employer may employ any employee not resident in the zone when capable employees are available.

Every contractor is allowed one apprentice to every four journeymen in the shop, apprentices to serve at least three years' apprenticeship and an additional year if considered necessary by the employer. The employment of improvers is not permitted.

All work contracted for and accepted prior to this schedule coming into force is to be completed at the rate prevailing at the time tenders were submitted.

**CARPENTERS, WETASKIWIN.**—An Order in Council, dated July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for the carpentry industry in a zone which includes the city of Wetaskiwin and surrounding district.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: in the city of Wetaskiwin, 44 hours per week from Monday to Saturday noon; outside the city limits, 48 hours per week.

Overtime: time and one half; all work on Sundays, four specified holidays, double time. No work on Labour Day.

Minimum wage rate: journeymen carpenters 60 cents per hour; carpenters' labourers 40 cents. Aged or handicapped employees may petition the Board for permission to work at a reduced wage rate, said rate to be determined by the Board appointed under the Act.

For work outside the city of Westaskiwin, transportation to be paid both ways when the employee makes definite arrangements with the employer before leaving for the job.

No employer to employ any employee not resident in the zone when capable resident employees are available.

No employer to employ more than one junior apprentice, that is, one serving the first two years of apprenticeship and one

senior apprentice, that is, one serving his third or fourth year of apprenticeship. Wage rates for apprentices to be 30 per cent of journeymen's rate during first year, 40 per cent during second year, 50 per cent during third year and 70 per cent during fourth year.

Carpenters' labourers not to be allowed to use a hammer or a saw on any construction work, but may use tools on destruction or pulling down work.

This schedule applies to all construction, alterations and repairs whether such work is performed for a contractor, owner or any other person, but does not apply to men employed as bench hands in planing mills, sash and door and wood-working factories.

**ELECTRICAL WORKERS, CALGARY.**—An Order in Council, dated July 13 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for the electrical contracting industry in a zone which includes the city of Calgary and surrounding district.

This Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: 8 per day on first five days of the week, a 40-hour week. Work that can be done only at night to be paid at the rate of 8 hours' pay for 7 hours' work. Employees who may be required for emergencies on Saturdays to be permitted to work, being paid straight time for the morning and double time for the afternoon and evening. In finishing up a repair job on regular working days, if to finish will not take more than one hour's time, it will be done at the regular wage rate.

No employee to be permitted to work on more than one shift in 24 hours, unless overtime rates are paid. Work on Saturdays, Sundays and holidays, double time.

Wages for journeymen electricians: 90 cents per hour.

On out-of-town work, travelling time to be paid at straight time.

One apprentice allowed to each employer for their first journeyman employed and an additional apprentice for every three added journeymen.

All work contracted for and accepted prior to this schedule coming into force may be completed at a rate approved by the Board.

This schedule does not include those working on the assembling, testing, inspecting, rebuilding and repairing of any electrical motors or household appliances done under the supervision of licensed electrical repair shops.

**TILE, MARBLE AND TERRAZZO LAYERS, EDMONTON.**—An Order in Council, approved July 23 and published in *The Alberta Gazette*, July 31, makes obligatory the terms of a schedule for all employees in the tile, marble and terrazzo contracting industry in a zone which includes the city of Edmonton and the northern part of the Province of Alberta.

The Order in Council is in effect from August 10, 1936, to August 9, 1937.

Hours: 8 hours per day, 4 on Saturdays, a 44-hour week. Where more than one shift is worked in the 24 hours, straight time to be paid for 8 hours. On work outside a fifteen-mile radius of Edmonton post office, employees may work up to 10 hours per day and on Saturday afternoon at regular out-of-town rates, at the option of the employee.

Overtime: time and one-half for first four hours, thereafter double time. Only emergency work may be done on Sundays and five specified holidays, such work to be paid at time and one-half.

Wages per hour: marble masons, tile layers, terrazzo and mosaic workers \$1 per hour; helpers and floor machine workers 60 cents; wall machine workers 70 cents, labourers 50 cents.

On work outside a fifteen-mile radius of Edmonton post office, employees hired in Edmonton and sent from Edmonton to out-of-town jobs shall have their transportation paid and be paid 10 cents per hour additional to the regular rates.

Any recognized tile and marble contractor having at least two mechanics in his employ, may employ one apprentice.

Wages for apprentices to be 25 per cent of journeymen's rate during first year, 35 per cent during second year, 50 per cent during third year and 75 per cent during fourth year.

By an Order in Council appearing in the July 31 issue of *The Alberta Gazette*, it is announced that the Minister of Trade and Industry is now charged with the administration of the Industrial Standards Act (LABOUR GAZETTE, June 1935, page 534). This Act was formerly administered by the Provincial Secretary (LABOUR GAZETTE, September 1935, page 866).

### Farmers' Co-operatives in Canada

The Department of Agriculture (Agricultural Economics Branch, Division of Marketing) has recently issued a Directory of Co-operative Associations in Canada. As explained in the foreword, this Directory is the first listing of co-operative associations since 1932 when the Fifth Annual Report of Co-operative Associations in Canada was prepared by joint arrangement with the Department of Labour and published by that Department. The Associations listed are mainly farmers' business associations engaged in the marketing of agricultural products. They vary in size from the large grain marketing organizations of the West with many branches to local unincorporated farmers' clubs formed for the purpose of marketing live stock or purchasing supplies. It was explained that Peoples Banks and credit unions are not included in this Directory because they are incorporated under separate Acts and are the subject of special government reports.

There were 5,515 accidents reported to the Workmen's Compensation Board of Ontario during the month of August, as compared with 5,772 during July, and 4,955 during August of last year. The fatal cases numbered 38, as against 32 reported in July. The benefits awarded amounted to \$338,807.61, of which \$266,559.68 was for compensation and \$72,247.93 for medical aid.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE cost of a weekly family budget in terms of retail prices continued upward during the month, due to an advance in the cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices declined during the last three weeks of August but was still higher at the end of the month than for any time in July.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was \$8.17 at the beginning of August as compared with \$7.97 for July; \$7.73 for August, 1935; \$6.67 for March, 1933 (the low point in recent years); \$11.63 for August, 1929; \$11.44 for August, 1921; \$16.92 for June, 1920 (the post-war peak); and \$7.68 for August, 1914. Fifteen items in this list of foods cost higher in August, 1936, than in the previous month, five were lower and nine were unchanged. The most important changes were advances in the cost of potatoes, eggs, butter and flour. There were fractional decreases in the cost of beef, mutton and veal. Including the cost of fuel and rent with that of foods the total budget cost \$16.72 at the beginning of August as compared with \$16.51 for July; \$16.15 for August, 1935; \$15.92 for August, 1934; \$15.41 for June, 1933 (the low point in recent years); \$21.90 for August, 1929; \$21.98 for August, 1921; \$26.92 for July, 1920 (the post-war peak); and \$14.41 for August, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was higher at the end of August than for any week during July. There was, however, some recession during the last three weeks of the month from the figure reached in the week ended August 7. Comparative figures are: 75.6 for the week ended August 28; 76.2 for the week ended August 21; 76.1 for that of August 14; 76.3 for that of August 7 and 75.4 for that of July 31. The latest figures available on a monthly basis are for July, when the index was 74.4 as compared with 71.6 for August, 1935; 72.2 for August, 1934; 63.5 for February, 1933 (the low point in recent years); 98.4 for August, 1929; 106.0 for August, 1921; 164.3 for May, 1920 (the post-war peak); and 66.1 for August, 1914. Grain prices were an important factor in the decline of the index number during the last three weeks in August just as they had contributed substantially to the advance in the preceding two months. Raw cotton and raw silk also declined, influenced by prospects of larger supplies for the coming year.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of August of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the

minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Meat prices continued to show little change, fresh pork and bacon being higher and beef, veal and mutton slightly lower. Fresh leg roast of pork advanced from 21.9 cents per pound in July to 22.4 cents in August and bacon from 29.5 cents per pound to 30.1 cents. In beef, round steak was down from an average price of 19.3 cents per pound in July to 19.1 cents in August and rib roast from 17.7 cents per pound to 17.5 cents. Leg roast of mutton declined from 22.5 cents per pound to 22.3 cents. Egg prices were generally higher, the Dominion average for fresh grades being up from 27.2 cents per dozen in July to 30.1 cents in August and cooking grades from 23.4 cents per dozen to 25.6 cents. Prices were lower in Alberta and Saskatchewan than in other provinces. Milk was unchanged in the average. The price of butter was seasonally higher, dairy being up from an average of 22.3 cents per pound to 24 cents and creamery from 26.2 cents per pound to 28 cents. Advance was shown in nearly all cities. The Dominion average price of bread has been unchanged since the beginning of the year, while the price of flour was fractionally higher in August at 3.5 cents per pound. Canned tomatoes have moved upward in price during the last three months, averaging 11.9 cents per can in August as compared with 11.1 cents in May. Onions were lower in most cities, the Dominion average price being down from 6 cents per pound in July to 5.2 cents in August. Potatoes averaged substantially higher in price in Ontario and the prairie provinces but were lower in other provinces. The Dominion average price was up from \$1.95 per ninety pounds to \$2.17, as compared with \$1.24 in January. Coal and wood prices were practically unchanged in the average. A slight increase in rent was reported from Port Arthur and Fort William.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$15; Charlottetown, \$12.40; Saint John, \$14.50; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$13; Montreal, \$14.25; Ottawa,

(Concluded on page 850)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended August 28, 1936; monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Concluded from page 842)

\$15.25; Kingston, \$14.50; Belleville, \$15; Peterborough, \$16; Oshawa, \$14.25; Toronto, \$14.50; St. Catharines, \$15; Hamilton, \$14.50; Brantford, \$16; Galt, \$16; Sudbury, \$17.50; Cobalt, \$18; Timmins, \$17.50; Sault Ste. Marie, \$14.50; Port Arthur, \$17; Fort William, \$17; Winnipeg, \$19.50.

### Distribution of Income in United States

The average income of a full-time employee in the United States in 1935 amounted to \$1,201 according to an analysis made by the United States Department of Commerce (Division of Economic Research) in its annual estimate of national income produced and national income paid out. National income produced is defined as the net value of goods and services produced. National income paid out is defined as payments to or receipts by individuals in the form of wages, salaries, interest, dividends, interpreneurial withdrawals (profits) and net rents and royalties.

This sum (\$1,201) was 9 per cent higher than the average employee's income in 1933, but only 80 per cent as much as the average employee's income in 1929. The number of employees who shared in the labour's income in 1935 was 28.1 million, as compared with the peak total of 34.5 millions in 1929 and the low total of 25.2 million in 1932.

Of the total income paid out in 1935, 67 per cent was applied to the remuneration of employees in the form of wages and salaries. (In 1929, the labour share of income paid out was 65.5 per cent; in 1932, 64 per cent.) An additional 16 per cent was withdrawn by individual entrepreneurs as profit (substantially similar percentages were withdrawn by entrepreneurs in 1929 and 1932). The remaining 17 per cent went to owners of property, of which 14 per cent to persons receiving dividends or interest and 3 per cent to receivers of net rents and royalties (the property share of income paid out has not altered substantially during the last five years, although the total of interest payments separately has continued to decline throughout the period).

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the July issue of the LABOUR GAZETTE.

### Great Britain

**WHOLESALE PRICES.**—The *Statist* index number, on the base 1867-1877=100, was 86·8 at the end of July, an advance of 2·8 per cent for the month. Each one of the six component groups contributed to this advance, which brings the index number to the highest point reached since December, 1930. The groups showing the greatest increases for the month were sundries, textiles and animal food.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 146 at the beginning of August, showing no change from the previous month's level, either in the total index number or in any of the groups.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 104·2 for July, an increase of 0·2 per cent for the month. There were no marked changes in any of the main groups.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 125·3 for July, an advance of 0·6 per cent for the month. All groups showed slight increases except the rent group, which was unchanged.

### New Zealand

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office on the base 1909-1913=1000, was 1399 for June, an advance of 0·6 per cent for the month. Of the seven main groups, five showed small increases and the other two were unchanged.

**COST OF LIVING.**—The official index number, on the base 1926-1930=1000, was 852 for May, an advance of 1·5 per cent from the February level. In this period, food, fuel and light, clothing and miscellaneous commodities all advanced.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number, which is based on the sum total of the prices per pound of 96 commodities of common consumption, was \$10·1445 at August 1, a

gain of 3 per cent for the month. Of the 13 groups, advances were recorded in eight, declines in three, while two remained unchanged.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated), which is based on the cost *per capita* of a year's supply of commodities, was \$181·878 at August 1, an increase of 2 per cent for the month, and is now at the highest point recorded since February, 1930.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 85·2 for July, an advance of 0·1 per cent for the month. Except for a slight decrease in the clothing group, all groups recorded a small increase for the month.

The *Alberta Gazette* of August 31, 1936, contains the announcement of the appointment of Mr. William Davis King as Deputy Minister of Trade and Industry, the appointment being dated as from the first day of August, 1936.

Since the first of October, 1935, up to last month, 3,688 employees of industries in Ontario have successfully completed First Aid courses under the Ontario Branch of the St. John Ambulance Association. This represents the results of the training in 39 different centres in the province. More and more employers are finding the courses valuable, not only in providing an efficient First Aid service but in assisting in developing safe habits and safe thinking among workers.

According to a news despatch the Health Insurance Act in British Columbia is not likely to go into effect until the first part of 1937. Originally, it had been hoped to start collecting insurance funds from employers and employees in November or December. A complete census of wage earners and small-salary groups is to be undertaken by the health insurance commission, with the intention of registering all working people who are entitled to enter the insurance scheme.

Before a meeting of the Board of Directors of the Quebec Association for the Prevention of Industrial Accidents, Mr. Arthur Gaboury, general manager of that Association, reported an increase of 449 lost-time accidents and 10 fatalities for the first six months of 1936 over a similar period last year. Mr. Gaboury maintained that human failures were responsible for this large increase. Eye injuries, Mr. Gaboury reported, were the cause of 27 per cent of all medical claims.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Member may be Expelled from Union only after Proper Inquiry and for Cause

A trade union may not expel one of its members and so deprive him of employment without proper inquiry as to the alleged violation of its rules. Such was the decision given by Mr. Justice Langlais in the Superior Court of Quebec on September 5, 1935, in an action brought by a member of the *Fraternité des Plombiers Electriciens de Québec* for damages for wrongful expulsion and for reinstatement in the union.

The plaintiff claimed that he had been wrongfully expelled from the union and, as a consequence, had been dismissed by his employer who had a closed shop agreement with the union. Moreover, he was unable to obtain employment from any employer who had signed the agreement, that is, with the great majority of master plumbers in Quebec City. The plaintiff had been hired at a rate of wages lower than that fixed in the collective agreement which had been made legally binding on the industry. A complaint on this point having been made to the union, a resolution was adopted that the business agent of the union should interview the employer. The evidence presented to the Court showed that the person making the complaint charged the plaintiff with divulging the proceedings at the union meeting to his employer, that this charge was based only on hearsay and was denied by the plaintiff and the employer as well as another witness. Nevertheless, the union imposed a fine of \$10 on the plaintiff. On his refusal to pay it, he was expelled.

The Court pointed out that union members, especially since the new law on collective agreements protecting the members, have a real interest in retaining their membership and loss of it causes considerable hardship. The officers of the union had made only a

summary inquiry and had taken no precautions to ensure justice. There was no proof that the plaintiff had divulged any secret and therefore the defendant had no right to expel him.

Damages of \$40 based on the estimated loss of earnings were awarded to the plaintiff, together with the costs of the action, and the union was ordered to reinstate him.

*Barbeau v. Fraternité des plombiers électriciens de Québec*, (1936) 74 *Rapports Judiciaires de Québec*, Cour Supérieure 286.

### Building Trades Agreement Does Not Apply to Contract for Building Between Owner and Workers

The Collective Labour Agreements Extension Act of Quebec provides that the Lieutenant-Governor in Council may make a collective agreement entered into by one or more employers or associations of employers and one or more trade unions legally binding on "all the employees and employers in the same trade, industry or business" in the district covered by the agreement. Under this section as interpreted by Mr. Justice Guibault of the Superior Court of the District of Montreal on June 15, 1936, the collective agreement between the building trades councils of Montreal and the Montreal Builders' Exchange, etc., does not bind an employer who is not a builder but merely employs a carpenter at a weekly rate to construct a garage and make repairs to his property.

The plaintiff claimed \$105.30 for wages, being the difference between the wages he received and the amount calculated at the rate fixed in the building trades agreement. The action was dismissed with costs to the plaintiff.

*Lessard v. Gariépy*, (1936) 74 *Rapports Judiciaires de Québec*, Cour Supérieure 339.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

THERE was an increase in employment at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 9,967 firms, each with a minimum of 15 employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. These firms employed 1,014,532 persons, or 14,562 more than in the preceding month. The experience of the last fifteen years shows that the average change between August 1 and September 1 has been very slight, increases in a number of these years just about balancing declines in the remainder. The employment index number (with the average for the calendar year 1926 as the base equal to 100) stood at 107.1 at September 1, 1936, as compared with 105.6 at August 1, 1936, and with 102.7 at the same date in 1935. At September 1 in the fourteen preceding years of the record the index was as follows: 1934, 98.8; 1933, 88.5; 1932, 86.0; 1931, 107.1; 1930, 116.6; 1929, 126.8; 1928, 119.1; 1927, 111.0; 1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8 and 1921, 89.8.

At the beginning of September, 1936, reports were furnished to the Department of Labour by 1,800 local trade unions, with an aggregate of 181,861 members. Of these, 19,591, or a percentage of 10.8, were without work, contrasted with percentages of 12.5 at the beginning of August, 1936, and 14.2 at the beginning of September, 1935.

Reports received by the Department of Labour from the offices of the Employment Service of Canada during the month of August, 1936, indicated a gain over July in the volume of business transacted, as shown by the average daily placements effected, but a decrease from the placements recorded daily during the corresponding month a year ago. The highest gain under the first comparison being in farming and the greatest losses under the second in construction and maintenance and farming. Vacancies during August this year numbered 32,721, applications for work

52,475, and placements in regular and casual employment, 30,651.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$16.84 at the beginning of September as compared with \$16.72 for August; \$16.16 for September, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.90 for September, 1929; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. The increase in September, 1936, as compared with the previous month was due to an advance in the cost of foods, chiefly eggs, butter, bread and flour. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 76.6 for the week ended September 25 as compared with 76.2 the previous week and 75.6 for the week ended August 28. On a monthly basis the index number was 76.2 for August; 72.3 for September, 1935; 71.9 for September, 1934; 63.5 for February, 1933 (the low point in recent years); 97.8 for September, 1929; 94.4 for September, 1922; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in a table on page 854. The index number of the physical volume of business in August was at the highest point reached since May, 1930, and was three per cent higher than in the previous month and five per cent higher than in August, 1935. Of the principal factors included in the construction of the index, mineral production, manufacturing and exports were substantially higher than in the previous month, the former because of increase in exports of copper and zinc and in shipments of gold and silver, as well as in imports of bauxite, while exports of nickel and production of coal were lower. In manufacturing, the production of foodstuffs and imports of raw rubber and of crude petroleum were the chief factors contributing to the advance in the group. Construction and electric power output were considerably lower

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended October 2, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending September 26, 1936, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending September 5, August 8, and July 11, 1936; September 7, August 10, and July 13, 1935.

(7) MacLean's Building Review.

than in July. All of the principal groups were higher in August, 1936, than in August, 1935. Information available for September shows advance in wholesale prices, employment, carloadings, the value of contracts awarded and in gross earnings of the Canadian National Railway, both as compared with August, 1936, and with September, 1935, while the production of sugar was lower than in August but higher than in September, 1935.

The number of strikes and lockouts recorded for September was 27, involving 6,513 workers and causing time loss of 33,292 man working days. Strikes of coal miners in Nova Scotia and in Alberta and a strike of textile factory workers at Cornwall, Ont., accounted for over two-thirds of the workers involved and time loss. In August there were 23 disputes, involving 9,681 workers with time loss of 65,658 days, due chiefly to the textile factory strike at Cornwall and a strike of coal miners in Nova Scotia. In September, 1935, there were 18 disputes, involving 4,303 workers with time loss of 26,506 days, the important disputes being strikes of water transport workers at Vancouver and other ports in British Columbia and of men's clothing factory workers at Montreal. Of the twenty-seven disputes recorded for September, twenty-three were recorded as terminated, thirteen resulting in favour of the workers involved, three in favour of the employers concerned, compromise settlements being reached in four cases, while the results of three were recorded as indefinite. Four disputes, involving approximately 380 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### **Industrial Disputes Investigation Act**

During the past month the Department has received reports from three Boards of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act. Two applications for the establishment of Boards were also received. The text of the Board reports and other information pertaining to proceedings under the Act are given in the section commencing on page 860.

#### **Classification of Relief Recipients.**

Tabular statistics presenting an analysis of relief recipients under various classifications—employables and unemployables, farmers, heads of families, dependents etc.—are presented in this issue on pages 886-890.

The statistics cover the period from December, 1935, to July, 1936.

#### **Dominion-Provincial farm placement plan.**

Arrangements have recently been made between the Dominion Government and the Provincial governments of Manitoba, Saskatchewan, Alberta and British Columbia for the placement of men on farms. Each man placed under this scheme will receive \$5 a month and \$2.50 a month bonus if he remains on the farm until March 31, 1937. The farmer taking a man under the plan will also receive \$5 a month. Nominal clothing expenses and free transportation will also be supplied to men proceeding to farms under this arrangement.

#### **Federal Relief grants-in-aid unchanged**

Federal relief grants-in-aid to the provinces for the third quarter of the current fiscal year will continue unchanged Acting Prime Minister, Hon. Ernest Lapointe, announced on October 6.

Relief grants-in-aid were initiated in August, 1934, and involved the outright payment of fixed monthly sums to assist the Provinces (and through the Provinces, the municipalities) with their relief expenditures. At the last session of Parliament an appropriation of \$26,000,000 was passed for this purpose to cover this disbursement during the fiscal year ending March 31, 1937.

By agreement, these payments are subject to revision every three months. Commencing the fiscal year, 1936, there was a reduction (effective April 1) of 15 per cent in the grants-in-aid (LABOUR GAZETTE, May, page 392). For the second quarter of the fiscal year (July, August and September) a further reduction of 10 per cent was put into effect.

During the first quarter (April, May and June) payments of the grants were at the rate of \$2,606,285.94 per month. The reduction of 10 per cent in the grant for the second quarter reduced these payments for July, August and September to a monthly rate of \$2,345,657.35.

Referring back to the 4-month period of the previous fiscal year (December, 1935, to March, 1936) the grants were \$3,066,218.75 per month, and prior to that period the amount of the monthly grant was \$1,751,250.

The announcement that the grants-in-aid would be continued without change throughout the third quarter of the present fiscal year means that the monthly payment to the provinces for October, November and December would be the same as in July, August and September, viz., \$2,345,657.35.

**Canadian  
Representative  
elected vice-  
president of  
Maritime  
Conference**

Hon. Norman McL. Rogers, Minister of Labour, and presently a member of the Canadian delegation to the League of Nations Assembly at Geneva, was elected vice-president of the Maritime Session of the In-

ternational Labour Conference which convened at Geneva on October 6. This special session of the Conference was called to deal exclusively with maritime matters including: regulation of hours of work on board ship; protection of seamen; promotion of seamen's welfare in ports; holidays with pay, etc. (LABOUR GAZETTE, January, 1936, page 41 and August, page 681).

The complete delegation was: The Hon. Norman McL. Rogers, Minister of Labour, and Dr. W. A. Riddell, Canadian Advisory Officer, League of Nations, representing the Government of Canada; Mr. A. L. W. MacCallum, Secretary of the Shipping Federation of Canada, representing the Employers of Canada; and Mr. W. A. MacDonald, General Secretary, National Association of Marine Engineers of Canada, representing the Workpeople of Canada.

**Conference  
on Industrial  
Relations**

A conference on Industrial Relations, sponsored by Queen's University, the Montreal Personnel Association and the Personnel

Association of Toronto, was held at Queen's University, Kingston, on September 18-19. Prof. W. A. Mackintosh, of Queen's University, acted as the conference chairman. There were 100 persons in attendance from leading industrial and commercial companies and from the staffs of Queen's, McGill, Dalhousie, the University of Toronto and the University of Western Ontario.

Four main topics were under consideration, namely: the Individual Worker and His Work, the Field of Industrial Relations, Security for the Worker, and Relations among Workers. Hon. C. D. Howe, Minister of Transport, delivered an address at the concluding luncheon on the Relations of Business and Government in Canada.

An official welcome was extended to those in attendance by Principal R. C. Wallace, of Queen's University. The following acted as chairmen at successive sessions of the Conference: Mr. Gray Miller, President of the Imperial Tobacco Company; Dr. W. C. Clark, Deputy Minister of Finance; Principal R. C. Wallace, Colonel Frank Chappell, of the General Motors of Canada Limited, Oshawa, and Mr. J. E. Macpherson, Vice-President of the Bell Telephone Company of Canada.

The program comprised papers and addresses as follows: Planning a Personnel Program, by A. J. Hills, Canadian National Railways; Interviewing the Worker, by L. L. H. Miles, Canadian Industries, Ltd.; Training the Worker, by G. P. Cosgrave, Department of Psychology, University of Toronto; Paying the Worker, by R. Presgrave of J. D. Woods Company, Industrial Engineers, Toronto; the Task of the National Employment Commission, by Prof. W. A. Mackintosh; Industrial Relations and the University, by Prof. J. Douglas Brown, Princeton University; Industrial Relations in Practice, by F. H. Horton, Dominion Rubber Company, and by W. H. C. Seeley, of the Toronto Transportation Commission; the Position of the Industrial Relations Man To-day, by Clarence J. Hicks of the Industrial Relations Counselors, Inc., New York; the Search for Security, by Dr. Bryce M. Stewart of the Industrial Relations Counselors, Inc., New York; Responsibility for Security, by Prof. A. E. Grauer, of the University of Toronto; Business and Governmental Responsibility for Unemployment Compensation, by Prof. L. C. Marsh, of McGill University; Relations Built up through Collective Negotiation, by R. J. Tallon, Railway Employees Division, American Federation of Labor, Montreal; Relations Built up Through Common Interest in the Enterprise, by C. S. Ching, Director of Industrial and Public Relations of the U.S. Rubber Products Company; Bringing to the Surface Underlying Factors in Relations Among Workers, by Dr. Chas. S. Slocombe, Director, Personnel Research Federation, New York. The Dominion Department of Labour was represented at the conference by Mr. Gerald H. Brown, assistant deputy minister.

**Ontario relief  
recipients to  
register with  
Employment  
Service**

Registration of all urban relief recipients in Ontario with the government employment service as a qualification for relief assistance was announced by Hon.

David Croll, Minister of Welfare and Municipal Affairs, on September 15.

This new regulation extends to all urban municipalities but does not affect smaller centres and rural points where there is no office of the Employment Service. Concerning this step, Hon. Mr. Croll, was reported to have declared, in part, as follows:

"This is a step in Ontario in the adoption of the English system of a close tie-up between relief agencies and employment bureaux. I think it is recognized by all those who are connected with the administration of relief

that our real task to-day is not to hand out a dole to the unemployed but to do everything in our power to find work for them.

"Most relief recipients are eager to return to a job. We cannot overlook the fact, however, that in the last six years, some of the unemployed have ethically deteriorated to the point where they prefer relief and idleness to work and wages.

"To establish that every employable man and woman in receipt of relief is making a definite effort to get work and remove himself or herself from dependence on public funds we are passing this regulation whereby municipalities must institute the system of weekly registration."

The announcement added that recipients would not be penalized unless the job offered paid prevailing fair wages in the area.

#### **Quebec social legislation indicated in Throne Speech**

Agrarian reforms and colonization are to constitute the "basis of the plan of restoration" in the province of Quebec according to an announcement contained in the Speech from the Throne opening an "emergency session" of the Quebec Legislature on October 8. It was also stated that the "government is striving to solve as soon as possible the distressing problem of the permanent settling of young people and will apply itself to make the place for our young people to which they are entitled in the development of our Province, especially in the new careers which the working of our mines will necessarily open."

Other features of the program of proposed legislation included: A Bill to authorize the establishing of a provincial farm loan; revision of the Election Act "in order to better secure the free and conscientious expression of the popular will"; a Bill "to improve the Old Age Pensions Act"; and a Bill "to make the Workmen's Compensation Act more humane"; a Bill to prohibit Ministers from being members of the board of management of any commercial or industrial association; a Bill "to check abuses from over-capitalization"; a Bill to repeal the act ordering the compulsory sale of immovables for municipal and school taxes.

#### **Amendment Sought to Collective Labour Agreements Act**

Amendment of Clause 6 of the Collective Labour Agreements Extension Act was sought by a delegation of the Confederation of Catholic Workers of Canada at a recent interview with the provincial cabinet. The amendment is of particular interest to the building and con-

struction industry, and its effect would be to make agreements binding upon all persons employing building workers and not only upon building contractors.

This amendment was urged in a resolution adopted at the recent convention of the Confederation, and was also embodied in Bill 13 which was not acted upon before the Legislature dissolved.

#### **Debt Revision to benefit Saskatchewan drought areas**

Cancellation of \$75,000,000 in taxes, relief and interest debts of 158 municipalities in the drought areas was announced by the Hon. W. J. Patterson premier of Saskatchewan on September 28. Marginal districts of 18 other rural municipalities also will benefit by this action.

Details of the new financial arrangements are contained in a press report as follows:—

Farmers generally throughout Saskatchewan will benefit by a reduction in interest on all farm mortgages to six per cent from January, 1937. This will mean an annual saving to farmers of approximately \$4,000,000.

All unpaid interest accumulated in the drought area on mortgages up to January, 1935, is cancelled. The amount owing on mortgages on January 1, 1937, will be the principal of the mortgage, together with only interest owing for the years 1935 and 1936. This interest will be consolidated with the principal and the consolidated amount is to be paid over a period of 10 years.

Under the new agreement the principal will be paid annually with the balance due in the 10th year. During the first three years the payment of principal and interest will be secured by one-third of the crop.

#### **Social Security in Canada**

Mr. Gerald H. Brown, the Assistant Deputy Minister of the Department of Labour of Canada, on invitation of the Municipal Finance Officers' Association of the United States and Canada, delivered an address to this organization at its annual meeting in Toronto on September 10, on the subject of Social Security in Canada.

In the course of his remarks, he presented a summary of the laws in Canada concerning Workmen's Compensation, Health Insurance, Old Age Pensions, Mothers' Allowances and Unemployment Insurance and Relief, and dealt briefly with legislation relative to Minimum Wages, Collective Agreements, Hours of Labour, Factories, Mines and Industrial Disputes.

### Safety Records of Ontario firms

Information has been received in the Department from the Industrial Accident Prevention Associations of Ontario giving statistics of firms that have operated one million or more hours without a lost-time accident in Ontario. These firms, together with the number of hours worked, follow: The Woodstock Rubber Company, Limited, Woodstock, 1,223,114; The Goodyear Tire & Rubber Co. of Canada, Ltd., New Toronto, 2,891,062; International Harvester Company of Canada, Limited, Hamilton, (Farm Implements), 1,209,179; International Harvester Company of Canada Limited, Hamilton, (Hamilton Twine Mills), 1,307,771; Davis Leather Company Limited, Newmarket, 1,069,200; Canadian National Carbon Co. Ltd., Toronto, 1,324,395 and 2,149,060; Western Clock Company Limited, Peterborough, 1,387,343; Colgate-Palmolive-Peet Company, Limited, Toronto, 1,018,969; Canadian Bank Note Company, Limited, Ottawa, 3,082,426 and 1,378,299; The Bell Telephone Company of Canada, Toronto, 2,833,368; Champion Spark Plug Co. of Canada, Ltd., Windsor, 1,303,808; Canada Cement Company, Port Colborne, 2,259,200.

The Association states that some of these are continuing records, and some are past achievements.

### Dispute in All-Canadian Congress of Labour

As a result of a dispute between the executive and the president of the All-Canadian Congress of Labour concerning the executive's annual report to the convention, the former sent out notices cancelling the annual meeting (scheduled for September 28). The president, however, conducted a convention with a reduced number of delegates.

An interim injunction has been granted the president, restraining the former executive from dealing with Congress funds and property, and this matter is now awaiting court decision.

### Railway Employees seek restoration of wage reduction

Seeking restoration of the existing 10 per cent reduction in railway wages, the chief officers of Canadian railway labour organizations held a special conference in Montreal from September 15-18. (Railway wages were reduced 10 per cent, effective from December 1, 1931; and a further reduction of 5 per cent to 15 per cent occurred in 1933. Effective from

January 1, 1935, to May 1, 1935, the reduction was 12 per cent and since May 1, 1935, the wage reduction has been maintained at 10 per cent.)

Approximately 100,000 railway employees comprised in 21 organizations were represented at the meeting by their vice-presidents and general chairmen.

It is understood that representatives of the labour organizations conferred with railways, contending that the reduction of 10 per cent should be eliminated, thus making complete restoration of the basic rates.

Failure of agreement on this point has resulted in the railway employees making application for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act which is dealt with elsewhere in this issue.

### International Association of Governmental Labour Officials

At the annual meeting of the International Association of Governmental Labour Officials—held at Topeka, Kansas, September 24-26—reports were presented on recent trends in the labour-social-economic field. These reports were prepared by representative committees of the Association and the subjects dealt with included: Wage Claim Collections; Minimum Wage Laws; Industrial Home Work; Child Labour; Civil Service; Old Age Pensions; and Women in Industry. Contributing, respectively, to the surveys on Civil Service and Women in Industry were Mr. Gerald H. Brown, Assistant Deputy Minister, Miss Margaret Mackintosh, Librarian, both of the Dominion Department of Labour.

### Normal Attrition among Railroad Employees in United States

A report entitled "Employment Attrition in the Railroad Industry," issued by the Federal Co-ordinator of Transportation, contains the results of a study of employment records of fourteen of the principal railroads in the United States during the period from 1925 to 1935, to ascertain the normal percentage of employees who annually ceased to hold positions, i.e., became separated from railroad service owing to death, disability, retirement, furloughs that became permanent, resignations and dismissals. The study was made for use in connection with the proposals under consideration to make provision for compensation for employees losing their positions as a result of the merger, consolidation and co-ordination of railways or of parts of their services. A bill was introduced into Congress to make provision for such compensation in March, 1936, but was

not proceeded with after May 21 when, as a result of negotiations with the unions, the railway companies signed an agreement providing for the payment of such compensation (LABOUR GAZETTE, June, 1936, page 505).

In making the study, the employment records were analyzed by all causes of separation in order to eliminate or make allowance for, so far as possible, those due to abnormal conditions. The figures were compiled and analyzed separately for the years 1925-1929, 1930-1932 and 1933-1935 (periods of industrial activity, depression and recovery). The railroads whose records were used have approximately 400,000 employees, which is twenty per cent of the total, and operate in the various regions of the United States.

It was found that the normal attrition rate averaged five per cent per annum, varying by occupational groups as follows: train and engine service, two and one-half to three and one-half per cent; maintenance of way employees, six to eleven per cent; shop employees, four and one-half to nine per cent; clerical employees, five to ten per cent. It was therefore stated that the average employee exposed to dismissal by co-ordination would need protection for relatively few years as on the average one-twentieth of all employees whose work might be merged would normally separate permanently from the service each year.

### **Growth of co-operative movement throughout the world.**

For all the countries for which data were available, the International Labour Office has compiled statistics for over 63,000 consumers' co-operative societies with 90 million members, over 62,000 housing co-operative societies with 14 million members, and nearly 488,000 agricultural co-operative societies with 44 million members.

For the financial year 1934 or 1934-1935, the total trade of the consumers' co-operative societies amounted to nearly 63,000 million Swiss francs, that of the agricultural co-operative societies to over 7,000 million, while the amount of capital insured (against fire, stock diseases and other risks) by the Agricultural mutual insurance societies exceeded 6,000 million Swiss francs, and the turnover of rural and urban co-operative credit societies 109,000 million Swiss francs.

These figures appear in the new edition of the International Directory of Co-operative Organizations, which is published by the International Labour Office, and contains interesting statistics of the co-operative movement during the depression. The most recent information available is given for 728 central organizations in 57 countries.

During the quarter ending September 30, 1936, a total of 14,960 accidents were reported to the Workmen's Compensation Board of Ontario, in the industries in Schedule 1 of the Workmen's Compensation Act. Sixty-seven of these accidents were reported as fatal. In Schedule 2 industries, 766 accidents were reported including 18 fatal cases; and 1,074 Crown cases, 15 of which were fatal, making in all 16,800 accidents, of which 100 were fatal.

The eleven establishments listed in the cordage, rope and twine industry in 1935 reported a gross value of production of \$5,127,087 and a capital investment in fixed and current assets of \$10,991,086. The production value in 1934 was \$4,818,586 and the capital invested, \$10,416,346. There were 1,001 employees with payments in salaries and wages of \$1,022,264 as against 952 and \$981,653 in 1934.

From the standpoint of both volume and value, binder twine is the principal product. In 1935 there were 55,169,044 pounds produced, valued at the factory at \$3,329,276. The output of binder twine represented 64.9 per cent of the total value of all products made in 1935. The output of rope totalled 11,026,506 valued at \$1,266,755, twines for sale 3,023,808 pounds at \$372,183.

The production of textiles and textile products amounted in value to \$342,054,536 in 1934. This was the highest reached since 1930 when it was \$361,814,733. In gross value of products the textile group ranked third with 13 per cent of the production for all industries, in number of employees it stood second with 21 per cent, while in capital investment it ranked only fifth with seven per cent. Out of a total of 128,488 female employees engaged in the manufacturing industries of Canada, 61,213 or 48 per cent were found in this group.

Employment was furnished to 115,695 persons who were paid a total of \$90,796,601 in salaries and wages as compared with 106,235 persons with payments of \$80,695,813 in salaries and wages in 1933. Capital investment rose to \$328,362,816 from \$322,312,247 and the cost of materials used from \$144,584,507 to \$174,532,597.

According to a proclamation in the *Saskatchewan Gazette* dated September 15, 1936, premises described as "garages and automobile service stations" were added to the list of establishments described in Schedule A of The Factories Act.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**D**URING the month of September reports were received in the Department of Labour from three Boards of Conciliation and Investigation which had been established to enquire into disputes affecting (1) the Winnipeg Electric Company and its employees in the Gas Production Department being members of the Gas Workers' Unit, One Big Union; (2) the Algoma Steel Corporation, Limited, and certain of its employees being members of the Algoma Steel Workers' Union; (3) the Corporation of the City of Edmonton and certain employees of the Edmonton Street Railway being members of Local Division 569, Amalgamated Association of Street and Electric Railway Employees of America. The reports of these Boards appear in this issue.

### Applications Received

Two applications for boards were received in the Department recently as follows:—

(1) From seventy employees of the Canada Steamships, Limited, at Windsor, Ontario, being freight handlers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The employees' request for an agreement embodying increased wages and improved working conditions is set forth as the cause of the dispute.

(2) From various classes of employees of the Canadian National Railways and the Canadian Pacific Railway Company (subsidiary railways: the Dominion Atlantic Railway, Quebec Central Railway, Northern Alberta Railways, and Esquimalt and Nanaimo Railway). Approximately 100,000 railway men throughout Canada are stated to be directly affected, including: locomotive engineers; locomotive firemen, hostlers and hostler helpers; conductors; trainmen; railway telegraphers; commercial telegraphers; machinists; carmen; boilermakers; blacksmiths; sheet metal workers; electrical workers; stationary firemen and

oilers; maintenance of way employees; pipe fitters; railway and steamship clerks; and signal maintainers. The dispute arose in connection with the employees' request that the agreement of November 3, 1934, which provided for a deduction of 10 per cent from basic rates of pay, should be cancelled, thus restoring the basic rates to full force and effect.

### Dispute Settled

It was reported in the June issue of the *LABOUR GAZETTE* (page 481) that an application for a board had been received from employees of Moore's Taxi, Limited, at Winnipeg, Manitoba, being members of the Taxi Drivers' Unit, One Big Union, in connection with the dismissal of fourteen employees, due, it was alleged, to their affiliation with the union. The company claimed that five of these drivers had been discharged for cause, such as insubordination, infractions of the regulations, etc., while the others had been dismissed by reason of a general lay-off of employees which occurs in the spring of each year. Prior to the submission of the application for a Conciliation Board, the Western Representative of the Department had mediated in this dispute and had obtained the company's consent to take back nine of the drivers. This offer, however, had been rejected by the applicants, who insisted upon all fourteen men being reinstated. Following receipt of the application for a board, considerable correspondence took place between the Department and the interested parties, and the men's representatives finally agreed to accept the offer of the company to re-employ the nine men in question, on the understanding that they would be taken back immediately and permitted to retain their union membership if desired. Five of these men have been re-employed. The other four, however, were engaged in other employment and did not avail themselves of the opportunity of being reinstated.

### Report of Board in Dispute Between the Winnipeg Electric Company and Employees in Its Gas Production Department

A unanimous report was presented to the Minister of Labour early in September by the Board of Conciliation and Investigation established to deal with a dispute between the Winnipeg Electric Company and its employees being members of the Gas Workers' Unit, One Big Union. The dispute related to the employees' request for increased wages, about forty-five men in the Gas Production Department being involved.

The personnel of the Board which enquired into this dispute was as follows: The Honourable Mr. Justice A. K. Dysart of Winnipeg, Chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Mr. Hugh B. Lyall of Winnipeg, nominated by the employer, and Mr. Allan Meikle also of Winnipeg, nominated by the men.

Following is the text of the report.

### Report of Board

Winnipeg, Manitoba,

September 9, 1936.

The Honourable the Minister of Labour,  
Ottawa.

SIR,—The Board of Conciliation and Investigation established by you on the 15th day of July, 1936, to deal with disputes between the Winnipeg Electric Company and its employees in the gas production department, being members of Gas Workers' Unit, One Big Union, having now completed their work, beg to submit herewith their report.

The Board consisted of Mr. Hugh B. Lyall, of Winnipeg, appointed on the recommendation of the employer; Mr. Allan Meikle, of Winnipeg, appointed on the recommendation of the employees; and the Honourable, Mr. Justice Dysart, of Winnipeg, appointed third member and Chairman of the Board by the Honourable the Minister of Labour.

The three members of the Board met for their first meeting on August 11, 1936, and, after a preliminary discussion, concluded that attempts to effect conciliation would be fruitless, and decided to cail upon the parties to present their respective cases.

The first public meeting was held on August 13, at which were present:—

The three members of the Board.

For the employer C. H. Dahl, Vice-President in charge of Operation, of Winnipeg Electric Company; L. Palk, Vice-President in Charge of Executive Matters, Winnipeg Electric Company, and R. R. Knox, Assistant to the General Manager, Winnipeg Electric Company. These representatives had the assistance of Mr. Hugh McNair, Manager of the Gas Utility, and George D. McIntosh, Assistant Secretary.

For the employees—R. W. Armstrong, President of the Gas Workers' Unit, O.B.U.; W. Bradley, Secretary of the Gas Workers Unit, O.B.U.; and R. B. Russell, Secretary of the One Big Union.

The dispute concerns only about forty-five or fifty men, being those directly engaged in the production of gas. The other employees of the company engaged indirectly in the Gas department in superintendence and general office management, and selling the products, are not involved.

The meetings of the parties, at which were presented fact, material, and argument, were held at frequent intervals up to and including the 28th of August, 1936. Thereafter the members of the Board met to consider and discuss the material, in an endeavour to reach a decision. During the course of these deliberations some additional explanatory material was called for and supplied by the parties involved.

The material filed was not voluminous, consisting of 38 exhibits, some of which are comments and criticism of other exhibits.

The main contention of the men was that the rate of their wages should be restored to the 1931 level. That was their primary or main case. Secondly and alternatively they argued that they should be given an increase over the present level of rates corresponding to that accorded by the Company to its employees in the Traffic, Mechanical and Track departments. The Company resisted any increase over present rate levels.

Before considering the merits of the opposing contentions it will be convenient to state that the 1931 scale of wages was one which had been arrived at by negotiation between the Company and all its employees, and continued until February 1, 1932, when sharp reductions were made by the Company. Those reductions led to disputes, and finally to a Board of Arbitration and Conciliation, established on May 17, 1933, consisting of Ernest T. Leech, K.C., Mr. Allan Meikle, and the Chairman of the present Board, as members. That Board reported on August 12, 1933, dealing fully with the problems brought before it. It is there stated in the Report, as published in the LABOUR GAZETTE for September, 1933, Vol. XXXIII, No. 9, at page 879:—

"The nature of the investigation was such that it called for an examination of the whole financial structure and operations of the Company in both the Railway utility and the Gas Producing departments. This breadth of scope was necessitated by the Company's demand for a reduction of wage rates based on its financial inability to continue paying present rates—a demand that was vigorously resisted by the employees whose demand for increased rates was predicated upon the Company's ability to pay same."

and at page 888:—

"The Company frankly admitted at the opening of the session that normally no reduction in the wage rates would be asked if it were not for the financial necessities of the Company. They did not deny that the wages of the men were not excessive in themselves, and the Board concur in this view. The gist of the difficulty lies, as already stated, in the inability of the Company to meet even the present wages, and the Board have to decide on whom the further necessary economies must fall."

The recommendations of that Board were that the employees in the Gas Production department be reduced ten per cent below the level of the 1931 wage scale. Beyond that reduction the Board would not go, although the Company strongly urged it, the reasons being that the peculiar conditions of the gas workers would not justify a further reduction. In that the Board were unanimous. As to the workers in the other departments, the Board recommended a reduction of fifteen per cent below the 1931 level.

These recommendations were not satisfactory to the men, and subsequently they were given a week's holidays with pay, the equivalent of a two per cent increase.

At these levels, viz., 92 per cent for the Gas Workers, and 87 per cent for the other workers, the wage scales continued until May, 1936. At this time all the employees of the Company, except the Gas Workers, by negotiation arranged for an increase of an additional week's holidays with pay, an additional two per cent increase. Thus these employees were brought up to 91 per cent of the 1931 level. The gas workers failed in their negotiations, hence this Board.

Dealing with the men's first claim, that is, for the restoration of wages to the 1931 level, in as much as the reductions from that level were made and supported by the financial inability of the company to maintain the higher scale the men's claim in this respect must fail, for the reason that, while the Company has made some progress, its financial position is not nearly so good as in 1931. In order to justify a return to that level it seems to the members of the Board that the financial position of the Company should be equal or substantially equal to what it was at that time.

The men's secondary claim to an increase corresponding to that accorded to the employees in other departments of the Company suggests several difficulties. The Company objected to any increase for the reason that, although the other employees have had their wages restored from 85 to 87, and now to 91 per cent of the 1931 level, still the Gas Workers are enjoying 92 per cent of that level. They argue that no increase should be given the Gas Workers until after the other workers are brought up to their level. On the other hand, it is contended that the reductions of 1933 ought to be removed rateably, and that, in as much as the reduction in Gas Workers' wages was two-thirds of that of the other employees, the restoration should be on the same percentages. We accept this as a fair and just principle for a decision.

The company's position has been bettered since 1933. This must be the conclusion reached by the fact that the Company has voluntarily increased the wage scale of the railway utility. It also appears from some exhibits filed by the Company, notably exhibits 5, 6, 7, 8, 9 and 35. From these it is clear that the Company made substantial progress in 1934 over 1933, made some progress, though less, in 1935 as compared with 1933, but that the increase, if any, for 1936, as compared with 1933, will probably be very small. Nevertheless, taking the three years as a whole, there has been some increase in the

net revenues to the Company from the Gas department. This increase, by the way, is not nearly so much in the Gas department as in the other departments of the Company. And this fact is urged by the Company as justification for what might otherwise appear as a discrimination against the Gas Workers. Even though it is less, it is not inconsiderable.

Applying the principle of rateable increases in the wage scales as between the Gas Workers and the Railway utility workers, we think that the six per cent return granted to the railway utility entitles the Gas Workers to a four per cent return, that is, in the proportions of their original decreases, and this return we recommend, but in the form now to be mentioned.

Holidays with pay have long been an aim and desire on the part of employees of this Company, and was accorded to them in 1935 to the extent of one week per year of employment with pay. That concession has been in force since May, 1935. It is by all agreed to be the equivalent of about two per cent increase in wages.

The railway utility workers by their agreement effective May 1, 1936, arranged for an additional week with pay, the effect being that they now receive two week's holidays with pay, being a four per cent increase, and an additional two per cent increase in pay roll. The Gas Workers should have an additional week's holidays with pay, the equivalent of two per cent increase in their scale. If they receive this they will then have two week's holidays with pay added to the 90 per cent, or a net of 94 per cent of their 1931 wage level.

We recommend that this additional week's holidays with pay be granted to these employees.

The only additional recommendation that we make in respect of wages is with respect to the employees known as Door Lifter Operators. These men have been receiving a rate of wages about one cent and a half per hour below that of the other employees engaged in operating the gas ovens. It appears to us from the statements of both parties that there is no sufficient reason for this difference in pay. We therefore recommend that the scale of the Door Lifter Operators be brought up to the level of the Heaters, Producer Operators, and Pusher operators.

All of which is respectfully submitted.

Yours respectfully,

(Sgd.) A. K. Dysart,  
Chairman.

Member.

## Interim Report of Board in Dispute between Algoma Steel Corporation, Limited, and Its Employees

An interim report was received in the Department of Labour on September 18 from the Board of Conciliation and Investigation established to enquire into a dispute between the Algoma Steel Corporation, Limited, and approximately 2,000 employees being members of the Algoma Steel Workers' Union. The report was signed by all three members, namely, Mr. A. H. Dowler, K.C., of Fort William, Chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Mr. Lynn B. Spencer, K.C., of Welland, nominated by the company; and Mr. W. F. O'Connor, K.C., of Ottawa, nominated by the men.

The dispute related to the employees' request for increased wages, an eight hour day, and improved working conditions. Through the efforts of the Board the parties were brought into accord on all points in dispute with the exception of the matter of the wage scale, and the interim report was accompanied by a signed agreement on these phases of the dispute.

The Board is to remain in existence, and, in the event of the parties not settling all outstanding issues between themselves, will resume its sittings to deal with the wage dispute upon call of either party to the proceedings within a reasonable time.

### Interim Report of Board

*In the matter of the Industrial Disputes Investigation Act and of a dispute between The Algoma Steel Corporation, Limited (Employer) and certain of its Employees, being Members of The Algoma Steel Workers Union (Employees).*

The Honourable Norman McL. Rogers,  
Minister of Labour,  
Ottawa, Canada.

SIR,—The undersigned members of the Board of Conciliation and Investigation, established by your order on the 10th day of July, 1936, have the honour to submit the following interim report:—

Application for the establishment of the Board was made by the union on or about the 20th day of June, 1936, and the disputes which have been referred to the Board, affecting over two thousand employees, are stated therein, namely—

(a) Restoration of 1928 wage scale and rates without prejudice to any individual or departmental adjustments which have been made and put into effect since that time.

- (b) Readjustment of such wage scale and all working conditions to cover a change in whole plant to an 8 hour working day and a 48 hour week at such restored wage scale and rates.
- (c) Payment for all overtime worked in whole plant over 8 hours per working day, at the rate of time and one-half for such overtime up to and including 4 hours, provided that should such overtime continue beyond said 4 hour period or the nature of the work involved require continuous work or service beyond that time then such portion of said overtime as exceeds 4 hours to be paid for at the rate of double time instead of time and one-half.
- (d) Readjustment and alteration of working conditions in all departments to such an extent that they will meet the requirements of the Department of Labour and the approval of the Board of Conciliation, thereby removing all unfair and inequitable practices now existing.
- (e) A uniform established and standard policy and basis of hiring apprentices, including terms of employment, rates of pay, working hours and other conditions, so that same will not interfere with skilled labour throughout the plant, and said apprentices eventually become skilled tradesmen entitled to skilled wages and rates.
- (f) A system and understanding of Departmental Seniority, based on efficiency and years of service in all departments, thereby removing family partisanship and the vicious Steel Plant patronage system now practised by certain officials to the detriment of the company, the plant and union and goodwill between the employer and the employee.
- (g) Such further and other concessions and relief in the premises, as to the Board of Conciliation or the Department of Labour, may seem fair, reasonable, equitable and just.

The two members of the Board, other than the Chairman, met at Sault Ste. Marie and organized, so far as possible, on the 29th day of July, A.D. 1936, the date arranged for the first meeting and in the enforced absence of the Chairman, who was unable to get transportation to meet as originally arranged, the formal sittings of the Board commenced on the 30th day of July, A.D. 1936, at the Windsor Hotel, Sault Ste. Marie, and proceeded daily unto and including the first day of August. The sittings were then adjourned until September 14, when the same were resumed there and the Board continued sitting daily until and including the 16th day of September, A.D. 1936. The Board then adjourned to meet in Toronto on Thursday, September 17, 1936, to consider its report which being done the Board adjourned to meet on call of either party within a reasonable time.

Evidence was adduced by the employees at the first sittings who called under subpoena eleven witnesses who were heard. Evidence was also adduced by the employees at the adjourned sittings when they called under subpoena five witnesses who were heard.

The Board adjourned the first sittings to give the parties an opportunity, if possible, to settle their differences. At the resumed sittings of the Board, through the efforts of the Board the parties were brought to agree on all matters in dispute (except as to the scale of wages) in the terms of the agreement attached. The Board sat in with the parties in the preparation of the agreement and the agreement itself was drafted by the Board. The Board is pleased to report that this working agreement covers all disputes except those set out in A and B of the employees application.

At the resumed sittings the Board again heard evidence and argument on the wage dispute and after the fullest discussion the Board expressed informally its unanimous opinion that the financial position of the company and the present situation of the steel industry prevent the expression of any opinion of the Board in favour of any general increase of wages at the present time. The Board however did consider and declare, and the company did not dissent, that the wage scale of the company ought to be raised at the earliest possible moment that conditions of the future might present.

With this fact in view it seemed to the Board that in the interests of both parties to the dispute the Board should remain in existence and resume its sittings to deal with the wage dispute upon call of either party to the proceedings within a reasonable time. What has been said is subject to the probability that the parties will settle all outstanding issues between themselves.

This is an interim report.

All of which is respectfully submitted.

(Sgd.) A. H. Dowler,  
Chairman.  
(Sgd.) Lynn B. Spencer,  
Member.  
(Sgd.) W. F. O'Connor,  
Member.

Dated at Toronto, Ontario,  
September 17, 1936.

#### TERMS OF AGREEMENT

This agreement made in duplicate this sixteenth day of September, 1936, between Algoma Steel Corporation, Limited, hereinafter called "the employer", of the one part, and the Algoma Steel Workers' Union, hereinafter called "the employees" of the other part:

Witnesseth that the parties hereto, in consideration of the respective covenants of each with the other, hereinafter expressed, have agreed with relation to the employment of the employees by the employer during the subsistence of this agreement, as follows:

#### Period of Agreement

1. This agreement shall come into force on the first day of October, 1936, and it shall subsist and endure, (A) until and during the thirtieth day of September, 1937, and (B) thereafter from year to year until terminated pursuant to the next following provision.

#### 2. Termination of Agreement

Either party hereto may cause this agreement to be terminated by giving to the other party at any time not later than the thirty-first day of August in any year one clear month's notice in writing that it so desires, and such notice having been given (unless it be subsequently withdrawn, as, with the consent of both parties hereto, it may be) this agreement shall, without more, be and stand terminated as of the thirtieth day of September next thereafter ensuing.

#### 3. General Provisions

(A) The plant of the employer will be maintained as an open shop. The employer agrees not to discriminate against any employee merely because he is an officer, delegate or member of the Algoma Steel Workers' Union and the employees agree not to discriminate against any employee of the employer who is not a member of such union.

(B) A departmental grievance committee, appointed by the employees, shall have the right to discuss, by appointment, with the departmental superintendent any grievance of either an individual or collective nature. If the decision of the superintendent is not satisfactory to the grievance committee it may so report to the Executive Committee of the employees, which Committee shall have the right to complain to the works manager of the employer, and if his decision is not satisfactory the said Committee may appeal to the General Manager of the employer.

(C) Except in emergent cases, no changes shall be made in any of the working conditions provided for by this agreement until after notice, due and proper in the circumstances, has been given and the period of notice has expired.

#### 4. Hours of Employment and Overtime

(A) The normal hours of employment, except on rail, coal and ore docks, (which are seasonal in their operation) shall be eight per day and, in so far as is practicable forty-eight per week.

(B) Time and one-half shall be paid for time in excess of eight hours per day, but this provision shall not apply when the overtime in any one day does not exceed fifteen minutes, nor shall this provision apply on rail, coal and ore docks; with relation to the latter overtime rates shall be as the law may provide.

(C) In so far as the law may permit, the opportunity for overtime employment at any particular operations shall be first afforded to those employees who, normally, perform those operations, and such employees shall work such overtime, (save that the foregoing:

shall not debar from overtime employment any employee whatever who is replacing another).

(D) Except in necessary compliance with law no employee shall be laid off to balance overtime work.

(E) Every employee who is called out in case of emergency shall be paid for such time as he may have worked, an amount not less than that payable for four hours' work.

(F) Every employee who, unless he has been previously notified that he is not required, reports for work on his regular shift, shall be paid for not less than four hours' work. This provision shall not apply to irregular workers who report for possible or probable employment on shifts.

(G) Construction work shall be paid for, in such cases as the employer and the employees shall from time to time agree, at regular construction rates to be from time to time specified.

#### 5. Seniority and Promotion

(A) All things else being equal the employer shall apply the principle of seniority of service in making promotions in the various departments.

(B) The departmental superintendents of the employer shall arrange with committees of the employees for a general line of promotion and for the establishment of a seniority list. Such list shall be posted annually in some conspicuous place in the works of the employer.

(C) If for any reason an employee has been assigned to a position which carries a higher rate of pay he shall be paid the rate applicable to that position.

(D) Any employee who has been promoted and is found unable to fill the duties of the higher position shall revert to his former position and seniority.

(E) When new positions are created in a department first consideration shall be given to employees already employed in that department.

(F) The employer and the employees shall arrange and agree between themselves concerning inter-departmental transfers and the effects thereof.

#### 6. Apprentices and Helpers

(A) All employees of the employer who undertake to learn a trade as apprentices shall enter into a contract of apprenticeship, which contract shall state the duration of the apprenticeship, the rates of pay and the applicable conditions.

(B) After such apprentice employee has completed his apprenticeship he shall be recognized as and be paid the wages of a journeyman, but it shall not be compulsory for the employer to find work for him as a journeyman, nor, should he choose to follow another line of occupation, to pay to him the journeyman rate of pay for the trade for which he was apprenticed.

(C) When an employee of the employer has learned a trade by acting as a helper and by advancing in the course of time to the status of a tradesman he shall have the right, while performing the work of a tradesman, to be paid a tradesman's rate of pay, and, as well, when, owing to trade conditions, a reduction in the number of employees working as tradesmen shall be made, the right to revert to the status of helper, with a helper's rate of pay.

(D) Employees who are, at the date when this agreement comes into force, already serving apprenticeships shall enter into a contract of apprenticeship like to that hereinbefore specified, which contract shall allow to them credit for all time served prior to the date thereof.

(E) The employer shall endeavour to afford to all apprentices, for the whole period of their apprenticeships, steady employment under just and fair conditions.

#### 7. Prevailing Wage Rates

All employees of the employer who shall be employed at or fulfilling the functions of the various trades involved in the works of the employer shall be rated at the prevailing rates which are being paid by the employer to tradesmen in such trades respectively.

#### 8. Co-operation

The employer and the employees covenant that they will co-operate to the fullest extent in the carrying out of this agreement.

In witness whereof the employer has executed this agreement under its corporate seal and the employees have executed it under the hands and seals of all the members of their Executive Committee.

ALGOMA STEEL CORPORATION, LIMITED

## Report of Board in Dispute Between the Corporation of the City of Edmonton and Certain Employees of the Edmonton Street Railway

A unanimous report was received in the Department of Labour at the end of September from the Board of Conciliation and Investigation which enquired into a dispute between the Corporation of the City of Edmonton and certain employees of the Edmonton Street Railway being members of Local Division 569, Amalgamated Association of Street and Electric Railway Employees of America. The matters in dispute included: (i) the proposal of the civic authorities to change the system of apportioning runs as between senior and junior employees; (ii) request of the employees for payment of time and one-half for certain holidays; and (iii) the employees' request that the agreement be changed so as to provide that an employee reaching the age of sixty-five years need not retire if, in the opinion of the superintendent, such employee is capable of efficiently continuing his work.

The Board was composed as follows: Mr. William Rea, K.C., of Edmonton, chairman, appointed on the joint recommendation of the other Board members; Colonel P. C. H. Primrose, of Edmonton, appointed by the Minister of Labour in the absence of a recommendation from the civic authorities; and Mr. Alfred Farmilo, also of Edmonton, nominated by the employees concerned.

### Report of Board

Edmonton, Alberta,  
September 23, 1936

To the Honourable Norman McLeod Rogers,  
Minister of Labour,  
Ottawa, Canada.

**REPORT.**—*Of the Board of Conciliation and Investigation established under the Industrial Disputes Act, being Chapter 112 of the Revised Statutes of Canada for the purpose of investigating and dealing with a dispute between the Corporation of the City of Edmonton, as Employer, and certain Employees of the Street Railway, being members of Local Division, No. 569, Amalgamated Association of Street and Electric Railway Employees of America, as Employees.*

The members of the Board were duly sworn in on the 27th day of July, 1936, and after proper notice to the parties, held sittings in the Council Chamber, Civic Block, City of Edmonton, on the following dates:—July 30, August 5, 10, 11, 13, 14, 17, 18, 19, 20, 21, 24, 25, 26, 27, 28 and September 2, and

heard the oral evidence of twenty-eight witnesses, most of whom were subject to cross-examination and re-examination, and the Board also received a considerable mass of documentary evidence, exhibits to the number of 48 in all having been filed, which included a number of original or certified copies of agreements in force between street railway employers and employees in other cities of Canada.

During the greater part of the hearing, the applicants were represented before the Board by Mr. James Matear and Mr. Fred McClean, respectively, the President and Secretary of Local No. 569, and Mr. Fred A. Hoover, of Vancouver, designated for the purpose, and after the departure of Mr. Hoover, who had to return home before the close of the investigation, by Mr. Fraser Duncan, Solicitor for Local No. 569; the City of Edmonton was represented first by Mr. George B. O'Connor, K.C., (in the absence of T. E. Garside, City Solicitor), and by His Worship Mayor Clarke; and from August 10 to the end of the proceedings the City was represented by the City Solicitor, Mr. Garside. The case for both sides was ably, and, for the most part, dispassionately presented to the Board.

The members of the Board pointed out at the opening and at subsequent sessions that it was their duty to endeavour to bring about a settlement of the dispute, if possible, and in the course of the Inquiry the Board did all such things as they deemed proper to induce the parties to come to a fair settlement of the matters in dispute. After the evidence was all in, and argument had been submitted thereon by Counsel for the parties, the Board on several occasions met representatives of each party separately and then together and made such suggestions as the members of the Board thought advisable for inducing the parties to come to an amicable settlement, but no settlement was arrived at, and hence this report follows:—

### THE QUESTIONS IN DISPUTE

The Three Questions in dispute are as follows:—

(1) Under the terms of the agreement between the Corporation and the Local Union, dated February 1, 1935, the picking of runs was agreed to by clause 6 of the schedule to said agreement and the seniority rights of the men provided for. The Corporation, pursuant to the agreement, requested that a change be made in the picking of runs and the employees, members of the union, refused to consent or agree to the change in respect to the picking of runs, but insisted that seniority

rights be recognized. At a meeting of the Edmonton City Council held on February 6, 1936, a motion was passed which provided, among other things, "That it would be in the public interest to alternate day and night shifts between senior and junior conductors" and the matter of working out the details of the change having been referred to a Committee of Council, the said Committee reported back to Council on February 15, 1936, a plan for carrying out the proposed change, which report was adopted by Council by a majority of one, and the changes were brought into effect on March 29, 1936. Under the new system no Motor-Conductor employed by the City is entitled by reason of length of service to be placed on "day-shifts" only, and the two Motor-Conductors on a run or route are required to take day and night shifts alternately in periods of not less than two or more than three weeks. The applicants (the senior men) have opposed this change on the ground that it is a violation of their agreement with the City of Edmonton dated February 1, 1935, and that it is a violation of the seniority rights of the men.

(2) The employees pursuant to the agreement requested the Corporation to agree that they be paid time and one-half for the following holidays; New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day and the Annual Civic Holiday proclaimed by the Mayor. And the applicants claim that the employer failed to deal with this request.

(3) Pursuant to the agreement, the employees requested the Corporation to change the agreement in so far as the requirement that employees reaching the age of 65 must retire, and requested that the agreement be changed to provide that an employee reaching the age of 65 need not retire if in the opinion of the Superintendent such employee is capable of efficiently continuing his work. And the applicants claim that the employer failed to deal with this request.

The main dispute of course is in connection with the choice and selection of runs and the application of the principle of seniority thereto. The employees who are the applicants in this matter maintain that, subject to efficiency, each motor-conductor should be entitled to choose and hold his run in accordance with his length of continuous service in the Department.

#### STATEMENT OF FACTS

The population of Edmonton at the present time is approximately 86,000. The street railway system, which is municipally owned and operated, was established in the fall of 1908. On the 5th day of March, 1936, the total number of motor-conductors, including the spare men, employed in the system was 141. Of these 95 might be classed as regular motor-conductors, of whom 43 might be classed as senior or day men, and 52 as junior or night men, and there were at that date 46 men on

the spare list. The regular motor-conductors are the only ones called upon to take part in a sign-up. In the operation of the system at the present time (September 1936) there are 41 regular day runs and 42 regular night runs, including the intermediate runs. In the winter season and under certain traffic conditions the number of day runs may be increased to 43 or 44 and the number of night runs (including intermediate runs) to 52. A day run means a run that begins from 5.00 to 6.30 a.m. and finishes between 1.00 and 2.00 or 2.30 p.m. A real night run is a run that begins between 3.30 and 5.00 p.m. and finishes from 11.30 p.m. to 1.00 a.m.; and an intermediate run is one that begins from 1.30 to 2.30 p.m. and ends between 9.00 and 10.00 p.m. Some of the day runs and some of the night runs are split into two shifts, having a break in between the shifts for meal time.

In the course of the hearing it was maintained by the City that the term "run" meant the whole period a car is in operation from the time the car leaves the barns in the morning until it is returned at night or at 1.00 a.m. on the following day. The applicants maintain that the term "run" means the hours per day which each operator signs up for and each run is for approximately eight hours' work. Some runs are split into two shifts.

It is fairly clear from the evidence that the interpretation or definition of the word "run" as given by the applicants is the one generally employed in street railway language throughout Canada and the United States of America, and it is in this sense that the word is generally used in this report. The point may not be important as affecting the merits of the issues in this reference, but we refer to it here merely for the sake of clarity.

It appears from the evidence that while there was not a formal street railway agreement in force in Edmonton during the first four years of the operation of the system, yet the principle of seniority governed absolutely in the selection and holding of runs, and in the first street railway agreement adopted in Edmonton in 1912, and filed as Exhibit 5 at the hearing, we find that the following clauses deal with seniority and the picking of runs:—

#### "Section 3, Seniority.

Each Motorman and Conductor shall be entitled to hold his run in accordance with his age in the continuous service in the employ of the Department, and the preference of runs shall always belong to the oldest man in the continuous service, except where men are incompetent to hold such runs, in such event, the Department will take up the matter with the proper Committee of the Association, and

after a mutually satisfactory understanding has been reached, then the employee next in line for promotion will take his place.

#### Section 4, *Picking of Runs.*

When a sign-up occurs, the oldest man will sign up first, the second oldest next and so on, until sign-up is completed, the board to be posted up not less than four days before change of schedule; any day run made vacant by sickness, leave of absence, discharge or resignation, for over a period of seven days, the run will be held by the next man entitled to a day run, and his run to be filled by the senior spare man, and in the event of a vacancy occurring among the night runs, the vacancy will be filled from the spare list on the same basis as above mentioned."

Apparently no change was made in the practice down to the end of March of the present year when the new system for alternating shifts was put into force. The clause as it stood in the last agreement entered into between the City and Local Union No. 569, which is dated February 1, 1936, is as follows:—

#### "Clause 6, *Picking of Runs.*

When a sign-up occurs the senior man will sign first, the second senior next and so on until the sign-up is complete. The list of runs shall be posted up in the Barns not less than two days before the sign-up occurs. A sign-up shall take place every three months. A day run made vacant by sickness, resignation or leave of absence shall be taken by the man entitled to a day-run, and his run shall be filled by the senior spare man. A similar vacancy occurring among the night men shall be filled by the senior spare man on the spare list. If a man is off duty during the sign-up the Executive of the Association with the approval of the Superintendent will make a choice for him, except where the employee is not a member of the Association, in which case the Superintendent will sign up for him, and he shall take the run so chosen, until the next Regular sign-up.

Each motor-conductor shall be entitled to hold his run in accordance with his age in the service of the Department and preference of runs shall always belong to the oldest man in the service of the Department, except when a man is incompetent of holding such run or position."

As already stated, the practice provided for in the above clauses—the selection and holding of runs on the principle of seniority—has prevailed in Edmonton since the inception of the street railway system in 1908. The evidence submitted to the Board shows that a similar provision is contained in the agreements in force in Winnipeg, Regina, Saskatoon, Calgary, Vancouver and Victoria, and with a few exceptions, in nearly all of the Cities of Canada and the United States of America.

In two Canadian cities, Brantford, Ontario, and Regina, Saskatchewan, the day and night men alternate, but the evidence shows that this alternation in both cases was put into effect as a result of a mutual arrangement be-

tween the junior and senior men themselves. The evidence is that there is not one other case in Canada where an alternating shift system has been put into effect by any municipal or other authority or by any other method than by a voluntary agreement between the junior and senior men themselves.

According to the evidence of one witness called by the City, the system of alternating shifts was in force in the City of Edinburgh in the years 1924 and 1925, but there was no satisfactory, up to date evidence submitted in respect to the practice in other cities of the Old Land.

In regard to the situation in Edmonton, practically all of the street railway employees were members of Local Union No. 569 until about two years ago. It was disclosed in the evidence that there has been an agitation or movement on the part of the junior men for at least 13 or 14 years back to secure a greater share of day runs. It seems that some concessions were made by the senior men at different times but these did not prove satisfactory in meeting the situation. Then about two years ago 35 of the junior motor-conductors withdrew from Local No. 569 and formed another union known as the "Edmonton Street Railway Unit of the Transport and General Workers of Canada, Local No. 1."

Your Board is well aware that it is not within its province to deal with or adjudicate upon a dispute between two labour unions and that we must deal with the situation created by the resolutions of the Council of the City of Edmonton which is the employer, as affecting members of Local No. 569 as employees, but we mention the foregoing matters in order properly to set out the whole situation in regard to the parties to this Reference.

The agreement between the Corporation of the City of Edmonton and Local No. 569, dated February 1st, 1935, and from which Clause 6 of Schedule "D" governing the seniority rights of the men is quoted above, was in fact not executed by the city until about the first of October, 1935. This is substantially the same agreement that had been in force for many years. As is well known, these agreements come up for consideration or negotiation when changes are to be made at the beginning of each year and are usually negotiated or settled so far as the city is concerned by the City Commissioners, who are the executive or administrative officers of the city under the City Charter. Owing to a difference of opinion between the City Commissioners over the question of the proposed alternating of day and night

runs as between senior and junior men, the matter of the settlement of this agreement was, in January, 1935, referred to the City Council. Between that date and August 12th, 1935, this question of alternating runs and the claims of the junior men in respect thereto was discussed at various meetings of the Council and Committee of the Council. A vote of all the street railway motor-conductors including the spare men was held by direction of the Council on the 14th day of May, 1935, at the car barns on the following question:

"Are you in favour of each employee after service of six years and holding a regular night run having one shift in three on day service?"

The result was as follows: For 67; Against 65; One Blank.

The street railway employees in Local Division No. 569 voted under protest, taking the position that they did not consider the spare men had any right to vote on this question. Finally, the 1935 Council did on the 12th of August, 1935, adopt a resolution that no change be made from the street railway agreement, and accordingly the agreement dated February 1, 1935, and filed as Exhibit 3 at the hearing, and which is practically the same agreement as had been in force for many years past, and from which Clause 6 dealing with seniority and the selection of runs has already been quoted, was executed by the city under its corporate seal attested by the proper officials of the city in that behalf.

And so matters continued for the balance of the year 1935. The material facts occurring between December 20, 1935, and the date of the application for this Board have already been referred to above under the heading of "The Questions in Dispute."

To recapitulate: On December 20, 1935, the City notified the employees (Local No. 569) that the Corporation wished to discuss with the employees various phases of the agreement including classification of employees, hours of duty, scales of pay and special conditions, and the Mayor by letter dated January 13, 1936, advised Local No. 569 that the conditions of the existing agreement were satisfactory, excepting Clauses 5 and 6, the latter of which deals with seniority and the picking of runs, and enclosing suggested changes. The applicants by letter dated January 25, 1936, notified the city that they were prepared to meet the City Commissioners to discuss the matters relating to the agreement. A meeting was held on February 1. Representatives of Local No. 569 informed the Mayor of the two changes they desired, namely, those relating to extra pay for certain holidays and an extension of the retiring

age, particularly set out under Clauses 2 and 3 of "The Questions in Dispute" referred to above.

Without going into any further discussion or negotiation of these matters, the representatives of Local No. 569 were informed that a special meeting of the City Council would be called to settle the agreement. This special meeting of Council was held on February 6, 1936. Representatives of the employees (Local No. 569) attended this meeting and set forth their position in regard to the changes suggested by the City which would affect their seniority rights and urged that the existing seniority rights be not disturbed. Mr. Fred Wood, President of Edmonton Street Railway Unit of the Transport and General Workers of Canada Local No. 1, outlined the history of the dispute over a period of fifteen years as between junior and senior men and the efforts that had been made from time to time to have the day runs shared up with the junior men.

The Council then passed a resolution, which, as already pointed out, provided among other things "that it would be in the public interest to alternate day and night runs or shifts as between Senior and Junior men Street Railway Motor-Conductors."

At the same Council meeting a Committee of three aldermen was appointed to consider the means of working out the suggested changes on the fairest basis. This Committee met on February 11 and February 13, and in conference with the Superintendent settled upon the plan of carrying out the proposed alternating shifts and recommended to Council that the proposed changes be put into effect as soon as possible and that the necessary changes to give effect to the recommendation be incorporated in the union agreement by the City Commissioners.

By a vote of 5 to 4 this report was adopted at a meeting of the Council held on February 15, 1936. In the new agreement prepared by the City, a copy of which was filed as Exhibit 20 during the hearing, the new clause 6 substituted for clause "6" of Schedule "D" of the agreement dated February 1, 1935, which the applicants claim is still legally in force, is as follows:—

*"Clause 6.—Picking of Runs.*

When a sign-up occurs, the senior man will sign first, the second senior next and so on until the sign-up is complete. The list of runs shall be posted up in the Barns not less than two days before the sign-up occurs. A sign-up shall take place at least every three months.

*No motor-conductor employed by the city shall be entitled by reason of length of service to be placed on day shifts only, provided*

that the Superintendent shall (subject to an appeal to the Commissioners) in all cases have the right and power to deal with any case involving (1) a special hardship to a motor-conductor; or (2) involving any detriment to the service.

The two motor-conductors taking the two regular shifts on a run shall take day and night shifts alternately in periods of not less than two nor more than three weeks each, estimated to work out as evenly and fairly as possible in each sign-up.

When a temporary vacancy occurs through absence of a regular man, such vacancy shall be filled by the next senior man who is entitled to take a vacancy and who is not already signed up, on an alternating shift.

Each motor-conductor shall be entitled to hold his run in accordance with his age in the service of the Department and preference of runs shall always belong to the oldest man in the service of the Department, except when a man is incompetent of holding such run or position.

If a man is off duty during the sign-up, the Executive of the Union of which he is a member will make a choice for him, except when the employee is not a member of any union in which case the Superintendent will make a choice for him and he shall take the run so chosen until the next Regular sign-up."

Under date of February 27, 1936, His Worship the Mayor sent a letter or notice to the officers of Local Union No. 569 advising them that their agreement with the city, namely, the agreement dated February 1, 1935, if not already terminated, was to be terminated as of the 28th of March, 1936. The question of whether or not this agreement was so terminated is dealt with subsequently in this report.

The new system of alternating shifts between all men on the service was put into effect by the city or March 29, 1936. Local No. 569 (the employees in this Reference) have at all times stood by their seniority rights or what they claim are the men's seniority rights under Clause 6 of the agreement of February 1, 1935, and they claim that notwithstanding the notice of termination given by the city, the said agreement of February 1, 1935, is still legally in force. Because of the action of the city, the employer, Local No. 569 in due course applied for a Board of Conciliation and Investigation under the Industrial Disputes Act, and your present Board was constituted and has inquired into the dispute and completed its investigation as above set forth.

#### FINDINGS FROM THE FACTS AND EVIDENCE

1. Your Board finds that in the matter of the choice and holding of runs and in promotion (subject always to efficiency) the seniority principle as set out in Clause 6 of the agreement of February 1, 1935, and as interpreted and practised in the City of Edmonton from the time of the first street railway agreement entered into in 1912 down to the coming

into effect of the present alternating shift system, is observed in practically all of the cities of Canada. It is true that an alternating system between junior and senior men prevails in the two Canadian cities of Regina and Brantford, but in these cities the alternating system between junior and senior men is carried out by mutual arrangement or agreement between the junior and senior men themselves, and in the agreements between the employer and the employees in each of these cities, the seniority clause is practically the same as in all of the other cities of Canada.

2. That the operation of a steam railway system is, so far as the running trades are concerned, fairly comparable with the operation of an electric street railway and that in the selection of runs, hours and routes and promotion subject to efficiency, the seniority principle is observed and prevails throughout the railway system of Canada.

3. That the application of the seniority principle is the most efficient and satisfactory way of handling large bodies of men and that it removes charges, or the opportunity for charges, of partiality and discrimination.

4. That by the adoption of the system of alternating shifts coming into effect on the 29th of March last, the seniority rights of the senior men have been seriously, and more or less indiscriminately interfered with. Mr. Garside, the City Solicitor, argued at some length that although there is a clause in the agreement dated February 1, 1935 to the effect that it continues in force until a new agreement has been negotiated, yet the same agreement had in fact been terminated by the notice or notices given by the City. Although the Board's Chairman happens to be a lawyer, the other members of the Board are laymen, and the Board accordingly is not giving a legal ruling on the point in question. The Board does find, however, upon the evidence that there was no proper negotiation in the ordinary sense of the term between the city authorities and the representatives of Local No. 569 (the applicants) in respect to the proposed changes in the agreement or the matters in dispute between the employees as represented by Local No. 569 of the City of Edmonton. If there had been such negotiation, it is quite possible that a satisfactory settlement would have been reached between the parties.

5. That any system where the change from night to day shifts is made at such short intervals as every two weeks, is such that men cannot easily adapt themselves thereto, and that such irregularity of hours and habits is injurious to health, and that for the number of runs open for alternating only eighteen men

during the present sign-up are availing themselves of the opportunity to work on alternating shifts.

6. That a number of the senior men by the system of trading permitted under the agreement have actually chosen to remain on night runs for the whole period of the sign-up or for sign-ups in succession, rather than attempt to accustom themselves to changing over every two weeks, which the older men declare to be very difficult if not impossible.

7. That of the so-called junior men, a fairly large number of them had been on night runs for a long period before becoming entitled to a regular day run under the system prevailing down to March 29, 1936. As the list stood in March, 1936, the senior 7 night men had been in the employ of the Department for over 21 years; the next 15 on the list from 15 to 19 years; and the remaining 30 from 6 to 13 years. Yet even under that system, senior night men came in for a considerable share of day work, and, according to figures supplied by Supt. Ferrier, the 23 senior night men of the Edmonton Street Railway shared between them in the 15 month period from January 1, 1935 to March 29, 1936, 1,853 days' work of day runs, which between them would be an average of 123 days per month, that is  $5\frac{1}{2}$  day runs per man per month, or 64 days, that is  $2\frac{1}{2}$  months of day work on the average for each of the 23 men in a period of one year. In actual practice, the result would not work out just in this way, some of the senior night men because of their seniority taking more than the average per month and some others by choice not taking any day work at all. The opportunity for the senior night men thus to share in day runs or night runs is open because of holiday time given to the senior men and to absence on account of sickness or other causes. All the men classed as "night men" before March 29, 1936, had previously served five years or more as spare men, and while on the spare list their work consisted of about  $\frac{1}{4}$  day work—and when a senior spare man signed on a regular night run he had straight night work for about seven years, after which he began to get short periods of day work, the periods increasing as he moved up the seniority list.

8. That the greatest hardship the junior man suffers because of being tied down for a long period to night work, is that it deprives him of association with his family at a time in the lives of his children when a father's influence and control are most necessary, and apart from his off day, which is one in seven, it deprives him of the opportunity for intercourse and social life and association with his fellow man. The evidence impressed the Board

that this phase of the situation deserved every consideration.

9. The situation as regards the time that a number of the junior men have had to remain on night work in the City of Edmonton under the application of the seniority principle observed prior to March 29, last, has been aggravated by the following circumstances:—

The growth of the City (speaking with modesty) was comparatively rapid in the years 1912 and 1913. Then in 1914 the War came, and to the city a state of arrested development. A large number of men were accordingly taken on in those two years. To give a few particulars: Of the men still on the force, 14 were taken on in 1912 and 18 in the year 1913; only one in 1914 and one in 1915; and relatively speaking not a large number in any one year since until the latter part of the year 1935 when fifteen new men were added to the spare list. Although there has been a substantial increase in population since 1914, yet the city's area, or the area of settlement within the city, has contracted rather than extended and accordingly outside of the University Bus line and the Calder line (to the area of the C.N.R. Shops) there has been no real extension of the Street Railway lines in Edmonton since 1914. On top of that was the introduction of the one man cars, all at about the same time, which threw some thirty men back on the seniority list. It can readily be seen, how these factors have reacted on the advancement of the men and how some of the conditions prevailing here would not obtain in cities like Toronto or Vancouver. However, the rule as to the retiring age and the natural effluxion of time will correct some of these conditions and give more opportunity to the junior men to advance more rapidly on the seniority list.

10. That among the 42 regular runs classed as night runs,—this number rises to 52 in the winter season—there are from 15 to 18 runs that might more properly be designated as intermediate runs. These are runs that begin at any time between 1.30 and 2.30 p.m. and finish between 8.30 and 10 p.m. or thereabouts. There are certain of the senior men to whom these runs appeal. Although these intermediate runs would, on the face of it, appear to use up the best part of the day and night for the operator so far as social or business avocations go, yet, in the long season of winter in this part of the country, they have this advantage that they begin and end at such time of the day and evening when premises and cars at such hours are usually comfortable and there is no hardship to the operator in the hours of going to work or returning from work in connection with these

runs. It seems to us, therefore, that some of the senior day men would be giving up very little if they voluntarily agreed to choose these runs from time to time by trading or on the sign-up and thus afford the opportunity for a corresponding number of the night or junior men to move on to the day schedule, and that such an arrangement would not affect the principle of seniority as applied to the senior men in the selection and holding of runs.

#### RECOMMENDATIONS FOR SETTLEMENT OF THE DISPUTE

1. The Board recommends that the full seniority rights of the men in the selection and holding of runs be restored, and that Clause 6 of Schedule "D" of the agreement between the Street Railway Employees and the City of Edmonton dated February 1, 1935, and as the clause stood and was interpreted for many years previous to February 15, 1936, be restored in the agreement between the Corporation of the City of Edmonton and the employees of the Edmonton Street Railway System.

2. Without prejudice to the operation of the principle of seniority as hereinbefore set out, the Board recommends that in each regular sign-up (there are four of these sign-ups during the year, each subject to traffic conditions lasting for approximately three months) the first ten of the regular senior men select intermediate runs for the period of the sign-up and that the ten day runs which they vacate for such period of three months and to which they are or would be entitled under the above-mentioned seniority clause, be given to the first ten senior night men for the period covered by the sign-up; and that a similar rotation in groups of ten take place at every sign-up, thus assuring to all regular night or junior men at least three months of day runs in the course of the year, in addition to such other day work as they were getting prior to March 29, 1936, in moving up to take day runs during the holiday periods or other absence through sickness or any other cause of the senior men.

We recommend that this change be carried out by a voluntary arrangement between the senior and junior men themselves; and following such arrangement, that the Superintendent give a direction to have this change brought into effect at the next ensuing sign-up of the system.

As pointed out in Clause 9 of "Findings," certain circumstances and conditions therein set out and applying to Edmonton particularly have created a situation peculiar to the street railway system here and have made the course of advancement from a night man to a

day man by the ordinary march of seniority much slower than it ordinarily would be, and have kept them on night runs much longer than would be the case in some other cities, and the adoption of this recommendation even for a limited number of years should fully meet the situation in regard to the position of the junior men. In the course of a few years, it is quite probable that the operation of the strict seniority principle in the ordinary way in which it has been and is to-day applied in nearly all of the cities on this continent, would work out in a manner satisfactory to the great majority of all the employees of the street railway system. The best interest and the common well-being of the great majority of employees in any utility or industry are all that the best system of operation can give.

3. Regarding item 2 of the dispute, we recommend that Clause 2 of the agreement be changed to read as follows:—

"That for the year 1936 the employees be not paid time and one-half for the following holidays: New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and the annual Civic holiday proclaimed by the Mayor, and further, that during January, 1937, the employees again meet the City Commissioners and negotiate these questions."

4. As to item 3 of the dispute, we recommend that:—

"No man under the age of 21 or over the age of 30 shall be started as a permanent employee of the department, and motormen or operators must retire at the age of 65 or sooner, if condition of health warrants; provided that any motorman or operator who reaches the age of 65 may with the permission of the Commissioners of the City of Edmonton on the recommendation of the Superintendent of the Edmonton Street Railway continue in the employ of the city on condition that such motorman or operator submits himself to physical examination when required by the city, but he must in any event retire at the age of 70."

We might add here that the Board is of the opinion that the city should take steps to provide a superannuation or retiring fund for the employees of this utility and that if such retiring allowance could be made adequate, then it would be unnecessary to consider retaining men in the service after they have reached the age of 65 years.

All of which is respectfully submitted.

## CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM JULY 1, 1936, TO SEPTEMBER 30, 1936

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbiter when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

These officers are also charged with certain duties arising out of the administration of the Fair Wages Policy applying to contracts let by the Dominion Government and to works aided by federal funds.

The following statement covers the more important conciliation matters dealt with during the period July 1 to September 3, 1936. (An article covering the period April 1 to June 30, 1936, appeared in the LABOUR GAZETTE, July, 1936, page 581.)

**LONGSHOREMEN, THREE RIVERS, P.Q.**—Reference was made in the July, 1936, issue of the LABOUR GAZETTE to a dispute at Three Rivers, P.Q., involving longshoremen, members of the International Longshoremen's Association, which had received the attention of a conciliator of the Department of Labour. On July 13 an application was made to the Department for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act by members of Local No. 1412, International Longshoremen's Association, employed by J. C. Malone and Company, Three Rivers, P.Q. The application stated that the rates of wages, regulation of hours, the right of the workers to belong to an association of their

choice, and the application of working conditions were the causes of the dispute. The conciliator again interviewed officials of the employing company and officers of the union, it being considered that the dispute was one in which a direct settlement could be effected, and at the end of September the case was still before the Department. It was stated that 300 were directly affected by this dispute, and 800 indirectly.

**OPERATING ENGINEERS, HAMILTON, ONT.**—In the July, 1936, issue of the LABOUR GAZETTE reference was made to a dispute between the Hamilton By-Product Coke Ovens, Limited, and its operating engineers which had been brought to the attention of the Department of Labour. A conciliator of the Department had attempted to adjust the matter but both parties expressed the view that the dispute could be dealt with more effectively by a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act. The board application, which was dated May 10, stated that the men desired increased wages and other improvements in working conditions. Thirty-three employees were said to be directly affected, and 45 indirectly. It was the opinion of departmental officers, however, that a further conference would be advisable and arrangements were made accordingly. On July 10, separate and joint conferences between the parties involved were held in the offices of the Department of Labour at Ottawa, and proposals which were put forward appeared to form an acceptable basis for negotiations. It was therefore agreed that further efforts to reach a direct settlement would be made upon the return to Hamilton of the disputing parties. Delays occurred, however, and the case was still before the Department at the end of September.

**TAXICAB DRIVERS, WINNIPEG, MAN.**—The July, 1936, issue of the LABOUR GAZETTE contained a report regarding a dispute which had arisen when Moore's Taxi, Limited, Winnipeg, dismissed 14 drivers affiliated with the One Big Union. A conciliator of the Department of Labour investigated the matter and was finally successful in obtaining the company's consent to reinstate 9 of the men, but the men's representatives refused this offer and stated that they would seek the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The application was made under date of May 28. A further effort was made,

through correspondence, to secure a direct settlement of the dispute, and finally the men's representatives agreed to accept the offer of the company to re-employ the 9 men in question with the understanding that they would all be taken back in a group, without delay, and permitted to retain their union affiliation. This arrangement was made effective on September 7.

#### OPERATING ENGINEERS, TORONTO, ONT.—

On July 28, 1936, a request was received in the Department of Labour from a representative of Local No. 796, International Union of Operating Engineers, Toronto, for the services of a mediator, the union having been unsuccessful in their efforts to bring about agreements covering stationary engineers and firemen in the employ of the Robert Simpson Company, Limited, and the T. Eaton Company, Limited, Toronto. The proposed agreements provided for increased wages. Subsequently a departmental official conferred with representatives of the union and later with the superintendent of the Robert Simpson Company. The superintendent stated that the employees of his Company were granted sick leave with pay, holidays with pay, and other concessions which were not granted by concerns paying higher wages, and therefore no consideration could be given at that time to increased rates. It was also learned that the T. Eaton Company had, a short time previously, granted certain increases to their engineers and firemen. In view of these circumstances the men's representatives stated that the matter would be allowed to remain in abeyance until a later date.

#### FREIGHT HANDLERS, ST. ANDREWS, N.B.—

On July 15, 1936, there was received in the Department of Labour an application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Canadian Pacific Railway Company and certain of its freight handlers at St. Andrews, N.B., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The application stated that the dispute had arisen when the employees had requested an agreement embodying the rates of pay and working conditions applicable to freight shed staffs generally, which would involve an increase in the hourly rates, and the management had made a counter proposal that the work be done on a tonnage basis. At that time the management stated that if any change must be made in the practice which had theretofore prevailed it might be necessary to consider the advisability of providing

for the service by a contract arrangement. An agreement not being reached, the Company, on June 18, put this latter proposal into effect, the contractor employing an entirely new crew. Subsequently a few of the former employees were taken on by the contractor, these men accepting such work without prejudice to their claim that they were still employees of the Canadian Pacific Railway Company. A conciliator of the Department held several conferences with the parties involved in Montreal, P.Q., and in St. Andrews and Saint John, N.B., in an effort to settle the dispute without Board procedure. At the close of September the matter was still receiving attention. Twelve employees are stated to be directly affected by this dispute.

#### AUTOMOBILE MECHANICS, TORONTO, ONT.—

A request for the assistance of the conciliation service of the Department of Labour was received early in July, 1936, from representatives of Lodge No. 1097, International Association of Machinists, it being stated that the members of this Lodge employed in approximately 21 garages in Toronto, Ontario, had voted unanimously for strike action following the refusal of the employers to discuss agreements embodying increased wages, shorter hours and other improved working conditions. A departmental conciliator interviewed officers of the union concerned and officials of the Automotive Dealers' Association, and subsequently arranged a joint conference between these two groups at which the whole situation was discussed at length. The representatives of the Automotive Dealers' Association later advised the departmental officer that their members were not prepared to enter into formal agreements with the union, either collectively or individually, but that they would consider any complaints made by the employees as to conditions of employment, average earnings, hours of labour, etc. This position was made known to the men's representatives who, although not satisfied with the undertaking given, stated that it did not appear there was any further action the Department of Labour could take at that time.

#### TAXICAB DRIVERS, MONTREAL, P.Q.—

On August 7 and 8, 1936, a strike occurred of certain taxicab drivers, including owners and chauffeurs, when the Diamond Taxicab Association, Limited, Montreal (through which these drivers secured calls, cab licences, etc.), refused to reduce the fees payable to the Association. The matter was brought to the attention of the federal Department of Labour on August 9 by representatives of the strikers, and the presence of a conciliator was requested at a conference of officers of the

Association, representatives of the drivers and a committee of the City Council, which was to be held on August 11. As it appeared that the dispute was one arising out of a private contract awarded by the civic authorities in which they had full jurisdiction, and was not one between employers and employees in which the Department of Labour would have authority to intervene, the departmental representative attended the conference as an observer only. At this meeting an agreement was reached for the immediate resumption of work for a period of 30 days, during which time a committee would investigate the situation and recommend a settlement. The committee, which was subsequently set up, was not successful in its efforts to settle the dispute and on September 29 the drivers again ceased work for a few hours. Operations were resumed, however, pending the outcome of further efforts to adjust the matter.

**TEXTILE FACTORY WORKERS (ARTIFICIAL SILK), CORNWALL, ONT.**—On August 11, 1936, a strike occurred of approximately 1,753 employees of Courtauld's (Canada), Limited, Cornwall, Ontario, the management having refused the demands of the workers for increased wages, a reduction in working hours, recognition of the Rayon Workers' Industrial Union with a closed shop agreement, and other changes in working conditions. On August 21, at the request of the member of Parliament for the county of Stormont, a conciliation officer of the Department of Labour interviewed, at Cornwall, representatives of the strikers and officials of the Company, proposing that, as direct negotiations had failed to settle the dispute, both parties should agree to the immediate resumption of work and a reference of the matter to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. Both parties stated, however, that an agreement had been reached to suspend negotiations pending the arrival from England of the president of the Company in a few days and, though consideration would be given to the proposal, no definite commitment could be made at that time.

On August 25 the departmental conciliator again visited Cornwall and conferred with the president and other officials of the employing company, and at that time it appeared that a direct settlement would be reached either at a conference which was scheduled for the 31st or shortly thereafter. In the interval a letter was addressed by the employing company to the strikers' representatives stating that the presence of the international organizer was objectionable to them and that negotiations would not be carried on so long as he was

retained on the committee. Notwithstanding this the committee, including the organizer, reported for the conference on the 31st but the employers refused to open discussions and the meeting adjourned.

The conciliator returned to Cornwall on September 1, and that evening interviewed officials of the union. After a lengthy discussion these union officials decided to call a meeting of the executive to obtain authority to drop the organizer from the committee, and later on in the evening the conciliator was advised that such authority had been obtained. Early the following morning the departmental representative made this decision known to the management but learned that, owing to certain developments, the employers were not prepared to deal with the committee as then constituted, and throughout the day the conciliator endeavoured to find a basis upon which negotiations could be resumed. As a result of various conferences a letter over the signature of the president of the union went forward to the president of the company on September 3. This letter set out certain suggestions as to a basis of negotiations which was acceptable to the strikers, and stated that the demand for union recognition would be dropped. These proposals were acceptable to the management, and a conference between the parties directly involved was immediately arranged for that afternoon. A settlement satisfactory to both sides was reached, and the picket lines were withdrawn the following morning, the 4th, with the understanding that operations would commence at the earliest possible date. The management stated definitely, however, that certain of the strikers would not be taken back but made it clear that these persons were not being discriminated against because of their membership in the union. The agreement, which was submitted to a mass meeting of the employees and accepted unanimously, was signed on September 10, and provided for wage increases of about five per cent, together with certain improvements in working conditions. Following the signing of the formal agreement telegrams expressing appreciation of the services rendered by the conciliation officer were despatched to Ottawa by the president of the company, the president of the Rayon Workers' Industrial Union, and the chairman of the negotiating committee.

**SHIP FREIGHT HANDLERS, WINDSOR, ONT.**—On August 13, 1936, the Department of Labour was notified of a dispute between the Canada Steamship Lines, Limited, and their freight handlers at Windsor, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Em-

ployees, and the assistance of a conciliation officer was requested. On the following day an officer of the Department conferred, in Windsor, with the disputing parties. He learned that for some time these workers had been dissatisfied with the wages and certain conditions of employment and they stated that they had found it impossible to obtain any satisfactory adjustment. It was therefore decided that they would not report for work on the morning of August 11. At the request of the union officials the Mayor of Windsor had endeavoured to arrange a conference between the men's representatives and the local superintendent of the company but, it is understood, the superintendent had refused to meet the men's committee. The conciliator held several conferences with both parties. The superintendent refused to make any concession whatever, his position being that the trouble, in the main at least, was due to a change which had been made in the method of payment of these men, Windsor having been made a terminal port. The superintendent further stated very definitely that there were certain officials of the union who would not be permitted to return to the service of the company. The conciliator made this position known to the men's committee, who finally decided that work would be resumed, and on August 15 notice to this effect was given out. On September 8 an application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department, and the matter was taken up with the employing company.

**POTTERY WORKERS, ST. JOHNS, QUE.**—Under date of August 21, 1936, the Department of Labour was advised that work had been suspended at the plant of the Canadian Potteries, Limited, St. Johns, P.Q., on August 17, when the management of the company refused to consider any adjustment of a dispute arising out of the dismissal, allegedly for union activities, of several employees. Picket lines were maintained but no disturbances had occurred up to that time. During the early period of the strike interviews were held between a committee representing the employees and officials of the company, the employees demanding increased wages, shorter hours and the reinstatement of all strikers without discrimination. Union recognition was also requested, but not insisted upon. No progress was made, however, and the conciliation service of the federal Department of Labour was requested. A conciliator accordingly visited St. Johns and conferred with both parties to the dispute. The management of the company finally stated that, upon the return to work of those em-

ployees acceptable to the company, an upward revision in wage rates would be made within ten days' time, but they made it definitely clear that there was a number of strikers whom they would not consider re-employing. The vice-president agreed to meet the strikers' committee to discuss a settlement on these terms. The interview between the parties directly concerned which followed failed to terminate the dispute, and later authorities of the provincial government intervened in the matter. Early in September the strike was suspended pending the report of an Arbitration Board set up by the provincial government to deal with the matter. It was stated that 80 workers were affected by this dispute.

**COAL MINERS, CADOMIN, ALTA.**—On August 24, 1936, word was received in the Department of Labour from the secretary of the Cadomin Miners' Union that a dispute had arisen regarding the interpretation of a clause in the existing agreement between the Cadomin Coal Company and its employees providing for the equal distribution of work for miners employed in the shaft and tunnel mines, and the Minister of Labour was requested to appoint an independent chairman to settle the matter, in accordance with the provisions of this agreement. The president of the company advised the department that he concurred in the request, and Mr. L. C. Stevens, consulting and mining engineer, Edmonton, Alberta, was appointed in this capacity.

**FUR FACTORY WORKERS, WINNIPEG, MAN.**—A request, made by the Winnipeg Trades and Labour Council on behalf of the local branch of the International Fur Workers' Union, for the conciliation service of the federal Department of Labour, was received on September 11, 1936. Early in August a strike of approximately 350 workers employed in about 35 establishments in Winnipeg had occurred when the employers refused to sign an agreement with the union providing for wage increases and a forty-hour week. Officials of the provincial Government and the Mayor of Winnipeg had attempted to bring about a settlement but were unsuccessful in their efforts. On September 18 an official of the federal Department of Labour conferred, in Winnipeg, with representatives of the Furriers' Guild, but his offer of mediation was refused, the representatives stating that the Guild would not consider negotiating with the union and, moreover, that they had only sufficient work for those presently employed as, due to the strike, a large amount of work had been sent to eastern shops. In view of the position taken by the Guild it was not possible for the federal officer to be of any assistance.

**BAKERY WORKERS, HAMILTON, ONT.**—On September 20, 1936, a request for the services of a conciliator of the Department of Labour was received from the secretary of Local No. 72, International Union of Bakery and Confectionery Workers, Hamilton, it being stated that a member of that union had been discharged by the Hamilton Bakeries, and on September 22 and 23 a departmental officer investigated the complaint. Officials of the union stated that at various times during the preceding weeks five employees, all union members, had been discharged by this company, and that no reason had been given in any instance for such action. They contended that the employees had been discriminated against because of their union affiliation, but were unable to give any definite reason for this statement. The manager of the Bakeries, when interviewed by the conciliation officer, explained that the dismissals were for cause, giving the reasons in each case, and further stated emphatically that the union affiliation of the employees had no bearing whatever on the matter. A further interview with the union officials interested cleared up the misunderstanding which had existed.

**COAL MINERS, DRUMHELLER, ALTA.**—A strike of coal miners, members of the United Mine Workers of America, employed at the Elgin mines, Drumheller, Alberta, occurred during September when a dispute arose regarding contract rates. A conciliator of the Department of Labour was successful in securing a settlement, and an agreement was signed on September 23, the men resuming work the following day.

**COAL MINERS, WAYNE, ALTA.**—A dispute regarding the contract rate applicable to the erection of timber sets resulted in a cessation of work of miners, members of the United Mine Workers of America, employed in the mines of the Ideal Coal Company, Wayne, Alberta, early in September. A settlement of the matter was brought about by a conciliator of the Department of Labour, an agreement being signed on September 23 and the men returning to work the following morning.

**COAL MINERS, CARBON, ALTA.**—On or about September 23, 1936, approximately 90 coal miners employed by the Peerless Carbon Collieries, Carbon, Alberta, ceased work, demanding increased wages and union recognition. A conciliator of the Department of Labour intervened in the matter and, as a result of joint conferences which he arranged between representatives of the employers and officers of the United Mine Workers of America, work was resumed on the 25th pending the result of further negotiations.

**RAILROAD CONDUCTORS AND TRAINMEN, QUEBEC CENTRAL RAILWAY COMPANY, SHERBROOKE, P.Q.**—For a number of years there has been in existence an agreement between the Quebec Central Railway Company and its railway conductors and trainmen, which was negotiated through a representative committee of these employees. Early in the summer of 1936 the committee requested a revision of this agreement but was advised that a newly constituted committee of employees had asked for a separate agreement covering wages and working conditions of conductors only. The former committee objects to the company recognizing the new committee and conceding to it the right to negotiate a separate agreement. The management, although willing to deal with the employees as such in the respective classes, has taken the position that it cannot proceed in the matter while a dispute continues between the two groups, fearing that a charge of non-compliance with the provisions of the Industrial Disputes Investigation Act might be made, and is of the opinion that the employees concerned should first reach an agreement among themselves. Representatives of both groups of employees have discussed the matter in Ottawa with officials of the Department of Labour, and considerable correspondence has been exchanged on the subject with the object of finding a solution of the problem. At the end of September the case was still receiving attention.

---

In the *Saskatchewan Gazette* of September 15, 1936, reference is made to the approval of a new regulation of the Workmen's Compensation Board of that Province. The new regulation rescinds regulation 47 which provided that "when less than six (6) workmen are usually employed in a mining industry (including prospecting and development work) such industry is wholly excluded from the operation of the Act and is withdrawn from the class in Schedule 1 in which it would otherwise be included." The new regulation rescinds the old one "in so far as it applies to coal mining and the operation of a coal mine, regardless of the number of employees, shall be deemed to be an industry under the Act and included in Schedule 1, and such industry for the purpose of application of the Act be deemed to be in Class 9, Group O, and rates of assessments applying to such classification shall apply to such coal mines." The new regulation is to be effective "as, from and after the 1st day of October, 1936."

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1936

THE following table shows the number of disputes, workers involved and time loss for September, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Sept., 1936 .....	27	6,513	33,292
*Aug., 1936 .....	23	9,681	65,658
Sept., 1935 .....	18	4,303	26,506

\* Preliminary figures.

The record of the Department includes lock-outs as well as strikes, but a lock-out, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lock-outs are recorded together. A strike or lock-out, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lock-outs which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Decreases appear in the number of workers involved in strikes and lockouts and in the time loss although the number of disputes increased. The disputes involving large numbers of workers during September were not of many days' duration and in August a strike of textile factory workers at Cornwall, Ontario, caused considerable time loss while two strikes of coal miners in Nova Scotia involved large numbers of workers for a short time. In September, 1935, strikes of longshoremen at Vancouver, B.C., and neighbouring ports and of men's clothing factory workers at Montreal, Quebec, caused considerable time loss.

Ten disputes, involving 2,360 workers, were carried over from August. Two of these were not included in the table for that month, namely coal miners, Drumheller, Alta., and fur factory workers, Toronto, Ontario, information as to these not having reached the Department in time for inclusion in the September issue of the LABOUR GAZETTE, while later information is that the dispute involving building wreckers at Toronto, Ontario, reported as unterminated at the end of August, was settled on August 26. Seventeen disputes commenced during the month. Of these twenty-seven disputes, twenty-three terminated

during the month, thirteen resulting in favour of the workers involved, three in favour of the employers concerned, compromise settlements being reached in four cases, while the results of three were recorded as indefinite. At the end of September, therefore, there were on record four disputes recorded as strikes or lockouts, namely fur factory workers, Winnipeg, Man., bakery drivers, Vancouver, B.C., bag factory employees, Walkerville, Ontario, and wood factory workers, Scotstown, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ontario, Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ontario, July 11, 1932, two employers; moulders, Peterborough, Ontario, February 27, 1934, one employer; and restaurant employees, Toronto, Ontario, May 1, 1936, one employer, this last being added to the list this month.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A minor dispute involved longshoremen at Leamington, Ontario, for about an hour on September 20, the men securing an increase in wages from 35 cents per hour to 40 cents.

A minor dispute involving three elevator operators for a short time in one building at Toronto, Ontario, on September 8 has been reported in the press, the strikers securing a wage increase and a reduction in hours of work. It is also reported that an elevator operators' local of the International Union of Elevator Constructors, Operators and Starters, organized in Toronto this year, has secured increases in wages and reductions in hours in a number of buildings, particularly in the clothing factory area.

Another minor dispute is reported to have involved twelve elevator operators in three buildings in Toronto, Ontario, in a strike lasting three hours on September 28, the demands of the strikers being conceded.

Reference was made in the LABOUR GAZETTE for September to a strike of compositors, pressmen, etc., in one job printing establishment in Toronto, Ontario. Further informa-

tion received is that twelve compositors and two pressmen ceased work on August 25, protesting against excessive overtime work and low wages. Work was resumed on August 27 on the understanding that these complaints would be dealt with but the men ceased work again on August 29. Some of the strikers were replaced and others resumed work but by the beginning of September the dispute appeared to have lapsed.

A strike of twenty-four truck drivers and sixty labourers on a highway construction job near Joggins, N.S., on September 26 has been reported in the press, but reports on the dispute have not been received in the Department. It was stated that the strikers demanded certain changes in conditions which were conceded and work was resumed on the next day.

In connection with the strike of glass factory workers in August, at Wallaceburg, Ont., recorded as terminated (the strikers having been replaced), it has been reported in the press that three men were charged with intimidation on September 16, also two on September 21, following threats to men employed in the establishment.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**COAL MINERS, DRUMHELLER, ALTA.**—A cessation of work by seventy coal miners from August 14 to September 24 at one mine at Drumheller, Alta., was not reported in time for inclusion in the LABOUR GAZETTE for September. The union demanded that certain work should be paid for by weight instead of by measurement and the employer is reported to have refused to install scales. As a result of mediation by the western representative of the Department, this was agreed to and a scale of wage payment by weight was adopted and embodied in a renewal of the agreement with the United Mine Workers of America which had expired in May. Work was resumed on September 25. In November, 1935, a strike had occurred over the wage scale (yardage rates), pending the installation of scales, and it was similarly settled by mediation. (LABOUR GAZETTE, December, 1935, pp. 1091 and 1099.)

**BAKERY EMPLOYEES (BAKERS AND DRIVERS), WINNIPEG, MAN.**—Employees in thirteen establishments in the northern part of the city ceased work on August 31. Five of the employers, members of the North Winnipeg Bread Bakers' Association, had signed an agreement with the Bakery and Confectionery Workers' International Union providing for higher wages, the union undertaking to bring the other bakers in that part of the city

under the agreement. By the end of August the union had not succeeded in doing this and the employers stated that they were, therefore, unable to continue under the agreement. The union then called out on strike employees in all the bakeries. The drivers, members of the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, also ceased work. Prior to 1936, bakers and drivers were members of the Food Workers' Industrial Union. On September 3, twelve of the bakeries signed the agreement and negotiations with the remaining bakery were in progress. A separate agreement for the drivers was also reported to be negotiated. The bakers' agreement was outlined in the LABOUR GAZETTE for September, 1936, page 829.

**FUR FACTORY WORKERS, WINNIPEG, MAN.**—At the end of August it was reported that twenty of the thirty-five establishments involved in this strike for a union agreement had signed the agreement but that most of the remaining firms, members of the Furriers' Guild, were operating their establishments, at least partially, claiming that large numbers of their employees were not members of the union and that some of the strikers had resumed work, also that others were being prevented from working by pickets. During September a number of pickets were reported to have been arrested on charges of assault, intimidation, etc., some being acquitted and others sentenced to terms of imprisonment. Early in September the Trades and Labour Council of Winnipeg considered calling a sympathetic strike of the locals of international unions in Winnipeg, apparently for one day, as a demonstration in favour of the principle of collective bargaining. On September 26 the Council sponsored a parade of union members for this purpose. The provincial government early in the month proposed that the Deputy Minister of Labour should meet the employers and employees separately in order to arrange a joint conference, or that a temporary joint council should be set up under the Industrial Conditions Act. The employers, however, did not accept these proposals. Earlier in the month, the Trades and Labour Council of Winnipeg had requested mediation by the Federal Department of Labour and on September 17 and 18 a representative of the Department interviewed the President of the Trades and Labour Council, the officers of the Furriers' Guild and the provincial Deputy Minister of Labour. The employers refused to negotiate with the union. At the end of September, it was reported that twenty-five of the employers had signed agreements with the union but that 150 workers were still on strike.

**FUR FACTORY WORKERS, TORONTO, ONT.**—Employees in eight establishments ceased work on August 19, negotiations for a new agreement not having been successful. The previous agreement had terminated on June 1, 1936. Between August 26 and September 10 the employers involved signed agreements providing for wage increases, and a reduction in hours from 44 per week to 40, also payment for holidays.

**TEXTILE FACTORY WORKERS (ARTIFICIAL SILK), CORNWALL, ONT.**—As stated in the LABOUR GAZETTE for September, this dispute was settled on September 3 as a result of conciliation by the Chief Conciliation Officer of the Department of Labour. Negotiations between the management and a committee of the strikers appointed by the union resulted in increases in wages, improvements in working conditions, increases in the numbers employed in various operations, and the formation of a workers' committee to confer with the management at stated intervals. The increases in wages were two cents per hour for adult male employees (in some cases the increases were five cents or more) and one cent per hour for all female employees. Medical attention for viscose operatives is to be on the same basis as in the English establishments of the company, and employees suffering from sore eyes are to be paid for the balance of the shift in which the trouble was contracted if attributed directly to the work. An agreement setting out the terms of settlement was signed. Work was resumed by a few employees on September 4, and by the others from time to time as the various units and departments resumed operations, it being expected that nearly all of the workers would be re-employed in three weeks. This would result in a supplementary time loss of nearly 15,000 days after the termination of the dispute. A number of pickets had been arrested on charges of assault, etc., but the charges were withdrawn in several cases while others were given suspended sentences. An account of the conciliation proceedings appears elsewhere in this issue.

**POTTERY WORKERS, (SANITARY WARE), ST. JOHN'S, P.Q.**—A resumption of work on September 9, pending arbitration, was agreed to by the parties involved in this dispute as the result of intervention of the provincial authorities. On September 10 the Minister of Labour announced the appointment of a Board of Arbitration to deal with the dispute.

**BUILDING WRECKERS (LABOURERS), TORONTO, ONT.**—This dispute, reported as unterminated in the September issue of the LABOUR GAZETTE, was settled on August 26, information as to

the resumption of work not having reached the Department until September. The workers involved were successful in securing the closed shop union agreement demanded, wage increases of ten cents and fifteen cents per hour being conceded as well as the forty-eight hour week. The agreement is similar to that outlined in the September issue of the LABOUR GAZETTE on page 830.

**TAXICAB DRIVERS, WINNIPEG, MAN.**—This dispute involving fourteen drivers, dismissed by one company on May 4, on account of membership in the One Big Union, was settled on September 7 when nine of the drivers were offered reinstatement, their right to belong to the union being conceded. The employer claimed that the services of the others were unsatisfactory. The employees had applied for a Board under the Industrial Disputes Investigation Act and an account of the conciliation proceedings which resulted appears elsewhere in this issue.

**RESTAURANT EMPLOYEES, TORONTO, ONT.**—This dispute, involving fourteen members of the Hotel and Restaurant Employees' International Alliance, Local 168, commencing May 1 against the dismissal of certain employees, alleged to be for union activity, appears to have lapsed by the end of September, nearly all of the strikers having secured work elsewhere. The employer had secured an interim injunction against picketing by the strikers in May, on the ground that it was in violation of their contract of employment, but picketing was thereafter carried on by others. A permanent injunction having been applied for, the union stated it would be contested. On July 10 thirty other employees, reported to be members of an independent union, joined in the strike but this union was later reported to have withdrawn from the dispute in order not to interfere with the international union. The employer is reported to have replaced most of the strikers, and the dispute has been added to the list carried elsewhere in this article where employment conditions are no longer affected but which the unions concerned have not declared terminated.

**RESTAURANT EMPLOYEES, TORONTO, ONT.**—This strike of eight employees in one restaurant demanding recognition of the Hotel & Restaurant Employees' International Alliance, increased wages, reduced hours, etc., has been reported as lapsed by the end of September. It appears that the strikers have been replaced.

**RESTAURANT EMPLOYEES, VANCOUVER, B.C.**—A settlement of the dispute involving the cooks' and waiters' local of the Hotel and Restaurant Employees' International Alliance and one restaurant in Vancouver, was reached on September 5. The strikers, who had ceased work on August 29 to enforce a demand for increased wages and reduced hours were successful in securing an agreement providing union conditions and resulting in wage increases of \$2-\$4 per week, also the forty-eight hour week.

**COAL MINERS, EAST COUTLEE, ALTA.**—Employees in four collieries ceased work on September 8 demanding recognition of the United Mine Workers of America and agreements providing for a revision of the wage scale and for working conditions as under the union agreements for the neighbouring Drumheller district. Until 1936 some of the miners had belonged to the Mine Workers' Union of Canada, the members of which voted this year to amalgamate with the United Mine Workers. Work was resumed on September 18 when the operators signed agreements with the union for the same working conditions as in the Drumheller agreement, also setting forth the contract mining rates and providing for the continuation of existing wage rates subject to changes in the Drumheller scale.

**COAL MINERS, WAYNE ALTA.**—Employees in one colliery ceased work on September 8 demanding changes in certain piece rates and the adoption of the union wage scale in the Drumheller district. As a result of mediation by the western representative of the Department of Labour, work was resumed on September 24, the employer signing an agreement with the union providing for the district wage scale.

**COAL MINERS, NEW WATERFORD, N.S.**—Employees in one colliery ceased work on September 19 demanding an increase in a tonnage rate in connection with longwall mining. Employees in an adjoining mine joined in the strike later in the day. Union officials negotiated with the management and a compromise on the rate in dispute was accepted by a vote of the miners involved. Work was resumed partially in one colliery on September 26 and fully in both collieries on September 28.

**COAL MINERS, CARBON, ALTA.**—Employees in one colliery ceased work on September 21, their request for recognition of the United Mine Workers of America and for a wage increase having been refused. Work was resumed on September 25, pending a settlement,

when through the mediation of the western representative of the Department of Labour the management agreed to meet union officials and negotiate as to wages.

**CANNERY EMPLOYEES (FRUITS AND VEGETABLES), BELLE RIVER, ONT.**—A number of the employees in one cannery ceased work on September 15 demanding increases in wages of  $7\frac{1}{2}$  cents per hour for men and  $4\frac{1}{2}$  cents per hour for women. About ninety female piece workers were indirectly involved. As a result of negotiations the increases were made, the rates for men after the change being  $32\frac{1}{2}$  cents to  $47\frac{1}{2}$  cents per hour and for women 22 $\frac{1}{2}$  cents. Work was resumed on the following morning.

**CANNERY EMPLOYEES (FRUITS AND VEGETABLES), ESSEX, ONT.**—A number of the employees on the night shift in one establishment ceased work on September 17, demanding wage increases of five cents per hour for men and two cents per hour for women. The management agreed to the changes, the new rates being 30 cents for men and 20 cents for women. Work was resumed on the next day.

**BAKERY EMPLOYEES, DRIVERS, ETC., VANCOUVER, B.C.**—Drivers employed at one bakery establishment ceased work on September 19, their demand for a union agreement not having been complied with. The drivers were paid \$15 per week plus a commission on sales. The agreement in force in one large establishment (outlined elsewhere in this issue) provides for a minimum rate of \$23 per week. The union claimed that it had presented the agreement to the employer in July but the management stated that the employees had not made any complaints prior to the strike. It is reported that bakers, etc., also sought union rates, but it is not clear that any of them ceased work but several appear to have become involved indirectly. At the end of the month a settlement had not been reached but the Deputy Minister of Labour for British Columbia was taking the matter up with the parties to the dispute.

**CAP FACTORY WORKERS, MONTREAL, P.Q.**—Employees in thirteen establishments ceased work on September 8 demanding union recognition, increases in wages and the forty-four hour week. Work was resumed on September 17 when the employers signed agreements providing for these demands. Piece rates were increased ten per cent to fifteen per cent and rates per week by \$1 to \$3, overtime being limited to ten hours per week.

**MEN'S WORK CLOTHING FACTORY EMPLOYEES, WINNIPEG, MAN.**—Employees in one establishment ceased work on September 10

demanding the reinstatement of one employee, dismissed for unsatisfactory work, whereas the union alleged discrimination. Work was resumed later in the day when the employee was taken back on probation.

BAG (COTTON AND BURLAP) FACTORY WORKERS, WALKERVILLE, ONT.—Employees in one establishment ceased work on September 28, their demand for recognition of a union shop committee and increases in wages having been

### STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
(a) Strikes and Lockouts in progress prior to September, 1936			
MINING, ETC.— Coal miners, Drumheller, Alta..	70	1,400	Commenced Aug. 14, 1936; for payment by weight instead of measurement; terminated Sept. 24, 1936; in favour of workers.
MANUFACTURING— <i>Vegetable Foods—</i> Bakery employees (bakers and drivers), Winnipeg, Man.....	125	375	Commenced Aug. 31, 1936; alleged violation of agreement; terminated Sept. 3, 1936; in favour of workers.
<i>Fur, Leather, etc.—</i> Fur factory workers, Winnipeg, Man.....	230	2,500	Commenced Aug. 11, 1936; for union agreement, increased wages and 40-hour week; unterminated.
Fur factory workers, Toronto, Ont.....	32	150	Commenced Aug. 19, 1936; for union agreement providing for increased wages and reduced hours; terminated Sept. 9, 1936; in favour of workers.
<i>Textiles, Clothing, etc.—</i> Textile factory workers (artificial silk), Cornwall, Ont...	1,753	7,000	Commenced Aug. 11, 1936; for recognition of union and increased wages; terminated Sept. 4, 1936; compromise.
<i>Non-Metallic Minerals—</i> Pottery factory workers (Sanitary ware), St. John's, P.Q..	80	560	Commenced Aug. 17, 1936; against dismissal of workers allegedly for union activity, for recognition of union, increased wages and reduced hours; terminated Sept. 8, 1936; indefinite.
CONSTRUCTION— <i>Buildings and Structures—</i> Building wreckers (labourers), Toronto, Ont.....			Commenced Aug. 14, 1936; for closed shop union agreement; terminated Aug. 26, 1936; in favour of workers.
TRANSPORTATION— <i>Local—</i> Taxicab drivers, Winnipeg, Man.....	13	65	Alleged lockout, May 4, 1936; <i>re</i> employment of union members; terminated Sept. 5, 1936; in favour of workers.
SERVICE— <i>Business, etc.—</i> Restaurant employees, Toronto, Ont.....	35	500	Commenced May 1, 1936; for reinstatement of workers allegedly discharged for union activity; working conditions no longer affected by end of September, 1936; in favour of employer.
Restaurant employees, Toronto, Ont.....	8	150	Commenced Aug. 29, 1936; for union recognition, increased wages and reduced hours; lapsed by Sept. 30, 1936; in favour of employer.
Restaurant employees, Vancouver, B.C.....	14	63	Commenced Aug. 29, 1936; for increased wages and reduced hours; terminated Sept. 5, 1936; in favour of workers.

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(b) Strikes and Lockouts commencing during September, 1936</b>			
<b>MINING, ETC.—</b>			
Coal miners, East Coulee, Alta..	300	2,700	Commenced Sept. 8, 1936, for recognition of union and revision of working conditions; terminated Sept. 17, 1936; in favour of workers.
Coal miners, Wayne, Alta.....	110	1,540	Commenced Sept. 8, 1936; for adjustment of certain contract rates and union wage scale; terminated Sept. 23, 1936; in favour of workers.
Coal miners, New Waterford, N.S.....	1,900	12,000	Commenced Sept. 19, 1936; for increase in a certain tonnage rate; terminated Sept. 26, 1936; compromise.
Coal miners, Carbon, Alta.....	75	300	Commenced Sept. 21, 1936; for increased wages and recognition of union; terminated Sept. 24, 1936; indefinite.
<b>MANUFACTURING—</b>			
<i>Vegetable Foods—</i>			
Cannery employees (fruits and vegetables), Belle River, Ont.....	86	86	Commenced Sept. 15, 1936; for increased wages; terminated Sept. 15, 1936; in favour of workers.
Cannery employees (fruits and vegetables), Essex, Ont.....	150	75	Commenced Sept. 17, 1936; for increased wages; terminated Sept. 17, 1936; in favour of workers.
Bakery drivers, Vancouver, B.C.....	38	380	Commenced Sept. 19, 1936; for union recognition and increased wages; untermiated.
<i>Textiles, Clothing, etc.—</i>			
Cap factory workers, Mont- real, P.Q.....	100	800	Commenced Sept. 8, 1936; for increased wages, reduced hours and recognition of union, terminated Sept. 16, 1936; compromise.
Men's work clothing factory employees, Winnipeg, Man...	40	20	Commenced Sept. 10, 1936; against dismissal of workers; terminated Sept. 10, 1936; in favour of workers.
Bag factory employees (cotton and burlap), Walkerville, Ont.....	41	123	Commenced Sept. 23, 1936; for increased wages and reduced hours; untermiated.
<i>Other Wood Products—</i>			
Wood factory workers (ven- eer), Scotstown, P.Q.....	150	450	Commenced Sept. 28, 1936; for increased wages and change in working conditions; untermiated.
Wood factory workers (furni- ture), Toronto, Ont.....	15	60	Commenced Sept. 24, 1936; for increased wages; terminated Sept. 28, 1936; compromise.
<b>TRANSPORTATION—</b>			
<i>Local—</i>			
Taxicab drivers, Montreal, P.Q.....	885	885	Commenced Sept. 29, 1936, to secure reduction in fees and changes in working conditions; terminated Sept. 29, 1936; indefinite.
<i>Water—</i>			
Pulpwood loaders, Merigom- ish, N.S.....	40	40	Commenced Sept. 4, 1936; for payment for waiting time; terminated Sept. 4, 1936; in favour of employer.
Longshoremen, Hamilton, Ont.	150	1,000	Commenced Sept. 5, 1936; for increased wages and recognition of union; terminated Sept. 12, 1936; in favour of workers.
Stevedores, Port Stanley, Ont.	30	30	Commenced Sept. 7, 1936; for increased wages; terminated Sept. 12, 1936; in favour of workers.
<b>SERVICE—</b>			
<i>Business, etc.—</i>			
Cleaners and dyers, Winnipeg, Man.....	80	40	Commenced Sept. 4, 1936; for union agreement and reduced hours; terminated Sept. 4, 1936; in favour of workers.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

refused after discussions during a month. The employees are members of Federal Labour Union 20303. At the end of the month a settlement had not been reached and the establishment was being picketed.

**WOOD FACTORY WORKERS (VENEER, ETC.), SCOTSTOWN, P.Q.**—Employees in one establishment ceased work on September 28, their demand for an increase in wages of ten cents per hour and a reduction of the speed of the machines not being conceded. The employer is reported to have offered a wage increase of ten cents per day. At the end of the month a settlement had not been reached but early in October it was reported that work had been resumed pending a settlement.

**WOOD FACTORY WORKERS (FURNITURE), TORONTO, ONT.**—Cabinet makers and machine operators in one establishment ceased work on September 24, demanding increases in wages of ten to fifteen per cent. On September 29 work was resumed when an adjustment in rates was made.

**TAXICAB DRIVERS, MONTREAL, P.Q.**—Following the failure of a settlement of the dispute by a committee (arranged for at the termination of the strike August 7 to August 11) the drivers again ceased work at midnight, September 28. The principal matter in dispute was the amount of the fee payable by each cab owner to an association which operated a telephone call service, cabstands, etc., but the drivers also suggested changes in the civic regulations. In the second cessation of work the independent cab operators in the city did not participate. As a result of conferences with the chief of police and the chairman of the traffic committee of the city council the drivers agreed to resume operations pending changes in the city by-laws which would enable them to secure permits individually instead of through the association

and also would provide for the general use of certain cab stands, changes in fares, etc. Work was resumed at five o'clock in the afternoon.

**PULPWOOD LOADERS, MERIGOMISH, N.S.**—Employees engaged to load a boat refused to work when refused payment for the time lost in waiting when the boat was delayed three hours by bad weather. The employer secured other workers the same day.

**LONGSHOREMEN, HAMILTON, ONT.**—Employees ceased work on September 5, their demand for increased wages and recognition of the union (independent) not being granted. On September 12 work was resumed, an agreement having been signed by the steamship companies involved providing for increases in wages from 40 cents per hour for day work to 42 cents and from 42½ cents per hour for work at night or on Sundays and holidays to 45 cents. The agreement is outlined elsewhere in this issue.

**LONGSHOREMEN, PORT STANLEY, ONT.**—Employees ceased work on September 7 demanding an increase in wages from 35 cents to 40 cents per hour, and the boat was unloaded by the crew under protest. The increase was granted on September 16 but in the meantime a boat was unloaded on September 13, pending negotiations.

**DIERS AND CLEANERS, WINNIPEG, MAN.**—Employees in one establishment ceased work for a few hours on September 4, negotiations for an agreement with their organization, a Federal Labour Union, not having been brought to a successful conclusion. The employer objected to signing it before other employers had agreed to the same conditions. Work was resumed when the employer agreed to the terms which included a provision for a forty-eight hour week.

*Industrial Environment and Health* is the title of a manual issued recently by the International Labour Office. The manual supplements a former publication of 1932—an *Encyclopedia of Industrial Hygiene*—a compendium of available knowledge on the health hazards inherent in occupations. It is intended that the manual shall serve as an account of the methods of analyses and research resorted to by industrial hygiene experts, and reports "on the methods of investigation that medicine derives from other sciences, and from physics and chemistry, in particular for the purpose of checking or testing atmospheric pressure, temperature, humidity, ventilation and lighting conditions, the quantity and

nature of dusts and harmful gases and fumes, etc. in working premises."

Substantial improvement was recorded in Canada's heavy chemical industry during 1935 when production reached a value of \$19,012,615 compared with \$16,494,139 in 1934. This gain of 15 per cent brought the value to the highest point since 1930. Eighteen factories were operating, of which 11 were in Ontario, three in Quebec, three in British Columbia and one in Nova Scotia. The average number of employees was 2,627 as compared with 2,289 in 1934. Payments in salaries and wages amounted to \$3,490,897 as against \$2,841,853.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in August was 59 and 15 were still in progress from the previous month, making a total of 74 disputes in progress during the month, involving 17,800 workers with a time loss of 76,000 working days for the month.

Of the 50 disputes beginning in August, 14 were over demands for increases in wages, 17 over other wage questions, 14 over questions respecting the employment of particular classes or persons, 9 over other questions of working arrangements and 5 over questions of trade union principle.

Settlements were reached during the month in 42 disputes, of which 13 were in favour of workers, 17 in favour of employers, and 12 resulted in compromises. In 12 other disputes, work was resumed pending negotiations.

### France

During the second week in September, a number of "stay-in" strikes similar to those noted in the July and August issues of the LABOUR GAZETTE again broke out. The textile industry in the Lille and Vosges districts was most seriously affected. A total of 76,360 workers were reported to be involved. Through government conciliation, settlements were reached in most cases. The agreement reached in the Lille textile industry provided for a wage increase of 6 per cent, while workers agreed to abandon the "stay-in" strike and made other concessions to employers.

### United States

The number of disputes beginning in July was 160 and 120 were still in progress from the previous month, making a total of 280 disputes in progress during the month, involving 116,000 workers with a time loss of 1,075,000 working days for the month.

A strike of over 3,000 lettuce workers on truck farms in California began early in September for union recognition and other demands.

The output of the biscuit, confectionery, cocoa and chocolate industries in 1935 was valued at \$41,180,949, an increase of three per cent as compared with the previous year. There were 10,446 persons employed who were paid \$9,315,563 in salaries and wages. Capital investment totalled \$37,779,319. The 234 establishments comprising this industry reported production of the following main products: chocolate confectionery in bulk, 20,762,254 pounds at \$3,743,154; chocolate confectionery, in dozen bars, 17,142,334 valued at \$5,834,873; chocolate confectionery, in packages, 7,617,258 pounds valued at \$2,407,762, sugar confectionery in bulk, 44,271,215 pounds at \$5,788,807. Biscuits, plain and fancy, 36,017 tons at \$8,700,098 and soda biscuits 12,411 tons at \$3,445,752.

At a meeting held in Halifax the new Educational Association, sponsored by the Trades and Labour Council formulated a program for the coming fall and winter season. Dalhousie University has intimated a desire to co-operate in the scheme, by offering to supply tutors in the various subjects without fee or charge. Subjects to be included in the educational program are: Economics and Political Science; Psychology; Composition, with current events of such a character as is deemed useful and informative.

These study classes will be open and available to workers generally, and it is planned to form a board of management consisting of one member from each union. An executive committee has already been selected consisting of various officers of the Association, a representative from each of the affiliated unions and three professors from Dalhousie University.

## STATISTICAL CLASSIFICATION OF DIRECT RELIEF RECIPIENTS IN CANADA

The accompanying tabular statistics, compiled by the Department of Labour, classify the number of direct relief recipients in Canada according to their economic and domestic status. As indicated in earlier issues of the *LABOUR GAZETTE*, commencing with December, 1935, the Department of Labour put into effect a new system of collecting figures from the provincial governments and municipalities, showing the numbers of direct relief recipients, classified on a basis not in use heretofore. The present tables constitute a brief synopsis of the more important features developed through the classification statistics.

With the month of August these classification statistics will be abandoned by the Department, to be succeeded by the tabulation results of the registration of direct relief recipients undertaken throughout Canada for the National Employment Commission in September. After September the registration will be kept up to date each month to provide a running index.

The following tables relate only to persons in receipt of direct relief from the provincial governments, or from municipal or other local governments, where the cost of relief is shared by the Dominion through the grants in aid made to the provinces for relief purposes. The figures do not include persons engaged on relief work where the services are remunerated in cash: neither do the tables include "transients," this term being arbitrarily defined as persons who had been resident within the reporting municipality for a period of less than thirty days.

The figures as reported for the different provinces are final, with the exception of the following:

1. Partially revised figures: New Brunswick, March and February; Quebec, February to May; Ontario, February and March; Alberta, February to April.

2. Preliminary figures: New Brunswick, April to July; Quebec, June and July; Ontario, April to July; Alberta, May to July.

The following is a summary of the phases of the relief situation dealt with in the tables:

Table I gives the total number of persons in receipt of direct relief from the provinces and/or municipalities from December, 1935, to July, 1936, by provinces. This table includes persons, whether heads of families or dependents of heads of families or individual persons living on their own.

Table II includes all employable persons sixteen years of age and over, regardless of their domestic status, together with wives and

children under sixteen years of age, dependent upon employable heads of families.

Table III includes all unemployable persons sixteen years of age and over, together with wives and children under sixteen years of age dependent upon unemployable heads of families.

Table IV includes all farmers on direct relief, together with their dependents of all classes.

Table V includes only employable male persons, regardless of their domestic status.

Table VI includes only employable female persons, regardless of their domestic status.

Table VII includes only employable persons, whether male or female, regardless of their domestic status.

Table VIII includes only employable male persons classified as heads of families.

Table IX includes only employable female persons classified as heads of families.

Table X includes only employable heads of families, whether male or female.

Table XI includes only employable male persons sixteen years of age and over who are dependent upon heads of families with whom they are residing.

Table XII includes only employable female persons sixteen years of age and over who are dependent upon heads of families with whom they are residing.

Table XIII includes only employable persons sixteen years of age and over, whether male or female, who are dependent upon heads of families with whom they are residing.

Table XIV includes only male persons, sixteen years of age and over, who are living "on their own", i.e., are not living with families and have no one dependent upon them.

Table XV includes only female persons, sixteen years of age and over, who are living "on their own", i.e., are not living with families and have no one dependent upon them.

Table XVI includes only persons, sixteen years of age and over, whether male or female, who are living "on their own", i.e., are not living with families and have no one dependent upon them.

It is to be noted in reference to the figures for New Brunswick for July, 1936, that the policy of the Government of the Province to substitute work for direct relief had become partly effective in that month.

TABLE I.—TOTAL NUMBER OF DIRECT RELIEF RECIPIENTS OF ALL CLASSES BY PROVINCES, BY MONTHS FROM DECEMBER, 1935, TO JULY, 1936

Province	Dec., '35	Jan., '36	Feb.	Mar.	April	May	June	July

## CONVENTIONS OF LABOUR ORGANIZATIONS

### Trades and Labour Congress of Canada—Confederation of Catholic Workers—Canadian Brotherhood of Railway Employees—British Trade Union Congress

**R**EPORTS were received this month concerning conventions of four labour bodies—Trades and Labour Congress of Canada, Confederation of Catholic Workers, Can-

adian Brotherhood of Railway Employees, British Trade Union Congress. Summaries of the proceedings of each convention follow.

#### Fifty-second Annual Convention of the Trades and Labour Congress of Canada

With a representative attendance of delegates, the fifty-second annual convention of the Trades and Labour Congress of Canada was held in the Mount Royal Hotel, Montreal, September 8-12, 1936. Presiding over the formal opening, Mr. George R. Brunet, former president of the Montreal District Trades and Labour Council, welcomed the visitors and delegates to the city. Mr. Raoul Trepanier, president of the Montreal Trades and Labour Council, extended a welcome on behalf of organized labour, while Mr. Leo. McKenna, acting mayor, extended the civic welcome.

##### Address of Dominion Minister of Labour

Representing the Dominion Government, the Hon. Norman McL. Rogers, Federal Minister of Labour, addressed the convention as follows:—

"It is an honour and a privilege to join with you this morning in the opening of this annual convention of the Trades and Labour Congress of Canada.

"During the past ten months I have had the pleasure of conferring on many occasions with the leaders of your organization. Sometimes I have sought advice. At other times I have received your criticism and your suggestions on questions of government policy. Even when we have not reached complete agreement, we have discussed our common problems with the utmost frankness and mutual understanding.

"This close and friendly relationship between government and organized labour is one of the most valuable aids to social progress in a democratic state. It rests fundamentally upon our common attachment to a political philosophy which respects individual freedom and accepts uncensored criticism as the one sure guarantee of healthy and progressive government. I need not remind you that in some countries organized labour has lost its independence and has become a subservient arm of the state. In other countries the future of the labour movement is dark with uncertainty. If we

value our heritage of freedom in Canada we must be prepared to defend it. It can only be preserved by constant vigilance on your part and by laws congenial to our federal institutions which will bring an increasing measure of economic security to our people.

"It is your lot and mine to hold positions of responsibility during a critical period in the history of our country. I firmly believe that we have passed through the worst of the depression and that better days are ahead. But this does not mean that we can sit quietly by and wait for the sunrise. There is need for thought and need for action. The many complex problems which have their origin in unemployment and relief will be with us for some time to come. We must face them courageously and with a steadfast faith that it is not beyond the organized power of the community to solve them. It is the view of the Government that the National Employment Commission will provide the leadership and enlist the co-operation requisite for a nation-wide attack on unemployment. I know that you will give your whole-hearted support to this national effort. The Trades and Labour Congress has made a distinguished contribution to the advancement of economic and social welfare during its long history extending over half a century. In seeking to meet the responsibilities of the office which has been entrusted to me at this time, I feel sure that I may count on the same measure of co-operation and good-will which has been extended so generously to those who have preceded me as Minister of Labour in other years.

"May I leave with you my best wishes for a pleasant renewal of old associations and a very profitable and successful convention."

##### Other Guest Speakers

Speaking for the Hon. William Tremblay, Minister of Labour, who was absent through illness, Mr. Gerard Tremblay, Deputy Minister of Labour paid tribute to the inter-

national unions as being the first organizations of workers in this country. He hoped that there would be co-operation between the unions of Ontario and Quebec for recognition of the collective agreements.

The delegates were also addressed by: Mr. E. C. Saint-Père, M.P., Hochelaga; Mr. Charlemagne Rodier, legal adviser to the Montreal Trades and Labour Council; Mr. Candide Rochefort, M.P.P., St. Mary, and Mr. F. A. Pouliot, M.M.P., Missisquoi.

### President's Address

Following the opening ceremonies, the president of the Congress, Mr. P. M. Draper, expressed appreciation of the felicitations received. Referring to the speech of the Minister of Labour, he drew attention to the words—"If we value our heritage of freedom in Canada we must be prepared to defend it"—as the key-note of the address. The president considered the present convention to be one of the most, if not the most, representative in the history of the Congress, and was convinced that the prospects for progress and better times were more favourable than at any other period since 1929.

Continuing, the president conveyed the regret of the convention at the illness of the Quebec Minister of Labour, and in thanking the deputy minister for his tribute to the Congress, expressed the hope that the promises of old age pensions and other social legislation for the province would be implemented and that labour enactments would receive speedy application from the present government.

It was the contention of President Draper that the Government should provide by law that all employees shall have the right to organize for their own protection; and that the power of the state should support the worker's exercise of his natural right to organize in labour unions of his own choice. In conclusion, the president said: "The Canadian workpeople want competent, vigorous, honest, courageous leadership; they want a truce from disruptive criticism and unworthy appeals to national, provincial and sectarian prejudice; they want their problems settled industrially, socially or politically, rather than discussed indefinitely, they want to get back on a road that leads somewhere; finally their innermost desire is to embrace a new future that will be brighter and better than the old past."

### Organizations Represented

The report of the Credential Committee, showed certificates received for 370 delegates, 43 of whom represented international organ-

izations which have affiliated the whole of their Canadian membership, 11 represented system divisions of telegraphers, 35 represented trades and labour councils, 1 represented a provincial federation of labour, 278 represented branch unions, and two fraternal delegates, one representing the British Trades Union Congress and the other the American Federation of Labor. The report was adopted, after which the various convention committees were appointed.

### Report of Executive Council

The report of the executive council referred to the legislation enacted at the last session of the Federal Parliament which directly affected labour, and also to the social and economic legislation passed by Parliament in 1935 (now before the Privy Council). Included also was a statement in regard to the annual interview with the Dominion Government, particulars of which appeared in the February, 1936, issue of the LABOUR GAZETTE.

Section 3 of the report contained a review of the first session of the eighteenth Parliament, the following subjects, among others, being dealt with at considerable length: National Employment Commission Act; Unemployment Relief and Assistance Act; Canadian National Railways; Criminal Code Amendments; British North America Act Amendments; Canadian Radio Broadcasting Act; Combines Investigation Act; Canada Shipping Act and the Bank of Canada Act.

In the 4th section of the report under the heading General Matters, the following subjects were reviewed: Relief Camps; Authority to amend the B.N.A. Act; Penitentiaries Commission; Canadian Government Merchant Marine; Canadian Coal, and Cadet Training.

The activities of the provincial executive committees and federations of labour are dealt with in the next section of the report, followed with a review of the relations with national and international organizations.

Among other subjects included were: Union Labels; *Canadian Congress Journal*; workers' right of association; unemployment among the youth of Canada; reference of social legislation to Privy Council; Royal Commissions; international peace and disarmament; democracy and freedom versus dictatorship; housing and building, and immigration.

### Report of the Committee on Officers' Reports

The Committee on Officers' Reports in submitting its report commented favourably on the subject matter contained therein and recommended its careful perusal by the mem-

bership. In connection with the relations with national and international bodies, the Committee recommended that the affiliation with the various bodies be continued and where possible be extended to other organizations. Gratification was expressed for the activities of the officers of the Congress in connection with the International Labour Conference. The action of the officers in extending an invitation to Sir Walter M. Citrine and W. Schevenels, president and secretary, respectively, of the International Federation of Trade Unions was commended. The Committee urged the whole-hearted support of all the members of the trade union movement for the official organ, *Canadian Congress Journal*.

Dealing with the subject of the workers' right of association, the Committee recommended the convening of a conference of international representatives in Ottawa in the near future to formulate plans for presentation to the Minister of Labour. Regret was expressed that the Dominion housing legislation of 1935 had not achieved the results expected and while it was possible that by amending the Act better results would be obtained, yet the Committee were of the opinion "that there are interests at work which prevent the success of the Act as at present constituted." The Committee recommended the endorsement of the actions of the officers of the Congress, as they considered an excellent showing had been made during the year. The report of the Committee was adopted.

#### Report of Secretary-Treasurer

Mr. R. J. Tallon, the secretary-treasurer, presented the financial statement for the fiscal year ending August 31, 1936, which, with the balance from the previous year, showed receipts of \$27,556.61, with expenses amounting to \$21,143.72, leaving a balance of \$6,412.89. Included in the above figures are the receipts and disbursements for the headquarters building in Ottawa. During the year the Cigar-makers' International Union of America and the International Fur Workers' Union affiliated their entire Canadian membership with the Congress. It was also announced that the Canadian Postal Employees had voted to affiliate and that the per capita tax on 750 members of that organization was received. There are now 62 international and 4 Canadian organizations in affiliation and pay per capita tax to the Congress.

The Audit Committee to which the secretary-treasurer's report was referred, reported finding the financial statement correct and their recommendation of approval was adopted.

#### Addresses of Fraternal Delegates

*Delegate From British Trade Union Congress.*—Mr. Harold Clay, fraternal delegate from the British Trades Union Congress, characterized his greeting from the membership of the British trade union movement as "a hearty and cordial message from colleagues in the old country who are co-workers with you in a great movement dedicated to the service of freedom, peace, and social justice." He reported the present trade union membership in Great Britain as numbering 3,750,000, and indicated its progress as reflected by a membership increase in the past year of 180,000, widely distributed among all sections.

Dealing with unemployment, the speaker traced the rapid development of production methods, and described the economic problem as the "paradox of poverty in the midst of plenty," adding that "poverty to-day is not only a hardship but a cause of grievance because it is unnecessary." Continuing, the speaker said: "As we in England see the problem of unemployment, we believe that the evil would be mitigated, although the problem would not be solved, by a reduction in the working hours and an increase in purchasing power. Consequently, the British movement, in association with the labour movement in other countries has played its part in the endeavour to secure the adoption of the 40-hour week." In referring to the problems arising from industrial reorganization and the substitution of one process for another, Mr. Clay cited a case in one section where changes have been made which affected not less than 30,000 men employed by a number of firms, and of these he stated "there are very few indeed for whom employment has not been found at the newer form of operation." This was accomplished through union activity and in the speaker's opinion was effective, practical service which the unions have rendered to their members. Concerning conditions at home, Mr. Clay stated: "In Britain during the past year there has been a steady improvement in wages and in many cases in service conditions. In the majority of trades and occupations in which the workers are organized, the reductions imposed during the difficult period of 1931-32 have been restored and further advances have been gained over a fairly wide range of industry." The increased cost of improved wages, salaries and conditions was stated to be over £1,000,000 per annum.

*Delegate From the A.F. of L.*—Mr. M. J. Gillooly, President of the American Flint Glass Workers' Union and fraternal delegate from the American Federation of Labor, after extending greetings from that body and the personal felicitations of President William Green,

enumerated the various laws which had been enacted during the past year which were of special interest to the working people.

Dealing with the economic situation in the United States the speaker utilized recent statistics which showed that there are approximately ten million men and women "still not absorbed by normal industries, still without jobs upon which they can depend for regular incomes." He further stated "that our effort to establish control of business in the public interest has shown us that the principle is thoroughly and practically right, and that short-comings were mainly due to administrative procedure and personnel."

In referring to the introduction of modern machinery, Mr. Gillooly cited many cases in various industries where these machines had displaced large numbers of workpeople, and declared "we cannot continually create an army of unemployed by machine displacement and regain prosperity." He considered that the jobless class in the cities and towns of the nation constitutes a menace to society.

Reference was made to the new Social Security Act, which the speaker said "marks the beginning of an effort to eliminate for the wage-earners and their families the major economic hazards of unemployment and old age dependence, as well as to safeguard the welfare of children and to provide for maternal and child help." Drawing attention to the demands made for the enactment of state and federal laws for the abolition of child labor, the speaker emphasized the great need of the same standards of protection for child life in business as is enforced in the home.

Mr. Gillooly contended that organized labour makes for industrial peace but declared that "organized labour cannot and will not admit the right of any person or any legislative body to compel the workers to remain at work when for any reason whatsoever the conditions of employment become distasteful and unsatisfactory."

*Representative of the I.F.T.U.*—Mr. Walter Schevenels, general-secretary of the International Federation of Trade Unions extended fraternal greetings on behalf of 32 affiliated national centres, the membership of these being over 14,000,000. He expressed regret that Sir Walter M. Citrine, President of the Federation who had also received an invitation to be present, was unable to attend. It was the first time the general secretary had attended a meeting of the Congress and was also the first opportunity afforded the I.F.T.U. to send an official delegate.

The delegates were warned that "labour must stand out against this economic absurdity of increasing production and reducing capa-

city of consumption, not only to safeguard their own interests but also in the interests of the welfare of the whole human community." He further observed that "Labour, internationally united, must play a great part in this fight against fascism, war danger, and economic distress."

With reference to the war in Spain, Mr. Schevenels said: "Stories, falsified and calumnious information, are circulated regarding the Spanish civil war. The world is being told that rebellion is necessary to prevent Communism and Bolshevik dictatorship. I wish to say that before the reaction started in 1934 there was no Communism in Spain, and at the present time it is ridiculous to speak of Communism in Spain, since that party got only 15 seats out of 420 in the last election." In the opinion of the speaker, "there is reason to look forward with some faith in the future, since a great part of the people in all countries are awakening and preparing to fight effectively and actively fascism, the common enemy of our liberty, democracy and standard of living." Referring to the subject of trade union unity, the general-secretary declared that all the trade union representatives from all the countries represented at London were absolutely unanimous that "international trade union unity must be attained on the pure trade union basis without any political distinctions."

### Legislative Committee Report

In the report of this committee the executive was commended for the splendid manner in which the various subjects were prepared and presented to the Dominion Government, making the matter of unemployment and its relief of first importance.

Referring to the Unemployment Relief and Assistance Act, the committee on legislation urged the delegates to see that union wages are paid on work jointly undertaken by Federal and Provincial Governments under the provisions of the Act.

Satisfaction was expressed that railway labour was to be represented on the Board of Directors of the Canadian National Railway, while the repeal of Section 98 of the Criminal Code was particularly gratifying to organized labour.

Disappointment was expressed at the continuance of salary deductions of public servants and it was recommended "that the Congress executive continue its activities towards removing this injustice." Reference was also made to the Health and Insurance Act, passed at the last session of the British Columbia Legislature as being the first of its kind in the Dominion. The committee referred to the inauguration of old age pensions in New Brunswick, thus making the payment of these

pensions Dominion wide. The provincial executives and federations were commended for pressing before their respective Legislatures the need of social legislation. The report of the Committee was adopted.

### Convention Resolutions

*Industrial Organization.*—There were thirteen resolutions submitted by various organizations in Ontario and the western provinces on the subject of "industrial organization." The action of the American Federation of Labor in expelling certain unions who were endeavouring to organize into industrial unions the workers in mass production industries appeared to give these resolutions more significance than most of the other 192 that were presented.

The Committee on Resolutions, in dealing with the resolutions on industrial organization, brought in the following report:

"Your Committee, having carefully considered resolutions Nos. 69, 71 to 79 inclusive, also Nos. 82, 83 and 86, dealing with the same subject matter, namely, industrial union organization, are of the opinion, after the most careful consideration, that the entire matter which is proposed in these resolutions is *ultra vires* of the jurisdiction of the Congress, inasmuch as such lines of demarcation are determined by our respective international organization in affiliation with the American Federation of Labor and this Congress. Therefore, it is resolved that we reiterate our position as the legislative body of Canadian International unions and refrain from action which might be considered as being injurious to the best interest of the labour movement on the North American continent."

*Ruling of President.*—Before any discussion took place on the report of the Resolutions Committee dealing with the subject of Industrial Organization, the president of the Congress gave the following explanation and ruling:

"Restrictions on the membership of the Congress are as set forth in Articles II and III of the Constitution. Broadly speaking, any union affiliated with the American Federation of Labor may join under Section 2 of Article III, while Section 5 of the same Article permits any other union to join on a two-thirds vote of a convention, providing the union is not dual to any properly affiliated organization. By-laws provide for the forming of Federal unions. It is to be noted that the Constitution does not provide that any affiliated union must be a craft union, and the Congress at all times has had as affiliates unions of either type. From this it must follow that the intention of the Constitution

never was to fix the type of internal organization of its member-unions, but to leave that matter to themselves, and to include both types in the Congress. Any change in this regard could only be effected, legally, by changing the Constitution, and hence, until the Constitution is so changed, any simple resolution of the Congress convention, aimed at the same purpose, is out of order."

Accordingly, the resolutions were ruled out of order.

*Resolution on Spanish Crisis.*—The following resolution dealing with the present crisis in Spain was unanimously adopted by the convention:

"That this Congress wishes to express to the workers of Spain our appreciation of their splendid fight in defence of their liberties and especially of their democratic institutions and government, constitutionally elected, and that this Congress places itself further on record in the interests of international solidarity as expressing to the Spanish workers our sincere interest in their struggle and extend to them our whole-hearted support in the fight for justice, freedom and peace and our hopes for an early and victorious finish."

Among the recommendations contained in other resolutions adopted were:

Creation by the Dominion Government of a housing scheme throughout the Dominion, and that the existing legislation be so amended to encourage such schemes and developments by cities and municipalities at trade union rates of pay, financed through the Bank of Canada.

Increasing of currency more in keeping with the wealth and resources of the country.

Inaugurating a policy of financing public undertakings and building homes with new currency.

Payment of dividends only on actual capital employed and prevention of inflation and over-capitalization of stock.

Refunding a greater proportion of all income collected by the Provincial Government from motor vehicle licences and gasoline taxes to the municipalities.

Establishment of a system of national control of the banking system of the Dominion.

Widening the scope of the Farmers' Creditors Act to cover city dwellers who reside in their own homes and that the Dominion Government arrange for financing all such homes at a rate of interest not exceeding three per cent.

Completion by the Federal Government of the C.N.R. Montreal terminal.

Enacting of legislation by the Ontario Government to provide for the examining and licensing of electrical workers within the Province.

Enactment and rigid enforcement of an Elevator Licence and Inspection Act by the different provincial governments.

Employment of two licensed operators in each theatre during the time the public are admitted, and that the examination of all projectionists be made more exacting, particularly as to theory and practice of projection machines.

Amending the laws of Canada so as to make the Government supreme, and amending the British North America Act to bring it in line with present day requirements.

Insertion of a clause in the Minimum Wage Act to read: "That no girl's services shall be dispensed with in industry simply because she has become an experienced worker, without the consent of the Minimum Wage Board."

Enactment of legislation providing that all workers in protected industries be subject to the fair wage regulations.

Placing of all boys under the age of 19 under the jurisdiction of the Minimum Wage Act wherever they are not already covered by trade union agreement and apprenticeship Acts.

Placing of domestic servants under the Minimum Wage Act.

Emphatic protest against subsidizing private interests in the scheme of using relief camp workers on railway maintenance work, and the use of such camp workers to do work now covered by schedule rate of pay.

Inclusion of all workers under Compensation Acts.

That the compensation boards of the various provinces have coach cleaners covered for silicosis and tuberculosis.

Appointment by the Dominion Government of a full time inspector of gears, tackles and working ways used in the port of Halifax.

Abolition of relief kitchens and a cash allowance be made to single unemployed so that they may be enabled to eat at union cafes.

Urging the Quebec Provincial Government to enact legislation in conformity with the recommendations of the Quebec Commission on Social Legislation.

Immediate enactment by the Federal Government of legislation providing for adequate unemployment and social insurance for residents of Canada who, through old age or lack of employment, are unable to properly support themselves.

Establishment by the Federal Government of a system of national health insurance similar to that in operation in Great Britain.

Opposition to the amalgamation of the two major railway properties in Canada.

Strict enforcement of penalties set out in the different industrial codes and the establishment of codes in provinces that have not such legislation.

Affiliation with city central bodies of local unions of all international organizations.

Unification of all trade union organizations the world over.

Approving the action of the International Federation of Trade Unions in endeavouring to unite all other labour organizations with the International Federation of Trade Unions, for the realization of unity and to combat war and Fascism.

Granting two weeks' holidays with pay to all employees.

Requesting the Dominion Government to assist in the observance of Armistice Day as a statutory public holiday.

Pensions for the blind.

Payment of the full amount under the Old Age Pension Act to those whose estate does not exceed \$5,000, and that same be exempt from all claim at death of pensioner, and further, that municipalities do not take into account money received by old age pensioners when issuing relief to unemployed relatives, such as son or daughter with whom the pensioner may be residing.

Pensions for all workers who have become unemployable, and pensions for workers at 60 years of age.

Uniform government regulations throughout the Dominion for the protection of the legal right of workers to organize in unions of their own choosing, without interference, intimidation, or coercion on the part of employers or their agents, and the right of workers to collective bargaining through representatives of their own choosing, together with the imposition of heavy penalties upon employers for violation of same.

The declaring of "Yellow Dog" contracts contrary to public policy and illegal and void.

That no temporary or interim injunction shall be issued in an industrial dispute until after the proper trial of any action arising out of such dispute.

The excluding from the jurisdiction of the civil courts any right to issue injunctions in actions arising out of industrial disputes.

Establishment of a six-hour day and five-day week in all industries, with at least a corresponding increase in pay to equalize any loss of earnings, so that the purchasing power of the masses will be increased through the absorption into activity of additional workpeople.

One day's rest in twenty-four consecutive hours each week for all persons employed in places of amusement and hotels and restaurants operating seven days a week in the province of Quebec.

Classification of certain construction on docks and piers as carpenter work in the fair wage schedule of the Dominion Government.

Placing of all public service employees under the operation of the Industrial Disputes Investigation Act.

Providing an extra man to ride on rear of truck trailers when in use, and the prohibiting of the use of trucks or trailers for the transportation of human beings.

Condemning the alleged introduction of a company union by the Ontario Provincial Government.

Re-establishment of the provisions in the Ontario Apprenticeship Act regarding age limit for apprentices.

National code of regulations governing the use of dangerous finishing materials, and the installation and operation of spray painting and ventilation systems.

Abolition of sand blasting.

That labour political autonomy be left in the hands of the established labour political parties.

Setting up of a Federal Ownership Commission, representative of all walks of life in Canada, with the object of controlling the resources of the nation.

The functioning of a commission in each major port in Canada.

Elimination of the operation of one-man street cars in Canada.

Forwarding a message of sympathy to Thomas Mooney in his fight for liberation.

Placing of all highway transportation under the authority and control of the Board of Railway Commissioners of Canada.

Resumption of diplomatic relations with the U.S.S.R.

Display and sale of cigars to customers in beverage rooms.

That the Dominion, Provincial and Municipal Governments be requested to purchase goods and equipment bearing the union label where the right of collective bargaining and union recognition prevails.

Appealing to all international organizations affiliated with the Congress to institute an organizing campaign in Canada.

### Election of Officers

The election of officers resulted in the reelection of the former executive, and was as follows: President, P. M. Draper, 172 McLaren St., Ottawa; Vice-presidents, P. R. Bengough, Vancouver, James Simpson, Toronto, D. W. Morrison, Glace Bay; Secretary-treasurer, R. J. Tallon, 172 McLaren St., Ottawa.

Provincial Executive Committees: Nova Scotia—W. A. MacDonald (chairman), Halifax; A. M. Sullivan, Halifax; G. A. Smith, Halifax; H. Tattersie, Springhill. Quebec—R. Trepanier (chairman,) Montreal; Omer Fleury, Quebec; Jack Cuppells, Montreal; Pierre Lefebvre, Montreal. Ontario—Ed. Walker (chairman), London; Rod Plant, Ottawa; A. Barron, Toronto; J. R. Pattison, Fort William. Manitoba—H. Kempster (chairman), Winnipeg; J. B. Graham, Winnipeg; W. B. Lowe, Winnipeg; M. L. Preston, Winnipeg.

peg. Saskatchewan—A. M. Eddy (chairman), Saskatoon; H. D. Davis, Prince Albert; A. Mose, Moose Jaw; fourth member of committee to be selected by Regina Trades and Labour Council. British Columbia—E. H. Morrison (chairman), Vancouver; F. Griffin, Vancouver, H. Pearson, Vancouver; C. E. Harrett, Vancouver.

The provinces of Alberta and New Brunswick having provincial federations chartered by the Congress, the executive officers carry on the legislative work for these provinces.

Fraternal delegate to the American Federation of Labor, G. R. Brunet, past president, Montreal Trades and Labour Council.

Fraternal delegate to the British Trades Union Congress, Carl Berg, president, Edmonton Trades and Labour Council.

Ottawa was selected as the convention city for 1937.

### Fifteenth Annual Convention of Catholic Workers of Canada

The Confederation of Catholic Workers of Canada held its fifteenth annual meeting from September 12-16 at St. Hyacinthe. More than 200 delegates were present, representing, according to the report of the President, Mr. Alfred Charpentier, some 43,000 members. Thirty new unions or federations were affiliated with the organization during the year. The Secretary, Mr. Gerard Picard, reported on the proceedings of the International Labour Conference at Geneva for which he was appointed technical adviser to the Canadian Government delegate. In an address by the new Minister of Labour for Quebec, the Honourable William Tremblay, he congratulated the Confederation on the advances made in Quebec since its organization and stated that they were largely due to the Confederation. He pointed out that a single workman could do little by himself and if workingmen wished their demands to be listened to they must organize. "For that reason I invite you to organize this province 100 per cent . . . help yourselves and we will help you. That is the policy of the Government of the Honourable Maurice Duplessis."

The officers of the Confederation elected for the following year include most of those in office last year: President, Alfred Charpentier, Montreal; first vice-president, H. Quevillon, Hull; second vice-president, E. Tellier, Three Rivers; secretary, Gerard Picard, Quebec; treasurer, Alphonse Bourdon, Montreal; directors, O. D. Paulhus, Sherbrooke; Albani Blanchard, St. Hyacinthe; J. T. Robitaille, Quebec; G. A. Gagnon, Jonquière; Charles Paquet, Montreal; O. Filion, Montreal; J. E. Labrecque, Kenogami; Albert Piché, Montreal; Alfred Lauzon, Victoriaville; R. Gilbert, Mont-

real; Joseph Landry, Thetford Mines; A. Roberge, Quebec, and P. Lavigne, St. Joseph d'Alma.

On September 12, various federations affiliated with the Confederation held their annual meetings. These included the federations covering the building trades, printing trades, textile workers, boot and shoe workers, and barbers. The question of organizing a federation of ship labourers and stevedores for the ports of Montreal, Chicoutimi and Port Alfred was discussed and a provisional committee appointed to draw up a constitution. The Catholic Federation of Asbestos Workers of Canada had held its annual meeting at Thetford Mines on September 6. Resolutions adopted by the asbestos workers and submitted to the Confederation included two of particular interest to these workers. One was to the effect that measures should be taken by the Legislature to prevent all Sunday labour in Quebec, and the other urged that stringent health laws should be passed and applied, particularly to the asbestos industry. Other resolutions adopted by the asbestos workers are similar to some submitted by other organizations and are included among those adopted by the Confederation of Catholic Workers.

The Printing Trades Federation adopted and referred to the Confederation for its approval certain resolutions, including several affecting the Collective Labour Agreements Extension Act. The printing trades expressed their opposition to a lower wage scale in the printing shops operated by the publishers of weekly newspapers than in other printing shops. They recommended, also, that in future a central labour council linking together the trade unions in one town be not regarded as a federation,

that the word "federation" should be used only to designate a group of unions in the same trade throughout the province or country and that all labour organizations should be able to obtain incorporation whether they were in the form of a single trade union, local trades council or federation covering several localities. The Federation recognized, in principle, the necessity for a single collective agreement for the whole province and recommended the appointment of a committee to prepare this agreement and to discuss it with employers.

#### *Collective Labour Agreements Extension Act*

As regards the Collective Labour Agreements Extension Act, the Printing Trades Federation adopted the following resolutions which were approved by the Confederation of Catholic Workers:

that piece-rates should be fixed under the Act as well as hourly rates of wages;

that the wage scale should be posted where those concerned are working;

that any terms of the agreement considered by the Lieutenant-Governor in Council to be in harmony with the spirit of the law should be made binding and not only the conditions as to wages, hours and apprenticeship as under the present Act;

that the definition in a collective agreement of the words "employer" and "employee" should be recognized as a legal definition;

that inspectors of any joint committees appointed to enforce an agreement should be given power to examine records and to take evidence under oath from the employer and employees in the workplace;

that employers themselves doing manual work should be required to pay at the employees' rate to the fund for the expenses of the joint committee;

that contractors should be responsible if subcontractors or middlemen do not pay their employees at the legal rate;

that a joint committee should continue to function and retain its powers after an agreement ceases to have legal effect in order that it may deal with unfinished business;

that "trade-plants" or private shops should be brought within the scope of the agreement;

that only associations of wage-earners recognized by the joint committee or signatories to the agreement should have the right to issue certificates of qualification but that an association not recognized by the joint committee should have the right of appeal to the Minister of Labour;

that a penalty should be provided for violation of the wage terms of an agreement as well as for the violation of any other conditions of the agreement made binding and that penalties should be more severe for a second and subsequent offence.

Other resolutions proposing amendments to the Collective Labour Agreements Extension Act adopted by the Confederation of Catholic Workers were as follows:

that in the construction industry all employers, and not only building contractors, should be bound by the agreement;

that certificates of qualification should be required for workmen in all places under the jurisdiction of a joint committee and not only in towns with a population of 10,000 or over as at the present time;

that section 14a should stipulate that any employer violating the wage terms of an agreement must pay as liquidated damages 100 per cent of the wage claim and not 20 per cent as at present;

that heavier penalties should be provided for the violation of collective agreements, especially for violation of the wage rates;

that every employer should be required to give the address of his workplace and any change of address during the life of the agreement; and

that special judges should be named to hear labour cases so that actions by joint committees under the Act may be more quickly disposed of.

Somewhat similar resolutions were to the effect that a special court should be established to hear cases involving wages and hours and that the Attorney-General should be asked to set up a court to deal solely with action arising from collective agreements. Another resolution advocated the amendment of section 11 of the Act. This section provides that the Lieutenant-Governor in Council may refuse to apply the Act to any industry liable to suffer, through its enforcement, serious injury from the competition of foreign countries or of other provinces. The proposed amendment which was suggested by the General Council of the Ottawa district was that the section should not apply to the construction industry.

#### *Freedom of Association*

Several motions adopted by the Confederation related to the right of workers to organize. It was resolved that the provincial Government should be asked to pass legislation giving adequate protection to freedom of association. Somewhat similar resolutions were put forward by the Montreal bakers, the General Council at Chicoutimi and the printers in Montreal to the effect that the Federal Government should be asked to amend the Criminal Code so that the dismissal of a worker on the ground of his membership or activities in a trade union should be made an offence under heavy penalty.

*Workmen's Compensation*

It was recommended that the workmen's Compensation Act be amended to include persons injured on relief works, compensation to be based on the wages earned in regular employment and to give to any injured worker the right to choose his own physician.

*Industrial Disputes*

The provincial Government is to be asked to intervene in a dispute involving any worker who has not the right to strike and to enact a compulsory arbitration Act. This latter resolution was introduced on behalf of the Quebec firemen's union.

*Holidays With Pay*

Two resolutions advocated legislation granting holidays with pay after one year's service.

*Pensions*

Resolutions concerning various kinds of pensions included the following: that the minimum age for old age pensions should be reduced from 70 to 60 years; that public utility companies should be required to provide pensions for their employees after 30 years' service, the pension to be equal to half of the average salary of the ten best years; that a mothers' allowances Act should be passed.

*Cost of Living*

It was resolved that the Dominion Department of Labour should be asked to publish more complete statistics on the cost of living in *THE LABOUR GAZETTE* so that the cost for an average family in different parts of Canada may be known as precisely as possible.

*Other Resolutions*

Other resolutions were as follows:

that no labour bills should be passed by the legislature without consulting the trade unions concerned;

that hospitals should be allowed the full cost of indigent patients so that hospital employees may be paid a fair wage, and that

hospital employees should be brought within the scope of labour legislation;

that the Bill for a two-platoon system and a weekly rest of 24 hours for firemen in cities of over 100,000 population should be passed;

that section 37 of the Industrial and Commercial Establishments Act be repealed so that an employer legally responsible for a violation of the Act should be no longer free from liability on the ground that he had no knowledge of the violation or had not consented to it;

that a provincial economic council be set up including among its members some nominated by different occupational and social groups;

that the Government be asked to publish building trades manuals for the use of persons wishing to improve their knowledge (referred to the Federation of Building Trades);

that consumers be represented on the Commission to fix the price of bread;

that the Companies Acts be amended to prevent the watering of stock, to require complete reports to be published in the *Canada Gazette* and to require some guarantee as to labour conditions;

that a program of public works be started to replace direct relief and that the wage scale on such works should be that fixed by collective agreement;

that the City of Montreal be permitted to raise the necessary funds for a housing scheme;

that under the Stationary Enginemen's Act apprentices should be required to serve twelve months instead of six before they are qualified to take charge of a steam engine;

that regulations under the latter Act be amended to prevent a woman being placed in charge of any installation of motor power;

that the regulation for the licensing of pipe-mechanics in towns of 10,000 or more should be amended to apply to towns with a population of 5,000 or more;

that the Government be asked to have lumbering carried on in the winter and not in the summer.

## Seventeenth Convention of Canadian Brotherhood of Railway Employees

The Seventeenth Regular Meeting of Grand Division of the Canadian Brotherhood of Railway Employees was held in Ottawa during the week of September 21. Approximately one hundred and fifty delegates and officers were present, Local Divisions of the Brotherhood from Charlottetown to Prince Rupert being represented. Mr. A. R. Mosher, who has been President of the organization since its establishment in 1908, was in the chair.

On the opening day, His Worship Mayor Stanley Lewis welcomed the delegates to

Ottawa, and expressed the hope that their deliberations might help to solve some of the important problems with which public officials had to deal.

Reports on the finances and membership of the Brotherhood, prepared by Mr. M. M. MacLean, Secretary-Treasurer, showed increased financial resources as well as improvements in membership during the previous three-year period.

In his presidential address, Mr. Mosher reviewed the work of the Brotherhood

since the 1933 Convention. He considered that the abolition of unemployment was an important objective of the Brotherhood, and of labour organizations generally, but that this could be accomplished only by replacing the present competitive system by one based on co-operation.

The President devoted a considerable portion of his address to the railway situation in Canada, and the efforts which were being made by certain individuals and groups to bring about amalgamation or unification, as a solution of the "problem." He stated that, since such proposals, under present conditions, would increase unemployment, the Brotherhood was strongly opposed to them.

Reports made by the Executive Board of the Brotherhood and the Board of Trustees, were presented to the Convention, and found satisfactory. Amendments proposed to the Constitution were of a minor nature, one of the most significant ones being a provision that, wherever the word "railway" or "railways" is used in the Constitution, it may be considered as embracing any form of transportation or allied industry.

Considerable time was devoted by the Convention to the discussion of resolutions, of which nearly fifty were submitted. While many of these dealt with administrative matters, there were a number of general interest. One of them referred to the employment of relief camp workers by the railways, in co-operation with the Government, at prevailing rates of wages, and it was resolved that they

be paid union wages and employed under union conditions. Another dealt with the action of the Supreme Court of Canada in ruling certain social legislation unconstitutional, it being felt that the elected representatives of the people should have the full right to interpret the Constitution and make laws in accordance therewith. Resolutions expressing opposition to railway amalgamation were passed, and the Brotherhood's policy in this respect confirmed.

At the final session of the convention, Rev. C. D. Clarke, of Prince Rupert, B.C., was invited to address the delegates. Mr. Clarke was the representative of the Canadian National Steamships (Pacific) employees on the recent Board of Conciliation and Investigation which dealt with a dispute regarding wages and working-conditions, and his address, in which he stressed the need for Labour organization and the spirit of co-operation, was listened to with great interest.

The election of the Grand Division officers and the Executive Board of the Brotherhood resulted as follows: President, A. R. Mosher, re-elected unanimously; Vice-President, J. E. McGuire, re-elected unanimously; Secretary-Treasurer and Editor and Manager of the Official Journal, M. M. Maclean, re-elected unanimously; Executive Board, F. J. Ainsborough, Ottawa; B. H. Crawford, Sydney; A. N. Lowes, Vancouver, all re-elected, and Arthur Massé, Quebec; Board of Trustees, J. McDonogh, Toronto; Geo. E. Lowe, Moncton, and A. J. Teasdale, Winnipeg.

### Trades Union Congress of Great Britain.

The Trades Union Congress of Great Britain held its sixty-eighth annual meeting at Plymouth, September 7-11, with Mr. A. A. H. Findlay presiding. About 600 delegates attended the convention representing an affiliated membership of 3,614,550, an increase of 225,000 compared with that of a year ago. In two years the affiliated membership of the Congress has increased by 320,000, reflecting a condition of more prosperous times in industry.

The President in his annual address referred to the serious situation in Spain, and events occurring in Russia and other countries. Dealing more particularly with the situation at home, the President said that from an economic standpoint, the outlook was brighter than when the Congress met a year ago. Unemployment had decreased, there being approximately half a million more insured work-people in employment now than were at work last year. Unemployment however, still remained a serious problem.

The President credited much of the present industrial activity in England to the Government's rearmament program, warning however that the "boom" conditions it had produced would inevitably be followed by a severe slump.

Referring to working conditions the President dealt with the "means test," hours of labour, conditions in collieries, and other subjects relative to the "labour problem."

Among the many resolutions passed at the four-day meeting of the Congress was one condemning the attitude of the Government in blocking proposals for the 40-hour week and called upon the General Council "to continue to press by such methods as they may deem expedient for the limitation of working hours to a maximum of 40 per week without prejudice to wages and conditions." Another adopted resolution was one dealing with holidays with pay. This resolution called upon the General Council "to take the necessary action to secure legislation making it com-

pulsory for all employers of labour to grant their employees a fortnight's holiday with pay each year, exclusive of Bank and public holidays, and including the other points covered by the Convention on Holidays with Pay, adopted at the recent I.L.O. Conference. That this shall be recommended for adoption by all local and public authorities."

The attention of the Congress was also drawn to the position of agricultural workers in a resolution, which was carried, urging that land workers "should be assured of the equivalent wages and conditions of employment and social amenities enjoyed by the best-paid workers in the towns." The resolution also demanded that any further international regulation of hours and holidays with pay should apply to agriculture as to other industries. Other resolutions brought before the Congress dealt with Workmen's Compensation, the desirability of framing an all-inclusive scheme of social insurance which would cover unem-

ployment insurance, national health insurance and pensions.

Delegates also urged that the General Council continue their pressure on the Government to implement its promise to introduce new factory legislation, and to press for the increase in the number of factory inspectors. The resolution carried in this regard, asserted that the Factory Acts were widely ignored because of "the ridiculously inadequate" number of inspectors. In the course of debate on this resolution various delegates urged that the government should in the proposed new Act introduce higher hygienic standards for factories and workshops.

A resolution demanding the raising of school-leaving age to sixteen was carried unanimously, it being stated in the course of discussion that certain employers in the North of England were using children for the purpose of lowering wages and working conditions, resulting "in a slow mental and physical deterioration" of the persons so affected.

## WORKERS EDUCATIONAL ASSOCIATION OF CANADA

### Seventh Annual Report for Session 1935-36

THE seventh annual report\* of the Workers' Educational Association of Canada (formerly of Ontario) shows that the organization has extended beyond provincial boundaries and is now national in scope. Since 1929-30 (when it was reorganized on its former provincial basis) this body has developed from a net enrolment of 425 members in 10 classes and 2 associations to 2,012 members in 43 classes and 22 associations in 1935-36. Some idea of the range of subjects studied in the classes is indicated in the report. While Economics and Economic History appear to have been prominent in many of the classes, yet a number of class programs show such subjects as Current Events, History, Psychology, Physiology, and Political Science. To a lesser extent, Sociology, Journalism, Art, Composition Finance, Foreign Affairs and Literature were found on class agenda.

Not only was progress reflected in membership statistics but in educational values the Association has definitely broadened its activities. In this respect, the report referred to the "greater demand for substantial material and a desire to acquire a knowledge of the background of the subjects than at any previous time." Continuing, the report observed:

"In Britain, the W.E.A. concerns itself with two particular types of work under different methods of control—the terminal and short courses being taken care of directly by the W.E.A. and the three-year tutorial which are organized by the W.E.A. but are controlled by joint committees of the Association and extension committees. We, in Canada, are hoping to develop within our own plan both of these schemes, which in the final analysis we believe will be in the best interests of workers' education as such.

"It is for that reason that District Associations are being urged to direct their efforts towards the formation of classes in Economics that might continue for a three-year period, taking first Economic History, Economic Theory, then Political Science or Social Theory. Our two new Associations in Quebec, one in Montreal and one in Verdun, and also our new organization in Ontario at Oshawa, have all started with this end in view. Toronto has established on a successful scale the complete three-year course in Economics and has arranged for a similar three-year course in Psychology for next Session. Peterborough and Preston last year took their first year in Economic History and propose carrying on with Theory next year, while Hamilton, Guelph, St. Catharines, and Kingston have made plans for the commencement of such a course this coming Session." (As noted elsewhere in this

\* Presented by the General-Secretary, Mr. Drummond Wren, at the seventh annual convention in Galt, Ontario, on August 29, 1936.

issue a branch association has been recently established in Halifax—page 885).

Dealing with the results achieved, the report stated that in order to ascertain if members in the second and third year course in economics were assimilating the information, a number of tests—similar to university term examinations in second and third years—were given. These tests, the report stated, "have proven conclusively the worth of our classes."

*Labour Research Institute.*—The report reviewed the work of the Labour Research Institute (organized in 1935) and referred to the series of seven bulletins issued on industrial and labour subjects (references to these bulletins have appeared from time to time in the *Labour Gazette*). The value of this service, as well as that of the Industrial Law Research Council, is indicated by the general-secretary as follows:

"In the Labour Research Institute and the Industrial Law Research Council, we have all the machinery and talent to provide labour with competent advice on important legal matters. And the legal, social, and economic data which could be assembled by the Institute and Council, together with conclusions reached as to the unsatisfactory nature of existing labour law or social legislation would supply the material necessary to launch and carry through an energetic and effective campaign for desirable legislative reform and amendments. At present there are but twenty trade unions that have become members of the Institute, all but two of which are Toronto organizations. Because of its great value to the Labour Movement and further because of the favourable reaction it would create towards our educational work, I would strongly urge every District Workers' Educational Association to become active in the formation of Labour Research Institutes in their respective localities."

*Agricola Study Clubs.*—Extension of educational facilities to the agricultural worker had been inaugurated as an experiment through the medium of Agricola Study Clubs. A total of eleven bulletins and lectures was supplied the membership in these clubs. Instead of attempting to organize and conduct clubs under the direction of the Association, it has been decided to provide educational material to existing organizations at a minimum fee. Experiments with Agricola Study Clubs and radio talks, the secretary reported, "bring us to the conclusion that the development of the study circle should play an important part in our work in the future." In this respect, the success of adult education, developed by the study club plan of St. Francis Xavier University, was emphasized.

*Summer School.*—Included in the report was a summary of the program of the 1936 Summer School, conducted for a period of ten days, and featured by lectures and discussions on subjects related to the work of the Association.

### I.L.O. Year Book, 1935-1936

The International Labour Office Year Book, 1935-1936, has been issued recently. This publication, which has now reached its sixth year of issue, aims at providing a complete catalogue of the salient events which have taken place in the social field throughout the world during the period it covers. The earlier issues contained statistical tables scattered through the various chapters but it was found preferable to group them systematically together, first in a special arrangement and later in a separate volume. With the present issue this separation has become permanent.

The survey of important social events contained in the latest issue of the I.L.O. Year Book covers the year 1935 and the first months of 1936. The different chapters of this volume deal with economic development, conditions of work, social insurance, remuneration of labour, unemployment, employment, migration, workers' living conditions, workers' general rights and special problems of certain categories of workers.

At the final session of the Saskatchewan immigration and settlement convention held in Saskatoon recently, it was decided to make definite requests to the Dominion Government to negotiate for a resumption of immigration to Canada. A resolution was unanimously adopted requesting the Saskatchewan Government to notify the federal government that Saskatchewan was ready to receive 5,000 British immigrant families during the next five years.

A new agreement under which the Dominion and Quebec governments will each contribute fifty per cent of \$5,250,000 to be spent on relief works in the Province of Quebec was entered into in September. The agreement was negotiated in conformity with the Unemployment Relief and Assistance Act of 1936, being on the same basis as those existing between the Dominion and other provinces. The works to be performed under this agreement are being undertaken for the purpose of relieving unemployment and as in former agreements with the Province, it is stipulated that there shall be no discrimination because of political affiliations or other considerations save only that of need.

## MINIMUM WAGES IN ONTARIO AND QUEBEC

### Orders Issued by Provincial Minimum Wage Boards

#### New Orders Governing Retail Stores and Hairdressing Establishment.

THE Ontario Minimum Wage Board has recently gazetted (September 5) two new orders governing retail stores and hairdressing establishments.

#### ORDER No. 6.—Retail Stores

This Order (effective from November 1, 1936) replaces four previous Orders (Nos. 3, 6, 10 and 29) governing retail stores in municipalities in different population groups and departmental stores in Toronto. The

new Order makes applicable the 1934 amendment to the Minimum Wage Act (LABOUR GAZETTE, May, 1934, page 436) stipulating that the minimum wages established by the Board should apply to a 48-hour week, or a 50-hour week, or a 54-hour week—according to the size of the municipality—and that the hourly rates should be paid for time worked in excess of these hours.

The order provides that no female employee, or male when replacing a female, in a retail store shall be paid wages less than those set forth in the following schedule:

POPULATION GROUPS	EXPERIENCED EMPLOYEES	INEXPERIENCED EMPLOYEES (Over 18 years)	INEXPERIENCED EMPLOYEES (Under 18 years) (See explanation below)
A. City of Toronto.....	\$12.50 per week.....	6 months at \$10.00 per week..... 6 months at 11.00 per week..... Then 12.50 per week.....	6 months at \$8.00 per week (16 years and under). 6 months at \$9.00 per week (17 years). Then the rates for inexperienced adults.
B. Ottawa, Hamilton, London, Windsor.	\$12.00 per week.....	6 months at \$10.00 per week..... 6 months at 11.00 per week..... Then 12.00 per week.....	6 months at \$8.00 per week (16 years and under). 6 months at \$9.00 per week (17 years). Then the rates for inexperienced adults.

Minimum rates in groups A and B are for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

An employee reaching the age of eighteen years without experience in selling goods may be paid at a minimum wage rate of not less than \$11.00 per week during the first six months as a saleswoman, at the end of which six months she shall receive the full minimum.

C. Cities, Towns, Villages and Unincorporated Urban Communities of from 10,000 to 50,000.	\$11.00 per week.....	6 months at \$ 9.00 per week..... 6 months at 10.00 per week..... Then 11.00 per week.....	6 months at \$7.00 per week (16 years and under). 6 months at \$8.00 per week (17 years). Then the rates for inexperienced adults.
---	-----------------------	--	--

Minimum rates in group C are for a maximum of 50 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 50.

D. Cities, Towns, Villages and Unincorporated Urban Communities of from 4,000 to 10,000.	\$10.00 per week.....	6 months at \$ 8.00 per week..... 6 months at 9.00 per week..... Then 10.00 per week.....	6 months at \$6.00 per week (16 years and under). 6 months at \$7.00 per week (17 years). Then the rates for inexperienced adults.
E. Towns, Villages and Unincorporated Urban Communities of from 1,000 to 4,000.	\$9.00 per week.....	ALL INEXPERIENCED 6 months at.....\$6.00 per week 6 months at.....7.00 per week 6 months at.....8.00 per week Then.....9.00 per week	
F. All places below 1,000.	\$8.00 per week.....	ALL INEXPERIENCED 6 months at.....\$6.00 per week 6 months at.....7.00 per week Then.....8.00 per week	

Minimum rates in groups D, E and F are for a maximum of 54 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 54.

The regulations governing conditions of work, etc. are set forth as follows:

**Application.**—This Order governs the wages of all female employees in retail stores as defined herein including the selling force, stock room employees, cashiers, parcelers, messengers and any employees performing special duties or employed by concessionnaires, but not including office workers, restaurant employees, and any other employees who are covered by separate Orders.

**Definitions.**—(a) "Retail Store" means any establishment which sells goods or merchandise of any kind direct to consumers, and for the purpose of this order, includes exhibition display and advertising booths except those located at the factory or manufacturing plant.

(b) "Unincorporated Urban Community" shall mean and include any urbanized section or adjacent sections of a township or townships which is subdivided into building lots, in which the majority of the residents are engaged in pursuits other than agriculture, and which is not incorporated as a separate municipality, such as industrial areas and residential subdivisions on the outskirts of cities residential and business areas in connection with mining developments, etc. (This is a new section and is particularly applicable to northern Ontario mining areas).

(c) "Population" is the population according to the latest decennial census of the Dominion Government.

**Experience.**—(a) "An experienced employee" is an employee, over 18 years of age, who has been employed by one or more employers for a period of one year or more in any branch of work covered by this Order.

Employees transferred from one branch of work to another may not have their wages reduced because of inexperience in the new work, without the approval of the Board.

(b) "Inexperienced employees under 18"—Only girls without any previous experience in retail stores, who commence employment before their seventeenth birthday may be paid at the rates prescribed for the first six months (16 years), in places of over 4,000 population. They must be increased to at least the rates prescribed for the second six months period (17 years) after six months employment and in a further six months, they become subject to the rates prescribed for inexperienced adults.

Girls commencing between their seventeenth and eighteenth birthday in places of over 4,000 population must be paid not less than the rates prescribed for the second six months (17 years) and after six months employment be subject to the rates for inexperienced adults.

**Part-time and Short-time Work.**—Employees who are engaged for busy periods only or as substitutes for regular workers and who regularly work not more than ten hours per week, must be paid at hourly rates which are not less than the full minimum hourly rates for experienced employees, regardless of age or length of employment. Regular full-time employees, when on short time, and part-time employees who regularly work for more than ten hours per week, may be paid on an hourly basis at rates equivalent to the weekly rates prescribed above, the hourly rate being determined by dividing the weekly wage by the normal

weekly work period for each female employee, or by the maximum weekly work period, as indicated above whichever is the smaller figure. A part-time employee shall be entitled to the increases in pay as scheduled above, after the same manner and after the same lapses of time, as a full-time employee, provided she works regularly more than ten hours per week.

**Overtime.**—Overtime must be paid for at proportionate hourly rates determined as outlined in the preceding paragraph.

**Deductions for Absence.**—No deduction below the minimum wage line for absence shall exceed the value of the time lost, reckoned on an hourly basis determined by dividing the weekly wages by the normal weekly work period for female employees.

**Commission Earnings.**—The section, relating to commission earnings, is new and provides that the weekly earnings of an employee working on a commission basis or guaranteed rate plus commission or bonus, must not fall below the prescribed minimum rate as set forth in the schedule.

**Maximum of Inexperienced Employees.**—A change has been made in the section relating to the permitted maximum of inexperienced workers. In former Orders, the total number of employees paid as inexperienced was not to exceed twenty-five per cent of the total working force. By the present Order this has been increased to forty per cent.

There are the usual stipulations respecting the maintenance of records, available to inspection, and as regards penalties (by fine or imprisonment) for violations of the Order.

#### ORDER No. 42.—*Hairdressing, manicuring and beauty culture*

This Order (effective from October 1, 1936) replaces a previous Order No. 42 (which governed establishments in Toronto) and Order No. 44 (for establishments in cities over 30,000 population except Toronto).

As in the Retail Store Order (No. 6) immediately preceding, it also makes applicable the 1934 Minimum Wage Act amendment respecting hours. Other new features include the sections defining "Unincorporated Urban Community" and the section concerning commission earnings (for both of which see Order No. 6 preceding). In the new Order, rates are established for apprentices indentured under the Apprenticeship Act.

The following schedule sets forth the rates for female employees (or male employees replacing female employees) in beauty parlours, manicuring or hairdressing establishments, "or in other establishments or places of business where the same type of work is performed" except in places under 5,000 population.

POPULATION GROUPS	INDENTURED APPRENTICES Minimum rates fixed under The Apprenticeship Act	ALL OTHER EMPLOYEES Minimum rates fixed under The Minimum Wage Act
A. City of Toronto.....	First 3 months — Nil Second 3 " — \$ 5.00 per week Third 6 " — 7.00 per week Fourth 6 " — 9.00 per week Thereafter — 10.50 per week — 12.50 per week	\$12.50 per week.
B. Ottawa, Hamilton, London, Windsor.	First 3 months — Nil Second 3 " — \$ 5.00 per week Third 6 " — 7.00 per week Fourth 6 " — 9.00 per week Thereafter — 10.50 per week — 12.00 per week	\$12.00 per week

Minimum rates in groups A and B are for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

C. Cities, Towns, Villages and Unincorporated Urban Communities of from 10,000 to 50,000.	First 3 months — Nil Second 3 " — \$ 4.00 per week Third 6 " — 6.00 per week Fourth 6 " — 7.50 per week Thereafter — 9.00 per week — 11.00 per week	\$11.00 per week.
---	--	-------------------

Minimum rates in group C are for a maximum of 50 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 50.

D. Cities, Towns, Villages and Unincorporated Urban Communities of from 5,000 to 10,000	First 3 months — Nil Second 3 " — \$ 4.00 per week Third 6 " — 6.00 per week Fourth 6 " — 7.50 per week Thereafter — 9.00 per week — \$10.00 per week	\$10.00 per week.
---	--	-------------------

Minimum rates in group D are for a maximum of 54 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 54.

**Application.**—This Order governs the wages of all female employees throughout the Province who are engaged in the hairdressing or beauty culture business, that is to say, in performing such operations on patrons or customers who pay for services rendered. The rates indicated for indentured apprentices are the minimum rates approved by the Ontario Apprenticeship Board for apprentices indentured under the Apprenticeship Act. Every employee who is not indentured under The Apprenticeship Act must receive the full minimum rates of pay as set forth above under the heading "All other employees."

**Part-time and Occasional Workers.**—Employees who are engaged for busy periods only, or as substitutes for regular workers, and

those who work for less than the full daily or weekly work period prevailing in the shop or establishment, must be paid at minimum rates equivalent to the above rates, the hourly rate being determined by dividing the weekly wage by the number of hours regularly worked per week in the establishment concerned, or by the maximum weekly work period as indicated above, whichever is the smaller figure.

In all other respects—"Overtime," "Deduction for Absence," "Commission Earnings," "Waiting Period," "Records" and "Penalties"—the Order is the same as Order No. 6 preceding.

### Minimum Wage Order Governing Female Employees in the Electrical Glass and Metal Trades in Quebec

In the *Quebec Official Gazette*, dated September 12, 1936, reference is made to an Order of the Minimum Wage Board governing female employees and males when replacing females in any class of employment in the Electrical, Glass and Metal Trades. The order reads as follows:—

1. *Minimum:* No wage shall be less than set forth in the following table:

Zone I.—City and Island of Montreal, and a radius of 10 miles around and beyond the Island.

15 per cent of the employees at not less than 15 cents per hour.

20 per cent of the employees at not less than 20 cents per hour.

65 per cent of the employees at not less than 25 cents per hour.

Zone 2.—Province of Quebec, with the exception of the city and Island of Montreal and a radius of 10 miles around and beyond the Island.

15 per cent of the employees at not less than 13 cents per hour.

20 per cent of the employees, at not less than 18 cents per hour.

65 per cent of the employees at not less than 23 cents per hour.

(a) The employee's wages shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. Said wages shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money enclosed in the envelope; same must be initialed by the person who pays the employee.

(b) All employees are covered by this Order, no matter what occupation they fill or the work they perform. The system of periodical changes from piece rates to hourly rates, or vice versa, for same operation, is prohibited as such changes permit an illegal reduction of wages; the piece rates shall be uniform for all employees performing same operation.

(c) To establish percentages, the wages of each employee shall be computed on four (4) consecutive weeks.

(d) The time of experience of an employee shall be taken into consideration in her classification.

2. *Hours of Work.*—The total of working hours cannot in any case exceed 55 hours

per week unless a special permit has been obtained from the Industrial and Commercial Establishment Inspection Department.

3. *Deduction for Absence.*—No deduction below the minimum wage line for absence shall exceed the value of the time lost.

4. *Waiting Time.*—Any employee required to wait on the premises shall be paid for the time thus spent.

5. *Exemption.*—The Board may grant permits of variation or suspension of any of the time thus spent.

6. *Discharge of Employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act. All complaints are strictly confidential.

7. *Reference.*—No employer shall refuse to give employees a letter of reference when they leave their employ, if request is made for same.

8. *Uniforms.*—If a special uniform is required it shall be furnished and laundered by the employer without cost to the employee.

9. *Penalties.*—Any violation of this Order is punishable by fine or imprisonment.

10. *Posting.*—Each establishment shall keep a copy of this Order posted in a conspicuous place where the employees have access.

11. This Order shall come into force and be effective on November 14, 1936.

## LABOUR AND INDUSTRY IN ALBERTA DURING 1935-36

### Annual Report of Bureau of Labour

THE annual report of the Bureau of Labour of Alberta for the fiscal year 1935-36, presents a review of the administration of the Factories Act, the Minimum Wage Act, the Trade Schools Regulation Act, The Theatres Act and the Steam Boilers Act up to March 31, 1936. In addition to these Acts the Bureau also administers The Industrial Standards Act which was passed during the 1935 session of the Alberta Legislature.

*Statistics of Trades and Industries.*—The report indicates a slight improvement over the previous year although the volume of employment still remains far below normal. Returns from 2,733 firms included 42,284 males over eighteen, 302 under that age; 7,617 females over eighteen and 99 under eighteen, and 563 apprentices.

Salaries and wages totalled \$58,836,019.82 of which \$50,813,529.58 was paid to wage earners as compared with \$53,863,690.73 and \$46,464,550 respectively in the preceding fiscal year.

Marked fluctuations due to seasonal employment and unemployment are indicated when employment returns are considered by months, March being the month of least employment when 36,204 were reported as working and October the month of greatest employment, 42,375 males then being employed.

Individual industries also reflect fluctuations in employment, which, according to the report, again demonstrates "that for unskilled work in the various industries men interchange from one to the other."

A small, but steady increase is reported in the employment of female workers.

According to tabular statistics contained in the report, of the 42,284 male employees over eighteen years of age, the largest number (5,179) were employed in the wage group between \$30 and \$34.99 per week. There were also 2,387 male employees receiving between \$35 and \$39.99 per week; 1,641 between \$40 and \$44.99; and 1,755 at \$50 and over. Of the 7,617 female employees over eighteen years the largest number (1,990) were receiving between \$12 and \$12.99 per week.

Referring to hours the report shows that 20,319 employees worked 48 hours per week, 2,870 worked 45 hours per week; 7,322 worked 44 hours; 4,365 worked 40 hours. There were also 2,507 working 54 hours per week; 809 working 56 hours per week; 1,834 working 60 hours; and 182 working 70 hours per week. Of the 2,773 firms reporting, 2,450 of them operated fifty-two weeks.

*The Labour Disputes Act.*—Two applications for the appointment of Boards of Conciliation are reported, one from the Typographical Union, Local No. 449, Calgary, in respect of an alleged dispute between the local union and the Calgary Herald Limited; while the second was from the Operating Engineers, Local No. 857, Edmonton, in respect of an alleged dispute between the local union and the Northern Alberta Dairy Pool, Limited, of Edmonton. In connection with the first application, a number of conferences were held by officials of the Provincial Government with representatives of the two parties, it being found that a new organization had been formed by a number of the men employed by the Calgary Herald Limited at the time of the dispute, which union had entered into an agreement with the Company and were continued in employment. The conferences failed to produce any change in the situation and no Board was established.

In respect of the second application, the requirements of the Act that no Board be established unless ten or more persons are affected were met, as only three persons were affected, consequently no Board was established.

*Factories Act.*—A total of 4,110 inspections was made of 3,774 factories, hotels, offices and office buildings, under the Factories Act, there being 14,132 males and 6,672 females employed in the inspected establishments.

Recommendations relative to safety, hours and wages and the employment of children to the number of 1,221 were made, all of which were carried out by the employers.

There were 336 inspections of 314 elevators in connection with which 242 safety recommendations were made. Of the elevators, 88

were passenger, 210 freight, 13 Humphreys, and 3 escalators.

*Theatres Act.*—Film reports dealt with during the year under review numbered 20,491, the bulk of motion picture prints in poor physical condition being largely confined to three or four distributing companies.

An increase in the number of motion picture machines inspected and the volume of repairs recommended is reported. Ten projectors were condemned as defective and were either completely rebuilt or replaced by new equipment.

Plans for fifty-three new entertainment halls were surveyed and licences recommended.

*Boilers Act.*—An increase during the year, of the number of boilers and pressure vessels included under this Act is reported, indicative of increasing industrial activities. In all 2,775 inspections were carried out during the year. Total revenues derived from inspections and examinations of candidates for engineers certificates amounted to \$20,744.34. The number of certificates issued to engineers, etc., amounted to 375.

*Employment Offices.*—The report of the Director of provincial employment offices indicates that heavy demands have been made upon the facilities of the Employment Service due to continued serious unemployment.

During the year under review 49,425 applications were made by men, 27,598 receiving placements. In the women's section there were 7,558 applications, 5,376 vacancies and 4,872 placements made.

Placements in the male section were recorded as 11,833 being sent to farms; 267 to building construction; 81 to clerical work; 263 to personal and domestic work; 7,857 to general labouring; 921 to lumbering; 207 to railroad construction and operation; 481 to mining; 596 to miscellaneous; and 4,953 to casual employment.

In the female section, 1,102 were sent to farms; 15 to clerical positions; 2,418 as domestics; 34 to miscellaneous occupations, and 1,303 to casual employment.

Tabulations of single men sent to relief camps indicated that these were distributed as follows: 1,180 to camps operated by the provincial government and 4,731 to camps operated by the Department of National Defence. There were 5,700 families assisted by direct relief at a total cost of \$2,669,958.04.

*Minimum Wage Act.*—Under this Act the report states that "a total of 2,915 inspections were made of 2,563 businesses in which were employed 6,803 experienced females and 577 learners." During the year, 534 orders for adjustment of wages were made, 48 for the

adjustment of hours, and 33 for adjustment of staff, so that not more than 25 per cent would be in receipt of apprentices' wages.

Twenty-three court cases were taken against employers for failing to pay minimum wages. Twenty convictions were obtained and three were dismissed, and in five instances appeals were taken by the defendants to a higher

court, three of these being allowed and two dismissed.

A number of permits were issued for overtime to be worked to take care of emergencies that had arisen. In respect of wage adjustments, inspectors of the Minimum Wage Board collected a total of \$5,205.49 arrears of wages for female employees.

## WORKMEN'S COMPENSATION IN BRITISH COLUMBIA AND ALBERTA IN 1935

### British Columbia

ACCORDING to the nineteenth annual report of the Workmen's Compensation Board of British Columbia, accidents reported in 1935 exceeded the number reported in 1934 by 18 per cent. The number of accidents reported during each of the past seven years was as follows: 36,750 in 1929; 33,285 in 1930; 25,877 in 1931; 19,101 in 1932; 18,274 in 1933; 22,354 in 1934, and 26,280 in 1935. Fatal accidents reported during those years were as follows: 253 in 1929; 277 in 1930; 125 in 1931; 106 in 1932; 97 in 1933; 116 in 1934; and 146 in 1935. Minor accidents to the number of about 2,000 were also reported during the year, but no medical attention was given, nor were claims made in such cases, first-aid attention being considered sufficient.

Since the Workmen's Compensation Act came into effect in British Columbia nineteen years ago, claims to the number of 464,261 have been filed or an average of 24,435 a year. Death resulted in 3,787 of the accidents which occurred, and 11,201 of the other workmen injured were left with permanent, total or permanent partial disability. As a result of the fatal accidents there were at the end of 1935, 879 widows, 883 children, 121 dependent mothers, 26 dependent fathers, and 26 other dependents in receipt of regular monthly allowances under the Act.

There were also 1,823 workmen either partially or totally disabled for life who were in receipt of monthly cheques. Approximately 1,800 temporarily disabled workmen were in receipt of time-loss compensation at the end of the year reported on. Only 505 workmen, or about 4½ per cent of those who received compensation for accidents in 1935, were shown to carry any kind of accident insurance.

Time-loss cases in 1935 arose out of the various classes of industry as follows: Lumber industry, 43 per cent; general manufacturing and delivery classes, 15 per cent; metal-mining, 13 per cent; railroading groups, 4

per cent; coal-mining, 4 per cent; construction work, 4 per cent; municipal work, 3 per cent; and all other classes, 14 per cent. Of those filing claims, 65 per cent gave their nationality as British or Canadian. Fifty-two per cent of those injured were married. Claims were made by 191 women injured in industry.

Disbursements made during 1935 included \$1,004,002.16 paid as compensation to workmen; \$506,741.27 expended on medical aid, for physicians, hospitals, drugs, etc. In addition, the total amount paid to beneficiaries as pensions on account of permanent disabilities and fatal accidents was \$1,133,381.03. Revenue for the year under review totalled \$4,612,870.88 of which employers contributed \$2,354,916.99 in assessments and interest and \$297,007.06 for medical aid; from workmen, \$231,931.31 was collected for medical-aid dues. In the capitalized reserve fund at December 31, 1935 there was \$8,869,533.09.

Referring to accident-prevention the report points out that amended safety regulations covering work carried on in the main industries were adopted and brought into effect early in the year. Circular letters dealing with specific hazards were sent to the classes of employers concerned "Placards were prepared dealing with safety matters in certain industries and were distributed to employers for posting in their plants and places of employment. All accidents reported are checked from an accident-prevention view-point. The plant is visited, if possible, and instructions are given for rectifying the hazardous condition. A follow-up system is utilized to ensure compliance with such instructions."

First aid activities have been continued during the year under review, and a marked improvement in the quality of first-aid service being rendered is reported. This improvement is attributed to the training given in organized classes in advanced first aid, and the class of men taking the course and the positions they are given in the plants or establishments in which they work. The report

states that "many employers are now realizing that a well-trained first aid man, equipped with the necessary kit and quarters, can be of real service in investigating accidents reported...." thereby "...keeping down the

cost of accidents and in preventing unnecessary labour turnover. The first-aid equipment required under the Act is carefully checked by safety inspectors."

## Alberta

The eighteenth annual report of the Workmen's Compensation Board of Alberta indicates that during 1935 there were 11,058 accidents, an increase of 1,450 compared with the number reported in the previous year. Fifty-nine of these accidents were fatal and 72 resulted in varying degrees of permanent disability. The total accident cost, that is, compensation pension awards and medical attention was \$1,089,099.70 for the year.

The report shows that since August 1, 1918, the date in which the Act became effective, \$9,826,334.89 has been paid to injured workmen and their dependents. In addition, the sum of \$2,714,150.70 has been paid for hospital and medical treatment, making a total cost for compensation, hospitalization and medical aid over the last seventeen years of \$12,540,485.59.

During 1935, \$842,664.35 was contributed by employers to the Accident Fund through assessments levied upon the wages paid to their workmen as compared with \$666,237.20 for the year 1934, an increase of \$176,427.15. Outstanding assessments as at December 31, 1935, were \$98,792.71 as compared with \$76,126.95 at the end of the preceding year. Contributions from workmen for the Medical Aid Fund amounted to \$236,651.07 as compared with \$202,316.34 for 1934.

The cost of administration, including the cost of maintaining mine rescue cars and stations and administration of The Electrical Protection Act was \$116,031.55, compared with \$111,202.42 for the year 1934.

The sum of \$629,915.59 was awarded in pensions compared with \$325,733.81 during the preceding year; and the total amount to the credit of the Pension Reserve Fund at the end of 1935 was \$3,183,686.33. Payments from this fund for the year under review amounted to \$413,334.63.

Statistics for the year under review are summarized in the report as follows:—

Number of employers within the scope of the Act as at December 31, 1935, 4,781; number of accidents reported during 1935, 11,058; number of accident claims, not finally disposed of as at December 31, 1934, 798; number of claims disposed of by award of Pension or payment of compensation, 4,813; number of claims disposed of by payment only of

account for medical aid, 4,183; number of accidents disposed of for which no application for compensation was received, 92; number of accidents disposed of on which no compensation was due, 1,213; number of claims on which further payments have to be made, 784; number of accidents awaiting further reports and on which no payments have been made, 771.

Of the 11,058 accidents occurring in 1935, fifty-nine were fatal, 72 involved some permanent disability, and 10,927 were of a temporary character. "Falling objects or bodies" was again the most frequent cause of accidents followed by "handling objects."

The time loss in non-fatal claims totalled 170,710 days. The average time loss in permanent disability cases was 109.75 days and in temporary disability cases 33.36 days. The average age of injured workmen was 36.88. The number of accidents to minors, under 20 years of age was 626 and to those 60 years or over 272.

The report also contains references to the work carried on by the Mine Rescue and First Aid Branches at various centres including details of the number of men given training and the extent and condition of equipment in use at the stations.

The annual review of the administration of the Electrical Protection Act is also included in the report, a still further improvement in the electrical industry being recorded. An increase in employment, especially in interior wiring is reported, the building program of the Federal Government being given as one of the principal contributing factors in this improvement.

The General Council of the United Church meeting in Ottawa recently endorsed the principle of collective bargaining in industry. The Council also asserted that it was an obligation of the community to further plans of housing schemes and slum clearance. It is recommended to Church conferences the establishment of standing committees on industrial relations for the study of "type industries within their bounds," dissemination of labour law knowledge, and the promotion of better understanding between employers and employees.

## NEW PENSION PLAN OF CANADIAN PACIFIC RAILWAY COMPANY

THE Canadian Pacific Railway Company recently announced a change in its Pension Plan to become effective January 1, 1937. Since January 1, 1903, the company has maintained a system of voluntary pensions without contributions from the employees, in order to provide for those who, after many years spent in the faithful performance of their duties, retire from active service. (The Company's original plan was reviewed in the LABOUR GAZETTE for April, 1928, page 381).

The new plan calls for contributions from eligible employees. According to a statement issued by the President of the Company this innovation is being made because "changes in conditions that have since taken place, more particularly in recent years, have made it clear that the continuance of the present system would eventually impose upon the Company financial burdens which it would be unable to bear." This change has been under consideration for some time and the new plan is being inaugurated in such a way as to "adhere as closely as possible to the underlying principles of the present pension system, and to incorporate therein suitable provisions for contributions by the officers and employees, and such other changes as are necessary to meet the altered conditions."

A new code of rules and regulations has been prepared by a joint committee, composed of four representatives appointed by the company and four chosen by the General Chairman of the organized classes of employees. The new code has been adopted by the Directors of the Company and on January 1, 1937, will replace that at present in effect.

After defining eligibility, casual employment, the position of employees in ocean services and employees of acquired companies, the regulations state that "every eligible employee in the service of the Company on December 31, 1936, and continuing in the service shall be entitled to elect on or before December 31, 1937 (but not thereafter) to become a contributor under the pension scheme." Provision is also made that every eligible employee entering the service on or after January 1, 1937, "shall become a contributor under the pension scheme."

**Basis of Contributions.**—Dealing with contributions, the rules and regulations provide that every eligible employee in the service on December 31, 1936, on becoming a contributor to the scheme shall make contributions equal to 3 per cent of salary or wages

learned. This also applies to persons entering the employ of the Company on or after January 1, 1937. Contributions are to be deducted currently, and are to cease with the month in which the employee attains the age of sixty-five years. It is also provided that, when before retirement on pension, the service of a contributor is terminated for any reason, an amount equal to the contributions made by him will be refunded to him or in the case of his death to his legal representatives; however, contributors are not to be entitled to a refund during a temporary lay-off unless his service is terminated during that time.

**Pension Trust Fund.**—A trust fund is to be established into which all contributions by employees will be deposited. The Canadian Pacific Railway Company will be the trustee, it being provided that the trust fund shall not form any part of the revenues or assets of the Company. The rules and regulations also definitely state what charges shall be met out of the trust fund.

**Non-Contributing Employees.**—Provision is also made that the Company will pay in to the trust fund monthly, an amount equal to 25 per cent of any allowances made in respect of eligible employees in the Service on December 31, 1936, who do not agree to contribute to the new scheme before the date set for election. Such employees are to be granted a pension allowance calculated as under the old pension scheme, that is an allowance of four-fifths of 1 per cent of the average monthly pay received for the 10 years preceding January 1, 1937. It is further provided in connection with non-contributing employees that no pension allowance granted shall be less than twenty-five dollars a month, except in the case of employees who entered the service after January 1, 1912, the annual pension allowance shall not be less than the equivalent of twelve dollars for each year of service subsequent to his last entry into the service prior to January 1, 1937.

**Contributing Employees.**—Pension allowances to contributors will be calculated on the basis of one per cent of the average monthly pay received for the ten years' service preceding retirement. For example, in the case of an employee who has forty years' service and has received on an average for the last ten years one hundred dollars a month, the pension allowance would be 40 per cent of \$100 or \$40 a month. A minimum pension of twenty-five dollars a month is provided.

## CO-OPERATION IN THE UNITED STATES

### Development of Consumers' Co-operative Movement

FROM a review of consumers' co-operation in the United States which appeared in a recent publication of the International Labour Office, the rapid growth in societies and membership is indicated. The movement started in the early part of this century but received an impetus during the depression. There are now 6,500 societies with a total membership of 2,000,000 and an estimated annual turnover of 365 million dollars, or one million dollars a day.

The first successful co-operative societies were of the Rochdale type, established by Finnish and Czechoslovak emigrants settling in Massachusetts, Wisconsin, Michigan and Ohio about 1910. The Central Cooperative Wholesale, the central organization of the Finns in the North Central States, was set up in 1917 with a capital of \$15.50. By 1934 this wholesale society had 100 member societies affiliated to it, whose total sales for that year amounted to 6 million dollars and the trade of the wholesale society to \$1,800,000. This wholesale society deals largely in food-stuffs and, clothing. The largest single retail co-operative in this section is a creamery opened in Minneapolis in 1921. It has a membership of 5,000 consumers and does an annual business exceeding 3 million dollars.

The rapid penetration by the farmers into the field of petrol distribution is one of the striking developments of the movement. The first co-operative gas and oil station was opened in 1921 by a group of Middle Western farmers. This was the signal for hundreds of similar societies to spring up throughout the West. These societies have been opposed by the big oil companies, but the opposition has only served to strengthen them and impel them to venture into new fields. The largest of the retail societies is the Freeborn County Co-operative Oil Company of Albert Lea, Minnesota, which started in 1925 with a capital of \$500. In 1935 its capital increased to \$12,000. The Midland Co-operative Wholesale of Minneapolis, which was started in 1926, did in 1935 a business of about \$968,000. It has 134 retail member societies representing a membership of 40,000.

The first co-operative oil blending plant in the world was organized in Kansas City in 1929. In September, 1935, this plant, now the Consumers' Co-operative Association, had done a business of about \$1,170,000 for the preceding six months. A grocery wholesale is now projected to serve the 300 member societies.

In addition to societies selling oil and gas, the farmers of the Middle West co-operatively buy and sell feed, fertilizer, automobile tires, and other farm and general supplies. *The Consumers Distribution Corporation*

To further the development of the consumers' co-operative movement, Mr. Edward A. Filene has organized the Consumers Distribution Corporation and has given \$1,000,000 towards its initial capitalization. This organization is under a directorate largely composed of leaders of the consumers' co-operative movement in America. Mr. Filene is the president, Mr. Herbert E. Evans, vice-president, and Mr. Percy S. Brown is secretary-treasurer. Its own description of its objects is given below.

"The Consumers Distribution Corporation is a non-profit corporation, organized to render the following services to those department stores which have been set up by the consumers. It will furnish the services by linking the stores together around a central purchasing and management unit.

"(1) It will employ the best experts, most competent organizers and managers for both the central organization and the stores belonging to the League.

"(2) It will assist local consumers in organizing their own department store.

"(3) It will supply efficient management to run the store under the supervision of a local board of directors, who shall be elected by the consumer owners in the area.

"(4) It will obtain the economies of centralized purchasing for all of the locally owned stores in the League, thus giving each individual store all goods as cheaply as any of the big chains can supply such goods to its own units, while it will organize and operate the centralized bureau to make available to consumers accurate information as to the quality and value of the merchandise sold in their stores.

"(5) It will organize a bureau for the development and expansion of service through the local co-operative department store to small stores which deal in food and other necessities in adjacent localities or adjacent communities.

"(6) It will supply all leader services, such as research, personnel, public relations, finance, etc."

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1936

### Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of September, 1936, was reported by the Superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy harvesting their grain and in some sections fall ploughing had commenced. Fishermen along the Northumberland Straits reported large catches of lobsters. Haddock and cod were also plentiful. Actual logging was quiet, but preparations were going on for a big cut during the winter and it was expected that many extra men would go into the woods this fall. Coal mines in the New Glasgow area operated from 3 to 6 days per week, while those in Cape Breton and vicinity worked from 1 to 6 days, with one mine idle all week. The iron and steel industries were busy and other manufacturing concerns registered a fair output. Building construction showed little change and highway work continued. Transportation was good, and trade, both wholesale and retail, was more encouraging. Many requests were received for maids and charworkers in the Women's Section and the usual placements were made.

Although harvesting was partly completed in Quebec, a fair number of farm hands were placed. The demand for bush workers was good throughout the Province and many placements of loggers were made, particularly at Chicoutimi. An improvement in mining was noted at Rouyn. Manufacturing concerns showed no change at Chicoutimi; paper, match and clothing plants listed a few vacancies at Hull; the metal industries reported no change at Montreal, while clothing and boots and shoes, there, were more active, but rubber and textiles quiet. Leather, clothing and fur industries at Quebec City were busier, as were also manufacturing concerns, in general, at Three Rivers. A decrease in the placement of workers in building construction was recorded, about the only employment available in this line being on repairs. Montreal, however, employed a number of men on miscellaneous work. Trade was somewhat better. Transportation was active. Less work was available for hotel and restaurant employees, but the demand for household domestics remained at about the same level.

With silo filling, gathering of root crops, picking of late fruit, grape cutting, fall ploughing and the usual clean up of Fall work, the

demand for extra farm help in the Province of Ontario continued. Unfortunately a heavy frost in the vicinity of Brantford severely injured a great portion of the tobacco crop yet to be harvested, thus throwing many men out of employment. Present estimates placed the harvested crop at between 40 and 50 per cent of that of last year. No appreciable increase was noted, as yet, in logging, although pulpwood camps were gradually opening and some calls listed for workers. Sawmills continued to operate steadily. Mining was very active and requests were received for experienced men, including master mechanics, mine mechanics, hoistmen, machine runners and assayers, but there was very little call for experienced help, and much of the surplus labour, would undoubtedly, be laid off in the near future. Factories, for the most part, were running steadily, but with little call for additional hands. Gains were noted by the metal trades, as well as in the tire division of the rubber industry, and canneries were also very busy, employment in this group being available for both men and women. More activity was shown in the building trades, as work was being rushed to completion before cold weather should set in. In some localities a shortage of skilled artisans was noted, but this condition was a temporary one only. Highway construction progressed rapidly, with plenty of applicants available. Some men also were sent out on extra gangs for the railways. Orders for skilled domestics in the Women's Section were sometimes difficult to fill, due to the scarcity of experienced applicants, but day work was fairly good.

Although harvesting was practically completed in the Prairie Provinces, except in districts where the work was retarded through adverse weather conditions, there was a continued and steady demand for farm hands by the month and an increase in the number of enquiries regarding the proposed winter Farm Labour Relief scheme. Orders for cordwood cutters in the district about Winnipeg showed an increase. Coal mines were busy, but at Estevan a surplus of miners was in the field; at Calgary, however, there were unfilled orders owing to the reported unfavourable conditions at the mines there. Manufacturing was quiet. Much of the building construction under way was being rushed to com-

pletion, due to the approaching cold weather and the majority of permits at Winnipeg was for alteration and repairs. Highway construction and other relief projects across the Prairie also continued. Trade showed slight improvement, although collections were still slow. There was little change recorded in the Women's Section, but the demand for domestics remained steady.

The demand for farm hands in British Columbia continued fair and the fruit crop was good, providing employment for a number of workers. Logging was less active, but saw-mills were working regularly, cutting for export, with many orders on hand. Mining, except in the vicinity of Vancouver, was brisk, but with no call for help. Salmon and halibut fishermen were about through for the year and many of them were seeking other employment. Factories at Nelson were working full

time, and pulp and paper factories at Victoria reported a good week in overseas shipments. Building construction was fairly brisk, although no large building projects were under way. Highway construction continued as a relief measure and consolidation of extra railway gangs was in progress as the winter program was coming into effect and a reduction of hands being made. Dry docks and shipyards at Prince Rupert were quiet, but waterfront work there and at Victoria was active, although somewhat slack at Vancouver. Trade was quieter than usual, hotel managers, in particular, reporting a falling off in business, which is customary at this season of the year. Many requests were received in the Women's Division for experienced cooks-general and domestics. Some of these openings, however, were difficult to fill, due to the type of applicant registering.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN AUGUST, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 9,967, the employees on their payrolls numbering 1,014,532 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,800, having an aggregate membership of 181,861 persons, 14·2 per cent of whom were without employment on

September 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of September, 1936, as Reported by Employers

The firms furnishing monthly returns on employment to the Dominion Bureau of Statistics reported at the beginning of September further substantial improvement in the situation, the upward movement extending to all five economic areas and to most of the industrial groups. Statements were received from 9,967 employers with an aggregate payroll of 1,014,532 persons, or 14,562 more than at August 1. Reflecting this gain, the crude index (average 1926 = 100) rose from 105·6 in the preceding month to 107·1 at September 1, as compared with 102·7 at the same date of last year.

According to the experience of the years since 1920, the average change between August 1 and September 1 is very slight, increases in a number of these years just about offsetting declines in the remainder. The advance at the latest date therefore resulted in a gain in the seasonally-adjusted index, which rose from 101·1 at August 1 to 102·7 at the beginning of September, 1936.

The following shows the unadjusted indexes for September 1 in the sixteen years of the record: 1936, 107·1; 1935, 102·7; 1934, 98·8; 1933, 88·5; 1932, 86·0; 1931, 107·1; 1930, 116·6; 1929, 126·8; 1928, 119·1; 1927, 111·0;

1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8 and 1921, 89.8.

An analysis of the returns by industries shows continued expansion in manufacturing, the eighth consecutive monthly increase since January 1, 1936. The experience of past years indicates that factory employment has declined in seven and increased in eight of the previous Septembers for which statistics are available, showing on the average for the fifteen years, a very slight falling-off. The advance at the beginning of September in the present year compares favourably with this average reduction, being also rather larger than at September 1 in any other of the years

employees had aggregated 964,647, which was an increase of 15,062 over their August 1, 1935, payrolls. The improvement then had also been fairly general, there having been gains in each of the five economic areas and in most of the main industrial divisions. As already indicated, the index at the date under review, standing at 107.1, was several points higher than at the beginning of September of last year, when it was 102.7.

#### Employment by Economic Areas

Firms in all five economic areas showed substantial gains, those in Quebec and the Prairie Provinces being most pronounced.

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

when the trend has been upward, with the exception of 1933. The greatest gains in manufacturing at the date under review occurred in fruit and vegetable canneries and in textile factories, while there were important seasonal losses in fish-canneries, and iron and steel plants were also slacker. Among the non-manufacturing industries, mining, communications, transportation, construction and services showed heightened activity. On the other hand, there were small reductions in logging, while employment in trade was practically unchanged from the preceding month.

The employers furnishing data for September 1, 1935, had numbered 9,355, and their

The situation generally was more favourable than at the beginning of September of last year.

*Maritime Provinces.*—Employment in the Maritime Provinces showed a moderate expansion at September 1, the fifth successive increase in as many months. The advance, though not large, is especially interesting because it is contrary to the usual seasonal trend at this time of year, the experience of the years since 1920 showing, on the average, a decline between August 1 and September 1. Most of the gain at the date under review took place in construction and maintenance, mainly of highways and roads, although gen-

eral building work was also rather more active. Improvement was indicated in manufacturing (particularly of textile and vegetable food products), and in communications. On the other hand, logging, coal-mining and railway construction showed curtailment. Statistics were received from 701 firms in the Maritime Provinces, whose staffs aggregated 82,130 workers at September 1, 1936, compared with 81,678 in the preceding month. A rather smaller increase had been recorded at the beginning of September of last year, when the 656 employers furnishing data had reported 76,325 persons on their payrolls; the index then was over seven points lower than at the latest date, when it stood at 114.4.

*Quebec.*—Increased employment was noted in Quebec, mainly in manufacturing, logging, mining, transportation and trade; within the first-named, the textile, vegetable food, leather, rubber and some other manufacturing groups showed improvement, while iron and steel, non-ferrous metal and tobacco and beverage

factories released employees. The working force of the 2,253 employers co-operating in Quebec stood at 285,430 persons, as against 280,865 at August 1. This gain was considerably greater than the average increase indicated at September 1 in the years 1921-1935.

An advance rather exceeding that noted at the date under review had been registered at the beginning of September, 1935, but employment then was generally in lesser volume, the index standing at 99.3 as compared with 103.0 at the latest date. Statements for September 1 of last year had been tabulated from 2,231 establishments employing 273,178 workers, compared with 267,289 in the preceding month.

*Ontario.*—In this province, 4,406 firms reported considerable increases in personnel, enlarging their staffs from 414,473 at the first of August, to 418,296 at September 1; improvement had also been noted at the same date last year, when the index, at 103.9, was several points lower than at the latest date,

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Sept. 1, 1921.....	89.8	104.9	83.3	89.1	97.8	84.8
Sept. 1, 1922.....	94.8	101.4	87.3	97.9	100.5	90.5
Sept. 1, 1923.....	101.2	113.3	95.4	104.5	100.4	94.6
Sept. 1, 1924.....	94.2	97.2	93.2	94.7	93.2	94.0
Sept. 1, 1925.....	97.8	99.2	96.6	98.7	95.3	101.3
Sept. 1, 1926.....	106.2	108.5	107.8	104.3	106.2	108.1
Sept. 1, 1927.....	111.0	112.2	110.5	110.5	114.4	108.7
Sept. 1, 1928.....	119.1	115.4	115.7	119.5	127.8	115.5

Relative Weight of Employment by Economic Areas as at Sept. 1, 1936.....	100.0	8.1	28.1	41.2	13.5	9.1

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

viz., 108.1. Manufacturing recorded a substantial increase. There were large seasonal increases over August 1, 1936, in the vegetable food and textile divisions, together with smaller gains in leather, chemical, non-ferrous metal, electrical apparatus and some other groups, while there were moderate declines in lumber, pulp and paper, tobacco and beverage and iron and steel factories. Among the non-manufacturing industries, mining, communications, construction, services and trade reported heightened activity, but logging was slacker.

The 4,126 employers co-operating at the same date in 1935 had employed 397,962 persons as compared with 392,513 at August 1 of last year.

*Prairie Provinces.*—A further important advance was indicated on the whole in industrial employment in the Prairie Provinces at the beginning of September; the index was nearly seven points higher than at September 1, 1935, when a much smaller increase had been recorded by the firms making returns. Data

were tabulated for the date under review from 1,447 employers of 136,342 workers, as compared with 131,818 in the preceding month. Mining, transportation and construction afforded heightened employment, the gains in the last-named being extensive. On the other hand, manufacturing and retail trade were slacker; within the former group, iron and steel works showed most of the loss. The seasonal employment afforded in harvesting operations at this time of year is, of course, not reflected in these statistics.

For September 1, 1935, 1,355 firms had reported 126,860 employees, or 2,250 more than in the preceding month.

*British Columbia.*—Employment in British Columbia showed an increase at September 1, the sixth recorded in as many months. A similar advance had been indicated at the same date of last year, but the index, at 108.0, was then slightly lower than at the latest date (viz., 109.3). Manufacturing on the whole was brisker, the improvement occurring largely in lumber and vegetable

Relative Weight of Employment by Cities as at Sept. 1, 1936.....	13.9	1.3	12.6	1.4	3.1	1.4	3.9	3.5

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

food factories, while fish canneries released help. Logging and highway construction and maintenance also showed heightened activity, while railway construction and shipping released some workers. The personnel of the 1,057 firms furnishing data rose from 91,136 persons at August 1, to 92,334 at the beginning of September. At the same date last year, 987 employers had made returns, showing an aggregate working force of 90,322.

### Employment by Cites

Employment advanced in Montreal, Quebec city, Toronto, Ottawa, and Vancouver, while curtailment was noted in Hamilton, Windsor, and Winnipeg.

*Montreal.*—Employment in Montreal showed an increase at September 1, 3,040 persons having been added since August 1 to the paylists of the 1,355 co-operating firms, who employed 141,569. Considerable improvement was noted in manufacturing, particularly in textiles, but leather, lumber, vegetable food

and printing and publishing factories were also somewhat busier. In addition, transportation, construction, services and trade showed heightened activity. A smaller advance had occurred at September 1, 1935, and the index then was between five and six points lower.

*Quebec.*—An increase was registered in Quebec, according to 173 employers of 13,064 persons, as compared with 12,924 in the preceding month. Manufacturing, especially of leather products, and construction were rather more active, while other industries showed little general change. Employment as reported by employers was in smaller volume than at the beginning of September of a year ago, when a larger advance had been noted.

*Toronto.*—Manufacturing showed substantial improvement, chiefly in the leather, vegetable food, textile, electrical apparatus and metal divisions; services and trade also afforded moderately increased employment, while the fluctuations in the other industries were slight. Statements were received from

Relative Weight of Employment by Industries as at Sept. 1, 1936.....	100.0	52.9	2.3	6.4	2.2	10.5	12.7	3.0	10.0

**NOTE.**—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

1,486 firms with 128,010 workers, 2,855 more than at August 1. Expansion on a smaller scale had been indicated at the same date of a year ago, and employment then was below its present level.

*Ottawa.*—There was a further increase in Ottawa, chiefly in manufacturing, construction and trade. The 196 firms furnishing returns reported 14,661 employees, compared with 14,179 in the preceding month. At September 1, 1935, a minor decline had been noted, and the index was then several points lower.

*Hamilton.*—Manufacturing showed curtailment, mainly in textile and iron and steel. The changes in the remaining industries were on a comparatively small scale. Two hundred and eighty-seven employers had 31,482 persons on their payrolls, as compared with 32,120 at August 1. Employment had been considerably curtailed at the beginning of September of a year ago, when industrial activity was at a much lower level.

*Windsor.*—A substantial reduction was registered in Windsor, where the 176 firms making returns reported 14,582 workers, as against 15,714 in the preceding month. Vegetable food and iron and steel factories showed diminished activity, while in other industries there was little general change. A moderate loss had been noted at the same date of last year, but the index was then slightly lower.

*Winnipeg.*—Employment in Winnipeg declined on the whole; construction and transportation showed small advances, while manufacturing and trade were slacker. An aggregate working force of 39,878 persons was reported by the 484 co-operating establishments, which had employed 40,331 workers in the preceding month. A decrease had also been recorded at the same date in 1935, when the index was somewhat lower.

*Vancouver.*—There was a moderate advance in employment in Vancouver, according to statements received from 439 firms employing 35,351 workers, as against 35,125 at August 1.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Sept. 1, 1936	Aug. 1, 1936	Sept. 1, 1935	Sept. 1, 1934	Sept. 1, 1933	Sept. 1, 1932	Sept. 1, 1931

\* The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

Manufacturing plants reported larger payrolls, the greatest gains being in the food and lumber industries, but transportation showed a decline. Employment was more active than at the same date of a year ago, although a much larger increase had then been noted.

Index numbers by cities are given in Table 2.

### Employment by Industries

*Manufacturing.*—Continuing the uninterruptedly favourable movement in evidence since the beginning of the year, employment in manufactures showed a further advance at September 1, the 5,812 co-operating employers enlarging their payrolls from 531,449 at August 1, to 536,420 at the date under review. Reflecting this advance, the index rose from 104.9 in the preceding month to 105.9 at September 1, when it was higher than in any other month since October 1, 1930.

The increase in activity at the beginning of September, 1936, is especially interesting because factory operations have very often been curtailed in the early autumn of the years since 1920, the average index showing a small fractional reduction between August 1 and September 1. The crude index when adjusted for seasonal movement therefore showed a gain, rising from 101.9 at the first of August to 103.0 at the latest date.

A review of the manufacturing group shows that the edible animal, pulp and paper, tobacco and beverage and iron, and steel divisions reported contractions as compared with the preceding month; these were generally seasonal in character. On the other hand, the leather, musical instrument, vegetable food, rubber, textile, electrical apparatus, electric light and power and non-ferrous metal industries indicated considerable improvement, also partly of a seasonal nature. The largest gains in factory employment were in Quebec.

The unadjusted indexes of factory employment at September 1 in the sixteen years of the record are as follows: 1936, 105.9; 1935, 100.8; 1934, 94.3; 1933, 86.8; 1932, 83.1; 1931, 94.7; 1930, 108.2; 1929, 119.8; 1928, 115.9; 1927, 106.8; 1926, 104.8; 1925, 96.8; 1924, 91.5; 1923, 100.7; 1922, 93.6 and 1921, 85.8.

For September 1, 1935, 5,550 manufacturers had reported 506,900 employees on their staffs; the increase over the preceding month had been on much the same scale as at the date under review.

*Animal Products, Edible.*—Large seasonal declines occurred in fish canneries, while dairies were also rather slacker and other branches of this group showed little general change. The payrolls of the 313 co-operating factories

aggregated 26,513 employees, as compared with 27,659 in the preceding month. Employment at September 1, 1935, had suffered a rather larger decrease, and the index number then was slightly lower than at the date under review.

*Leather and Products.*—An increase was shown in leather factories, chiefly in footwear plants; the general gain in the group somewhat exceeded that noted at the beginning of September of last year, when the employment indicated by the firms making returns was at a very slightly lower level. Statements were received from 292 manufacturers having 22,825 persons in their employ, as against 22,000 at August 1, 1936. Ontario firms reported the most marked advances.

*Lumber and Products.*—Moderate reductions were made in sawmills, but container, vehicle and other lumber-using factories were rather more active. The result was a decrease of 79 persons in the staffs of the 845 lumber establishments furnishing data, whose payrolls aggregated 46,085. This loss was decidedly smaller than that noted at September 1, 1935, when the index was over five points lower.

*Musical Instruments.*—Additions to personnel were recorded in musical instrument works, 35 of which enlarged their labour forces by 104 persons to 1,521 at September 1. The increase occurred mainly in Quebec. A greater gain had been indicated at the beginning of September, 1935, but employment was then at a lower level.

*Plant Products, Edible.*—Confectionery and chocolate and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being particularly pronounced. The general improvement was on a larger scale than at the same date last year, when the index stood at 126.4, compared with 133.3 at the beginning of September, 1936. Data were compiled from 479 firms in the vegetable food division, whose payrolls rose from 34,933 at August 1, to 38,790 at the date under review. Ontario recorded the most marked advances.

*Pulp and Paper Products.*—Employment in this group showed a decline, improvement in the production of paper goods being offset by losses in plup and paper mills. A small reduction had been noted at September 1 of last year, when the index, at 98.2, was over five points lower than at the date under review. The forces of the 605 co-operating establishments included 63,041 persons at the beginning of September, as compared with 63,479 in the preceding month.

*Rubber Products.*—Improvement was indicated in rubber factories, 53 of which em-

ployed 12,932 workers, compared with 12,580 at August 1. The situation at September 1, 1935, had also shown a betterment as compared with the preceding month, but employment was then at a lower level, the index standing at 91.2, as against 101.5 at the date under review.

*Textile Products.*—Seasonal increases occurred in textile factories, 1,037 of which had 102,127 employees, as against 97,856 at August 1. Most of the advance took place in Quebec and Ontario, but the tendency was generally favourable. Garment and personal furnishing factories registered the bulk of the gain, while headwear, cotton, woollen, silk and knitting mills were also busier. The index of employment at the same date last year was between six and seven points lower; the increase then reported had involved a much smaller number of workers.

*Tobacco, Distilled and Malt Liquors.*—Curtailment was noted in these industries at September 1 as compared with August 1, since when 635 persons were released from the payrolls of the 183 co-operating factories, which employed 15,297 operatives. The level of employment was lower than at the beginning of September, 1935, when a gain had been indicated in the group as a whole.

*Chemical Products.*—Employment in this division showed a small advance according to statistics from 201 employers of 11,446 persons, compared with 11,358 at August 1. The situation in the chemical industries was more favourable than at the same date a year ago.

*Clay, Glass and Stone Products.*—Factories producing these classes of building materials showed rather greater activity; statements were received from 207 plants, having 9,857 workers, as against 9,797 in the preceding month. A decrease had been noted at the beginning of September last year; the index then was several points lower.

*Electric Light and Power.*—Considerable expansion was shown in electric current plants, 98 of which employed 15,638 persons, or 215 more than at August 1. Employment was brisker than at September 1, 1935, although a larger increase had then been indicated.

*Electrical Apparatus.*—Employment in this group increased at the beginning of September, 506 workers having been added since August 1 to the forces of the 124 co-operating establishments, which had 17,103 employees. The gain occurred mainly in Ontario. A smaller advance had been noted at the corresponding date in 1935, and the index then was rather lower.

*Iron and Steel Products.*—The agricultural implement, heating appliance and vehicle divisions of the iron and steel group recorded contractions in employment, while sheet metal,

wire and some other factories were busier. On the whole, there was a reduction of 3,219 in the forces of the 856 co-operating iron and steel manufacturers, who employed 108,201 persons at the beginning of September. The largest losses were in Ontario and the Prairie Provinces. The trend at September 1, 1935, had also been downward; the decline then was much smaller, but the index number was over three points lower than at the date under review, when it stood at 83.1.

*Non-Ferrous Metal Products.*—The precious and the base metals, and the smelting and refining divisions reported heightened employment; 169 manufacturers in the group as a whole employed 22,160 operatives, as against 21,846 at August 1. Improvement had also been indicated at the same date last year, but general activity was then decidedly less.

*Mineral Products.*—Employment in this group showed little general change, according to statements from 143 establishments with 14,596 persons on their pay-rolls, as against 14,566 at the beginning of August. The index was higher than at September 1, 1935, when a larger gain had taken place.

### Logging

Employment in logging camps showed a falling-off at the beginning of September, according to the 311 co-operating firms, whose payrolls aggregated 23,400 workers, compared with 23,987 in the preceding month. The number employed in the bush at September 1 was greater than at the same date in 1935, being also larger than in most other years of the record.

### Mining

*Coal.*—Data were received from 100 operators having 23,193 men on their payrolls, as compared with 23,126 at the beginning of August. Improvement in the Prairie coal-fields rather more than offset declines in the Maritime Provinces. Much greater gains had been made at the same date a year ago, when the index number was fractionally higher than at the date under review.

*Metallic Ores.*—Employment in metallic ore mines showed a further expansion, according to returns from 217 firms whose forces rose from 32,372 persons at August 1, to 33,156 at the beginning of September. An advance had also been shown at September 1, 1935, but employment was then in lesser volume.

*Non-Metallic Minerals (other than coal).*—Continued gains were reported in this group, in which 83 firms enlarged their staffs by 205 workers to 8,284 at September 1. A larger increase had been noted at the corresponding date of last year; the level of employment then, however, was considerably lower.

### Communications

Further expansion was indicated in the communications division, in which the companies reporting employed 22,790 workers, as compared with 22,280 in the preceding month. The index was higher than in the early autumn of 1935; the gain then indicated had been much smaller.

### Transportation

*Street and Electric Railways and Cartage.*—Improvement was shown in local transportation at the date under review, for which the 235 employers furnishing data reported 27,200 workers, or 201 more than in the preceding month. The advances were chiefly in the Prairie Provinces. A rather larger increase had been recorded at the beginning of September, 1935, when the index was some three points lower.

*Steam Railways.*—There was a further gain in the number employed in steam railway operation at September 1, according to the 101 companies and branches from which returns were received, and which had 62,824 employees, compared with 61,845 at August 1. Employment was at a higher level than at the same date last year; the advance then noted had been on a smaller scale. The improvement reported at the beginning of September, 1936, took place mainly in Quebec and the Prairie Provinces.

*Shipping and Stevedoring.*—Reductions in staffs were indicated in the water transportation group, in which activity was rather greater than at the same date in 1935, when the tendency had also been upward. Statements were received from 109 employers of 16,831 workers, as against 17,141 in the preceding month.

### Construction and Maintenance

*Building.*—Important expansion was shown in building construction, in which employment was not so brisk as in the late summer of 1935. Data were received from 728 contractors, whose payrolls stood at 24,553 at September 1, 1936, as compared with 23,461 at the beginning of August. The trend was favourable in most of the provinces.

*Highway.*—There was a further pronounced increase in this group, 3,791 men being added to the forces of the 381 co-operating organizations, who had 60,200 workers. There were gains in the Maritime Provinces, Ontario and the Western Provinces, while curtailment was indicated in Quebec. Activity was generally less than at September 1, 1935, when a larger advance had been reported.

*Railway.*—Further increases in employment were indicated by the 33 employers furnishing data in this division, who employed 43,710 persons, as against 41,253 in the preceding month. Improvement occurred in Quebec, Ontario and the Prairie Provinces. Smaller additions to staffs had been noted at the corresponding date in 1935; the index number then was many points lower.

### Services

Continued improvement was shown in the service group, in which business this year has been brisker than in 1935. The 472 establishments furnishing information for September 1, 1936, reported 29,994 assistants, or 364 more than at August 1. Most of the gain occurred in hotels and restaurants.

### Trade

Little general change was noted in either wholesale or retail trade, in both of which employment continued at a higher level than in the late summer of last year; a gain had then been indicated by the firms making returns in the group as a whole. Statistics for September 1, 1936, were received from 1,299 trading establishments employing 101,977 persons, compared with 101,939 at the beginning of August, 1936.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

## (2) Unemployment in Trade Unions at the Close of August, 1936

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of

unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Further improvement in the local trade unions situation was evident at the close of

August, the 1,800 labour organizations making returns, with an aggregate membership of 181,861 persons, showing that 19,591, or a percentage of 10.8, were without employment, in comparison with 12.5 per cent in July. This advance noted in August marks the fourth month in a series of gradual and continuous favourable tendencies, culminating at the close of August in the maximum of employment available this year to date. Expansion on a larger scale than in comparison with July was reflected over August a year ago, when 14.2 per cent of the members reported, were idle. Alberta unions showed

A separate tabulation is made each month of unemployment affecting local trade union members in the largest city in each Province, with the exception of Prince Edward Island. Toronto unions, with a gain of around 5 per cent, recorded the most marked expansion from July, and in Montreal advances of over 3 per cent were noted. Increases in work afforded, of minor importance, were evident among Edmonton, Vancouver, Winnipeg and Regina unions. Recessions in activity of noteworthy degree, however, were manifest by Halifax members, and in Saint John employment was retarded by less than one per

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

the most substantial increases in activity when contrasted with July conditions, the coal mines of the Province particularly, affording a greater volume of work. In Quebec, Ontario and British Columbia, gains of lesser degree were shown, while in Manitoba and Saskatchewan, the trend was toward heightened activity though the changes were but fractional. Nova Scotia and New Brunswick unions, however, indicated a slightly adverse tendency. All Provinces participated in the better employment movement noted from August a year ago, Alberta unions, as in the previous comparison, showing the most outstanding advancement, though the improvement noted among Ontario and British Columbia members was also noteworthy. In Manitoba moderate gains occurred, the remaining Provinces showing a slightly upward trend.

cent. Decided betterment in conditions from August a year ago was indicated by Edmonton and Toronto unions, and in Montreal and Vancouver the situation improved considerably. Gains of moderate proportions were reported from Saint John and Winnipeg. On the other hand, Halifax members suffered losses in employment of about 4 per cent, and in Regina the trend was toward lessened activity though the change from August last year was slight.

Appearing with this article is a chart which illustrates the trend of unemployment from January, 1930, to date. The curve has pursued a steadily downward course since the close of April, denoting an increasing employment volume, and continued this favourable movement throughout August. Industrial activity, as reflected by the chart, was more

pronounced during August than in the corresponding month of last year when the curve rested at a point above that of the month reviewed.

The manufacturing industries showed a very slight tendency toward a better situation during August from the previous month, and improvement on a larger scale was manifest from August a year ago. This was apparent from the reports received from 502 unions in the manufacturing industries, with 60,416 members, 6,513 or 10.8 per cent of whom were idle at the close of the month, contrasted with

percentages of 11.2 in July and 14.0 in August, 1935. Glass and hat and cap workers, whose combined membership was rather smaller, showed a noteworthy percentage increase in activity from July. Employment was also better maintained among wood, fur, iron and steel, garment, leather, and brewery workers, bakers and confectioners, and meat cutters and butchers, though the changes were not of particular significance in any one group of trades.

Contractions in activity of a largely offsetting nature were recorded among general labourers, metal polishers, cigar and tobacco workers, printing tradesmen, paper makers, and textile and carpet workers. Employment for jewellery workers remained at the same level as in July. Compared with the returns for August of last year in the manufacturing industries, extensive employment recovery was noted among textile and carpet, wood and glass workers, and bakers and confectioners, and the situation for iron and steel, fur and jewellery workers, was also substantially improved. Activity in the printing trades tended upward though the variation from August last year was slight. Pronounced increases in slackness, however, were evident among metal polishers and general labourers. There was a noteworthy falling off in work accorded cigar and tobacco, leather, and hat and cap workers, from August, 1935, while among brewery workers slight recessions only, were shown. In the garment trades and among paper makers there was little change though the tendency was toward lessened activity.

Employment in the coal mines was in greater volume during August than in either the previous month or August a year ago, according to the returns compiled from 44 local unions involving a total of 14,741 members. Of these, 1,374 were out of work on the last day of the month, a percentage of 9.3 contrasted with percentages of 12.4 in July and 14.7 in August, 1935. Greater activity in the Alberta coal fields accounted largely for the better situation obtaining in the industry as a whole, from July, though in British Columbia there was a slight employment. A less favourable tendency was noted in Nova Scotia but the change was less than one per cent. As in the previous comparison, the Alberta coal mines were the determining factor in the improvement registered from August last year, though Nova Scotia and British Columbia unions also contributed to the total advance. Short time work, however, was rather prevalent throughout the month.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4
Average 1920.....	11.3	8.5	16.6	9.7	9.5	7.8	7.8	23.5	12.7

From unions in the building and construction trades, 193 reports were forwarded during August covering a membership of 20,766 persons, 6,201 or a percentage of 29.9 of whom were without employment on the last day of the month, in comparison with 37.4 per cent of inactivity at the close of July and 44.1 per cent in August, 1935. Carpenters and joiners were afforded a much better volume of work than in July, the improvement recorded involving the greatest number of workers reported in any of the groups of trades. Among tile-layers, lathers and roofers, steam shovelmens and hod carriers and building labourers, large percentage gains were registered from July, but as their combined membership was small they did not include a great number of workers. Considerably improved conditions were also reflected by bricklayers, masons and plasterers, over July, and among painters, decorators and paper hangers, moderate gains in activity were recorded. Electrical workers maintained practically the same situation as in the preceding month. Bridge and structural iron workers, however, were decidedly less active than in July, and recessions, on a much smaller scale, though noteworthy, were recorded by granite and stone cutters, and plumbers and steam fitters. The improvement shown in building and construction operations from August last year was widely distributed throughout the majority of trades, steam shovelmens, bridge and structural iron workers, carpenters, and joiners, electrical workers, tile layers, lathers and roofers and hod carriers, and building labourers, particularly showing pronounced expansion during the month reviewed. Much better conditions prevailed also, for bricklayers, masons and plasterers, painters and decorators and paper hangers, and plumbers and steam fitters. Granite and stone cutters alone, reported a slackening in work available, which was quite marked.

A slight upward employment movement was manifest in the transportation industries during August from both the previous month and August, 1935, as shown from the returns compiled from a total of 808 local unions, with an aggregate of 58,156 members. Of these, 3,066 were idle on the last day of the month, a percentage of 5.3 in contrast with percentages of 6.3 in July and 6.9 in August, 1935. Steam railway employees, whose returns constituted nearly 78 per cent of the entire group membership reported, showed increases in activity on a small scale when compared with July, and gains of slightly greater degree over August last year. Among street and electric railway employees there was but nominal employment advancement

recorded in both comparisons. Navigation workers, and teamsters and chauffeurs showed a small employment rise from July, though some curtailment in work afforded was noted from August a year ago.

No variation in conditions was apparent among retail shop clerks during August from the previous month, the 5 unions furnishing reports with 1,439 members, indicating an unemployment percentage of 4.7, the same as was recorded in July. The situation was considerably better, however, than in August last year when 12.3 per cent of inactivity was recorded.

Civic employees with 79 associations, covering a membership of 8,894 persons, during August, showed that 329 were idle at the end of the month, a percentage of 3.7, contrasted with percentages of 1.8 in July and 3.0 in August last year.

Unemployment in the miscellaneous group of trades remained at the same level during August as in the previous month, according to the reports tabulated from 130 unions, with a membership numbering 6,698 persons. Of these, 681, or 10.2 per cent, were without work on the last day of the month, this percentage being identical with that recorded in July. Hotel and restaurant employees were afforded a moderately increased volume of work during August, and fractional improvement only was registered by theatre and stage employees, barbers, and stationary engineers and firemen. Unclassified workers, however, showed a nominal adverse change. Employment advancement, on a large scale, was noted in the miscellaneous group of trades as a whole, from August last year when 22.0 per cent of idleness was recorded. In this comparison barbers, and hotel and restaurant employees were decidedly busier during the month reviewed, and slight gains in activity were reflected by theatre and stage employees. Among stationary engineers and firemen and unclassified workers, quite small employment recessions were evident.

The percentage of idleness among fishermen stood at 4.2 at the close of August as compared with a percentage of 0.8 in July and with a fully engaged situation in August a year ago. The percentage for the month under survey was based on the reports received from 3 unions, with a combined membership of 590 persons.

The trend of activity for lumber workers and loggers was more favourable during August than in the previous month, though the change was but fractional, while gains of rather noteworthy proportions were reflected from August a year ago. This was apparent from the reports forwarded during August by

during the first half and 60.1 during the second half of August, 1936, in contrast with the ratios of 65.2 and 67.8 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods under review were 61.3 and 55.6, as compared with 61.6 and 62.8 during the corresponding months of 1935.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during August, 1936 was 1,259 as compared with 1,149 during the preceding month and with 1,488 in August a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,019, in comparison with 2,049 in July, 1936, and with 2,236 during August last year.

The average number of placements made daily by the Offices of the Service during August, 1936, was 1,179, of which 833 were in regular employment and 346 in work of one week's duration or less, as compared with a total daily average of 1,088 during the preceding month. Placements for August a year ago averaged 1,392 daily, consisting of 961 placements in regular and 431 in casual employment.

During the month of August, 1936, the Offices of the Service referred 31,968 persons to vacancies and effected a total of 30,651 placements. Of these, the placements in regular employment were 21,646, of which 17,290 were of men and 4,356 of women, while placements in casual work totalled 9,005. The number of vacancies reported by employers was 23,226 for men and 9,495 for women, a total of 32,721, while applications for work numbered 52,475, of which 39,853 were from men and 12,622 from women. Reports for July, 1936, showed 29,851 positions available, 53,257 applications made and 28,271 placements effected, while in August, 1935, there were recorded 40,164 vacancies, 60,363 applications for work and 37,566 placements in regular and casual employment.

The following table gives the placements effected by Offices of the Employment Service of Canada, each year, from January, 1926, to date:—

Year	Placements		
	Regular	Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367

1935.....	226,345	127,457	353,802
1936 (8 months).....	129,943	79,487	209,430

## NOVA SCOTIA

During the month of August, 1936, positions offered through employment offices in Nova Scotia were nearly 6 per cent less than in the preceding month and nearly 12 per cent below the corresponding month of last year. There was a decline also in placements of over 7 per cent when compared with July and over 11 per cent in comparison with August, 1935. The decrease in placements from August of last year was due to a decline under construction and maintenance and smaller losses in mining and trade. Gains were reported in all other groups, but none were large. Industrial divisions in which most of the placements were effected during the month were logging 43; construction and maintenance 361 and services 287, of which 189 were of household workers. Placements in regular employment numbered 217 of men and 95 of women.

## NEW BRUNSWICK

There was a decrease of over 31 per cent in the number of positions offered through employment offices in New Brunswick during August, when compared with the preceding month and of over 32 per cent in comparison with the corresponding month of last year. Placements also were nearly 31 per cent less than in July and over 30 per cent below August, 1935. A large decrease in relief placements under construction and maintenance accounted for the decline from August of last year, as minor changes only were reported in all other groups. Placements by industrial divisions included manufacturing 21; construction and maintenance 66; trade 25 and services 539, of which 417 were of household workers. There were 95 men and 111 women placed in regular employment.

## QUEBEC

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec, during August, was nearly 13 per cent greater than in the preceding month, but 18 per cent below the corresponding month of last year. There was a gain in placements of over 7 per cent when compared with July, but a loss of over 22 per cent in comparison with August, 1935. The decrease in placements from August of last year was due to a reduction in relief work under construction and maintenance, although declines were also reported in trade and manufacturing. These losses were partly offset by increased placements in services and logging. Placements by industrial divisions included manufacturing, 147; logging, 590; farming, 71; construction and maintenance 193; trade and services 2,496, of which 1,841 were of household workers. During the

\* 159 placements effected by offices since closed.

month 1,168 men and 1,441 women were placed in regular employment.

#### ONTARIO

Orders received at employment offices in Ontario during August called for nearly 8 per cent less workers than in the preceding month and nearly 28 per cent less than during the corresponding month of last year. There was a decrease also in placements of nearly 10 per cent when compared with July and of over 28 per cent in comparison with August, 1935. There was a large decrease in placements under construction and maintenance and farming when compared with August of last year and smaller losses in services and manufacturing, which accounted for the decline under this comparison. Gains were reported in logging, transportation and mining, but they were small and did not, to any appreciable extent, offset the losses mentioned above. Placements by industrial divisions included manufacturing, 504; logging, 408; farming, 1,112; transportation, 181; construction and maintenance, 5,676; trade, 226 and services, 3,306, of which 2,035 were of household workers. Placements in regular employment numbered 5,562 of men and 1,384 of women.

#### MANITOBA

During August, orders received at employment offices in Manitoba called for 52 per cent more workers than in the preceding month and over 11 per cent more than during the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. There was an increase in placements over August, 1935, under construction and maintenance, which accounted for the gain under this comparison. Farming, manufacturing and mining were also slightly higher. The only decrease of importance was in services. Industrial divisions in which most of the placements were effected during the month were farming, 2,404; construction and maintenance, 1,043; and services 577, of which 479 were of household workers. There were 3,436 men and 266 women placed in regular employment during the month.

#### SASKATCHEWAN

Opportunities for employment, as indicated by orders received at employment offices in Saskatchewan during August, were over 96 per cent better than in the preceding month but over 7 per cent less favourable than during the corresponding month of last year. Placements were nearly 100 per cent higher than in July, but over 4 per cent less than in August,

1935. The large reduction in farm placements, supplemented by a decline in services, accounted for the decrease from August of last year. These losses, however, were largely offset by gains in construction and maintenance, manufacturing and logging. Placements by industrial divisions included manufacturing, 66; farming, 3,929; construction and maintenance, 403; and services 702, of which 504 were of household workers. During the month 4,265 men and 406 women were placed in regular employment.

#### ALBERTA

There was an increase of 2 per cent in the number of positions offered through employment offices in Alberta during August, when compared with the preceding month, but a decline of over 25 per cent in comparison with the corresponding month of last year. Placements were nearly 5 per cent higher than in July, but nearly 24 per cent below August, 1935. Substantial reductions in farming and construction and maintenance, with minor losses in trade, manufacturing and transportation accounted for the decline in placements from August of last year. The only increase of importance was in logging, although services also showed improvement. Placements by industrial divisions included manufacturing, 70; logging, 322; farming, 887; construction and maintenance 392 and services 550, of which 447 were of household workers. Regular placements numbered 1,495 of men and 364 of women.

#### BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during August, were nearly 12 per cent less favourable than in the preceding month and over 16 per cent below the corresponding month of last year. Slightly higher percentages of loss were reported in placements under both comparisons. The decrease from August, 1935, was due to a reduction in relief placements under construction and maintenance, as, except for a nominal loss in logging, all other groups showed improvement. The most important gains were in services and mining. Industrial divisions in which most of the placements were effected during the month were manufacturing, 81; farming, 232; mining, 171; construction and maintenance, 1,238 and services 802, of which 458 were of household workers. During the month 1,052 men and 289 women were placed in regular employment.

### Movement of Labour

During the month of August, 1936, the offices of the Employment Service of Canada effected 21,646 placements in regular employment, 14,323 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 728 were granted the Employment Service reduced transportation rate, 565 journeying to centres within the same province as the despatching office and 163 to other provinces. The reduced transportation rate which is 2.7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the office of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during August, the Hull office arranged for the transportation of 155 bushmen to centres within the Pembroke zone. Ontario offices granted reduced rate certificates to 310 persons during August, 309 of whom were bound for provincial situations. Of these, the Port Arthur office assisted in the transfer of 108 bush workers, 10 mine workers, 5 carpenters, 4 survey men, 3 hotel employees, 2 painters, and one tractor man to various centres within its own zone. From Fort William, 58 bush workers, 2 taxi drivers, and one restaurant cook, and from Sudbury, 60 bush workers were carried to employment within their respective zones. In addition, the Fort William zone received 19 miners and the Port Arthur zone 2 miners from Timmins. The North Bay office was responsible for the despatch of 33 pulp-cutters and one millwright to the Timmins zone. The one worker travelling outside the province was a drill-runner sent from Timmins to Rouyn. Manitoba transfers at the reduced rate during August were effected by the Winnipeg office and numbered 170, of which 167 were pro-

vincial and 3 interprovincial. Provincially the movement was entirely within the Winnipeg zone and included the despatch of 81 highway construction workers, 77 farm hands, 7 mine employees, one building labourer, and one carpenter. Travelling to employment outside the province were one farm hand, one mine employee and one rigger, destined to the Port Arthur zone. Transportation vouchers granted in Saskatchewan during August were to teachers, 4 in number, who were conveyed at the reduced rate from Regina to situations within the same zone. The Alberta labour movement originated at Edmonton and comprised the transfer of 68 persons, 64 within the province and 4 outside. The latter were farm hands for Saskatchewan rural points. Provincially, 2 farm hands were carried to Drumheller, one farm hand to Calgary, and 27 farm hands, one farm domestic, 10 parks labourers, 5 mine workers, 4 sawmill labourers, 4 cooks, 3 carpenters, 3 oil well employees, one bridge engineer, one school teacher, one hotel maid, and one house maid to various centres throughout the Edmonton zone. Offices in British Columbia issued 21 reduced rate certificates during August, all to provincial points. At the Vancouver office 12 cannery workers secured certificates for transportation to Kamloops, and 2 hotel workers, one farm housekeeper and one mine cook for centres within the Vancouver zone. The Nelson office was instrumental in transferring 4 camp pole makers, and the Prince Rupert office one tie-cutter to employment in their respective zones.

Of the 728 workers who took advantage of the Employment Service reduced transportation rate during August, 490 were conveyed by the Canadian National Railways, 174 by the Canadian Pacific Railway, 52 by the Temiskaming and Northern Ontario Railway, 10 by the Northern Alberta Railway, and 2 by the Pacific Great Eastern Railway.

### (4) Building Permits issued in Canada during August, 1936

The value of the building permits issued during August, 1936, was smaller than in the preceding month, and was also less than in August of last year; during the month under review, the 58 co-operating centres authorized building estimated to cost \$3,672,845, as compared with \$4,615,502 in July, 1936, and \$4,311,968 in August, 1935. There was, therefore, a decrease of 20.4 per cent in the comparison, and of 14.8 per cent in the second.

The value of the building authorized in the first eight months of the present year was \$25,788,767; this was lower than the aggregate

of \$33,348,881 reported in the period January-August, 1935, although it was decidedly higher than in the first eight months of either 1934 or 1933. The cumulative total for this period in each of the last five years had been very much lower than in any other year on record; the wholesale prices of building materials since 1931 have also been decidedly lower than in any preceding year since 1920.

Some 50 cities furnished detailed statistics showing that they had issued about 350 permits for dwellings estimated to cost over \$1,500,000 and more than 1,500 permits for

other buildings valued at approximately \$1,850,000. During July, authority was granted for the erection of some 400 dwellings and 1,500 other buildings, estimated at about \$1,700,000 and \$2,300,000, respectively.

As compared with July, 1936, Nova Scotia and Saskatchewan reported gains of \$63,721 and \$108,923, respectively. Of the reductions elsewhere indicated, that of \$484,977 or 36·6 per cent in Quebec was greatest.

Prince Edward Island, New Brunswick, Quebec, Manitoba, Saskatchewan and Alberta reported higher aggregates of building permits issued than in August of last year; the largest increase of \$508,938 or 154·0 per cent was in Quebec. Of the declines recorded in the remaining provinces, that of \$790,531 or 81·6 per cent in Nova Scotia was most marked.

Of the four largest cities, Toronto, and Vancouver showed decreases as compared with July, 1936, and also with August, 1935, while in Montreal and Winnipeg there was a decline in the first, but an increase in the second comparison. Of the other centres, Sydney, Quebec, Shawinigan Falls, Three Rivers, Westmount, Chatham, London, Niagara Falls, Port Arthur, Sarnia, Sault Ste. Marie, Welland, St. Boniface, Regina, Saskatoon, Lethbridge, Kamloops and Victoria recorded gains in both comparisons.

*Cumulative Record for First Eight Months, 1920-1936.*—The following table gives the value of the building authorized by 58 cities during August, and in the first eight months of each year since 1920, as well as index

numbers for the latter, based on the January-August total in 1926 as 100. The average index numbers of wholesale prices of building materials in the first eight months of the years since 1920 are also given, (average 1926=100).

Year	Value of permits issued in August	Value of permits issued in first eight months	Indexes of value of permits issued in first eight months, (1926=100)	Average indexes of wholesale prices of building materials in first eight months, (1926=100)
	\$	\$		
1936.....	3,672,845	25,788,767	23·6	84·7
1935.....	4,311,968	33,348,881	30·5	81·2
1934.....	3,764,425	17,433,272	16·0	82·8
1933.....	1,910,809	14,407,111	13·2	77·0
1932.....	3,823,251	32,576,464	29·8	77·7
1931.....	8,201,879	78,194,996	71·6	83·0
1930.....	14,029,564	115,268,330	105·5	93·4
1929.....	21,582,221	168,894,072	154·6	99·2
1928.....	17,448,542	145,247,485	133·0	96·4
1927.....	29,478,378	126,690,292	116·0	96·2
1926.....	11,672,599	109,211,942	100·0	100·7
1925.....	9,511,008	88,223,328	80·8	103·1
1924.....	9,406,733	81,762,083	74·9	109·0
1923.....	11,425,031	97,551,074	89·3	111·8
1922.....	18,158,932	105,181,416	96·3	108·4
1921.....	10,928,039	77,665,614	71·1	128·6
1920.....	10,805,846	86,303,601	79·0	143·8

The aggregate for the first eight months of this year was lower than in 1935, although it was higher than in 1934 or 1933. The average index number of wholesale prices of building materials, though higher than in any of the years, 1931-1935, was considerably lower than in any other year since 1920.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, September, 1936, summarized the employment situation as follows:—

Employment in August showed a further improvement as compared with the previous month, and was considerably better than in August, 1935. There was a substantial increase in employment, between July 20 and August 24, in the coal mining industry; there was also some improvement in the linen industry, boot and shoe manufacture, building and public works contracting, general engineering, the iron and steel tube industry, and cocoa, chocolate, etc., manufacture. On the other hand there was a decline in employment in tailoring, dressmaking, the shirt, collar, etc., industry, and the distributive trades.

25373-6

It is provisionally estimated that, at August 24, 1936, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of agricultural workers, was approximately 10,961,000. This was 66,000 more than at July 20, 1936, and 500,000 more than at August 26, 1935.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural workers) the percentage unemployed in Great Britain and Northern Ireland, at August 24, 1936 (including those temporarily stopped as well as those wholly unemployed), was 12·3 as compared with 12·7 at July 20, 1936, and with 14·9 at August 26, 1935. In Great Britain the percentage at August 24 was 12·1 compared with 12·5 at July 20, and with 14·7 at August 26, 1935.

At August 24, 1936, the number of persons on the Registers of Employment Exchanges

in Great Britain was 1,297,596 wholly unemployed, 244,874 temporarily stopped, and 71,470 normally in casual employment, making a total of 1,613,940. This was 38,132 less than a month before and 334,024 less than a year before. The total of 1,613,940 included 1,255,006 men, 58,325 boys, 246,307 women, and 54,302 girls.

The persons on the Registers included 688,446 insured persons with claims for insurance benefit, 624,432 insured persons with applications for unemployment allowances; 175,174 insured persons (including insured juveniles under 16 years of age and insured agricultural workers) not in receipt of insurance benefit or unemployment allowances, and 125,888 uninsured persons.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at August 24, 1936, was 1,678,277, as compared with 1,717,062 at July 20, 1936, and 2,022,450 at August 26, 1935.

### United States

*Manufacturing Industries.*—A substantial increase in factory employment between July and August combined with gains in 10 of the 16 non-manufacturing industries surveyed monthly by the U.S. Bureau of Labor Statistics resulted in a net gain of 166,000 workers in these combined industries over the month interval, and weekly payrolls in these industries increased by approximately \$7,300,000, according to a recent announcement by Secretary of Labor Frances Perkins.

"The gains in factory employment and payrolls were widespread, 71 of the 90 manufacturing industries surveyed reporting increases in number of workers and weekly payrolls over the month interval," Secretary Perkins said. "The increase of 2.2 per cent in factory employment indicates the return of approximately 165,000 workers to jobs in the manufacturing industries and marks the seventh consecutive month in which gains have been reported. The August, 1936, employment index (88.7) exceeds the level shown in any month since September, 1930. The increase of 4.1 per cent in payroll totals raised the August payroll index (81.0) to the maximum recorded since October, 1930.

While a large proportion of the durable goods industries showed gains in employment, the level of employment for the durable goods group as a whole remained unchanged, due largely to a sharp decline in employment in the automobile industry. The non-durable goods group, however, showed a substantial

increase in employment, 4.3 per cent. The August employment index for the non-durable goods group (98.5) exceeds the levels of any month since September, 1930, and indicates that for every 1,000 workers employed during the index base period (1923-25=100) 985 were employed in August, 1936. The August employment index for the durable goods group (79.7) is, with the exception of the two immediately preceding months, higher than in any preceding month since September, 1930, and indicates that 797 of every 1,000 workers employed during the index-base period were employed in August, 1936. Employment in the durable goods group in August, 1936, was 13 per cent higher than in August, 1935, while in the non-durable goods group the gain over the year interval was 4.5 per cent.

Employment gains in 10 non-manufacturing industries slightly offset the declines in the remaining 6 non-manufacturing industries covered by the Bureau of Labor Statistics and resulted in a small net employment increase (approximately 1,000 workers) between July and August. Nearly 13,000 workers were returned to employment in wholesale trade establishments. Private building construction and bituminous coal mining also added substantial numbers of workers to their payrolls. Electric light and power and manufactured gas companies continued to absorb additional workers, the gain of approximately 6,000 workers bringing the level above that of any month since September, 1931.

*Non-manufacturing Industries.*—Among the 6 non-manufacturing industries reporting decreased employment, the most pronounced losses were in retail trade and anthracite coal mining. Employment in retail trade establishments normally recedes from July to August, the decrease of 1 per cent during the month interval indicating 31,600 fewer workers in retail stores. Reports from anthracite mines indicated a drop of 10,400 workers. Seasonal declines were shown in laundries and dyeing and cleaning and small decreases in employment were reported in year-round hotels and in electric railroads and motor bus operation and maintenance.

A comparison of aggregate employment in the combined manufacturing and non-manufacturing industries between August, 1935, and August, 1936, shows an increase of approximately 960,000 workers over the year interval. Weekly wage disbursements were more than \$41,500,000 greater in August, 1936, than in the corresponding month of last year.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on

May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodeling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodeling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodeling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages

clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wage conditions have recently been executed by the Government of Canada.

# NATIONAL HARBOUR BOARD

## Contracts in Group "A" (Construction, Remodelling, etc.)

Demolition and reconstruction of Raceways Nos. 1 to 9, inclusive, Windmill Point Wharf, Harbour of Montreal, P.Q. Name of contractors, Atlas Construction Co., Ltd., Montreal, P.Q. Date of contract, August 17, 1936. Amount of contract, approximately \$123,398. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmith.....	\$0 60	8	44
Burners and welders—electric or acetylene.....	0 60	8	44
Carpenters.....	0 70	8	44
Compressor air operator.....	0 50	8	44
Cement finishers.....	0 60	8	44
Concrete mixer operator—steam, gas or electric.....	0 65	8	44
Concrete mixer operator—steam.....	0 65	8	44
Concrete mixer operator—gas or electric.....	0 50	8	44
Crane operators—stationary (gas or electric).....	0 55	8	44
Crane signalman.....	0 45	8	44
Dragline operator.....	0 85	8	44
Drill runner.....	0 50	8	44
Driver, horse and cart.....	0 55	8	44

Tractor operators.....	0 50	8	44
Watchman.....	0 35	8	44
Divers (equipment supplied by contractor).....	1 75	8	44
	(Half day's pay to be allowed for work done in any forenoon or afternoon.)		
Divers' attendants.....	0 50	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

## DEPARTMENT OF NATIONAL DEFENCE

*Contracts in Group "A" (Construction, Remodelling, etc.)*

Painting the metal roofs of the Permanent Camp buildings at Valcartier. Name of contractor, Mr. Joseph Lirette, Quebec, P.Q. Date of contract, September 2, 1936. Amount of contract, \$1,147. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Carpenters.....	\$0 50	8	44
Labourers.....	0 30	8	44
Painters.....	0 50	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Repairs to the exterior brickwork on the Armoury, Coaticook, P.Q. Name of contractor, Mr. Hilaire Savard, Coaticook, P.Q. Date of contract, September 9, 1936. Amount of contract, \$550. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Carpenters.....	\$0 50	8	44
Brick and hollow tile layers.....	0 70	8	44
Brick and hollow tile helpers (continuously employed mixing and tempering mortar).....	0 35	8	44
Labourers.....	0 30	8	44
Painters.....	0 50	8	44
Sheet metal workers.....	0 55	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Erection of Airmen's Married Quarters at the Royal Canadian Air Force Station, Trenton, Ont. Name of contractors, Frontenac

Construction Co., Ltd., Toronto, Ont. Date of contract, September 9, 1936. Amount of contract, \$113,990. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Brick and hollow tile layers.....	\$0 80	8	44
Brick and hollow tile helpers (continuously employed mixing and tempering mortar).....	0 40	8	44
Carpenters and joiners.....	0 60	8	44
Cement finishers.....	0 55	8	44
Cement and concrete mixer operator—

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

#### ROYAL CANADIAN MOUNTED POLICE

#### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

Contracts were awarded by the Royal Canadian Mounted Police during the months of August and September, 1936, to the following: The Hart Boot & Shoe Co., Ltd., Fredericton, N.B., for the manufacture of riding boots; the Wabasso Cotton Co., Ltd., Three Rivers, P.Q., for the manufacture of mercerized broadcloth; and to Firth Bros., Ltd., Hamilton, Ont., for scarlet serge tunics, and also for brown serge jackets. The contracts all included the "B" labour conditions above referred to.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A summary is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Vegetable Foods, Drink and Tobacco

VANCOUVER, B.C.—A CERTAIN BAKERY AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, Local No. 189.

(A strike at another bakery is reported on page 881 of this issue.

Agreement to be in effect from June 1, 1936, to June 1, 1937, and thereafter from year to year until either party gives 30 days' notice before June 1 of any year. If such changes cannot be agreed upon they shall be submitted to a board of arbitration whose decision shall be final and binding.

All employees must become and remain members in good standing of the union within one week of commencing their employment. All employees to receive and sign for a copy of this agreement, thereby authorizing the Company to deduct from their wages and pay to the union secretary any dues, fines or assessments levied by the union. The union agrees to reimburse the Company should any union member cheat the Company out of any money, but the Company is to prosecute such salesman. No salesman to be discharged for upholding union principles.

No work on Sundays or any national holidays, except that two men may be asked to be ready to handle emergency or shipping orders, such men to be called in rotation. A day's work to be ended on the completion of the salesman's route, but in no case to exceed the hours of work as set by the "Hours of Work Act."

Minimum wage scale: bakery salesmen \$23 per week, route inspectors \$29.40; inexperienced new men \$20 per week for first four weeks. No employee receiving a higher wage rate to have his wages reduced because of this agreement. The commission on cakes to be 10 per cent retail and 5 per cent wholesale. Salesmen are not to be expected to accept for sale any other products than those ordered by them previously. Any other goods given them to be on a returnable basis.

One week's notice to be given employees discharged and employees to give the same notice if leaving.

In case of any dispute, the men to continue to work and if it cannot be adjusted it must be referred to a board of arbitration whose decision is final.

### Manufacturing: Fur, Leather and Leather Products

TORONTO, ONTARIO.—CERTAIN LEATHER GARMENT MANUFACTURERS AND THE UNITED GARMENT WORKERS OF AMERICA, DISTRICT COUNCIL.

Agreement to be in effect from July 1, 1936, in one establishment and later dates in other establishments, until July 1, 1937.

(A dispute in one establishment before the signing of the agreement was reported in the *LABOUR GAZETTE*, August, page 692.)

Only union members to be employed to perform all cutting, operating, pressing and all general work.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. No work on Labour Day.

Overtime: No overtime to be permitted as long as additional employees can be secured from the union for such work and there is room and extra machinery for such new help.

Both parties agree to enter into conference for the purpose of fixing piece work and weekly wage rates for the different sections in the shop. All new prices for piece work to be agreed upon by the manufacturer and the shop committee and if they cannot agree, a representative of the union will be called in to help settle the dispute.

The manufacturer will not enter into any individual agreement with any employee without the knowledge and consent of the union. The manufacturer agrees not to give out any work to be done at any contracting shops.

In the slack period, when there is not sufficient work for all employees, the available work in the shop to be divided as equally as possible among all employees engaged in the work and no employers are to work. In the busy season, where the firm consists of several partners who have been working regularly at some operation, one of such partners may continue in this position.

No employee to be discharged without sufficient cause and without the consent of the union. A shop chairman and a shop committee to be selected by the employees and all complaints and disputes are to be taken up at a conference between the shop chairman, the shop committee, the union and the representative of the firm.

### Transportation and Public Utilities: Water Transportation

HAMILTON, ONTARIO. — CERTAIN STEAMSHIP COMPANIES AND THE LONGSHOREMEN'S UNION OF HAMILTON.

Agreement reached at the conclusion of the strike reported on page 884 of this issue.

Agreement to be in effect from September 1, 1936, to the end of the 1936 navigation season.

Negotiations for an agreement for 1937 are to be commenced not later than the end of January, 1937.

The companies agree to recognize the union and the dock stewards as representatives of the union during loading or unloading operations, such dock stewards to be working longshoremen. No discrimination to be shown against union members because of their union activities. If sufficient union men are not available when required, non-union men may be employed for the loading or unloading of the boat for which they are required.

Hourly wage rates: 42 cents from 6 a.m. to 6 p.m., 45 cents from 6 p.m. to 6 a.m. and for all work on Sundays and holidays. After the first hour of waiting, all waiting time to be paid for at half regular rates, excluding meal hours.

Other conditions as to waiting time, etc. are provided for in the agreement.

Truckers not to load or unload their own trucks.

Complaints against union members are to be submitted by the stevedore or foreman to the union's business agent or dock steward, but longshoremen may be immediately discharged and their cases taken up as soon as possible by representatives of the Company and the union.

### Transportation and Public Utilities: Street and Electric Railways

#### MONTREAL, QUEBEC.—THE MONTREAL TRAMWAYS COMPANY AND THEIR EMPLOYEES

Agreement to be in effect from July 1, 1936, to June 30, 1937 and will continue from year to year thereafter until either party gives notice 60 days before the termination date.

#### GENERAL

No discrimination to be shown against any employee because of his membership in a union and employees who are union officials to be granted leave for the work of the union. A union president or business agent may visit any division or department and discuss with the head of the department questions relating to the welfare of the union members.

Free transportation to and from work to be given employees and also to pensioned employees.

Promotions to be made with justice to all, considering ability and seniority.

All employees normally to be entitled to one day's rest in seven. Men employed in the power, mechanical or construction departments who receive an urgent call for duty at night outside their regular hours to be paid time and one-half with a minimum of 4 hours computed at regular rates.

Employees dismissed or suspended to first have an opportunity of presenting their case to the superintendent or other authorized official and will have the right to submit the case through the business agent to the head of the department and to the management.

Uniforms will be supplied by the Company to conductors, motormen, autobus chauffeurs and car starters who have been three years in the service. Car starters, couplers, switch inspectors, hillmen, watchmen on construction work on streets and section foremen to be supplied with rubber coats and rubber boots.

One apprentice allowed for every 10 craftsmen or fraction thereof. They may only work as apprentices for three years.

The Company agrees to meet a committee representing the employees to settle questions which may be submitted.

#### TRANSPORTATION DEPARTMENT

Hours for conductors, operators and autobus chauffeurs to be limited to 54 per week. Seniority to prevail in the selection of runs. All men taking senior bookings of between 45 and 54 hours per week to complete their work in six days. Spare men to be limited to a maximum of 42 hours per week and all men may work on the seventh day to bring their hours to 42 in the week. All car runs will be in two shifts, as much as possible to be worked inside of 14 consecutive hours. Runs may be booked from 44 hours in 7 days to 36 hours in 7 days, but no employee to be obliged to book on a car or bus making less than 36 hours per week.

With certain exceptions, crews, operators and autobus chauffeurs on regular scheduled runs who are required to work for an extended period or in emergencies to be paid time and one-half for extra time worked up to a maximum of 2 hours at overtime rate. All work on Sundays and seven specified holidays, 5 cents per hour extra.

Provision is made for conditions governing waiting time, work on special cars, delays, sufficient time for rest between runs, etc.

Wages per hour: conductors, motormen and car starters—first year's service 41 cents, second year 46 cents, after two years 51 cents; one man car operators 5 cents per hour extra. Wages for autobus chauffeurs—first year 52 cents, second year 56 cents. Wages for hillmen and switchmen—first year 29 cents, second year 33 cents. Five cents per hour extra to be paid employees requiring special training for working mechanical cars and shifting and switching railroad cars for suburban lines, also for employees training platform men or autobus chauffeurs, and for work on sweepers, ploughs and special snow equipment.

#### CONSTRUCTION DEPARTMENT

Hours: 48 per week but owing to the nature of the work this standard in force only so far as work is available and weather conditions and other contingencies permit.

Overtime at the rate of time and one-quarter to be paid to day gangs for all time worked over 10 hours up to midnight and time and one-half from midnight to 7 a.m. except for working on snow when time and one quarter to be paid for all overtime over 10 hours. Night gangs to be paid at regular rates when work continues for more than 8 hours. Night gangs commencing work at midnight or after to be paid time and one-quarter with a minimum of 6 hours of paid time. Emergency gangs called after midnight to be paid time and one-half with a minimum of 4 hours at regular rates.

Hours for construction department shop employees: 40 per week. Overtime: time and one-quarter to be paid for all time over 10 hours on any week day; on Sundays and legal holidays, the overtime rate to be time and one-half.

Wage rate for labourers in construction department: 31 cents per hour.

Hourly wage rates for road department: subforemen 51 cents in summer, 47 cents in winter, 45½ cents for snow work; spring switch inspectors 47 cents; city trackmen, 45½ cents except snow work 40 cents; suburban trackmen, 43 cents except snow work, 40 cents; section men, 38 cents.

**POWER DEPARTMENT**

Hours: 56 per week for operating men and 40 per week for maintenance men.

Overtime: time and one-half for all time over 10 hours on any week day. Work on Sundays and seven specified holidays by operating employees, 5 cents per hour extra.

**OVERHEAD SECTION OF POWER DEPARTMENT**

Hours: 40 per week.

Overtime: time and one-quarter for all work over 10 hours and for all work on Sundays and holidays. In emergency cases outside the regular hours, time and one-half to be paid employees, with a minimum of 4 hours.

**AUTOBUS GARAGE EMPLOYEES**

Hours: 50 per week.

Overtime: time and one-half for work over 10 hours; work on Sundays and holidays, time and one-quarter.

**YOUVILLE SHOPS AND CAR BARNs**

Hours: 40 per week for all employees at Youville shops and at car barns.

Overtime: time and one-half for all work over 10 hours on any week day at Youville shops. For work on Sundays and on legal holidays, time and one-quarter. No employee to be required to work more than two Sundays in each month, unless called for emergency work.

**Quebec Collective Labour Agreements Extension Act**

The following agreement and amendment to an agreement have recently been made obligatory by Orders in Council and are noted on page 953 of this issue:

Dress Cutters, Province of Quebec.

Building Trades, Montreal (Amendment).

**Industrial Standards Act of Ontario**

The following schedules have been made binding by Orders in Council and are summarized in the article below:

of this issue:

Barbers, Toronto.

Building Labourers, Toronto.

Plasterers, Ottawa.

Plumbers, Toronto.

Electrical Workers, Toronto.

Painters, Toronto.

Men and Boys' Clothing Workers, Province of Ontario.

**INDUSTRIAL STANDARDS ACT OF ONTARIO****Agreements Recently Approved by Orders in Council**

The Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*.

The minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the *LABOUR GAZETTE*, summaries are given in this article of the schedules which have thus been approved.

**BARBERS, TORONTO.**—An Order in Council, dated September 4 and published in *The Ontario Gazette*, September 12 and corrected in the issue of October 3, makes obligatory the terms of a schedule governing the barbering trade in a zone which includes the city of Toronto and the adjacent suburban area.

The Order in Council is in effect from September 22, 1936 "during pleasure."

Work may be performed on any day except Sundays, Wednesdays after 12 noon and on eight specified holidays.

Minimum wage rates for any person who is regularly employed on a percentage basis, for master barbers (that is persons who employ any other person to do work at the barbering trade) who personally work at the trade and for any person who carries on a business in a one-chair establishment or who operates a barber chair in any shop as a separate unit to be "such percentage of the earnings of the barber or chair operated by him as will ensure to the barber a minimum wage equivalent to what he would have received for the same work if he had been employed pursuant to an arrangement whereby he would receive 60 per cent of

the amount taken in at the following shop prices: hair cut (adults) 40 cents; shampoo (plain) and facial massage (plain) 35 cents; hair cut (children), singe and razor honing 25 cents; shave 20 cents; hair tonics and neck clip or neck shave 15 cents. Minimum wage rate for persons regularly employed on a weekly salary basis: \$20 per week. Minimum wage rates for persons who are not regularly employed at the trade to be \$3 per day for any day except Saturday or a day preceding a holiday for which minimum is \$5. If employed for less than a full day, 60 cents an hour to be paid with a minimum of 3 hours' pay.

No deduction to be made from the wages established herein for materials supplied, laundry service or operating expenses of any kind.

Apprentices to be governed by the Ontario Apprenticeship Act.

**BUILDING LABOURERS, TORONTO.**—An order in Council dated September 4 and published in *The Ontario Gazette*, September 12, and corrected in the issues of September 19 and October 3, makes obligatory the terms of a schedule affecting common labourers in the building trades in a zone which includes the city of Toronto and the adjacent suburban area.

The schedule is to be in effect from September 22, 1936, "during pleasure."

Hours: 48 per week. In case of shift work, no person to work more than one shift of 9 hours in any 24 hour period.

Overtime: time and one-half; work on Sundays and five specified holidays, double time.

Minimum wage rate for common labourer: 50 cents per hour. A special minimum rate may be established by the Advisory Board for any person who is handicapped by age or disability.

**PLASTERERS, OTTAWA.**—An Order in Council dated September 24 and published in *The Ontario Gazette*, September 26, with correction in the issue of October 3, makes obligatory the terms of a schedule governing the plastering trade in a zone which includes the city of Ottawa and surrounding district.

The Order in Council is in effect from October 6, 1936, "during pleasure."

The Order in Council does not apply to regular employees of industrial or manufacturing plants or establishments engaged on repair or maintenance work or new structures, alterations or extensions of a minor nature in such plant or to its equipment.

Hours: 8 per day, from 8 a.m. to 5 p.m. from April to September inclusive, and between 8 a.m. and 4.30 p.m. from October to March inclusive, 4 on Saturdays from 8 a.m. to noon, a 44 hour week. Where shift work is being carried on, any 8 hours to be a regular shift.

Overtime to consist of all work done outside of the hours outlined above and to be paid at time and one-half; work on Saturday after 12 noon, on Sundays and six specified holidays, double time. No work on Labour Day.

Minimum wage rate: 80 cents per hour during regular working hours and for work at night for 8 hours if such work cannot be done during a regular working day. In case of shift work, for work on night shifts, 91 cents per hour or

8 hours' pay for 7 hours' work. A special minimum rate may be established by the advisory board for any person who is handicapped by age or disability.

Apprentices to be governed by the Ontario Apprenticeship Act.

**PLUMBERS, TORONTO.**—An Order in Council, dated September 24 and published in *The Ontario Gazette*, September 26, and corrected in the issue of October 3, makes obligatory the terms of a schedule governing the plumbing and heating trades in a zone which includes the city of Toronto and surrounding district which is defined in the Order in Council.

The schedule is in effect from October 6, 1936, "during pleasure."

The provisions of the schedule do not apply to regular employees of industrial or manufacturing plants or establishments engaged in manufacturing processes in the repair, servicing or upkeep of the plant or equipment, on new installations, alterations or extensions of a minor nature in or to the plant or its equipment, nor does it apply to sprinkler fitting.

Hours: 40 per week, a regular working day to be 8 hours between 8 a.m. and 5 p.m. from Monday to Friday inclusive. When work is being carried on in two or more shifts, persons on the night shift to work only seven hours per shift and be paid at \$1.03 per hour, with no overtime permitted on such work.

Overtime: all work performed at any time except during the hours specified above and except for work on Saturday before noon which is required for the protection of life or property or the setting of sleeves and inserts, must be paid for at the rate of time and one-half. Work on Saturdays, Sundays and eight specified holidays, double time.

Minimum wage rate for plumbers, steam-fitters, pipe-fitters, hot water fitters and gas-fitters: 90 cents per hour.

Apprentices to be governed by the Ontario Apprenticeship Act, but whenever this Act does not govern the employment of fifth year junior mechanics they will be governed by all the provisions of this schedule except that the minimum wage rate is two-thirds of the journeyman's scale.

**ELECTRICAL WORKERS, TORONTO.**—An Order in Council, dated September 24, and published in *The Ontario Gazette*, September 26, and corrected in the issue of October 3, makes obligatory the terms of a schedule governing the electrical repair and construction trade in a zone which includes the city of Toronto and surrounding district which is defined in the Order in Council.

The schedule is in effect from October 6, 1936, "during pleasure."

The schedule applies to work in connection with the construction and erection of any new building, or structure or part thereof and the remodelling or alteration of any existing building. It does not apply to regular employees of industrial or manufacturing plants or establishments who are engaged in manufacturing processes, in the repair, servicing or upkeep of the plant and equipment used in the operation of such plant, in the work of new installations, alterations or extensions of a minor nature to the plant or its equipment,

nor to those engaged in repairing or servicing electrical machines or appliances when the work is done in commercial establishments or when done by regular employees of manufacturers or their agents pursuant to the terms of a guarantee or contract accompanying the sale or installation of such machines or appliances.

Hours: 40 per week divided into five regular working days of 8 hours each between 8 a.m. and 5 p.m. on Mondays to Fridays inclusive. When work is carried on in two or more shifts, night shifts to be paid at 8 hours' pay for 7 hours' work.

Overtime: All work outside the above hours and all work on Saturdays, Sundays and eight specified holidays, double time, with the exceptions that work required on Saturday morning for the protection of life or property to be paid at regular rate provided that during the next week following the commencement of such emergency work, the hours worked by such workmen do not exceed 40, including the hours worked on such Saturday morning.

Minimum wage rate: \$1 per hour which also applies to night work of not more than 8 hours' duration when such work cannot be done during the day. A special minimum rate of wages may be established by the advisory board for any person who is handicapped by age or disability.

Apprentices to be governed by the Ontario Apprenticeship Act.

PAINTERS, TORONTO.—An Order in Council dated September 24, and published in *The Ontario Gazette*, September 26, and corrected in the issue of October 3, makes obligatory the terms of a schedule governing the painting and decorating trades in a zone which includes the city of Toronto and surrounding district which is defined in the Order in Council.

The schedule is in effect from October 6, 1936, "during pleasure."

The schedule does not apply to regular employees of manufacturing plants while engaged in manufacturing processes nor to regular employees of manufacturing plants or industrial establishments engaged on the repair, servicing or upkeep of the plant or equipment or on work of new installation or alterations of a minor nature.

Hours: 40 per week divided into 8 hours between 8 a.m. and 5 p.m. on the first five days of the week. Whenever work cannot be performed during the regular hours, it may be done at night, with the 8-hour shift being paid at the regular rate. In case of shift work, any 8-hour shift may be paid at the regular rate. Whenever any person is required to work on Saturday at "spray painting" in industrial establishments or manufacturing plants which work cannot be done during regular working hours he may be paid at the regular rate for such Saturday work, provided that during the next six days the hours he works at regular rates of pay, together with such Saturday work, do not exceed forty.

Overtime: up to 8 hours in a week, time and one-half. All other overtime and work on Saturdays, Sundays and eight specified holidays, double time.

Minimum wage rate: 75 cents per hour: spray painting 85 cents. A special minimum

rate of wages may be established by the advisory board for handicapped persons.

Apprentices to be governed by the Ontario Apprenticeship Act.

MEN'S AND BOYS' CLOTHING WORKERS, PROVINCE OF ONTARIO.—An Order in Council dated September 24 and published in *The Ontario Gazette*, September 26, and corrected in the issue of October 3, makes obligatory the terms of a schedule governing the men's and boys' clothing industry throughout the province of Ontario.

The schedule is to be in effect from October 1, 1936, "during pleasure."

"The following schedule for wages and hours and days of labour, during the period while this schedule is in force, shall govern the employment of all persons working in the men's and boys' clothing industry, that is to say, the entire or partial manufacture or production, anywhere in the Province of Ontario (whether in factories or other premises of the employer or elsewhere) of all men's, boys' and youths' pants, coats, vests or suits of every type and description, and any clothing as before specified, manufactured from crossbred serges, flannels of all kinds, worsted or cotton and wool mixtures save and except the manufacture of infants' and children's clothing not exceeding size 24 for children up to the age of 6 years, work shirts, overalls, baseball or other similar athletic uniforms, combination overalls, wind-breakers, mackinaw coats, rubberized and leather goods, coarse pants manufactured from pure cotton fabrics, cotton warped flannels or from mackinaw cloths and tweeds above 20 ozs. per yard in weight, the mere alteration in retail stores of completely manufactured coats, vests or pants sold by retail in such stores and the manufacture of clothing by merchant tailors employing or giving employment to no more than four workmen (including any working employer, his partner or partners) manufacturing clothing to order for individual customers according to individual sizes, measurements or specifications."

Hours: 8 per day between 8 a.m. and 5 p.m. and 4 on Saturdays between 8 a.m. and noon, a 44-hour week. Such factories as have been working from 7.45 a.m. with an hour and a quarter lunch period or such as have worked between 8 a.m. to 6 p.m. on the first four days of the week, between 8 a.m. and 5 p.m. on Friday and no work on Saturday may continue, provided the 44-hour week is maintained in all cases.

Overtime: all work other than during the hours above specified and all work on eight specified holidays, time and one-half.

The following wage rates apply to the counties of Ontario, York, Peel, Halton and Wentworth. In the remainder of the province these minimum rates are reduced by 12½ per cent.

Minimum hourly wage rates for employees of "stock manufacturers": Class A (skilled cutter and head operator) 70 cents; class B (finish presser) 65 cents; class C (pocket operator and front pocket and back pocket maker on pants) 62 cents; class D (skilled trimmer, edge taper, 1st operator on vests and 2nd operator on vests) 61½ cents; class E (shaper and leg and bottom presser on pants) 60 cents; class F (seamer on pants, top stitcher on pants, lining

maker on pants, waistband maker on pants, fitter, under-baster, top collar baster and finish presser on vests) 57 cents; class G (lining maker, edge stitcher, joiner and pocket tacker, shoulder joiner, general operator, gorge sewer, fitter on vests, top presser on pants and chopper) 50 cents; class H (edge presser, edge baster by hand, lining baster, facing baster by hand, collar setter, and examining brusher) 45 cents; class I (shoulder and undercollar baster, alteration tailor, seam presser, under presser and back presser on vests, pocket maker and outside seamer on boys' longs, shorts and bloomers and lining sewer and stitcher on boys' shorts, longs and bloomers) 41 cents; class J (sleeve maker and separator of coats) 37 cents; class K (buttonhole maker, machine; edge baster, machine, fitter on pants, trimming maker on pants, seam presser on pants, separator of vests and ticket pocket maker) 35 cents; class L (facing and bottom tacker, special machine operator, lapel and collar padder, facing baster, machine, armhole serger, lining and back maker on vests, operator on vests, baster on vests and separator of pants) 33 cents; class M (canvas baster, machine, special machine operator on pants, buttonhole maker, hand, canvas baster, hand, finisher and button sewer) 31 cents; class N (bottom trimmer on pants, thread marker, canvas maker, machine, buttonhole tacker, binder, cleaner and basting puller, pocket and piecer on vests, general helper and busheller on pants) 28½ cents.

Minimum hourly wage rates for employees of "odd pants manufacturers": class A (skilled cutter) 68 cents; class B (front and back pocket maker, trimmer, lining stitcher, leg presser and top presser) 50 cents; class C (lining sewer and seamer) 43 cents; class D (pocket maker on boys' longs, shorts and bloomers and lining sewer and stitcher on boys' longs, shorts and bloomers) 41 cents; class E (chopper for odd pants) 40 cents; class F

(fitter, underpresser, trimming maker, buttonhole maker and seamer on boys' longs, shorts and bloomers) 33 cents; class G (fly maker, pocket serger, tacker, button sewer, loop maker, finisher, examiner, cleaner and buttonhole tacker) 28½ cents.

Any employer may submit to the advisory board the name of any employee who has less than the average skill and ability, and the board may set a special wage rate for such employee for a defined period. In the case of employees performing more than one operation they are to receive the wage rate for the highest classification of work they perform, unless a special rate is fixed by the advisory board.

"Whenever any person or firm, or corporation, whether retailer, jobber, contractor or manufacturer, shall give work to other persons, firms or corporations, whether to outside shops or otherwise, such person, firm or corporation so supplying work shall also be deemed an employer of and shall be responsible for the paying of wages (according to the minimum standards provided by this agreement) to any person performing any of the operations covered by this agreement."

"Nothing in or concerning this schedule shall be so construed or applied as to imply the right of any employer, during the period in force hereof, to reduce or lower the scale of wages now being paid to any specific worker, nor to prejudice or affect any rights, legal or equitable of any worker or group of workers under any collective bargain or other arrangement or agreement, whether now prevailing or later to be concluded, or in respect to any acts or conduct seeking to secure any such collective bargain, arrangement or agreement other than to the full extent to which any such collective bargain, agreement or arrangement purports to provide for lower wages or more or different hours of work than as herein set out and provided."

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and a Further Application

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension by Order in Council of an agreement affecting dress cutters throughout the Province and an amendment to the Order in Council affecting building trades at Montreal, both of which are summarized below. In addition, a request for an amendment to the Order in Council affecting furniture workers throughout the Province was published in the *Quebec Official Gazette* of September 19.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526, and July, 1936, page 607. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one

or more associations of bona fide employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from

the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**DRESS CUTTERS, PROVINCE OF QUEBEC.**—An Order in Council, approved September 10 and published in the *Quebec Official Gazette* September 19, makes obligatory the terms of an agreement between the Montreal Dress Manufacturers' Guild representing certain manufacturers and the International Ladies Garment Workers Union and Dress Cutters Union Local 205, International Ladies' Garment Workers Union.

The agreement applies throughout the entire Province to the cutting departments of manufacturers, contractors, jobbers and retailers engaged in the production of ladies and misses' dresses, dress ensembles, gowns, waists and blouses and also all separate skirts not included in the Order in Council for the cloak and suit industry, but does not apply to the manufacture of nurses' and waitresses' uniforms, smocks, hoozers, aprons and pinafores.

The agreement is in effect from September 19, 1936 to January 15, 1938, and shall renew itself automatically unless one of the contracting parties gives notice to the other party of its intention of amending or revoking same at least 30 days before the expiration of the contract.

**Hours:** 44 per week, either 8 per day for first five days of the week and 4 on Saturday morning, or 9 per day for first four days of the week, 8 on Friday and no work on Saturday.

**Overtime:** not more than 2 hours overtime in any day or 8 hours overtime to be permitted in any one week and these can only be worked during the first four days of the week, and to be worked at regular rates of pay. No employer to engage for overtime work any regular cutter, chopper or apprentice of another employer during the term of such employee's regular employment.

**Minimum wage rates per week:** cutters \$30, choppers, \$20, apprentices, \$15. Employers paying higher weekly wages must maintain their present rates during the duration of the agreement. No worker to be entitled to any pay when he is not working.

So that an employee may advance into the next higher grade, the Joint Committee or its board of examiners may issue permits to employees.

In shops employing from two to six cutters and choppers inclusive, the number of apprentices is limited to one, shops employing from seven to nine cutters or choppers inclusive, the number of apprentices is limited to two, in shops employing ten or more cutters and choppers the number of apprentices is limited to 20 per cent.

No employer may work as a cutter, chopper or apprentice in his shop unless he is so working at the time the agreement comes into effect, in which case he shall be bound by the provision of the agreement and in no case allowed to work for longer hours than those provided for employees. Any such employer who later discontinues to so work is not permitted to resume such work.

No employer to make any individual contracts with any employee falling within the scope of this agreement, nor exact or accept any cash deposits or other securities from any such employee nor shall any agreement be entered into with any such individual employee, guaranteeing any length of employment, except that the employer shall be entitled to retain not more than three days' wages as security for notice.

This agreement shall supersede all individual agreements that may exist between employers and employees, except the collective agreements which now exist between the parties to this agreement, but in no case may the wages be less nor the hours of labour longer than those prescribed for employees in this agreement.

**BUILDING TRADES, MONTREAL.**—An Order in Council, approved September 10 and published in the *Quebec Official Gazette*, September 19, amends the original Order in Council for these trades (*LABOUR GAZETTE*, May, 1936, page 460), by changing the wage rate for painters, spraymen, glaziers, decorators and paperhangers from 50 cents to 60 cents per hour.

### Survey of Trade Unionism for Study Circles

The Trades Union Congress (Great Britain) has issued a new study course for classes and students, the first pamphlet of which has recently been received. The new course constitutes a general survey of trade unionism in twelve lessons, and deals with its history, structure, functions and policy. Quantities of the pamphlet can be obtained for classes, groups, and study circles at nominal rates from the Trades Union Congress, Smith Square, London, S.W. 1.

According to a recent press report a committee of the Essex County Medical Association is studying the possibilities of inaugurating a health insurance scheme in the Windsor area. If the program is inaugurated it will be carried out as an experiment under the auspices of the Ontario Medical Association.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was slightly upward, the cost of the weekly family budget in terms of retail prices being higher than in August, due to an advance in the cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices was higher at the end of September than at any time during the previous month.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was \$8.28 at the beginning of September as compared with \$8.17 for August. Twenty items in this list advanced in cost and only two were lower. The most important increases occurred in eggs, butter, cheese, bread, flour and beans, while potatoes were substantially lower. Comparative figures for certain earlier dates are \$7.74 for September, 1935; \$6.67 for March, 1933 (the low point in recent years); \$11.64 for September, 1929; \$10.28 for September, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.83 for September, 1914. Including the cost of fuel and rent with that of foods the total budget was \$16.84 at the beginning of September as compared with \$16.72 for August; \$16.16 for September, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.90 for September, 1929; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. Fuel and rent were practically unchanged.

In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was steady during the first two weeks of the month but advanced during the last half and at the end of the month was a full point higher than at the end of August. Comparative figures are: 76.7 for the week ended October 2; 76.6 for the week ended September 25; 76.2 for that of September 18; and 75.6 for that of August 28. The latest figures available on a monthly basis are for August, when the index was 76.2 as compared with 72.3 for September, 1935; 71.9 for September, 1934; 63.5 for February, 1933 (the low point in recent years); 97.8 for September, 1929; 94.4 for September, 1922; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914. Six of the eight main groups in the classification according to chief component materials were higher at the end of the month under review than at the end of August, the largest increases being in the vegetable pro-

ducts group and in the animal products group. Grain prices influenced by the devaluation of the French currency and weakness in Sterling exchange as well as by favourable weather reports from Australia and the Argentine declined slightly toward the end of the month, losing part of the earlier advance. In animal products livestock and milk products were higher.

### Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of September of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to

be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climate conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on

#### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1936\*

(Average prices in 1913=100)

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18%; Clothing, 18%; Sundries, 20%.

prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Meat prices again showed little change of importance. Shoulder roast of beef declined from an average price of 12·6 cents per pound in August to 12·3 cents in September, while bacon advanced from 30·1 cents per pound to 30·8 cents, and boiled ham from 53·4 cents per pound to 53·8 cents. Egg prices were higher in practically all localities, fresh grades averaging 33·5 cents per dozen as compared with 30·1 cents in August and cooking grades averaging 28·5 cents per dozen in September as compared with 25·6 cents in August. Prices were considerably lower in Alberta and Saskatchewan than in other provinces. The average price for milk has remained unchanged at 10·2 cents per quart since April. Butter prices were generally higher, dairy being up from an average of 24·0 cents per pound to 25·4 cents and creamery from 28 cents per pound to 29·6 cents. Cheese also was higher in most localities averaging 21·7 cents per pound in September and 21·0 cents in August. Flour prices continued toward higher levels, the Dominion average price being 3·7 cents per pound as compared with 3·5 cents in August. The price of rolled oats also was fractionally higher at 5·3 cents per pound. Canned tomatoes have advanced gradually in the average in recent months, the price in September being 12·3 cents per tin as compared with 11·1 cents in May. Dry beans advanced from a price of 5·1 cents per pound in August to 5·7 cents in September.

(Continued on page 964)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 2, 1936, monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 956)

ber, while onions were generally lower averaging 4.2 cents per pound in September and 5.2 cents in August. Potatoes were lower in most localities in Ontario and eastern provinces and higher in the western, the Dominion average price being down from \$2.17 per ninety pounds in August to \$1.87 in September. United States anthracite coal averaged ten cents per ton higher at \$14.53, seasonal increases being reported from several localities.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$14.50; Windsor, \$16.50; Charlottetown, \$12.90; Moncton, \$16; Saint John, \$13; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$15.85; St. Hyacinthe, \$13; Montreal, \$14.25; Ottawa, \$15.25; Kingston, \$14.50; Belleville, \$15; Peterborough, \$16.75; Oshawa, \$14.75; Toronto, \$14.50; St. Catharines, \$15; Hamilton, \$14.50; Brantford, \$16; Galt, \$16; Sudbury, \$17.50; Cobalt, \$18; Timmins, \$17.50; Sault Ste. Marie, \$14; Port

Arthur, \$17.25; Fort William, \$17; Winnipeg, \$19.50.

### Educational and Employment Program For Youth In New South Wales

The Department of Labour and Industry (New South Wales) has recently issued a bulletin entitled "Young Citizens' Associations" in which is reviewed the activities of a program for the furtherance of educational and employment opportunities for young people. This scheme was launched in 1932 following a conference of representatives of Municipal and Shire Councils, convened by the Minister of Labour and Industry.

Essentially a citizens' movement, committees of local citizens, representative of each section of the community, have been formed in many suburbs and in some country districts.

Among the objects of the association are:

1. To provide instructional, educational, and recreational facilities for unemployed boys and

girls between the ages of 14-21 whereby they may—

(a) profitably and pleasurably utilize the hours of leisure and unemployment;

(b) extend and consolidate their general education;

(c) prepare themselves for future employment; and

(d) help make themselves useful citizens.

2. (a) to assist in finding employment for unemployed boys and girls between the ages of 14 and 21.

(b) To work in conjunction with existing organizations having employment as their main objective.

Provision for tools, materials, for the classes, rental of premises, and general financial assistance is made by the Government, through the Department of Labour and Industry, and the

only financial responsibility placed on local Committees is that required for social and welfare activities.

Equipment for the motor engineering classes, such as old cars, engines, etc., has been supplied by various Government Departments, and by private firms.

More than 10,000 unemployed boys and girls have already taken advantage of the scheme, and have thus been materially assisted in utilizing their enforced leisure to the best advantage. Membership is open to unemployed boys and girls between the ages of 14 and 21 years, and they are at once entitled to all the privileges provided, with good prospects of early employment. Since the inception of the scheme several thousand boys and girls have been placed in employment, through the activities of the various Associations.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 95·2 for August, an increase of 1·7 per cent for the month. Both food and industrial materials advanced, the greatest change in any one group being a rise of 14·8 per cent in cereal prices.

The *Statist* index number, on the base 1867-1877=100, was 88·7 at the end of August, an increase of 2·2 per cent for the month, which included a rise of 10·2 per cent in vegetable food and 4·9 per cent in sundries.

**COST OF LIVING.**—The Ministry of Labour's index number, on the base July, 1914=100, was 147 at September 1, an increase of one point for the month, due entirely to higher food prices.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100, was 80 for August, an increase of one point for the month. The increase was general, all groups contributing to the upward movement.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base

1913=100, was 104·6 for August, an increase of 0·4 per cent for the month. The changes in all of the main groups were very slight advances over the previous month's level.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 125·4 for August, an increase of 0·1 per cent for the month due to very small increases in food, heat and light, and clothing prices.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the sum total of the prices per pound of 96 commodities of common consumption, was \$10·1907 at September 1, an increase of 0·5 per cent for the month. Of the 13 groups, nine showed small increases, two were unchanged and two declined.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities in wholesale markets was \$182·498 at September 1, a rise of 0·03 per cent for the month. This is the highest point recorded since February 1, 1930.

**COST OF LIVING.**—The Bureau of Labour Statistics index number of the cost of living for wage earners and lower-salaried workers, on the base 1913=100, was 143·0 at July 15, an increase of 1·7 per cent from the level of April 15. The principal change was a rise of 5·8 per cent in food prices; rent and house-furnishing goods also rose slightly, while fuel and light, clothing and miscellaneous items were lower.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Damages and Injunction in Winnipeg Picketing Case

ON August 20, 1936, in the Manitoba Court of King's Bench, Mr. Justice Donovan gave judgments in two actions against the officers and members of the Winnipeg Local of the Canadian Theatrical Federation comprising local unions of the International Alliance of Theatrical Stage Employees and Moving-Picture Machine Operators and the Musicians' Union.

Both cases arose as suits for damages for picketing alleged carried on in an unlawful manner in July and August, 1935, and for an injunction restraining picketing in the future. In one case there was no dispute between the employer, Allied Amusements, Ltd., and its employees who were members of a rival union affiliated with the All-Canadian Congress of Labour. Picketing in this case was for the purpose of inducing the employer to hire members of the Canadian Theatrical Federation or to cause those employed to join it. An interim injunction to restrain picketing was applied for but, according to the reports of the union, an agreement was made by the union through its solicitor to refrain from picketing until September 11, 1935, when it was expected that the application for a restraining order and for damages would come to trial.

In the other case, the plaintiff, Kershaw Theatres, Ltd., had abandoned its former policy of having two projectionists on duty at the same time and from September 1, 1935, engaged only one for each of its two theatres. The union conditions called for two men on duty at all times. When their four men were "locked out," the two theatres were picketed. The defendants in this case numbered 19, including some of the defendants in the Allied Amusements, Ltd. case.

In the latter case involving five theatres, the Court was of the opinion:

that the picketing and besetting, the carrying and exhibition of the banners or posters and distribution of pamphlets, were intended to injure the business of the plaintiff and to cause annoyance and discomfort to its management. There can also be no question but that the object of the defendants in taking such action was to force the plaintiff to accede to their demands....

As to the plaintiff's contention that the conduct of the defendants constituted a "nuisance," the latter claimed that the picketing was done in a lawful and peaceful manner "for the sole and lawful purpose of conveying information to the public" and they denied "that they thereby committed a nuisance to the plaintiff."

It is further claimed on behalf of the plaintiff that the individual defendants (nine in number) combined together to injure it in its trade and business, and arranged to employ means which were illegal and wrongful in an effort to cause the plaintiff to comply with their demands, viz., to employ as projectionists only members of the union with which the defendants were associated, and at wages and under working conditions approved of by them; to employ two projectionists at each theatre instead of one then being employed; and to have an orchestra employed at each theatre, instead of one for two or more theatres.... The plaintiff was at the time duly licensed to carry on its business, and the mechanical and other equipment in the theatres were such as to satisfy the law and the regulations laid down by the department of the Government having jurisdiction over such matters. Although much emphasis was laid by the defence during the hearing on the danger of the public and patrons of the theatres in respect of the manner in which the theatres were conducted, there was no evidence of any independent complaint by anyone or of any notice to the inspectors or the department which had the duty of inspecting and passing on the equipment.

On the evidence it must be held that the appeal was, so far as the defendants could make it, intended to be especially to the patrons and intending or likely patrons of the theatres.... As I view it, in the light of the authorities, it is under the circumstances for the defendants to legally justify their actions.... (Reference was here made to *Rea ex rel Barron v. Blachaw* [1925] 3 W.W.R. 344 Lyons v. Wilkins [1899] 1 ch. 267).

It may be said reasonably that the ultimate or general object the defendants had in mind was to promote better working conditions for labour generally, yet it must, as I see it, be said that in this case the immediate and direct object governing the defendants' action was to cause such injury to the plaintiff and its business, and such annoyance and displeasure to its management, that, as the lesser of two evils, it would employ a second projectionist and an orchestra for each theatre and, generally, to agree to the participation by the defendants in its manner of contracting with some of its employees. The activities undertaken by the defendants should then be considered as relating to those particular motives, rather than to general or ultimate aims.... It must be assumed from the evidence that the board of examiners having the power of issuing licences had in a special manner considered the question of requiring two projectionists instead of one, and that, from the absence of a regulation requiring that two be employed, it had rejected that possible restriction. The evidence of expert and experienced witnesses satisfies me that with automatic safety devices and equipment, such as the plaintiff was shown to use, there was no danger from which it could reasonably be said that two projectionists or operators in place of one would provide immunity. We should, I think, infer that the references to danger used by the defendants and their witnesses in such definite form should at the most in fairness have only been

stated in a relative sense\*... There can on the evidence be no doubt that the defendants acted in concert in reference to a pre-arranged plan, and that what was subsequently done was in pursuance of that plan. The defendants, without lawful justification, were attempting to compel the plaintiff to do what it was not legally obliged to do in conducting its business.

The Court here referred to *Quinn v. Leatham*, (1901 A.C. 495) and the following quotations were made from the judgment in that case:

A combination of two or more without justification or excuse to injure a man in his trade by inducing his customers or servants to break their contracts with him or not to deal with him or continue in his employment is, if it results in damage, actionable....

But there are many ways short of violence or the threat of it of compelling persons to act in a way which they do not like: picketing is a distinct annoyance, and if damage results is an actionable nuisance at common law, but if confined merely to obtaining and communicating information it is rendered lawful by the Act.

Mr. Justice Donovan distinguished the case before him from *Sorrell v Smith* (1925 A.C. 700) where it was held that the purpose of the defendants was not to injure the plaintiff but to forward or defend by lawful means their own trade and that the means were not illegal. He states:

To say that the general intention of the defendants was the furtherance of labour

\* A handbill distributed by the union contained a statement to the effect that the employment of two operators on a shift "ensures the safety of the public and of the operators against fire and panic." It continues: "In other provinces, the law compels theatres to employ two operators on a shift. The Manitoba Government in delaying to enact similar laws in the public interest is not only responsible but is ignoring the advice of the National Research Council of the Dominion Government whose investigation finds and recommends two operators on each shift."

The following explanation may be made: In 1932, at the request of the Government of British Columbia, the National Research Council of Canada undertook an investigation into the regulations and practices of projection rooms in moving-picture theatres from the point of view of public safety. The Governments of Ontario and Manitoba requested that they be permitted to be parties to the inquiry. The recommendations made by the Council's committee included the following:—

That in projection rooms in which two machines are in operation and in which there is auxiliary equipment such as Brenkert machines, spot lights, etc., there should be on duty at all times during public performances at least two qualified projectionists. In the opinion of this Committee, it is advisable to use in this class of theatre only men of the highest qualifications;

That in projection rooms in which two machines are in operation without auxiliary equipment such as mentioned in the foregoing, there should be on duty at all times during public performances at least one qualified projectionist and an assistant projectionist. In the provinces of Alberta, British Columbia, Ontario and Saskatchewan, the regulations require two projectionists when two sound picture projectors are operated during the same show. In Saskatchewan and in small theatres in Ontario, one of these projectionists may have a licence of a lower grade.

interests does not excuse unlawful means to achieve the immediate intention, which here was to so annoy, coerce and injure the plaintiff that there would be a surrender of a part of the conduct of its business, and that payments would have to be made to additional employees who were not required for the lawful conduct of that business....

I have concluded that the real object of the defendants was to secure the employment of two projectionists in the place of one, and generally secure for themselves unionization of employees of the plaintiff's theatre business.

As regards the defendants' claim that the amendment of 1934 to the picketing section (s. 501) of the Criminal Code,\* made earlier Canadian cases inapplicable, the Court was of the opinion that the attendance of the defendants' pickets and representatives at and near the plaintiff's theatres was for more and other than to give information. At best the statements were opinions based on such contentious factors as prevailing wages, financial ability to pay, and of most importance, the implied unwillingness of the persons then employed to continue. There was also the implication that the intervention of the defendants was on behalf of the persons then or thereafter to be employed at the theatre. It seems to me that the object of the amendment to the statute was merely to provide a summary way of dealing under the *Criminal Code* with such cases, and was not intended to deal with civil rights or remedies. As I see it, the defendants and their union were outsiders until they could secure recognition or authority either from the plaintiff or from the operators then employed by the plaintiff for their activities....

Although this case may be distinguished from the case of *Vulcan Iron Works v. Winnipeg Lodge* on the ground that here no violence was threatened, yet the judgment in that case may be taken as an authority on the question of the objects in view where there has been besetting and watching.

In *Schubert v. Local International Alliance Co.* (1927) 2 D.L.R. 20, it was held that pamphlets containing not facts but matters of opinion distributed at the door of a theatre were not protected and constituted a watching and besetting; and Macdonald, C.J.A. is quoted at p. 550... as saying:

"Even assuming that they conducted themselves in a peaceful manner, the question is, had they the right to bring about what was virtually a boycott of the plaintiff? The defendants' object in distributing the handbills and in parading with banners, was unquestionably to prevent persons from patronizing the theatre. No matter how peaceably this may have been done, and even admitting the absence of actual malice, yet I think it was an actionable wrong done by these defendants, in combination, with the object of compelling the plaintiff by inflicting loss upon him to do something which he had a legal right to abstain from doing."

\*Paragraph (g) was added in 1934 as follows: "Attending at or near or approaching to such house or other place as aforesaid, in order merely to obtain or communicate information, shall not be deemed a watching or besetting within the meaning of the section."

On a finding, as I do find, that the acts of the defendants in picketing and exhibiting posters have not been excused or justified, and that the means used by the defendants were illegal and wrongful and were intended to harm and cause and did cause loss, I consider that the judgment in the case of *Reners v. Reg.* (1926) S.C.R. 499, is an authority which applies, and which, on the facts of this case, requires that judgment be given for the plaintiff.

The plaintiff suffered a definite falling off in attendance by patrons following the picketing, and I find that it suffered therefrom substantial loss. There can also be no question but that the plaintiff's management suffered annoyance and discomfort in carrying on the business as a result of the activities hereinbefore referred to of the defendants, and that such result was intended by the defendants.

I allow damages in the sum of \$300, and there will be a perpetual injunction restraining the defendants from watching or besetting the plaintiff's places of business in the manner here shown to have taken place, and from exhibiting posters or signs such as those of which complaint is made.

The plaintiff will also have the costs of the action with the statutory bar removed.

The case of *Kershaw Theatres, Ltd. v. Reaney* was distinguished from the *Allied Amusements, Ltd.*, case in that

the union had as its members projectionists who were in the employ of the plaintiff until the end of the month preceding the month in which the picketing and other matters of which complaint is made herein started. The watching and besetting herein referred to were more extensive, and included the distribution of pamphlets, hand-bills and copies of a paper "Typo News" in and about the neighbourhood of the plaintiff's theatre....

It will be apparent that the handbills, pamphlets and other publications containing the above statements went far beyond the making of communications. They were not solely for the purpose of giving information.

I do not think that the publications referred to can be considered to be free from misrepresentation, or from such appeals as tended to prejudice and injure the plaintiff in its business and with its patrons. Undoubtedly they were intended also to irritate and annoy the management of the plaintiff. The use of the phrases "danger to patrons," "disregard of public safety," "callous indifference," may be taken as appeals to the sentimental feelings of the patrons and public, and as intended to hurt the feelings of the management of the plaintiff and cause monetary loss.... Such activities—the object being to compel acquiescence in the defendants' demands—were intended to interfere with the plaintiff and with a lawful business lawfully conducted.

In *Reners v. Reg.*, it was held that the defendants' acts were wrongful and unlawful and the besetting and watching in which he in common with his comrades or associates was engaged amounted to a nuisance....

What the defendants did against the plaintiff and its business was a common-law nuisance punishable in damages....

The discussions of the principles referred to in the reasons for judgment in the *Allied*

*Amusements Ltd.* case, above written, may generally be taken to apply to the facts of this case.

The plaintiff has, in my opinion, established its case, and as both the picketing and distribution of publications were carried on for some weeks, and by the evidence, there was a substantial falling off in patronage, there was a large monetary loss to the plaintiff at each of its two theatres.

There will be an award of damages in the sum of \$900, and a perpetual injunction against watching and besetting in the manner of which complaint was made herein, and also against the carrying, exhibition or publication of such posters, pamphlets, etc., as are referred to in the statement of claim.

The plaintiff will also have its costs of action with the statutory bar removed.

*Allied Amusements, Ltd. v. Reaney et al, Kershaw Theatres, Ltd., v. Reaney et al* (1936) 3 Western Weekly Reports 129.

### Damages Awarded Members of Amalgamated Mine Workers of Nova Scotia Against U.M.W.A.

In the Supreme Court of Nova Scotia at Amherst on September 3, 1936, Mr. Justice Hall awarded damages totalling \$4,055 and costs to five members of the Amalgamated Mine Workers of Nova Scotia in an action brought by the latter against five officers of the United Mine Workers of America, Local 4514, at Springhill, N.S.

The case arose through a strike called by the United Mine Workers employed by the Cumberland Coal and Railway Company on January 24, 1935, to induce the Company to dismiss twelve men who had been active in the organization of the rival local union. Seven of these men later joined the United Mine Workers. On February 10, the Company agreed not to give the five plaintiffs employment and the strike was called off.

Under the collective agreement between the Dominion Coal Company, which controls the Cumberland Coal and Railway Company, and the United Mine Workers of America, the Company was not required to employ only members of the international union but agreements had been made with that union since 1919 and practically all the miners at Springhill were members of the U.M.W.A. Rivalry between the two unions after the formation of the A.M.W. of Nova Scotia in 1932 led to the enactment by the Nova Scotia Legislature in 1934 of an amendment to the check-off provision of the Nova Scotia Coal Mines Regulation Act to provide that no employer need retain from the wages of his employees any dues payable to any union other than the union to which the larger number of his employees belonged. The amendment provided also that a ballot should be taken before November 15 in each year in order to deter-

mine the union to which the majority belonged. At the plebiscite held at Springhill in November, 1935, 722 miners voted for the U.M.W.A. and 508 for the A.M.W. Subsequently, all but a small number of the miners seem to have joined the U.M.W.A. In order to compel this minority to join the U.M.W.A. a strike was called.

The plaintiffs in the action claimed damages on the ground of unlawful conspiracy on the part of the defendants to prevent their employment and of coercion and intimidation of the company for the same purpose. The statement of claim was amended to allege specifically that there was a conspiracy to injure the plaintiffs and that the defendants threatened to commit an illegal act by inducing the maintenance men to break their contracts of employment, thus endangering valuable property.

The Court, after reviewing several English cases involving combinations, stated:—

After consideration of all the circumstances I am forced to find that the defendants were not content to do only what was necessary to advance the interests of their union, but made use of the occasion for the purpose and with the intent to injure the plaintiffs. The picketing of the mines, the conduct of the men forming the pickets, the threat to withdraw the maintenance men in violation of their contract, all are badges of malice which assist me as a juror in reaching this conclusion.

I have no doubt the defendants, intended to, and did infringe the plaintiffs' rights and remove their liberty of action and compelled the company to refuse them employment.

The plaintiffs are entitled to recover on another ground also. The defendants having

black-listed the plaintiffs, then intimidated and coerced the company into boycotting them. The company was induced so to act either by the commission of unlawful acts or by threats, express or implied, to do or procure illegal acts.

Having notified the company that the U.M.W. members would not work till the plaintiffs' lamps were stopped, pressure was brought to bear. In the first place the mines were picketed. Defendants say this was a "peaceful picket" set up solely for the purpose of giving information. I do not accept this explanation. There is much evidence to the contrary.....

On other occasions some of the plaintiffs were seized by U.M.W. men, including some of the men who had been recognized as members of the pickets, and were run out of town....

The wilful breaking of a contract knowing or having reasonable cause to believe that the probable consequence of such breach will be to expose valuable property to destruction or serious injury is an indictable offence (Criminal Code sec. 499 (a)) and the threat to withdraw maintenance men was a threat to do an illegal act.

The plaintiffs have suffered damages and are severally entitled to recover on two grounds:—

- (1) The defendants acted in combination, not with a single view to advance the interests of their union but with the main or ulterior intent to injure the plaintiffs and
- (2) They threatened to commit or procure an illegal act with the intention and effect of intimidating the officers of the Company into refusing to employ the plaintiffs.

*Jas. Johnston et al v. Wm. McKay et al*, Supreme Court of Nova Scotia, Amherst, September 5, 1936.

[NUMBER 11

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

INDUSTRIAL employment showed a considerable increase in Canada at October 1, according to statements received by the Dominion Bureau of Statistics from 10,020 employers, each with a minimum of fifteen employees, whose staffs aggregated 1,044,178 persons, as compared with 1,015,639 in the preceding month. Activity has shown a falling-off between September and October in six, and an advance in nine of the fifteen preceding years of the record, the change on the average, being a fractional increase; the substantial improvement this year is therefore especially interesting. The index (based upon the average for the calendar year 1926 as 100) stood at 110.1 at October 1, 1936, compared with 107.1 at September 1, 1936, and 106.1 at October 1, 1935. At the same date in the fourteen preceding years, the index was as follows: 1934, 100.0; 1933, 90.4; 1932, 86.7; 1931, 103.9; 1930, 116.2; 1929, 125.6; 1928, 118.8; 1927, 110.3; 1926, 106.5; 1925, 99.5; 1924, 95.0; 1923, 100.7; 1922, 95.8 and 1921, 91.3. These returns are representative of all industries except agriculture, fishing, hunting and highly specialized business.

At the beginning of October, 1936, the percentage of idlen ss reported to the Department of Labour by Local Trade Unions throughout Canada stood at 10.9 as contrasted with percentages of 10.8 at the beginning of September and 13.0 at the beginning of October, 1935. The percentage for October was established from the reports received from a total of 1,825 labour organizations with a combined membership of 180,306 persons.

Reports for September, 1936, received by the Department of Labour from the offices of the Employment Service of Canada showed declines from August, 1936, and September, 1935, in the average daily placements effected, farming and construction and maintenance being entirely responsible for the loss in each instance. During the month under review, September, 1936, the total opportunities for work numbered 29,325, applications 63,484 and

placements in regular and casual employment 26,996.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$16.87 at the beginning of October as compared with \$16.84 for the beginning of September; \$16.42 for October, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.96 for October, 1929; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.48 for October, 1914. A slight decrease in October, 1936, as compared with the previous month occurred in the cost of foods, chiefly in potatoes. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 76.8 for the week ended October 30 as compared with 76.9 for the week ended October 23; 77.1 for that of October 16; 76.7 for that of October 2 and 72.4 for that of November 1, 1935. On a monthly basis the index was 76.4 for September, the latest available; 73.1 for October, 1935; 71.3 for October, 1934; 63.5 for February, 1933 (the low point in recent years); 96.8 for October, 1929; 99.6 for October, 1921; 164.3 for May, 1920 (the post war peak); and 66.8 for October, 1914.

The table on page 974 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business moved upward in September continuing the advance in progress since March. The figures for September were two per cent higher than those for the previous month and thirteen per cent higher than for September, 1935. Of the principal factors used in the construction of the index, mineral production, electric power output, carloadings and exports were lower than in August, the decrease in the first named group being due to smaller shipments of non-ferrous metals. The groups to show advance in the same comparison were manufacturing, construction, trade employment and imports. In the manufacturing group the increase was due in large part to advances in the iron and steel, forestry, and foods industries and in imports of raw materials for the textile industries.

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended October 30, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending October 31, 1936, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending October 3, September 5, and August 8, 1936; October 5, September 7, and August 10, 1935.

(7) MacLean's Building Review.

All of the above principal groups were substantially higher in September of this year than in September, 1935. Information available for October shows gain in wholesale prices, carloadings, employment and gross earnings of the Canadian National Railways, both as compared with the preceding month and with October last year, while contracts awarded were somewhat lower.

The number of strikes and lockouts recorded for October was 17, involving 2,222 workers and causing time loss of 12,733 man working days. There were no disputes involving large numbers of workers for long periods. In September there were 27 disputes, involving 6,513 workers, with a time loss of 33,292 days, due chiefly to a strike of textile workers at Cornwall, Ont., and to strikes of coal miners in Nova Scotia and Alberta. In October last year there were 16 disputes, involving 2,360 workers, with a time loss of 17,793 days, nearly one-third of which was due to strikes of water transport workers in British Columbia. Of the seventeen disputes recorded for October, twelve were recorded as terminated, eight resulting in favour of the workers involved, one being partially successful, while the results of three were recorded as indefinite. Five disputes, involving approximately 630 workers were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### **Social Legislation before Privy Council**

Hearings began on November 6 before the Judicial Committee of the Privy Council in appeals of certain judgments of the Supreme Court of Canada (LABOUR GAZETTE, July, 1936, pages 585-600, and August, 1936, page 679), respecting the validity of social legislation enacted at the 1934 and 1935 sessions of Parliament. The particular measures in question are an act providing for one day's rest in seven; an Act providing for a 48-hour week, the Minimum Wages Act and the Employment and Social Insurance Act. The Privy Council has also been asked to decide upon the validity of the Natural Products Marketing Act, the Farmers' Creditors Arrangement Act and the Dominion Trade and Industry Commission Act.

#### **Appointment of Women's Employment Committee**

The personnel of the Women's Advisory Committee to the National Employment Commission was announced on November 5 by the Hon. Norman McL. Rogers, Minister of Labour, to comprise: Mrs. L. G. Ferguson, Westville, Nova Scotia; Miss Ruth Low, Kitchener, Ontario;

Mrs. Walter Lindal, Winnipeg, Manitoba; Madame Maurice Cormier, Montreal, Quebec; and Mrs. Angus J. Currie, Govan, Saskatchewan.

(Appointment of a Youth Employment Committee "to give special attention to the youth aspect of unemployment and relief" was made in September last and its personnel was given in the LABOUR GAZETTE of September at page 769. The establishment of both Committees is in accordance with provisions of the National Employment Commission Act—LABOUR GAZETTE, July, 1936, page 601).

As pointed out in the Minister's announcement, the duties of the Women's Committee will be to investigate and report upon means to aid unemployed women in securing employment. This Committee will meet in the near future and discuss with Commissioner M. M. Sutherland the work to be done. The Minister's statement, with a biographical sketch of each member of the Committee, continues as follows:—

"Mrs. Sutherland has been devoting her attention largely to women's unemployment problems in her capacity as women's representative on the Commission. As she comes from British Columbia, and will be actively associated with the new Committee, that province is represented.

"The Maritime Provinces' member on the Committee, Mrs. L. G. Ferguson of Westville, is an honour graduate of Dalhousie University, formerly vice-principal of Westville Schools and past president of the Provincial Council of Women for Nova Scotia. She is a speaker with wide experience and has taken keen interest in relief work. In that connection Mrs. Ferguson organized and conducted practical relief work in her home district for six or seven years.

"Miss Ruth Low of Kitchener, Ontario, is the general secretary of the Young Women's Christian Association of that city. A graduate of McGill University she majored in Sociology and Social Work. She took post-graduate work at Emmanuel College, Toronto, taught for a time and then entered the Y.W.C.A. Her Y.W.C.A. activities include a direction of social work and international club work. In Toronto she initiated and carried through work undertaken by the Y.W.C.A. for unemployed, administering relief and setting up classes to develop independence and leadership. She served as secretary of the Citizens' Committee but still carries on successful household training courses for young girls.

"Born in Canada of Icelandic parents, Mrs. Walter Lindal of Winnipeg received her early education in Yorkton, Saskatchewan. A graduate in law from Manitoba University, Mrs. Lindal practised with her husband for

several years in Winnipeg. She has been an active member of the University Women's Club, formerly on the Executive, and is now chairman of one of the study groups. She is first vice-president of the Women's Canadian Club and an active member of the Social Science Group of Winnipeg (also a member of the Executive of the Central Council of Social Agencies of Manitoba). On two occasions Mrs. Lindal declined invitations to run as alderman in Winnipeg. She has been associated with women who organized a successful school for training girls for household work.

"Madame Maurice Cormier is a graduate of Notre Dame Congregation, Montreal. Since her marriage she has been associated with all of the leading charities and social service organizations for the French of Montreal. She is attached to the French Federated Charities, the board in charge of the work for the deaf and dumb in Montreal and that for crippled children and for Notre Dame Hospital. She is the founder and head of the Feminine Society of Protection, through which has been done a great deal of work for the less fortunate women of Montreal.

"As provincial president of Homemakers' clubs in Saskatchewan, Mrs. Angus J. Currie of Govan, Saskatchewan, has had an opportunity to study home conditions in that province most carefully. She is now serving her third term as provincial president. Having been much interested in betterment of conditions for farm women, Mrs. Currie has gathered a fund of practical knowledge of unemployment as it affects farm people and those who are helping them. Mrs. Currie was formerly a school teacher in Ontario.

#### **Dominion-Provincial farm improvement arrangements made between the Dominion Government and the Provincial governments of Manitoba, Saskatchewan, Alberta and British Columbia, whereby an unemployed single man placed on a farm will receive \$5 a month and \$2.50 a month bonus if he remains on the farm until March 31, 1937. Similar schemes are now in effect in the provinces of Prince Edward Island, New Brunswick and Quebec.**

The October issue of the LABOUR GAZETTE (page 855) contained a reference to arrangements made between the Dominion Government and the Provincial governments of Manitoba, Saskatchewan, Alberta and British Columbia, whereby an unemployed single man placed on a farm will receive \$5 a month and \$2.50 a month bonus if he remains on the farm until March 31, 1937. Similar schemes are now in effect in the provinces of Prince Edward Island, New Brunswick and Quebec.

#### **Employers' questionnaire on industry and employment**

The National Employment Commission has recently sent a questionnaire to employers throughout the Dominion in order to secure data supplementary to the Commission's studies along other lines relative

to the relief problem. Replies to the questionnaire will be treated as absolutely confidential.

The questionnaire requests information as to the number of employees working on September 30 in 1929, 1933, and 1936. If there is a substantial decrease since 1929, it asks to specify the chief cause of such decrease, viz—decrease in domestic or export demand, introduction of new machines, increased use of alternative competitive product, or change to new line of product (or activity) within the plant.

Information is also asked as follows:

The number of working hours in a standard week;

Method of securing employees (either by utilizing the Employment Service of Canada or other designated means);

If an apprentice plan is in operation, and if so, what type of plan;

If the work in the industry is of a seasonal nature;

If any shortage of skilled labour is anticipated in the next 12 months.

If plant and machinery have been modernized since 1929.

If holidays with pay are granted to salaried employees and wage earners.

If an age limit is established in the hiring of new employees, and in the retiring of employees.

If a pension or superannuation plan is in operation.

If free or low rent dwellings are provided employees.

If employees are assisted financially or otherwise in the building or acquiring of homes.

#### **Revision of child labour legislation in Quebec**

Revision of existing labour legislation in regard to the employment of children in industrial establishments in the province of Quebec was indicated by Premier Maurice Duplessis in the Legislature on November 10. It was intimated that steps in this direction would be taken at the next session of the Legislature.

The Premier was also reported as stating that the proper place for young children was in school and not in industry where they frequently replaced adults.

#### **Progress of Forestry training in British Columbia**

In the Speech from the Throne, opening the current session of the British Columbia Legislature, reference was made to the satisfactory advancement of the Young Men's Forestry Training Plan. It was stated that "young

men participating are given a fair grounding in all branches of forestry work and steady employment has been found for a considerable number through this movement."

Attention was also drawn to the preliminary work relative to the organization of health insurance with the expectation that benefits under the Act will be available in 1937 (the registration of employees and employers under the Act is dealt with in the note immediately following).

Recent labour legislation was stated to have had beneficial results, resulting in increased employment.

#### **Registration conducted by B.C. Health Commission**

The Health Commission of British Columbia is preparing to register approximately one hundred thousand salary and wage earners whose incomes are \$1,800 a year or less, in connection with the Provincial Health Insurance Scheme (LABOUR GAZETTE, May, 1936, pages 422-3).

The registration is to be accomplished by completion of a questionnaire which is being distributed. The employee's registration form is a four-page folder, which asks the identity of the employee, his or her earnings during the last twelve months, how paid, birthplace, and racial origin, family status, list of previous employers, nature of work, data as to children under 21 years of age, dependent relatives and whether covered by a sick benefit fund or health insurance plan already. The reply to the questionnaire is to be closed with a declaration, to be made before a witness.

The registration of employers has already been effected. From this questionnaire, information was obtained relative to the ownership and nature of the business, whether or not there are any branch offices or plants in the province; date upon which the business was established, number of employees on the payroll from July 31, 1935, to June 30, 1936, classification of employees into wage and salary groups and other payroll information. There were also questions to be answered by incorporated companies only.

When the registration of employees is completed, statistics will be available upon which a factual estimate of the actual size of the scheme and its costs will be made available.

#### **Extension of Minimum wage regulations to wholesale employees in Quebec**

Extension of the provisions of the Minimum Wage order governing the employment of female employees in retail stores to wholesale establishments in the province was recently announced by Mr. Gustave Francq, chairman of the Quebec Minimum Wage Board.

Order No. 18 (revised), which hitherto applied to "female employees and males when replacing females in any class of employment in departmental stores, chain stores and retail stores," Mr. Francq stated, would from now on be extended to refer to "all commercial establishments."

The chairman is reported to have intimated that in future the extended ordinance would apply uniformly to all and any employees, whatever their occupation in such establishments.

#### **Settlement of Dispute in All-Canadian Congress of Labour**

Reference was made in the October issue of the LABOUR GAZETTE (page 858) to the dispute in the All-Canadian Congress of Labour and to an interim injunction granted the president, restraining the former executive from dealing with Congress funds and property.

At a subsequent conference an agreement was reached whereby a provisional committee, composed of A. R. Mosher, Z. David, M. M. McLean and W. T. Burford, was set up to carry on the work of the Congress pending a convention to choose a new executive. All questions at issue between the parties and any question arising out of the settlement were to be referred to Hon. (Senator) J. A. McDonald, who was to act as umpire, and his decision was to be final.

On October 19, the agreement was presented to Mr. Justice A. Hope, of the Ontario High Court, for his consideration, and, as a result, the injunction was dissolved. Subsequently, the resignations of Z. David and W. T. Burford from the provisional committee were accepted at a meeting called by the umpire, Senator J. A. McDonald.

It was reported that on October 24, 1936, a meeting was held in Winnipeg, Manitoba, which was attended by certain members of the former executive of the Congress and at which it was decided to revive the "Canadian Federation of Labour," an organization which was originally established in 1902, and functioned as a national labour body until 1927, when it merged with the All-Canadian Congress of Labour. A provisional committee of the new body was appointed to further organizational work and arrange for a national convention at a later date.

The affairs of the All-Canadian Congress of Labour will be carried on by the provisional committee, with Senator McDonald as umpire, until the next convention when a new executive will be appointed. It is expected that this convention will be called early in the new year.

# **President Roosevelt on Standards of Labour Legislation**

In a message to the third national conference on United States labour legislation (convened by the Secretary of Labor, Frances Perkins, for the purpose of studying uniform standards of labour legislation). President Roosevelt assured the delegates that "the Federal Government was willing to do its part in making these standards effective and in supplementing the efforts of the States when problems assume an interstate or a national character."

The President stated he believed the mandate he had received had directed the legislators "to proceed along these lines until working people throughout the nation and in every station are assured decent working conditions, including safe and healthful places of work, adequate care and support when incapacitated by reason of accident, industrial disease, unemployment, or old age; reasonably short working hours, adequate annual incomes, proper housing and elimination of child labour."

# **Determination of Labour conditions in public contracts in United States**

The United States Secretary of Labor, Frances Perkins, has announced the establishment of a public contracts board in the Department of Labor to hold hearings and to make findings upon questions arising under the Walsh-Healey law which went into effect early in October, and which requires that manufacturers and dealers who make future contracts in excess of \$10,000 with the Government shall comply with certain minimum wage, maximum hour and other labour conditions in the performance of the contract.

Pending the passage of a special appropriation act, the board will consist of three officers of the Department. Under the terms of the administrative order naming this temporary board, the members were charged with the duty of passing upon requests for exceptions and exemptions, establishment of overtime rates, complaints of violations of the act, establishment of prevailing minimum wages, and appeals from the rulings of other agencies.

The determination of minimum wages will be made by industries or industry groups and will be preceded by hearings at which representatives of labour and management will be invited to appear. The board in making such recommendations will also draw upon a panel of employer and employee consultants for technical advice.

Thus far no minimum wage hearings have been scheduled on the docket of the board. It was announced, however, that the clothing

industry would probably be the first to be taken up. The Department is now making a statistical survey of wages paid in the various branches of the clothing industry.

# **Wage Increases in United States Steel Industry**

Steel corporations in United States have recently announced wage increases throughout the industry. As reported, the steel wage plan provides for an increase of from 12 to 25 per cent (depending on the location of the plant), for basic common labour, the lowest-priced category in the mills. Increases of less than 10 per cent were offered to men now in the higher brackets. The aim of the plan is to provide a proportionately larger increase for the lower-priced workers, for whom special demands were made by employee representatives.

The wage plan of United States Steel calls for automatic increases or decreases to become effective as the cost of living index of the United States Bureau of Labour Statistics rises or falls within certain limits.

Approximately 600,000 employees are effected by the plan, which becomes effective December 16.

On August 1, the United States Steel Corporation established a basic forty-eight hour week (LABOUR GAZETTE, August, 1936, page 680).

# **Survey of World Unemployment Situation**

According to the quarterly tables of employment and unemployment statistics published in "Industrial and Labour Information" by the International Labour Office, registered unemployment in a large majority of countries has again declined as compared with the corresponding date last year, indicating that the improvement which has now been taking place for well over three years continues. Exceptions to this improvement are Austria, France, Hungary, New Zealand, Rumania and Switzerland.

According to statistics based on unemployment insurance schemes, a decrease of 2.6 per cent was registered for the United Kingdom in comparing figures for corresponding months of 1935 and 1936, Belgium registered the largest decrease (4.8) in this category and the Netherlands the smallest (0.4) while increases of 1.9 in Switzerland and 0.7 in Austria were recorded.

Statistics based on returns from trade unions show that the largest decrease in unemployment, when comparing figures for corresponding months of 1935 and 1936, took place in Norway—where a decrease of 8.3 was registered followed by the United States with

a decrease of 6.5, Australia with 5, and Canada with 2.6.

Returns from selected establishments in all countries except Switzerland (which recorded a decrease of 0.9) indicate increases in the number of persons reported as in employment. Estonia recorded the greatest increase in employment in comparing corresponding months of 1935 and 1936, the increase being 19.8. Estonia was closely followed by Bulgaria with an increase of 19; South Africa with an increase of 10.9; United States 6.8; Japan, 5.5; and Canada, 3.8. The figure given for Canada reflects the situation at August 1, 1936 when the index of employment stood at 88.6, compared with the corresponding month of 1935 when the index stood at 84.8. More recent statistics dealing with the employment situation in Canada are given in this issue of the *LABOUR GAZETTE* reflecting a still further improvement in the employment situation when the index of employment as at October 1, 1936, stood at 110.1, an increase of 4.0 compared with the index at October 1, 1935, when it stood at 106.1.

It should be pointed out that the figures given in the survey of the world unemployment and employment situation, provide a basis for comparing tendencies, and should not be treated as a statistical comparison of employment and unemployment in the different countries. This reservation is necessary in view of the fact that the figures are arrived at by different methods in the various countries, and those given for certain countries are far from indicating the real situation.

All affiliated unions have been notified that the fifty-sixth annual convention of the American Federation of Labour will convene at Tampa, Florida, Monday, November 16, 1936.

In the October issue of the *Monthly Labor Review*, it is stated that "the construction projects of P.W.A. created more than 10,736,700 man-months of labour during the 3 years from its beginning in July, 1933, to June, 1936, according to an estimate made by the Bureau of Labour Statistics. This estimate includes both direct labour, i.e., labour performed at the site, and the indirect labour involved in the final fabrication of materials purchased in connection with the various construction projects. Because of lack of basic data, no attempt was made to estimate the amount of labour required in producing and transporting raw materials to the point of manufacture nor that involved in transporting the finished product to the site of construction.

Industrial and Labour Information of October 19, 1936, refers to a new federal Act in the United States relative to vocational education. By the provisions of this enactment "appropriations of \$12,000,000 annually, beginning July 1, 1937, are authorized to further the development of vocational education in the several states and territories."

Money paid to each state under the Act must be matched by State or local funds equal to 50 per cent of the appropriations granted until June 30, 1942, 60 per cent for the year ending June 30, 1943, 70 per cent in 1944, 80 per cent in 1945, 90 per cent in 1946 and 100 per cent thereafter. Each State is to be allotted at least \$20,000.

In addition there is a provision for annual appropriations of \$1,200,000 for training in retail store occupations and \$1,000,000 for co-operation with the states in training teachers in agricultural, commercial, industrial and home economic subjects.

According to the October issue of the *Monthly Labor Review*, published by the United States Department of Labour, "old-age pensions were paid in 30 states and 2 territories during 1935, as compared with 25 States and 2 territories in 1934. In addition there were nine other States which had on the statute books old-age pension acts which had not yet been put into operation. Nearly 410,000 needy old people were cared for under the provisions of the State acts during 1935; this was an increase of about 73 per cent over the previous year. The sum spent for this purpose totalled more than \$65,000,000, or slightly more than double the disbursements of 1934. The average monthly allowances in the various States ranged from \$1.08 to \$27.74. For all States the average was \$15.57, or \$1.04 more than in the preceding year. About 70 per cent of the funds were contributed by the States and the remaining 30 per cent by the counties."

The Department of Immigration and Colonization recently issued figures showing the immigration to Canada for the six months ending September 30, 1936. The total number of immigrants entering the Dominion during that period was 7,005 of whom 1,610 were males, 2,909 females, and 2,486 children under eighteen years of age. Those of British origin numbered 1,410; of U.S. origin, 2,835; of Northern European races 508; and other races 2,252. In the corresponding period of 1935, immigration totalled 6,579 including 1,378 British, 3,049 of U.S. origin, 342 of Northern European races and 1,810 of other races.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**T**HREE applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour during the month of October as follows:—

(1) From telegraph messengers in the employ of the Communication Department of the Canadian Pacific Railway Company in the City of Montreal, being members of Local 269, Canadian Brotherhood of Railway Employees. The dispute relates to the employees' request for an agreement covering working conditions and rates of pay, 96 employees being directly affected, and 11 indirectly.

(2) From telegraph messengers in the employ of the Telegraph Department of the Canadian National Railways at Montreal, P.Q., being members of Local 268, Canadian Brotherhood of Railway Employees. This dispute also relates to the employees' request for an agreement covering working conditions and rates of pay, 131 telegraph messengers being directly affected.

(3) From clerks and other classes of employees of the Canadian National Railways being members of the Canadian Brotherhood of Railway Employees. Ten thousand employees throughout Canada are stated to be directly affected by the dispute, which relates to their demand for restoration of basic rates of pay, involving the discontinuance of a wage deduction of 10 per cent at present in effect.

### Boards Established

On June 15 a Board of Conciliation and Investigation was established by the Minister of Labour to deal with a dispute concerning wages and working conditions between the Hamilton By-Product Coke Ovens, Limited, and its stationary engineers and operators, and Mr. Fred Bancroft of Oakville, Ontario, was appointed a member of the same on the recommendation of the employees' concerned. Subsequently a further effort was made by the departmental officers to assist the parties in reaching a settlement in this case, and action looking to the completion of the personnel of the Board was stayed pending the result of the negotiations. A settlement not having been effected by October 19, however, the Acting Minister of Labour proceeded with the constitution of the Board and appointed Mr. Lynn B. Spencer, K.C., of Welland, Ontario, a member of the same on the company's recommendation. Messrs. Bancroft and Spencer were unable to agree upon a person

for appointment as third member and chairman of the Board, and, in the absence of a joint recommendation, the Minister appointed Mr. H. H. Ward, of Ottawa, former Deputy Minister of Labour, to the chairmanship.

A Board of Conciliation and Investigation was established on October 19 by the Honourable J. G. Gardiner, Acting Minister of Labour, to deal with a dispute between the principal Canadian railways and their employees comprised in 17 trades unions, in regard to the request of the latter for discontinuance of the present 10 per cent deduction from basic rates of pay. The personnel of the Board is as follows: Honourable Mr. Justice A. K. MacLean, President of the Exchequer Court of Canada, Ottawa, chairman, appointed by the Honourable Norman McL. Rogers, Minister of Labour, failing a joint recommendation from the other Board members, Messrs. W. Sanford Evans, of Winnipeg, nominated by the companies, and Fred Bancroft, of Oakville, Ontario, nominated by the men. The application in this matter had been received from the employees on October 2 (see LABOUR GAZETTE, October, p. 860). Approximately 100,000 employees of the Canadian National Railways and Canadian Pacific Railway and the following subsidiary railways are affected: Dominion Atlantic Railway, Quebec Central Railway, Northern Alberta Railways, and Esquimalt and Nanaimo Railway.

### Settlements Effected

The text of the report of the Board of Conciliation and Investigation which dealt with a dispute between the Western Stevedore Company and the Canadian National Railways and their stevedores, checkers, sealers, coopers, etc., at Fort William and Port Arthur, Ontario, appeared in the August issue of the LABOUR GAZETTE at page 683. The employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, had requested increased wages and various changes in working conditions. The chairman of the Board, Mr. Robert Jacob, K.C., and the Board member nominated by the employees, Mr. Fred Bancroft, recommended certain improvements in working conditions and that the rate of wages for all classifications involved in the dispute should be increased by three cents an hour. The Board member nominated by the companies, Mr. W. C. Hamilton, K.C., submitted a minority report dissenting from the Board's recommendations. The Board's findings were accepted by the employees, but rejected by the employers concerned. Through the efforts

of the Deputy Minister and officers of the Department of Labour it was arranged that a joint conference of officials of the Canadian National Railways and Western Stevedore Company and their employees would be held in Winnipeg towards the end of September. These negotiations proved unsuccessful and the men subsequently voted almost unanimously in favour of a strike. However, as a result of mediation by the Honourable C. D. Howe, Minister of Transport, the strike was averted, an understanding as to a basis of settlement being reached at conferences which that Minister held at the Lakehead on October 16 and 17 with representatives of the parties concerned. The agreement provides for the wage increase of three cents an hour which had been recommended by the Conciliation Board, effective as from October 1 until the end of the 1937 season. The companies also undertook to eliminate progressively night work which had been a subject of complaint. A tentative agreement on several other points had been reached at the conference in Winnipeg during September.

A settlement of the wage dispute between the Winnipeg Electric Company and 45 employees in its Gas Production Department was also announced during October, the agree-

ment incorporating generally the unanimous recommendations contained in the report of the Board of Conciliation and Investigation the text of which appeared in the October issue of the LABOUR GAZETTE at page 860. The Board's recommendation that the employees be granted an additional week's holidays with pay (stated to be equivalent to about 2 per cent increase in wages) has been adopted, save that for this particular year employees who, due to the lateness of the season, may not be able to take their holidays, will receive pay equivalent to that which they would have enjoyed had the holidays been taken. Also in line with the Board's decision, the scale of wages for door lifter operators has been brought up to the level of that of employees engaged in operating gas ovens, this increase, which amounts to one and one-half cents per hour, being made effective as from September 1, 1936. The Board which enquired into this dispute was composed as follows: the Honourable Mr. Justice A. K. Dysart, of Winnipeg, Manitoba, chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members, Messrs. Hugh B. Lyall and Allan Meikle, both of Winnipeg, nominated by the employer and employees respectively.

#### **Exempt Employers elect to come under Unemployment Insurance Law of New York State**

Announcement was made on October 13, by Elmer F. Andrews, Industrial Commissioner of New York State that the Division of Placement and Unemployment Insurance is receiving numerous applications from employers who wish to take advantage of the provision of the State Unemployment Insurance Law which permits them voluntarily to become subject to it.

Certain employers, among them those employing less than four persons, and non-profit making institutions organized and operated exclusively for religious, charitable, scientific, literary or educational purposes, are exempted under the law. The employees of such employers do not acquire benefit rights while thus employed unless the employers elect to become subject to the law.

Under the State Unemployment Insurance Law, benefits to all workers who qualify for unemployment insurance will not be payable until January, 1938. In view of the fact that insured employment, accumulated after January 1, 1937, counts toward employees' rights to benefits, employers who elect to become subject to the law at such date will assure their workers protection identical with that offered to employees who are compulsorily covered.

#### **Mine Regulations in Saskatchewan**

Additional rules governing electrical installations and appliances for all mines under the Coal Mines Safety and Welfare Act (Saskatchewan) were published in the *Saskatchewan Gazette* of October 15. The provisions of the Act were reviewed in the LABOUR GAZETTE for May, 1932, page 532, and the original general rules for all mines were contained in the schedule to the Act and were reproduced on page 78 of the 1930 supplement to the federal Department of Labour's publication "Labour Legislation in Canada." The new regulations concerning electrical installations are issued under the following heads: "Application for permission to use electricity"; plans of electrical installations; notices; emergency lights; extinguishment of fires; underground voltages; haulage; trolley wires; annual return; non-compliance with rules, etc.

Latest figures compiled by the Department of National Revenue indicate that Canada's export trade has reached levels unequalled since 1929. For the first six months of the present fiscal year, April 1 to September 30, exports of Canadian produce totalled \$485,777,313, the highest figure recorded for the same period since 1929, and almost double the volume of exports in the same period of 1932, which was the low mark of the depression period.

## STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1936

THE following table shows the number of disputes, workers involved and time loss for October, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Oct., 1936.....	17	2,222	12,733
*Sept., 1936.....	27	6,513	33,292
Oct. 1935.....	16	2,360	17,983

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts, workers involved and time loss showed considerable decreases in October from the previous month and there were no disputes involving large numbers of workers for considerable periods. In September a strike of textile factory workers at Cornwall, Ont., and strikes of coal miners at New Waterford, N.S., and in the Drumheller district in Alberta accounted for two-thirds of the workers involved and time loss during the month. A strike of fur workers in Winnipeg, Man., which commenced in August, involved fewer workers in October than in September. The figures for October were approximately the same as for October last year except as to time loss, strikes of longshoremens and other water transport workers on the British Columbia coast having caused considerable time loss at that time.

Four disputes, involving 364 workers, were carried over from September, and thirteen disputes commenced during the month. Of these seventeen disputes, twelve terminated during the month, eight resulting in favour of the workers involved, one being partially successful, while the results of three were recorded as indefinite. At the end of October, therefore, there were on record five disputes recorded as strikes or lockouts, namely: fur factory workers, Winnipeg Man., bag factory

employees, Windsor, Ont., coal miners, Caden, Alta., women's clothing factory workers, Montreal, P.Q., and hotel employees, Windsor, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to two such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; and moulders, Peterborough, Ont., February 27, 1934, one employer. The dispute involving photo engravers at Toronto, and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., which commenced May 4, 1931, in the establishments of one firm with branches in the above cities and has been carried in this list for some time, is reported by the union to have lapsed by the end of October and has consequently been removed from the list. The dispute of restaurant workers in the employ of one firm in Toronto, Ont., commencing May 1, 1936, and added to the above list in September, is reported as lapsed by the union involved and has also been removed from the list.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A minor dispute involved seven elevator operators in Toronto, Ont., for one day. Employees in three buildings belonging to one company ceased work from 11 a.m. on October 1 until the same hour on October 2 on the refusal of the demand of their union for an increase in wages to \$16 per week of forty-eight hours instead of \$14-\$15 for fifty-two hours. Their demands were conceded following the refusal of the union clothing workers in the building to use the elevators, and union elevator repair men refused to work on the elevators during a strike. Toward the end of the month short strikes in three other buildings were reported in the press, the union securing its demands in two of these cases.

A minor dispute involving thirty-six longshoremens engaged to load a boat with pulpwood occurred at Michipicoten Harbour, Ont., on October 20, 1936, the men demanding 50 cents per hour instead of 40 cents. This being conceded, work was resumed in one hour.

A minor dispute involved six members of the crew of one ship at Vancouver, B.C., who

refused to sign on when the vessel resumed service on October 21, their request for the dismissal of four workers not members of the Seafarers' Industrial Union being refused. The strikers were replaced next day and the ship went on its voyage.

Coal miners about 100 in number in one colliery at East Coulee, Alta., are reported to have ceased work from October 22 to October 26 owing to a dispute as to some matter in working conditions, returning to work at the instance of the President and Secretary of District 18 of the United Mine Workers of America with which the management had entered into an agreement following a strike for union recognition from September 8 to September 17 (LABOUR GAZETTE, October, 1936, p. 881). Detailed reports as to the recent dispute have not been received.

Painters in Toronto, Ont., were reported to be picketing two jobs about the end of the month, claiming that union painters were not being employed and that conditions enforceable under the Ontario Industrial Standards Act were not being observed.

A cessation of work by building wreckers on one job in Toronto, Ont., on October 23 has been reported in the press. Five workers were involved. The building wreckers' local of the International Hod Carriers, Building and Common Labourers' Union demanded union wage rates and these were secured after a day and one-half.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**BAKERY DRIVERS, VANCOUVER, B.C.**—This dispute, involving employees in one establishment who ceased work on September 19 demanding an agreement providing for union wages and working conditions, was terminated when a union agreement was signed and work was resumed on October 29. The Deputy Minister of Labour for British Columbia had met representatives of the parties involved on October 1 but the union refused to accept proposals of the employer that work should be resumed for thirty days pending a settlement or that the employer would recognize a union of its own employees. The employer stated that the union demands could not be accepted until approval was secured from the head office of the company. The union offered to refer the dispute to arbitration. The agreement as finally reached is reported to provide that the new conditions shall not go into effect for thirty days and also that bakers in the establishment will receive union wages.

**FUR FACTORY WORKERS, WINNIPEG, MAN.**—At the end of September the strike of employees in some thirty-five establishments for a union agreement was reported to involve 150 workers, while all but eight of the employers had settled with the union. The members of the Furriers' Guild still refused to negotiate with the union claiming that their employees did not belong to the union or wish to join it. On October 9 one firm secured an interim injunction against picketing its premises and the carrying of placards. On October 16 this order was amended to permit picketing without molestation of the public or those entering to work, also permitting the use of placards so long as the statements were not libellous or offensive. Three pickets were arrested on October 14 on charges of assault and remanded on bail for trial. By the end of the month, seven firms and about 100 workers were reported to be still involved. Toward the end of the month at the request of the Trades and Labour Council the provincial authorities again took up the matter and considered the appointment of a temporary joint council under the Industrial Conditions Act, but as the employers refused to agree to refer the dispute to such a body it was decided that the proposal was not feasible.

**BAG FACTORY WORKERS (COTTON & BURLAP), WALKERVILLE, ONT.**—This strike of employees in one establishment to secure wage increases and union recognition, which commenced on September 28, was terminated at the end of the month. The Ontario Minimum Wage Board investigated complaints that less than minimum wages for females were paid and on October 31 the employer was fined and ordered to pay wage balances due to six employees. On October 30 the Trades and Labour Council requested the Department of Labour for the services of a conciliation officer. As a result early in November negotiations for a settlement were in progress.

**WOOD FACTORY WORKERS (VENEER), SCOTSTOWN, P.Q.**—This strike, which commenced on September 28, involving employees in one establishment demanding increases in wages of 10 cents per hour and the slowing down of machines, was terminated on October 6, the points in dispute having been referred to arbitration as a result of mediation by an official of the provincial Department of Labour. On the following day the arbitrators rendered their decision which provided for a minimum rate of 25 cents per hour for millwrights and foremen, 22½ cents per hour for sanders, lathe operators, etc., 20 cents per hour for other employees except female and junior employees who are to receive 15 cents per hour; time and one-quarter for overtime and Sunday work as

before. No change in the speed of machines was recommended. Hours of work, ten per day, were not in dispute.

**COAL MINERS, GLACE BAY, N.S.**—Miners in one colliery ceased work on October 5 when the demand of their committee for a change from eight inch cutting bars to six inch was refused. The miners claimed that the use of these bars had resulted in numerous fires through overloading the electric current circuits. The company officials pointed out that they had been in use for five years and were covered in the union agreement. The union requested the provincial Department of Mines to make an inquiry under the Coal Mines Regulations Act and after a preliminary investigation by inspectors and experts the Minister of Mines visited the locality and recommended that the company change the bars. This being agreed to, work was resumed on October 13.

**COAL MINERS, RIVER HERBERT, N.S.**—Employees in one colliery ceased work from October 23 to October 26, negotiations for the renewal of the agreement which had expired on September 30 not having been successful. The union demanded increases in wages and a change from eight inch cutting bars to six inch. The latter point being conceded on October 26, arrangements were made to negotiate a new wage scale, work to be resumed immediately.

**COAL MINERS, CADOMIN, ALTA.**—Employees in one colliery ceased work on October 26, their demand for equal distribution of work having been refused. The agreement in force contained a provision for the distribution of certain work so far as practicable and the miners alleged that the clause was not being applied sufficiently. The employer claimed that for reasons of safety it was not practicable to apply it as requested. Under the agreement in August the dispute was referred to a joint committee of miners and officials, the Minister of Labour to appoint an independent chairman if they did not agree, the decision to be final. On August 31 the Minister appointed an independent chairman (Labour GAZETTE, October, 1936, page 876). The decision, rendered October 10, was in favour of the company but the miners did not accept this and failed to report for work on October 26. No settlement had been reported at the end of the month.

**MEAT PACKING EMPLOYEES, EDMONTON, ALTA.**—In one establishment 160 out of 200 employees ceased work demanding recognition of the Edmonton Meat Packing and Purveying Union, Local No. 1, affiliated with the All Canadian Congress of Labour, organized some months ago. The union wished to negotiate an agreement providing for increases in wages and reductions in hours of work. The management agreed to meet a committee of the em-

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
(a) Strikes and Lockouts in progress prior to October, 1936			
MANUFACTURING— Vegetable Foods— Bakery drivers, Vancouver, B.C.....	38	900	Commenced Sept. 19, 1936; for union recognition and increased wages; terminated Oct. 28, 1936; in favour of workers.
Fur, Leather, etc.— Fur factory workers, Winnipeg, Man.....	150	2,300	Commenced Aug. 16, 1936; for union agreement, increased wages and 40 hour week; unterminated.
Textiles, Clothing, etc.— Bag factory employees (cotton and burlap), Walkerville, Ont.....	41	1,000	Commenced Sept. 28, 1936; for increased wages and reduced hours; unterminated.
Other Wood Products— Wood factory workers (veneer) Scotstown, P.Q.....	135	600	Commenced Sept. 28, 1936; for increased wages and change in working conditions; terminated Oct. 6, 1936, partially successful.

ployees to discuss the proposal and work was resumed after seven hours.

**LEATHER WORKERS (PURSES, ETC.), TORONTO, ONT.**—Employees in seven establishments ceased work on October 5, the employers having refused to arbitrate wage increases as

stipulated in the agreement. This being agreed to, work was resumed next day. The arbitrators awarded increases reported to be 7½ per cent. The agreement was extended from October, 31, 1936, to July 1, 1937.

**LEATHER WORKERS (HANDBAGS, ETC.), MONTREAL, P.Q.**—Employees in one establishment

**STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1936\***

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(b) Strikes and Lockouts commencing during October, 1936</b>			
<b>MINING, ETC.—</b>			
Coal miners, Glace Bay, N.S...	450	3,000	Commenced Oct. 5, 1936; for change in cutting bars; terminated Oct. 12, 1936; in favour of workers.
Coal miners, River Hebert, N.S.	140	400	Commenced Oct. 23, 1936; for increased wages; terminated Oct. 26, 1936; indefinite.
Coal miners, Cadomin, Alta....	450	2,700	Commenced Oct. 26, 1936; against arbitration decision <i>re</i> equal distribution of work; untermiinated.
<b>MANUFACTURING—</b>			
<i>Animal Foods—</i>			
Meat packing employees, Edmonton, Alta.....	160	120	Commenced Oct. 29, 1936; for union recognition, wage increases and reduced hours; terminated Oct. 29, 1936; indefinite.
<i>Fur, Leather, etc.—</i>			
Leather workers (purses, etc.), Toronto, Ont.....	250	250	Commenced Oct. 5, 1936; for arbitration <i>re</i> increased wages; terminated Oct. 6, 1936; in favour of workers.
Leather workers (hand bags, etc.), Montreal, P.Q.....	86	172	Commenced Oct. 14, 1936; alleged violation of agreement; terminated Oct. 16, 1936; indefinite.
<i>Textiles, Clothing, etc.—</i>			
Women's clothing factory workers (dressmakers), Toronto, Ont.....	30	30	Commenced Oct. 2, 1936; for wage increase (piece rates); terminated Oct. 2, 1936; in favour of workers.
Women's clothing factory workers (dress cutters), Montreal, P.Q.....	7	125	Commenced Oct. 12, 1936; against dismissal of one employee; untermiinated.
Boys' clothing factory workers (overalls, etc), Winnipeg, Man.....	65	30	Commenced Oct. 31, 1936; for increased wages; terminated Oct. 31, 1936; in favour of workers.
<i>Other Wood Products—</i>			
Wood factory workers, Wingham, Ont.....	20	102	Commenced Oct. 14, 1936; for recognition of union, and increased wages; terminated Oct. 20, 1936; in favour of workers.
Furniture factory workers, Listowel, Ont.....	120	60	Commenced Oct. 20, 1936; for changes in working conditions; terminated Oct. 20, 1936; in favour of workers.
<b>SERVICE—</b>			
<i>Business, etc.—</i>			
Hotel employees, Windsor, Ont.....	34	714	Commenced Oct. 8, 1936; for increased wages and reduced hours; untermiinated.
Window cleaners, Toronto, Ont.....	46	230	Commenced Oct. 27, 1936; for union agreement; terminated Oct. 31, 1936; in favour of workers.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

ceased work on October 14, alleging non-payment of the wages provided for in an agreement entered into on August 29 between the International Ladies' Handbag, Pocketbook and Novelty Workers' Union and certain employers in Montreal following a strike from August 20 to August 29 (LABOUR GAZETTE, September, 1936, p. 779). The employer claimed that the agreement was being complied with. It was arranged with union representatives that an interpretation of the clauses should be given by an impartial arbitrator. Work was resumed on October 14.

**WOMEN'S CLOTHING FACTORY WORKERS (DRESS MAKERS), TORONTO, ONT.**—Employees in one establishment ceased work on October 2 demanding an agreement with the dress-makers' local of the International Ladies' Garment Workers' Union, providing for increases in wages (piece rates). The employer met these demands and work was resumed on October 5 and October 6. Apparently the establishment was not working full time as one day's time loss only was reported.

**WOMEN'S CLOTHING FACTORY WORKERS (DRESS CUTTERS), MONTREAL, P.Q.**—The cutters in one establishment ceased work on October 12 in protest against the dismissal of an employee. The dress cutters had recently joined the International Ladies' Garment Workers' Union and alleged that the man had been dismissed for union activity. The employer stated that it was for unsatisfactory work. At the end of the month a settlement had not been reached.

**BOYS' CLOTHING FACTORY WORKERS (OVERALLS, ETC.), WINNIPEG, MAN.**—Employees in the boys' clothing department in one factory ceased work for four hours on October 31, their demand for a ten per cent increase in wages having been refused, five per cent being offered. Work was resumed when their demand was conceded.

**WOOD FACTORY WORKERS, WINGHAM, ONT.**—Employees in two establishments ceased work on October 14 and October 16 respectively, demanding recognition of the United Brotherhood of Carpenters and Joiners of America and wage increases. As a result of mediation by an official of the Ontario Department of Labour, the employers negotiated wage scales at increased rates with union committees. Work was resumed on October 21.

**FURNITURE FACTORY WORKERS, LISTOWEL, ONT.**—Employees in one establishment ceased work on October 20 for one-half day, claiming that the management would not discuss working conditions with the union committee, chiefly with respect to overtime. Negotiations resulted in a resumption of work next day.

**HOTEL EMPLOYEES, WINDSOR, ONT.**—A number of the employees in one hotel ceased work on October 8, negotiations for an agreement with the Hotel and Restaurant Employees' Union not having been successful. The proposals included increases in wages, a 48-hour week, and improvements in working conditions and in meals. The union reported that members of the union committee had been dismissed. The management stated that the female employees were getting a minimum of \$26 per month and the men at least \$30 per month with room and board. The strikers were replaced but picketed the hotel, displaying placards. On October 9 an interim injunction against carrying defamatory placards was secured by the management and an action for damages for libel and interference was instituted against union members. On October 15 the management was reported to have stated that the strikers had offered to resume work if the union were recognized, this being refused. Later in the month representatives of various unions joined the pickets, carrying banners bearing the names of their organizations. On October 30 the Trades and Labour Council requested the Department of Labour for the services of a mediator. As a result a settlement was negotiated early in November.

**WINDOW CLEANERS, TORONTO, ONT.**—A strike of forty-six window cleaners employed by one firm on October 27 has been reported in the press, a union agreement providing for 40 cents per hour and 44 hours per week having been refused. The employer is reported to have stated that he would sign the agreement when the trade was organized one hundred per cent. A resumption of work on November 2 was reported, the union agreement having been signed.

According to "Industrial and Labour Information" of October 19, 1936, evidences of interest in the movement for the reduction of hours are continuing in the United States. Various views substantiating this fact are cited and it is reported that the establishment of the eight-hour day on all Hawaiian plantation sugar mills has been recommended by the Hawaiian Sugar Planters' Association to become effective on January 1, 1937, affecting approximately 11,000 workers. Reference is also made to the action of the United States Steel Corporation in announcing payment of time-and-a-half for work in excess of 48 hours a week. Other steel companies have also adopted the plan. This offer has been rejected by several groups of employees, on the ground that it was not adopted through the action of the employees and that they will continue agitating for a 40-hour week.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes reported as beginning in September was 90 and 19 were still in progress from the previous month, making a total of 109 disputes in progress during the month, involving 62,200 workers with a time loss of 166,000 working days for the month. Of the 90 disputes beginning in September, 15 were over demands for increases in wages, 2 over proposed wage reductions and 17 over other wage questions, 4 over working hours, 26 over the employment of particular classes or persons, 12 over other questions respecting working arrangements, 9 over questions of trade union principle and 5 disputes were due to sympathetic action. Settlements were reached during the month of 80 disputes, of which 20 were settled in favour of workers, 33 in favour of employers and 27 ended in compromises; in 6 other disputes work was resumed pending negotiations.

A dispute as to which of two unions represented the workers caused a stoppage of work of 1,522 coal miners at Bedwas, Monmouthshire from September 3 to 5. In certain collieries in the Rhondda Valley 3,300 miners were out on strike from September 4 to 5 in sympathy. Work was resumed and it was decided that a ballot be taken to determine which union should represent the miners. Another coal mining strike in the Blantyre district from September 7 to September 17, although in-

volved a small number originally, was the cause of 3,000 miners in the same district being out on strike from September 11 to September 14 and 22,000 others in Lanarkshire and parts of Dumbartonshire and West Lothian being on strike for one day, September 14, both in sympathy with the original strikers. Those involved in the sympathetic strikes resumed work unconditionally, while the original dispute was amicably settled following the resumption of work.

A strike occurred of 2,000 longshoremen at the Salford Docks of the Manchester Ship Canal over the suspension of workers who had refused to handle cargoes allegedly injurious to their health. After three days, a settlement was reached October 14, providing for reinstatement of the workers and an undertaking by the longshoremen to observe the general agreement. Another longshoremen's strike involving 4,000 men began in Glasgow October 23 for increased wages.

### United States

The number of disputes beginning in August was 220 and 120 were still in progress from the previous month, making a total of 340 disputes in progress during the month, involving 112,000 workers with a time loss of 925,000 working days for the month.

A strike of 37,000 longshoremen, seamen and other marine workers in all Pacific Coast ports began October 30 over the question of union control of hiring halls, the continuance of the 6 hour day for longshoremen and over a demand for increased wages. In the first few days of November, sympathetic strikes of seamen in Gulf and Atlantic ports occurred and a large proportion of ocean and coastal United States shipping was reported to be practically at a standstill.

The strike of 3,000 lettuce workers in California which began September 4 and was mentioned in the last issue of the LABOUR GAZETTE, was called off November 3.

Towards the end of September, a strike occurred of 6,000 garagemen in New York City. Work was resumed and the dispute referred to the Regional Labour Board who on October 12 granted increased wage rates of from \$1 to \$8 per week and a closed shop. On October 13, 2,000 garagemen in Brooklyn went out on strike, also for shorter hours and higher wages.

## STIMULATION OF HOUSE RENOVATION PROGRAM

### Agreement With Chartered Banks to Make Funds Immediately Available

THE immediate stimulation and utilization of the federal \$50,000,000 house renovation plan (Labour Gazette, September, 1936, page 785) are the objectives sought in arrangements recently completed whereby loans are now available for the purposes of the program.

In a recent statement, Hon. C. A. Dunning, Minister of Finance, announced that "the chartered banks have offered to begin making loans immediately in order to bridge the gap between now and the time when the necessary legislation can be passed by Parliament. Recognizing the great desirability of expediting the program in order to relieve unemployment during the fall and winter months, the government has agreed to accept the offer of the banks and to give them the assurance that the necessary legislation, providing for a government guarantee of 15 per cent of the aggregate value of loans for housing repair and renovation made by each institution, will be introduced into Parliament at the forthcoming session. When the legislation is introduced it will be of such a character as to include under the guarantee loans made during the next few months in anticipation of the legislation being passed." The Hon. C. A. Dunning expressed the Government's appreciation of the co-operation of the banks in this regard, saying that it was the Government's belief that the facilitating of loans under the scheme would serve "to stimulate general economic activity and relieve unemployment during a period of the year when the problem of unemployment tends to become most acute."

He referred to a conference with representatives of all chartered banks, and Mr. Purvis and Prof. Mackintosh of the National Employment Commission, held at his office on October 13, at which it was decided to lower the interest rate of 5 per cent previously announced and to provide for a discount rate of  $3\frac{1}{4}$  per cent. With the Government guarantee of 15 per cent of the aggregate value of loans made by a lending institution, the banks have agreed to accept a discount rate of  $3\frac{1}{4}$  per cent being equivalent to an effective interest rate of 6.32 per cent on a one-year loan. This rate represents a reduction of more than one-half from the rates at which instalment purchases are usually made.

The following general conditions, which the lending institutions would have to meet to obtain the Government guarantee, were also announced by the Minister of Finance.

"(1) Loans are to be made to *owners* of residential property (including farm houses)

for repairs, alterations and additions including built-in equipment.

"(2) Loans shall not exceed \$2,000 in amount on any single property. More than one loan may be made on a single property if the aggregate amount does not exceed \$2,000.

"(3) Loans are to be repaid in equal monthly instalments or in suitable instalments for such other periods as may be necessary to fit the conditions of the individual borrower.

"(4) The maximum charge for the loans shall be  $3\frac{1}{4}$  per cent discount for a one-year loan repayable in equal monthly instalments and proportionate rates for other periods.

"(5) No service or insurance charges or any additional charges of any kind may be made except certain stipulated penalties for arrears.

"(6) No endorsements or other security will be required."

The present arrangement has been worked out with the chartered banks only. The Minister of Finance added, however, that "similar arrangements may later be made with other lending institutions which are able and willing to make housing modernization loans on the conditions outlined above.

"The limit of aggregate loans is to be \$50,000,000," Mr. Dunning stated, "and the limit of the Government's guarantee is \$7,500,000. The Government also reserves the right to announce at any time that no further loans will be guaranteed for all lending institutions or for any particular institution."

### National Employment Commission to Organize Community Effort

The National Employment Commission will be responsible for organizing the "co-operative community effort" essential to the success of the plan.

In a subsequent statement, Mr. A. B. Purvis, chairman of the National Employment Commission, said: "The beneficial scope of the plan is so wide it does not appear in its entirety at first sight. Not only will the plan directly benefit thousands of house owners enabled under it to make needed repairs and changes which tight money and depressed conditions rendered next to impossible, but it will give a tremendous impetus all along the line. In every community in Canada, house repairs and modernization are urgently required. "Business is recovering," Mr. Purvis observed, "the building trades, building supplies industries and general labourers who find employment in building have however, had only a very small

share in this recovery. The house repair and modernization plan puts into the hands of these depressed trades a real instrument of recovery."

Emphasizing certain features of the plan, the Employment Commission chairman explained that the discount rate, equivalent to an interest rate of slightly over six per cent per annum included charges for official services which the banks must necessarily perform in connection with making this particular type of loan. Farmers, as well as urban dwellers, come under the scheme. No endorsement or other security is required to secure a loan, however, persons who have no income cannot get a loan.

The fact that a house already carries a mortgage will not constitute a barrier to securing a loan.

Mr. Purvis stated that a similar scheme had found immediate response and met with great success in the United States. Started in 1934, it had grown to very large proportions, about one million one hundred thousand individual modernization loans amounting to \$440,000,000 having been made up to September of the present year.

### Meeting of the Committee of the International Labour Organization on Industrial Health

Members of the Correspondence Committee of the International Labour Organization on Industrial Health met at the International Labour Office, Geneva, from 21 to 23 September.

Fourteen members were present from the following countries: Austria, Belgium, Canada, Czechoslovakia, Denmark, France, Great Britain, Hungary, Italy, the Netherlands, Poland, Switzerland, the Union of South Africa and the United States of America. The Canadian representative in attendance at this meeting was Dr. J. F. Cunningham of the Ontario Department of Health.

The agenda comprised the following questions: miners' nystagmus, prophylaxis in regard to ankylostomiasis, extension of the schedule of occupational diseases with a view to the eventual inclusion of poisoning due to chlorine and its compounds and to nitrous fumes and injuries to the mucous membranes; risks connected with disinfestation in agriculture and horticulture; code of hygiene regulations for office work; and the study of the compensation of occupational diseases by the system of "blanket coverage."

Subsequent to discussion and in terminating its activities the Committee adopted a number of resolutions. In regard to miners' nystagmus it recommended compensation of serious cases involving incapacity for work.

The application for a home improvement loan, requires certain information concerning the applicant's financial standing in the community, the type of work he proposes to do with the loan, the names and addresses of contractors or dealers performing the work or supplying materials. Information is required as to the extent of mortgages, liens or other encumbrances against the property to be improved; also in respect to taxes, assessments, fire and other insurance. As stated above, however, a mortgage against a property is not a deterrent against receiving a loan.

On approval of an application for a home improvement loan, the borrower signs a note agreeing to repay the loan in monthly instalments to the chartered bank from which it was obtained. The possibility of default of payment of the monthly instalments on the loan is also provided for.

The plan has been commended by the Prime Minister, Rt. Hon. W. L. Mackenzie King. Early returns indicate that the program is meeting with a favourable public reaction.

It recommended compensation, as industrial accidents, of all cases of acute poisoning due to nitrous fumes, and, as occupational diseases to be inscribed in the schedule, of pathological affections of the skin due to chlorine and its compounds.

It remitted for study to a future session the problem of chronic poisoning by nitrous fumes and that of injuries of the mucous membranes.

Having examined in detail the reports presented relative to a code of hygiene regulations for work in offices, to compensation for occupational diseases by "blanket coverage" and to prevention of ankylostomiasis, the Committee expressed the opinion that it was advisable to obtain supplementary data and to present final reports in regard to these matters to a future session of the Committee.

The question of disinfestation in agriculture and horticulture in the view of the Committee formed part of a much wider problem, namely, the protection of the health of the general population, which, in its opinion, was a matter to be studied by the Health Committee of the League of Nations.

At the end of the meeting the Committee outlined its program of future activity, notably in regard to workers' nutrition, training of medical specialists in industrial hygiene and the publication of the first supplements to the encyclopaedia *Occupation and Health*.

## CONSUMERS' CO-OPERATION IN CANADA

### Survey of Movement as Reflected in Co-operative Distribution and Credit Unions

**I**N view of the rapid extension of the co-operative movement throughout the world, particularly in Great Britain, Sweden, Finland, Denmark, Switzerland and the United States, its development in Canada is of special importance. From time to time, co-operative trends in Canada have been outlined in the *LABOUR GAZETTE*. It is the intention, however, to limit the scope of this survey to consumer co-operation and co-operative credit. It should be emphasized that Canada, being fundamentally agricultural in its economic life, the greatest development of co-operatives in the Dominion has taken place in that sphere, and the growth of consumers' co-operatives has been relatively slow in comparison. The agricultural phase of the movement has been dealt with by the Dominion Department of Agriculture (Division of Marketing) in a pamphlet entitled "Farmers' Business Organizations in Canada" (*LABOUR GAZETTE*, December, 1935, page 1087). The Department of Agriculture also publishes a directory of farmers' co-operative associations.

#### Consumer Co-operation

In England, prior to 1844, ventures in co-operation had failed because of certain elements which were not fundamentally sound. In that year, a society known as the "Equitable Pioneers of Rochdale" was formed for the purpose of carrying on a grocery business in the town of Rochdale, England. The success of this experiment, commonly referred to as the Rochdale Plan, was due to the adoption of certain principles. The policy outlined by these early co-operative societies and which have been used in the establishment of subsequent organizations down to the present day may be briefly outlined as follows:

1. No discrimination because of sex, politics or religious belief.
2. Each member in the society, no matter how many shares of stock held, to have only one vote. In this manner, the Rochdale pioneers avoided the danger that a few members would be able to gain control.
3. Capital investment in stock to earn interest at a low rate, the real savings obtained through economies of purchasing and distribution to be distributed in patronage dividends.
4. Prices to be fixed at the market price and the difference between this and the actual cost to the co-operative was to be returned at regular intervals in the form of patronage dividends to each member in direct proportion to his purchases.
5. All business to be done on a cash basis.

Such were the rules which brought success to the enterprise undertaken by the Rochdale pioneers, and form the basis of policies adopted by consumer co-operatives in other countries where societies have been successfully organized. These fundamental requisites necessarily vary to suit local conditions and laws, but in general remain the same in all countries.

In Canada, the co-operative system was introduced first in Nova Scotia.<sup>1</sup> In 1861, the first co-operative store was opened at Stellarton, N.S., by miners who had immigrated to Canada subsequent to membership in co-operative societies in Great Britain. The Stellarton society failed in 1916, and of ten other stores opened by co-operative organizations in Nova Scotia prior to 1900, only one survived beyond 1916. The failure of these co-operatives was largely attributable to the fact that certain coal mines situated in the districts in which they were established closed down. Other co-operative societies in Nova Scotia have had a greater measure of success, notably the British Canadian Co-operative Society, Ltd., formed in 1906 to which further reference will be made.

In Ontario, the first co-operative society was established in Guelph in 1904, primarily for the purpose of operating a bakery, and in subsequent years added other activities, such as a grocery and meat business, a boot and shoe department, a coal yard, and a cash and carry groceteria.

In the Prairie Provinces the development of the co-operative movement has been most rapid. The twenty-second annual report of the Saskatchewan Commissioner of Co-operation and Markets for the year ending April 30, 1936, indicates this development in statistics of associations reporting. In 1914, the year of inauguration of the movement in that province, 102 associations were recorded as reporting. By 1935 this number had increased to 326. The value of total sales of reporting associations has risen from \$281,354.64 in 1914 to \$2,770,466.72 in 1935. Most of these co-operative associations are engaged in the marketing of farm produce. The report observes, however, that "in the field of co-operative endeavour the most noteworthy development" during the year reviewed, "was the increased interest in consumers co-operation," fifty-two new organizations being incorporated during the fiscal year.

<sup>1</sup> Canada Year Book, 1925.

In British Columbia, the miners, railroad workers, and fishermen have organized co-operative stores. The miners at Fernie have established a store, and at Revelstoke a store is operated by a society composed chiefly of railroad workers. The Kynquott Trollers' Co-operative Association, and the Prince Rupert Fisherman's Co-operative Association are examples of fishermen's organizations.

Most of the provinces have legislation<sup>1</sup> in respect to consumers' co-operative societies. In the Maritime Provinces, societies are formed under the Provincial Companies Act or by Private Acts. In Ontario, the Companies Act contains a section providing for co-operative associations. Quebec, Manitoba, Saskatchewan, Alberta and British Columbia have special statutes concerning co-operative organizations. In each of these provinces, a declaration stating the name of objects of the association is required to be filed with a provincial or municipal officer and provision is made for protecting the funds of the society.

### The Co-operative Union of Canada

In March, 1909, the Co-operative Union of Canada was established to serve as a "national federation of societies organized on true co-operative principles." All co-operatives affiliated with the union must strictly conform with such principles and the great majority of them follow closely the Rochdale Plan. In order to affiliate with the Co-operative Union, societies must: (1) provide in their by-laws or constitution for a one-member—one-vote system which must be exercised personally and not by proxy (if a society extends over a very large area provision for representation by delegates appointed at local meetings may be made); (2) if interest is paid on capital investment, it must be provided for at a fixed and moderate rate; and (3) if there is any distribution of net surplus it must be in proportion to the patronage trade given.

The annual report of the Dominion Executive of the Co-operative union, reviewing the position of affiliated unions during 1935, was submitted to the Union's Annual Congress, held in Toronto in September. Continuation of the upward trend in annual returns of affiliated societies reported for 1934 was indicated in the figures presented for 1935. Thirty-six retail societies reported for 1935 compared with thirty-three for the previous year, and with thirty-one for 1933. Twenty-four retail societies reported increases during 1935 aggregating \$532,998.25 compared with twenty-seven and a sales total of \$574,202.96

for 1934. In 1935 there were 11,286 members of retail societies with share capital of \$427,033.76. These societies reported 351 employees who received \$315,386.34 in salaries and wages; total sales for the year amounted to \$3,876,195.32, while \$130,517.54 in purchase dividends were declared, the net surplus of these retail societies being given as \$161,112.90.

An outstanding affiliate of the Co-operative Union is the British Canadian Co-operative Society, Limited, of Sydney Mines, Nova Scotia<sup>2</sup> to which reference has already been made. This society, which has been established for 29 years, reported a membership of 3,342 for 1935. In that year the share capital of the society was \$126,917.39, and 147 persons earning \$128,246.53 in salaries and wages were in its employ. Sales for the year totalled \$1,062,879.55, showing an increase of \$33,582.83 over 1934, and a dividend of 8 per cent on purchases was paid, disbursements in this respect amounting to \$83,255.52. The net surplus of the society was declared to be \$84,750.71. This Co-operative deals in groceries, drygoods, meat, tailoring, bakery, dairy, and men's wear. Other prominent examples of retail co-operatives in affiliation with the Union are the Consumers' Co-operative Society, Limited, Timmins, Ontario, and the Harrow Farmers' Co-operative Association, Limited. The Timmins Society deals in groceries, meats, fruits, vegetables, flour feed and coal. It has been in existence for only 4½ years, reported 482 members during 1935, and sales volume of \$382,199.94 for the year, an increase of \$104,204.14 over the previous year, and declared purchase dividends totalling \$10,181.39. The activities of the Harrow Farmers' Co-operative differ slightly from the other two individual cases mentioned in that they deal in grain, fencing, coal, fertilizer, sundries and live stock. This organization, in existence for 17 years, reported 293 members in 1935, sales for the year amounting to \$711,475.46, an increase of \$198,275.62 over 1934.

The activities of co-operatives other than the retail or consumers' organization are also dealt with in the annual report of the Co-operative Union. In addition to wholesale societies, marketing, and dairy societies, there are producers societies and transportation societies in affiliation. These affiliates had a reported membership of 45,919 for 1935, with total sales of \$9,142,103.15—an increase of \$1,214,777.15 over 1934; and declared purchase dividends amounting to \$176,305.14. The net surplus of these societies totalled \$250,180.79.

<sup>1</sup> Canada Year Book, 1925.

<sup>2</sup> Canadian Co-operator for September, 1936.

Of special interest in this group is the Rossland Co-operative Transportation Society in British Columbia. This organization has been operating a bus transportation and garage service for almost four years, and has 410 members, sales for the year amounting to \$28,287.22.

Commenting on the progress of the co-operative movement in Canada, the report of the Dominion Executive of the Union states, in part, as follows:

"The statistics of the organized movement in Canada for the year under review, as in past years, demonstrate the fact that the principles of the co-operative movement can be as successfully applied in this Dominion as in other countries. There is no doubt that co-operative societies have withstood the effects of the depression much better than the private trade organizations with which they have to compete. The figures above quoted show that substantial advantages have accrued to the members of co-operative societies in the period under review, which would have been lost to them altogether had they not been co-operatively organized."

It must be pointed out that, while a large proportion of consumer co-operative societies are affiliated with the Co-operative Union, there are a number operating independently concerning which no information has been received.

### Co-operative Credit

In the field of Co-operative Credit one of the most successful institutions is the organization in the Province of Quebec known as "*Les Caisses Populaires*," or People's Banks, organized under the Quebec Syndicates Act and now operating under the Quebec Co-operative Syndicates Act. The movement was initiated in 1900 by Alphonse Desjardins who founded the first bank at Notre Dame de Lévis near Quebec. Based on the stimulating of thrift and savings in small territorial units, it has now developed into an important factor in the community life of the province. The following descriptive outline of the operation of these banks is taken from the 1936 volume of the Canada Year Book:

"These banks are for the most part established in agricultural districts. Loans are made to purchase agricultural implements at cash prices, to increase farm live stock, to improve farm buildings, to tide over a period of depression, to pay off a merchant and for various similar purposes. The loans, though comprised within the term 'short credit,' are for longer periods than are usual in ordinary commercial transactions because agricultural operations necessarily extend over longer

periods than those of trade. They may be for 12, 15, or even 24 months, because they must give time for the farmer to realize on his products."

According to statistics in the Canada Year Book, there were 190 of these banks in 1934 with 38,811 members, 39,723 depositors and 11,230 borrowers. The value of loans granted amounted to \$2,141,762, and profits realized totalled \$441,876.

In other provinces, the Quebec *Caisse Populaire* has a somewhat analogous development in credit unions. As stated in a pamphlet issued by the Credit Union Extension, Canadian Bureau, Toronto, the purpose of a credit union is "a co-operative association organized for the purpose of promoting thrift among its members and creating a source of credit for provident and productive uses." The money deposited with the union by members is loaned to members at reasonable rates of interest. Provision is made for the auditing of the unions books at regular intervals. All money received is deposited in a bank selected by a board of trustees, the deposits of which may be guaranteed by the Credit Union Guarantee Fund. Funds not needed for lending may be invested only in Government securities or those guaranteed by the Government. Twenty per cent of the net earnings must be set aside as a reserve against possible bad loans and this fund may not be distributed except on liquidation of the credit union. The period of a small loan may not exceed two years and repayment must be made at regular intervals, usually each pay day. The maximum limits on secured and unsecured loans are fixed by the Board of Trustees, but an unsecured loan may not exceed \$50, and an adequately secured loan may not exceed \$200 or 10 per cent of the assets of the credit union whichever is the greater. Security for the loan may be collateral or endorsement of a note. In passing on loan applications, a credit committee carefully considers the purpose of the loan, the character of the applicant, his ability to repay and the security offered. Interest is paid on the members' minimum monthly balances, after expenses have been paid and a percentage set aside as a reserve for possible bad loans. Such interest is authorized by a majority of members at the annual meeting.

Among the first employee group credit unions in Canada was the Civil Service Co-operative Credit Society Limited, established at Ottawa in 1908 and incorporated in 1928. Other credit union organizations in Ontario include: La Caisse Co-operative de Notre Dame d'Ottawa Limitée established in 1929, the Plymouth Cordage Co-operative Credit

Society Limited of Welland established in 1931, the People's Co-operative Credit Society of St. Jean Baptiste of Ottawa Limited also established in 1931, the Burns Fraternal Credit union, Toronto, established in 1935, and the Timmins Credit Union established in June of this year.

In the Maritime Provinces the development of co-operative credit is indicated in the calendar of St. Francis Xavier University for 1936-37 (LABOUR GAZETTE, June, 1936, page 478), in which the activities of the Extension Department are reviewed. This department was organized for the purpose of developing a scheme of adult education which was defined as "the improvement of the economic, social, educational and religious conditions of the people of Nova Scotia."

The program as laid down in 1930 was an ambitious one, and included, in addition to educational activities, surveys (a) of economic possibilities in farming, mining, fishing, lumbering, etc., (b) of possible social improvement in industrial and rural communities, and (c) to discover the best educational practices for the development of eastern Nova Scotia. These were to be undertaken in conjunction with various governmental agencies designed to do this work.

Operating through county and parish conferences and community organizations, the Department has achieved many of its original objectives, particularly in the development of study clubs and co-operative projects.

The development and successful operation of co-operative organizations of various types is shown in a tabular summary of the five year period from 1932 to 1936. In 1932, there were 9 communities served by 13 co-operative societies, eight of which were credit unions. In 1936, there were 117 societies serving 75 communities. Of these 117 societies, 65 were credit unions, 18 were co-operative stores; 5 co-operative buying clubs; 10 co-operative fish plants, 2 community industries, and 17 lobster factories.

In 1934, the Royal Commission (Provincial Economic Inquiry)—appointed by the Lieutenant-Governor of Nova Scotia (LABOUR GAZETTE, January, 1935, page 29) made certain recommendations as to the adoption of legislation giving greater opportunities for co-operation than now appears to exist. On the subject of co-operation, Dr. H. A. Innis, a member of the Royal Commission, suggested that "the province (Nova Scotia) should introduce at its earliest convenience, a co-operative Societies Act, modelled on the experience of other countries, but adapted to local needs. The movement deserves every advantage in expert guidance and direction." In May, 1935, an Act was passed to provide

for the incorporation of co-operative associations, and a recent amendment made to the Domestic, Dominion and Foreign Corporations Act, provides that co-operative societies incorporated under the Co-operative Associations Act are exempt from payment of the annual registration fee.

The Prince Edward Island Legislature also passed an Act, at its 1936 session, providing for the establishment of credit unions in that province (LABOUR GAZETTE, May, 1936, page 394). In introducing the Bill, the Hon. Mark R. McGuigan, Minister of Education, declared that he believed credit union organizations would promote thrift, and described the credit union as a "bank of credit," providing its members with immediate constructive loans, which would encourage buying on a cash basis rather than on the instalment plan. The Bill further defined a credit union as a "co-operative credit society organized for the two-fold purpose of promoting thrift among its members and creating a source of credit for its members at legitimate rates of interest for provident and productive purposes."

#### Dust Control Experiment

Industrial Commissioner Elmer F. Andrews, of New York State, announced recently that the State Department of Labour has established a field laboratory in a granite quarry at Letchworth Village in Rockland County for the purpose of testing dust control machinery to be used in the State's campaign for the prevention of silicosis. Manufacturers of such machinery have made application for the Labour Department's approval of their equipment, and the tests to determine the qualifications of several devices will be started shortly under conditions and procedures recommended by the Advisory Committee on Dust Control Rules and Regulations for Rock Drilling Operations. The Rockland County outcropping of granite where the tests are to be made is of high silica content and the dust to be created by drilling this rock will show a high percentage of free silica, the most injurious of all dusts when inhaled.

According to a recent announcement made by the Hon. William Tremblay, Minister of Labour, for Quebec, cheques will be issued to pensioners accepted as due for pensions by the Quebec Old Age Pensions Commission on or about November 1, 1936. The provincial old age pension legislation is complementary in Quebec as elsewhere in Canada to the Federal law, under which the Dominion Government pays 75 per cent of the cost of pensions, the province in each instance bearing the burden of the additional 25 per cent plus cost administration.

## LABOUR LEGISLATION IN NEW BRUNSWICK, ALBERTA AND PRINCE EDWARD ISLAND IN 1936

A review of the labour legislation enacted during recent sessions of the Legislatures of New Brunswick, Alberta, and Prince Edward Island is given below. The Alberta

legislation covered in this review was enacted in the second 1936 session from August 25 to September 1.

### New Brunswick

Among the laws enacted during the session of the New Brunswick Legislature from March 5 to April 24, 1936, were Acts for the regulation of wages in any trade or industry, for parents' maintenance, assistance to industry and for regulation of business practices in any trade or industry. Minor amendments were made in the statutes providing for woodmen's liens and the licensing of guides. An Act was also passed providing for the early closing of barber shops in the City of Moncton.

#### Fair Wages and Hours

The Fair Wage Act provides for the appointment by the Lieutenant-Governor in Council of a Fair Wage Officer under the Minister of Health and Labour with authority to hear complaints and conduct investigations for the purpose of ascertaining the wages, hours and conditions of labour prevailing in any trade. A "trade" is defined to include an industry or business. Where it appears that the wages, hours or conditions in any trade are inadequate or unfair, the Fair Wage Officer may call a conference of representatives of employers and workers in such trade for the purpose of effecting a voluntary adjustment of such conditions. A disinterested person appointed by the Minister is to act as chairman and the Fair Wage Officer as secretary of the conference. A written report is to be made to the Minister by whom it may be referred to the Board of Commissioners of Public Utilities.

Whether an investigation or a conference has been held or not, the Board, when directed by the Minister, must make the necessary inquiries to ascertain the wages, hours and conditions in any trade and may establish fair rates of wages and maximum hours per day, week, or month for which such wages shall be paid. It may also fix rates of wages for all time worked in excess of the established maximum. Different orders may be made for different establishments in the same trade if deemed expedient and special rates may be fixed for part-time workers, handicapped employees or apprentices. The Board may suspend, cancel or revise any of its orders,

all of which are subject to review by the Minister.

Notice of an order is to be given to the employers and workers concerned in such manner as the Board may direct or as may be fixed by regulation. All orders are binding upon employers and workers concerned and are not subject to variation by individual agreement or, except with the authorization of the Minister, by collective agreement.

An employer wilfully contravening an order of the Board in regard to wages or hours is liable on summary conviction to a fine not exceeding \$100 for each worker affected and, in addition, must pay the difference between the wages actually paid and the wages established by the Board. A worker who has been paid a lower wage than that to which he is entitled under an order of the Board may, in addition to any other remedy, recover as an ordinary debt the amount by which he has been underpaid.

#### Miscellaneous Legislation

The Parents' Maintenance Act provides legal machinery to compel children to provide for dependant parents when the children are judged financially able to do so. A maintenance order may be made under the Act, whether or not the parent is receiving aid from any government or municipality or from any public or private body.

An amendment to the Public Utilities Act enables the Board of Public Utilities Commissioners to investigate the commercial practices and marketing conditions in any trade or industry. If such practices are found to be unfair or unreasonable or such conditions are resulting in wasteful or demoralizing competition, the Board, with the approval of the Lieutenant-Governor in Council, may prohibit such practices and prescribe such conditions as it deems to be in the interest of the trade or industry and of the general public and may require persons engaged in such trade or industry to be registered.

An Act respecting Assistance to Industry was passed with a view to enabling the Provincial Government to take the necessary

action before the next legislative session if agreement is reached on certain proposals made by the Government of New Brunswick to the Dominion Government for the purpose of assisting the basic industries of the province. Under the Act the Lieutenant-Governor in Council may enter into agreements with the Dominion for the purpose of assisting agriculture, lumbering, mining, or any other industry in the Province and for this purpose may take such measures as it may deem advisable either alone or in co-operation with the Dominion. The monies necessary

for purposes of the Act may be raised by way of loan or paid out of the Consolidated Revenue Fund.

The New Brunswick Early Closing Act, providing for the early closing of shops by municipal by-law, applies only to places where goods are offered for sale. Accordingly, a special Act was passed to enable a by-law to be made for the early closing of barber shops in Moncton. A petition by not less than two-thirds of the barbers doing business or employed in barber shops in the city is required before a by-law may be made.

## Alberta

The Alberta Legislature held a second session in 1936 from August 25 to September 1. New laws were enacted concerning hours of labour and the issuing of credit certificates. Amendments were made to Acts relating to minimum wages, factory inspection, mothers' allowances, the Department of Trade and Industry and the licensing of trades and businesses.

### Hours of Labour

The Hours of Work Act, which came into effect on September 1, 1936, provides for an eight-hour day and a 48-hour week for female workers and a nine-hour day and a 54-hour week for male workers. Exception is made in the case of persons holding confidential, supervisory or managerial positions. It applies to any establishment, work, or undertaking in or about any industry, trade or occupation with the exception of farming and domestic service. The Act is not, however, to affect the provisions of the Coal Mines Regulation Act. Previously, the Alberta Factories Act limited hours of both male and female workers to 9 a day and 54 a week, but under the Minimum Wage Orders weekly hours for girls and women in manufacturing establishments in towns of over 600 population were restricted to 48 except where a permit was granted by the factory inspector.

The Hours of Work Act is to be administered by a Board of Industrial Relations consisting of not more than five persons appointed by the Lieutenant-Governor in Council one of whom is to be designated as chairman. Members of the Board are to hold office during pleasure and to receive such remuneration as may be fixed by the Lieutenant-Governor in Council. Amendments to the Minimum Wage Act, 1925, governing female employment, and the Male Minimum Wage Act, 1936, provide that these two statutes shall also be administered by the Board of Industrial Relations.

The provisions made for the application of the new statute are similar to those of the Hours of Work Act of British Columbia and of the draft convention of the International Labour Conference, 1919, concerning the eight-hour day. The sections of the Act providing for exceptions to the daily or weekly limit of hours, like those of the British Columbia law, are based on the convention. Where, in accordance with the customary practice or an existing arrangement between employers' and workers' organizations, working hours on one or more days of the week are less than the prescribed limit, such limit may be exceeded on any of the remaining days of the week provided that the weekly limit is not exceeded. The daily limit in such cases may not, however, be exceeded by more than one hour except with the approval of the Board of Industrial Relations. The prescribed number of hours may also be exceeded in case of accident or of urgent work to machinery or plant or in case of unforeseen circumstances, but only so far as may be necessary to avoid serious interference with the ordinary working of the undertaking. A weekly report in writing of every day upon which the limit of hours of work is exceeded under this section must be sent to the Board not later than three days following the week in which the limit was exceeded, stating the reason for exceeding the prescribed limit, the names of employees involved and the amount of overtime.

The Board of Industrial Relations, with the approval of the Lieutenant-Governor in Council, may make regulations determining the permanent exceptions to be made in case of preparatory or complementary work or for classes of employees whose work is seasonal or intermittent, the temporary exceptions to deal with unusual pressure of work, and the extent to which the prescribed limit of hours may be exceeded in continuous industries which are carried on by a succession of

shifts. Regulations for continuous industries are to be made only after inquiry and the Board is to fix maximum additional hours in each instance. In exceptional cases where the limitation of working hours laid down in the Act cannot conveniently be applied, agreements between employers' and workers' organizations or between workers' and employers' representatives concerning the daily limit of work over a longer period may be given the force of regulations if confirmed by the Board.

Unless otherwise ordered by the Board of Industrial Relations, every employer must allow each of his employees at least twenty-four consecutive hours of rest in every consecutive period of seven days. The Board may, however, inquire into conditions in any industrial undertaking whose operations are ordinarily continuous and may except it in whole or in part from this provision making any other provision deemed necessary for days of rest for the employees in such undertaking. Consecutive rest periods may be provided for in relation to a monthly work period.

The Board may inquire into the conditions prevailing in any industry and may prescribe that the maximum hours of work of any employee in the industry shall be less than the maximum fixed by the Act. It may determine the rest periods and generally, having regard to the interests of employers and employees, may make regulations as to the hours of work and conditions of employment. For the purpose of any inquiry held pursuant to the provisions of the Act the Board is vested with all the powers of Commissioners under the Public Inquiries Act.

Inquiry may be made with respect to the persons working in or about any industrial undertaking as members or alleged members of any partnership or association or in the execution of any agreement or scheme of profit-sharing or co-operative or joint contract or undertaking, including the contractual or other relations of the persons so working. If the Board finds that such partnership, association, etc., is intended to defeat the object of the Act in limiting hours of work, it may make regulations applying the provisions of the Act to such partnership, association, etc.

The Board, or any person authorized by it, may inspect and take extracts from all books, payrolls or other records of an employer relating to hours of labour and may also require the production of records or statements, in possession of employees and may obtain statements on oath from both employers and employees.

Employers are required to notify employees, by posting notices or by other methods approved by the regulations regarding hours, shifts and rest periods. For failure to notify employees of hours of work as required by the regulations or for employing any person outside of the hours fixed under the Act or during rest periods, an employer is liable to a fine of not more than \$100 for each employee affected. For failure to perform any other duty imposed or for neglect or refusal to permit inspection or examination or to furnish any information or thing required by the Act or regulations and for any violation of the Act or regulations for which no other penalty is provided, a fine not exceeding \$500 may be imposed. In any prosecution for an offence against the Act alleged to have been committed by an employer, the onus of proof that he is not an employer is upon the person charged with the offence.

### Minimum Wages

As stated above, the laws providing for minimum wages for male and female employees were amended to transfer the administration of these statutes to the Board of Industrial Relations appointed under the Hours of Work Act. The amendments to the Minimum Wage Acts are to come into force on Proclamation. Under both statutes the Board is authorized to issue orders fixing wage rates for time worked in excess of the maximum hours permitted by the Hours of Work Act, but under the Minimum Wage Act, such rates are not to exceed one and one-half times the ordinary rate.

The Minimum Wage Act, 1925, was amended to bring it into line with the Hours of Work Act, by repealing the section authorizing periods of employment and shifts to be fixed. Similarly, the section stipulating that the provisions of the Factories Act as to a minimum wage and any other statutory provision regarding minimum wages should not apply to any employees in respect of whom a minimum wage had been fixed by the Minimum Wage Act was also repealed as being inconsistent with the Male Minimum Wage Act passed during the earlier session of 1936.

The section of the Minimum Wage Act dealing with penalties was amended and now declares an employer guilty of an offence who contravenes or neglects or fails to comply with any regulation made pursuant to the Act, or who hinders or prevents the entry of an inspector or authorized person upon any premises, or who, when questioned by an inspector or authorized person as to whether he is an employer of employees, denies that he

is such an employer when in fact he is. For a first offence in such cases there is no longer a minimum penalty. The maximum fine of \$100 and the penalties for a second or third offence of this kind and for violation of the minimum wage rate are unchanged.

### Factory Inspection

The Factories Act, 1926, was the subject of amendments which will come into force on Proclamation. Some of these, like the amendments to the minimum wage laws, are consequent upon the passing of the Hours of Work Act. The section was repealed which fixed a nine-hour-day and a fifty-four hour week in all factories with the exception of repair shops, creameries, cheese factories, sawmills and grain elevators in places having a population of less than 5,000, and in shops, offices and office buildings in cities and towns over that population.

A new clause was added to permit the Lieutenant-Governor in Council to make regulations prescribing the nature and frequency of inspections of freight and passenger elevators, the fees payable for such inspections and the persons by whom they are to be paid.

### Licensing of Trades and Businesses

The Licensing of Trades and Businesses Act was amended as to the section which enables the Minister in charge of the Act to cancel or suspend a licence where he is satisfied that the holder habitually contravenes the provisions of any code or regulations issued pursuant to certain statutes. The Hours of Work Act was added to the list of such statutes.

### Mothers' Allowances

The Mothers' Allowances Act was amended to define "Superintendent" to mean any person designated by the Minister as the Superintendent for the purposes of the Act instead of as the Superintendent of Neglected and Dependant Children appointed under the Child Welfare Act.

### Department of Trade and Industry

An amendment to the Department of Trade and Industry Act provides for the appointment of a Board, to be known as the Price Spreads Board consisting of not less than three nor more than five persons.

The Board must, when directed by the Minister of Lands and Mines, and may of its own motion, inquire into any matter relating to the production, manufacture, supply, distribution or sale of any goods, wares or mer-

chandise to which the Act applies, or into any matter relating to any trade or industry to which the Act applies.

After making such inquiry, the Board may fix maximum or minimum prices or both for the sale or purchase of such goods by wholesale or retail or for services rendered or work done in any trade to which the Act applies. The Board may designate the areas of the Province to which such Order shall apply and may fix different maximum and minimum prices for different areas. In so doing the Board is not required to take into account any plant, equipment or other investment, or the capital represented thereby, which it does not consider to be required for the time being for the purposes of the trade or industry under review and, in case account is taken, the Board may allow a return on such plant, equipment or capital at a rate which it deems proper. A penalty of \$1,000 per day may be imposed upon any person contravening an Order of the Board.

The amending Act also authorizes the appointment by the Lieutenant-Governor in Council of persons to act as agents of the Minister to carry out such duties as may be prescribed by him. These agents and the Price Spreads Board are vested with all the powers of commissioners under the Public Inquiries Act with regard to summoning witnesses, requiring the production of documents and taking evidence under oath.

### Credit Certificates

The Prosperity Certificates Act authorizes the Provincial Treasurer to issue credit certificates to persons willing to accept them in return for goods and services in respect of any public work undertaken by the Government in relation to unemployment relief, or for any existing Government services, or under any agreement between the Government and any city, town, village or municipal district for the relief of unemployment, and for such other public expenditures as may be specified by the Lieutenant-Governor in Council.

Such certificates are to be in denominations of 25 cents, \$1 and \$5 and the aggregate amount issued may not exceed \$2,000,000. The certificates are to bear date of issue and to be redeemable by the Provincial Treasurer at face value after two years from such date provided there are attached 104 stamps each representing one per cent of the denomination of the certificate. The Provincial Treasurer may, however, pay out of the General Revenue Fund the face value of any valid certificates presented to him on the Thursday, Friday and Saturday following the second Wednesday

in each month and on those days such certificates will be accepted in payment of taxes payable under the Ultimate Purchasers Tax Act, 1936.

Certificates are valid only when they have affixed to them certificate stamps of the proper denomination for as many full weeks as have elapsed since the date of issue. Certificate stamps are to be sold by the Provincial Treasurer in denominations of one-quarter of one cent, one cent and five cents. The proceeds of the sale of stamps are to be kept by the Provincial Treasurer in a trust fund to be used for the purpose of redeeming certificates and defraying expenses connected with them.

### Prince Edward Island

The Legislature of Prince Edward Island, which was in session from March 30 to April 18, 1936, enacted a new law for the re-establishment of needy farmers and fishermen and amended the Charlottetown Incorporation Act. The latter Act was amended to enable the City Council to pass a by-law prohibiting under penalty the hiring of workmen for work being done by or under any contractor, or of the nature usually done by contractors, if managed or directed other than by the owner of the property, at a lower rate of pay than thirty-five cents an hour irrespective of the term of hiring.

#### Relief Recipients

The City was also authorized to make a by-law to compel every person receiving unemployment relief, directly or indirectly, from or through the City, to work without pay for the City during, or within seven days after, the period of receiving such relief to an extent not more than commensurate, at the prevailing scale of wages, with the cost of the relief supplied him and his dependants, provided that such work is not of a permanent nature or such as is ordinarily done for the City by hired labour. The by-law may also provide a penalty of imprisonment for any person who refuses or fails to do such work on demand unless prevented by illness or inability or unless he has gainful employment.

A section of the Charlottetown Act formerly provided for a by-law to impose a licence fee on non-residents doing transient work in the City. Such fee in the case of residents of the Province might be fixed at an amount not exceeding the total poll taxes paid by residents of the City; in the case of non-residents of the Province the licence fee might be fixed at an amount not exceeding \$10. Any licence fee might be reduced by the amount of any

Any city, town, village or municipal district may enter into an agreement with the Province to purchase certificates or to accept them to assist in relieving distress from unemployment or to aid indigents in lieu of, or in addition to, any moneys allotted or contributed by the Province under the Unemployment Relief Acts, 1933, or otherwise. Such certificates may be expended in respect of unemployment relief, services or other undertakings or expenditure, or may be received by such municipality in respect of money owing to it, or may be dealt with as such municipality may designate.

poll or property tax paid to the City. There was a penalty not exceeding \$20 or thirty days' imprisonment. This section has been revised and no distinction is now made between residents and non-residents of the Province, all taxes being imposed on the basis formerly fixed for non-residents. The fine for non-payment is raised to \$30 and it is stipulated that any person working on a project directly or indirectly performed by the Provincial Government shall be exempt from the tax if the Lieutenant-Governor in Council so orders.

#### Needy Farmers and Fishermen

An Act to Regulate Assistance for the Re-establishment of Needy Farmers and Fishermen authorizes the Lieutenant-Governor in Council to make regulations for the administration of any fund provided for such purpose. The regulations are to govern the manner in which the funds are to be expended, the security, if any, to be taken for advance of cash or goods, the title of goods or chattels to be supplied to farmers or fishermen and other matters arising from the administration of such funds.

The Division of Labour Standards of the United States Department of Labour reports that a manual is being prepared for the use of labour inspectors in pursuance of a recommendation made by the Second National Conference on Labour Legislation held in Asheville, N.C., in 1935. Two committees have been appointed to assist in preparing the sections of the handbook dealing with safety and health and with inspection in connection with the laws on hours of work, child labour, minimum wages and home work. Members of the staff of the Division of Labour Standards are acting as secretaries of these committees.

## MINIMUM WAGES IN SASKATCHEWAN

### Act Extended to Cover Male Employees in Shops and Factories

**B**Y Order in Council, effective November 1, the Minimum Wage Board of Saskatchewan has extended the provisions of the Minimum Wage Act to include male employees in shops and factories in the cities of the province.

During the last session of the Legislature, the Act was consolidated and amended (LABOUR GAZETTE, May, 1936, page 406). In the amended Act, "shop" is defined to include not only the part of a building where goods are offered for sale by retail but also all other parts of the building used in connection with the sale by retail and, also, a mail order house, hotel, boarding or rooming house with five or more beds for lodgers, a restaurant where meals are served daily to more than five persons, a refreshment room, beauty parlour, barber shop and the place of business of a tobacconist or news agent.

In view of the extension of the Act to include male employees in cities, the Board has revised and reissued: Order No. 1 governing employment in certain shops; Order No. 2 governing employment in laundries, dye works, dry cleaning, tailoring, fur sewing, dress-making and millinery establishments; Order No. 3, governing employment in factories, garages, and automobile service stations; and Order No. 5 governing employment in beauty parlours and barber shops. These orders (except that covering garages and service stations), formerly applied to female employees, and were published in the LABOUR GAZETTE for February, 1935, page 151. The old Order No. 3 governed employment in mail order houses, but, as referred to above, mail order houses are now defined and included under the category of "shops."

#### ORDER No. 1

*Governing employment of persons in certain shops in the cities of the province and within a radius of five miles thereof.*

This order, effective November 16, applies to every person except a registered druggist or drug apprentice employed in or about a shop, other than an automobile service station, whether as office help, cashier, elevator operator, parcel wrapper, delivery man, or in any way connected with the sale or delivery of merchandise, except when such delivery is done on foot or on bicycle.

While there have been no major changes in wages or hours yet there have been two important additions to the new order, viz.—pro-

viding for indentured apprentices and restricting the number of inexperienced employees. There is also a change in the section regarding overtime and part time. Formerly part time workers (experienced or inexperienced) were paid at a rate not less than 20 cents per hour and the period of employment was to be not less than three consecutive hours. By the new Order, experienced workers on part time are to receive not less than 30 cents per hour; inexperienced adults not less than 25 cents per hour; and inexperienced minor workers not less than 20 cents per hour, employment to be for a period of not less than two consecutive hours.

The wage provisions of the revised Order are as follows:

#### Wages:

(a) Minimum rates are set herein for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment, if less than 48.

(b) Experienced Workers: No employer shall employ an experienced worker or suffer or permit an experienced worker to be employed in a shop at a rate of wages less than \$14 per week of 48 hours.

(c) Inexperienced Adult Workers: Inexperienced adult workers shall be paid: Not less than \$9 per week of 48 hours for the first 6 months. Not less than \$11 per week of 48 hours for the second 6 months. Not less than \$12 per week of 48 hours for the third 6 months, and thereafter shall be considered experienced workers, and shall be paid not less than the minimum rate above prescribed for experienced workers.

(d) Inexperienced Minor Workers: Persons under 21 years of age may be employed as inexperienced minor workers and shall be paid: Not less than \$6 per week of 48 hours for the first 6 months. Not less than \$7 per week of 48 hours for the second 6 months and shall then be considered inexperienced adult workers irrespective of age and shall be paid on the scale set out above for inexperienced adult workers.

Minors shall be considered inexperienced adult workers upon reaching the age of 21 years, irrespective of length of experience.

(e) Indentured Apprentices: If an indenture of apprenticeship has been entered into under the terms of which the employer, during a specified period of not less than one year, undertakes to see that an employee is taught a skilled trade, and the employee undertakes to learn the trade, the wages stipulated in the indenture may supersede the rates set in this Order, provided a copy of such indenture is filed with and approved by the Minimum Wage Board.

(f) Restriction in Number of Inexperienced Workers: No employer shall employ or permit to be employed as full time inexperienced workers in any class of employment in any establishment more than 25 per cent of the

total number of employees in that class of employment in that establishment, excepting when the total number of employees is less than four, in which case one inexperienced worker may be employed.

(g) Overtime and Part Time: Wages at not less than the following hourly rates applicable shall be paid to employees, whether experienced or inexperienced, for all time worked beyond 48 hours in any one week and to all employees working on a part time basis:—

- (i) Experienced workers not less than 30 cents per hour.
- (ii) Inexperienced adult workers not less than 25 cents per hour.
- (iii) Inexperienced minor workers not less than 20 cents per hour.

Provided that in no case shall the hours of labour exceed fifty-six (56) in any one week, unless a special permit in writing has been obtained from the Secretary of the Board, and provided further that no period of employment shall be less than two consecutive hours.

(h) Holidays: No reduction for statutory holidays shall be made from the minimum wage.

(i) Method of Payment: Wages shall be paid promptly at regular intervals in cash or by cheque and no earning period shall be longer than one month.

There are the usual provisions respecting the maintenance of a register by employers, posting of Orders and penalties.

**ORDER No. 2.—Governing employment of persons in laundries, dye-works, dry cleaning, fur sewing, dressmaking, and millinery establishments in cities.**

As in Order No. 1, this Order (effective November 16) contains new sections relative to indentured apprentices, restricting the number of inexperienced workers, and establishing a new schedule of part time rates.

The wage provisions are as follows:

#### **Wages:**

"Wage" or "Wages" means any compensation for labour or services paid to or retained by, or partly paid to and partly retained by, a worker in a laundry, dyeworks, drycleaning, tailoring, fur sewing, dressmaking or millinery establishment to which this Order applies, whether measured by time, piece, commission or by any other method whatsoever.

(a) The minimum rate of wages as set herein are for a maximum of forty-eight (48) hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

(b) Experienced Workers: No employer shall employ an experienced worker or suffer or permit an experienced worker to be employed in a laundry, dyeworks, drycleaning, tailoring, fur sewing, dressmaking or millinery establishment to which this Order applies at a rate of wages less than \$13 per week of 48 hours.

(c) Inexperienced Adult Workers: Inexperienced adult workers shall be paid: Not less than \$9 per week of 48 hours for the first 6 months. Not less than \$11 per week of 48 hours for the second 6 months, and thereafter shall be considered experienced workers and shall be paid not less than the minimum above prescribed for experienced workers.

(d) Inexperienced Minor Workers: Persons under 21 years of age may be employed as in-

experienced minor workers and shall be paid: Not less than \$6 per week of 48 hours for the first 6 months. Not less than \$7 per week of 48 hours for the second 6 months; and shall then be considered inexperienced adult workers, irrespective of age, and shall be paid on the scale set out above for inexperienced adult workers.

Minors shall be considered inexperienced adult workers upon reaching the age of 21 years, irrespective of length of experience.

(e) Indentured Apprentices: If an indenture of apprenticeship has been entered into under the terms of which the employer during a specified period of not less than one year undertakes to see that an employee is taught a skilled trade, and the employee undertakes to learn the trade, the wages stipulated in the indenture may supersede the rates set in this Order, provided a copy of such indenture is filed with and approved by the Minimum Wage Board.

(f) Restriction in Number of Inexperienced Workers: No employer shall employ or permit to be employed as full time inexperienced workers in any class of employment in any establishment more than 25 per cent of the total number of employees in that class of employment in that establishment, excepting when the total number of employees is less than four, in which case one inexperienced worker may be employed.

(g) Overtime and Part Time: Wages at not less than the following hourly rates applicable shall be paid to employees, whether experienced or inexperienced, for all time worked beyond 48 hours in any one week and to all employees working on a part time basis:

- (i) Experienced workers not less than 30c per hour.
- (ii) Inexperienced adult workers not less than 25c per hour.
- (iii) Inexperienced minor workers not less than 20c per hour.

Provided that no period of employment shall be less than two consecutive hours.

(h) Holidays: No deduction for statutory holidays shall be made from the minimum wage.

(i) Method of Payment: Wages shall be paid promptly at regular intervals in cash or by cheque and no earning period shall be longer than one month.

**ORDER No. 3.—Governing employment of persons in factories, garages, and automobile service stations in cities.**

The former Order No. 3 applied to the employment of women in mail order houses, but since mail order houses, are now defined under shops and covered by Order No. 1, this new Order No. 3 applies now to a new group of employees (in garages and service stations) under the Act. Its provisions are as follows:

#### **1. "Factory" means:**

(a) any building, workshop, structure or premises of the description mentioned in Schedule "A" of The Factories Act;

(b) any premises, building, workshop, structure, room or place wherein or within the precincts of which steam, water or other mechanical power is used to move or work machinery employed in preparing, manufacturing or finishing

any article, substance, material, fabric or compound or incidental thereto, or is used to aid the manufacturing process carried on therein:

(c) any other premises, building, workshop, structure, room or place wherein the employer of the persons working therein has the right of access or control and in which or within the precincts of which manual labour is exercised by way of trade or for the purposes of gain in or incidental to the following purposes or any of them, that is to say: the making of any article or part of an article; the alteration, repair, ornamentation or finishing of any article or adapting it for sale.

## 2. Wages:

"Wage" or "Wages" means any compensation for labour or services paid to or retained by, or partly paid to and partly retained by, a worker in a factory, garage or automobile service station to which this Order applies, whether measured by time, piece, commission or by any other method whatsoever.

(a) Minimum rates are set herein for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

(b) Experienced Workers: No employer shall employ an experienced worker or suffer or permit an experienced worker to be employed in a factory, garage or automobile service station to which this Order applies at a rate of wages less than \$12 per week of 48 hours.

(c) Inexperienced Adult Workers: Inexperienced adult workers shall be paid: Not less than \$9 per week of 48 hours for the first 6 months. Not less than \$11 per week of 48 hours for the second 6 months, and thereafter shall be considered experienced workers, and shall be paid not less than the minimum rate above prescribed for experienced workers.

(d) Inexperienced Minor Workers: Persons under 21 years of age may be employed as inexperienced minor workers and shall be paid: Not less than \$6 per week of 48 hours for the first 6 months. Not less than \$7 per week of 48 hours for the next 6 months, and shall then be considered inexperienced adult workers, irrespective of age, and shall be paid on the scale set out above for inexperienced adult workers.

Minors shall be considered inexperienced adult workers upon reaching the age of 21 years, irrespective of length of experience.

(e) Indentured Apprentices: If an indenture of apprenticeship has been entered into under the terms of which the employer during a specified period of not less than one year undertakes to see that an employee is taught a skilled trade, and the employee undertakes to learn the trade, the wages stipulated in the indenture may supersede the rates set in this Order, provided a copy of such indenture is filed with and approved by the Minimum Wage Board.

(f) Restriction in Number of Inexperienced Workers: No employer shall employ or permit to be employed as full time inexperienced workers in any class of employment in any establishment more than 25 per cent of the total number of employees in that class of employment in that establishment excepting when the total number of employees is less than four, in which case one inexperienced worker may be employed.

(g) Overtime: Wages at not less than the minimum rate applicable shall be paid to employees, whether experienced or inexperienced,

for all time worked beyond forty-eight (48) hours in any one week, provided that in no case shall the rate be less than twenty (20) cents per hour.

(h) Part Time: Wages at not less than the following hourly rates applicable shall be paid to all employees working on a part time basis:

(i) Experienced workers not less than 30 cents per hour.

(ii) Inexperienced adult workers not less than 25 cents per hour.

(iii) Inexperienced minor workers not less than 20 cents per hour.

Provided that no period of employment shall be less than two consecutive hours.

(i) Method of Payment: Wages shall be paid promptly at regular intervals in cash or by cheque and no earning period shall be longer than one month.

This order comes into effect on November 16, 1936.

ORDER No. 5.—Governing employment of persons in beauty parlours and barber shops in cities.

In this Order, effective January 1, 1937, the Minimum wage for experienced workers was reduced from \$14 to \$13 per week of 48 hours. However, as in Orders 1, 2, and 3, there has been established a part time schedule at higher hourly rates than formerly. Furthermore, any worker who performs services for a customer, for which the customer is required to pay, shall be considered an employee, subject to the provisions of this Order.

The wage provisions of this order are as follows:—

## 1. Wages:

"Wage" or "Wages" means any compensation for labour or services paid to or retained by, or partly paid to and partly retained by, a worker in a beauty parlour or barber shop to which this Order applies, whether measured by time, piece, commission, or by any other method whatsoever.

(a) Minimum rates are set herein for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

(b) Experienced Workers: No employer shall employ an experienced worker or suffer or permit an experienced worker to be employed in a beauty parlour or barber shop at a rate of wages less than \$13 per week of 48 hours.

(c) Inexperienced Adult Workers: Inexperienced adult workers shall be paid:

Not less than \$7 per week of 48 hours for the first 6 months.

Not less than \$9 per week of 48 hours for the second 6 months.

Not less than \$12 per week of 48 hours for the third 6 months;

and thereafter shall be considered experienced workers, and shall be paid not less than the minimum rate above prescribed for experienced workers.

(d) Inexperienced Minor Workers: Persons under 21 years of age may be employed as inexperienced minor workers and shall be paid:

Not less than \$6 per week of 48 hours for the first 6 months, and shall then be considered inexperienced adult workers, irrespective of age,

and shall be paid on the scale set out above for inexperienced adult workers.

Minors shall be considered inexperienced adult workers upon reaching the age of 21 years, irrespective of length of experience.

(e) **Indentured Apprentices:** If an indenture of apprenticeship has been entered into under the terms of which the employer during a specified period of not less than one year undertakes to see that an employee is taught a skilled trade, and the employee undertakes to learn the trade, the wages stipulated in the indenture may supersede the rates set in this Order, provided a copy of such indenture is filed with and approved by the Minimum Wage Board.

(f) **Restriction in Number of Apprentices and Inexperienced Workers:** No employer shall employ or permit to be employed more than one indentured apprentice or one inexperienced worker for every experienced worker employed on the premises.

(g) Any worker who performs services for a customer, for which the customer is required to pay, shall be considered an employee, subject to the provisions of this Order.

(h) **Waiting Period:** An employee required to wait on the premises of the employer between appointments, shall be paid for all time thus spent.

(i) **Overtime and Part Time:** Wages at not less than the following hourly rates applicable shall be paid to employees, whether experienced or inexperienced, for all time worked beyond 48 hours in any one week and to all employees working on a part time basis:

(i) Experienced workers not less than 30 cents per hour.

(ii) Inexperienced adult workers not less than 25 cents per hour.

(iii) Inexperienced minor workers not less than 20 cents per hour.

Provided that in no case shall the hours of labour exceed fifty-seven (57) in any one week, unless a special permit in writing has been obtained from the Secretary of the Board, and provided further that no period of employment shall be less than two consecutive hours.

(j) **Holidays:** No deduction for statutory holidays shall be made from the minimum wage.

(k) **Method of Payment:** Wages shall be paid promptly at regular intervals in cash or by cheque and no earning period shall be longer than one month.

### **Additional Regulations Governing Minimum Wages in Shops and Stores in Nova Scotia**

The Minimum Wage Board of Nova Scotia has recently added the following amendments to Order No. 7, governing female employees in stores and shops, and including millinery, dressmaking, tailoring and fur sewing, situated or in any way connected with a store or shop. (This order was published in the *LABOUR GAZETTE* for June, 1934, page 532.)

Under Section 3, Clause F, **Part-time Workers:** This work shall include all female employees, employed for special days, seasons or rush periods. All such employees shall be classed as experienced workers, and paid at the full minimum rate per hour, fixed on this Order. No inexperienced rate shall apply to part-time workers.

**Section 4. Definition.**—This order governs the selling force, mail order employees and includes cashiers, parcellers, messengers, and other employees working with the sales force, but does not include office or restaurant employees.

**Section 5.—Discharge of Employees.**—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board, or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act.

## **REGULATIONS GOVERNING TRADE SCHOOLS IN ALBERTA**

Under the provisions of the Alberta Trade Schools Regulation Act (Labour Gazette, June, 1931, page 649) amended regulations have been issued in the Alberta Gazette of October 15.

As defined by the Act (Section 2, paragraph b) Trade "means the skill and knowledge requisite for an industrial occupation, calling or vocation, and without derogating from the generality of the foregoing, includes the construction, building, repair and operation of automobiles, steam engines, boilers, internal combustion engines, machinery of all kinds, bricklaying, building, carpentry, the work of a stonemason, plastering, plumbing, the fabrication of iron and steel mining, barbering, beauty culture, hairdressing and any other vocation or calling as may be designated by the Lieutenant-Governor in Council."

In view of the fact that certain additional trades are now being taught in privately owned schools, the provision of the Act to designate vocations other than those specifically set out in the above section, has now put into effect (Alberta Gazette, October 15) by the inclusion of the following: millinery, dressmaking, tailoring, fur sewing, and the construction, building, repair and operation of diesel engines.

The new regulations are as follows:

1. No trade shall be taught, and no instruction in any trade shall be given in any trade school unless with the approval of the Minister in writing first had and obtained.

2. No person who carries on, keeps, or operates a trade school within the meaning of the Act, shall publish or make use of any advertisement of any kind whatsoever unless such advertisement has been approved by the Minister.

3. No person who carries on, keeps, or operates a trade school shall advertise such school

by means of radio broadcasting, unless such advertisement is in writing, and has been approved by the Minister, and nothing shall be added to or detracted from any such advertisement whilst the same is being broadcasted.

4. Every trade school shall be provided with sufficient equipment to the satisfaction of the Minister for the purpose of efficiently teaching any trade taught at such trade school.

5. Every person who carries on, keeps, or operates a trade school shall, before commencing to teach any trade, submit to the Minister for his approval an outline of the course of tuition for such trade, and shall not proceed to teach any trade until the course in respect of it has been approved, and shall not depart from the course approved by the Minister, without his consent in writing first had and obtained.

6. In the case of barbering, hairdressing, beauty culture, millinery, dressmaking, tailoring, and fur-sewing the course of tuition shall not be less than six hours per day, thirty-six hours per week for twenty-six weeks, in a period of not more than thirty-nine weeks. Provided, however that in the case of barbering, hairdressing and beauty culture a short course of not less than six hours per day in a period of not less than eight weeks in any one special subject, such as marcelling, finger waving, and/or permanents may be given to any person who has had not less than two years' practical experience, providing that all applications for such course shall have been approved by the Minister.

7. In the case of electric and acetylene welding the course of tuition shall not be less than six hours per day, thirty-six hours per week for thirty-nine weeks in a period of not more than fifty-two weeks.

8. In the case of the repair of automobiles and tractors and the repair, building, construction, and operation of diesel engines, the course of tuition shall not be less than six hours per day, thirty-six hours per week for thirty-nine weeks in a period of not more than seventy-eight weeks. Provided, however, that in the case of repair, building, construction and operation of diesel engines, a special short course of not less than six hours per day, thirty-six hours per week, for a period of thirteen weeks, or a special night course of not less than six hours per week for a period of seventy-eight weeks may be given to any person who has had three years' practical experience in the repair of automobiles or tractors, providing that all applications for such courses shall have been approved by the Minister.

9. No person shall give instruction in any trade school in any trade unless he has been approved by the Minister as a person fit to give instruction in such trade.

10. No instructor shall be employed at any trade school unless he has been approved by the Minister, and such approval shall not be given unless the instructor satisfies the Minister that he has had at least four years' practical experience in the trade which he proposes to teach and in addition is the holder of the highest class certificate issued under the authority of The Tradesmen's Qualification Act, being Chapter 69 of the Statutes of Alberta, 1936, for the said particular trade.

11. The fees to be payable on every application for registration under the Act shall be as follows: In case one trade only is to be taught, twenty-five dollars. If more than one trade is to be taught, twenty-five dollars in respect of one such trade and ten dollars in respect of each additional trade.

12. In every trade school where work is performed by students for which a fee is to be charged, no fee shall be charged unless a sign approved by the Minister is displayed in a conspicuous place.

13. No certificate, diploma or other document as to the competency of any person shall be issued by any trade school until that person has submitted himself to such examination by such persons as the Minister may direct.

14. Every trade school shall comply with the provisions of the Factories Act and The Workmen's Compensation Act in respect of lighting, heating, sanitation, ventilation and accident prevention.

15. Every application for a license shall be accompanied by an outline of the course of studies both theoretical and practical and the amount of tuition fees to be charged.

16. If, after investigation the Minister is satisfied that the training afforded is inadequate he may order the proprietor of the school to return the fees paid by the student for tuition.

17. Order in Council numbered 1090-31 is hereby rescinded.

### Regulation of British Columbia Board of Industrial Relations

The British Columbia Board of Industrial Relations, administering the Male Minimum Wage Act, the Female Minimum Wage Act, and the Hours of Work Act has issued Regulation No. 15c replacing Regulation No. 15b, applicable to the mercantile industry, whereby persons employed in the wholesale or retail trade with the exception of certain urban municipalities may work three hours per day in excess of the limit prescribed by section 3 of the Act "on Saturday of each week and on the day preceding a statutory holiday when such statutory holiday occurs on a Saturday." The former regulation expired on September 30, 1936, and the present one extends the period to September 30, 1937. The Board has also issued Regulation 16c, applicable to drug stores, permitting licentiates of pharmacy, clerks and apprentices to work four hours per week in excess of the limit imposed by the Act, but in no case are the daily hours to exceed nine in any one day. This regulation is effective until September 30, 1937.

## CODE FOR COMMERCIAL PRINTING INDUSTRY IN ALBERTA

### Regulations Governing Conditions of Labour and Prices

**U**NDER the provisions of the Department of Trade and Industry Act, 1934, a code of Fair Competition and Business Practice and Schedule of Prices for the Printing Industry was approved by the Minister of Trade and Industry, on petition of the members of the commercial printing industry in the province, and with the regulations was approved by Order in Council on October 9, 1936, being published in the *Alberta Gazette* for October 17, 1936. (Codes governing the retail trade and the cleaning and dyeing industry were published in the *LABOUR GAZETTE* for May, page 424.)

The definitions in the regulations include the following:—

"The term 'Commercial Printing Industry' shall mean all persons who are engaged in the commercial printing industry or who use any of the processes or partial processes used in printing, mimeographing, multigraphing, embossing, copper plate printing, offset, or who produce any printed matter of whatsoever description (excepting, however, the publication and printing of daily newspapers) or who sell any printed matter of whatsoever description in competition with persons who produce such printed matter in the Province of Alberta.

"The term 'Open Shop' means any printing establishment that is not operating under an agreement entered into by collective bargaining with a duly recognized union."

All persons, firms, etc., engaged in this industry are required to register with the Department of Trade and Industry and secure licences, for which a scale of fees based on annual value of output is provided.

The "Licensing of Trades and Businesses Act, 1936" provided for the suspension or cancellation of a licence by the Minister, in his discretion, upon being satisfied that the holder of a licence is habitually contravening any of the provisions of any code or of any regulations made pursuant to the "Department of Trade and Industry Act," (*LABOUR GAZETTE*, June, 1936, p. 499).

The Hours of Work Act was passed at the special session of the legislature from August 25 to September 1, 1936. An amendment to the "Licensing of Trades and Businesses Act," provided for the cancellation of licences in case of violation of the Hours of Work Act. (This legislation is outlined in this issue on page 995.)

The wages and hours under union agreements on record in the Department as being in force for job-printing establishments in Alberta are as follows: Edmonton, compositors

and pressmen, \$37.40, 44 hours per week; Calgary, compositors \$36.80, 40 hours per week and 92 cents per hour, 44 hours per week; pressmen, cylinder, \$40.50, platen \$36.80, 44 hours per week; Lethbridge, compositors \$37.40, 44 hours per week; Medicine Hat, compositors \$35.64, 44 hours per week.

The code lists unfair competitive and trade practices which are prohibited, including rules as to submitting bids for work, rebates, allowances, discounts, etc., and includes a schedule of prices for various kinds of work and services, such as the printing and supply of business cards, bill heads, binders, cheques, Christmas cards, envelopes, letter heads, posters, etc., and the operations incidental to their production, also mimeographing, multigraphing, and stitching. In quoting prices for work not listed cost must be estimated by using the prices for the various operations as set out in the list. The clause with reference to the observance of the schedule is as follows:—

"The prices for work and services of the printing industry as herein set out are the lowest advisable in the interest of the public, of the employees, and of the industry, and to sell or advertise for sale work and/or services below these prices is prohibited by this Code."

### Labour Provisions

The clauses as to labour provisions are as follows:—

1. *Hours of Labour.*—The standard working hours shall be 44 hours per week for all mechanical operatives, including proprietors, supervisors, foremen, apprentices, and all others for the time being actually engaged in mechanical work. The work week shall be divided into not more than six shifts, no one of which shall be more than eight hours unless overtime be paid. When necessary, overtime shall be permitted, provided that not less than one and one-half times the regular hourly rate of wages be paid for all work in excess of eight hours within any 24-hour period. All work performed on legal holidays shall be paid for at the rate of time and one-half, and all work performed on Sunday shall be paid for at the rate of double time. In a country newspaper and job office in a locality where competent journeymen for casual employment are not available to permit the issue of the newspaper within the standard 44-hour week, the Advisory Committee may in such cases, if petitioned by the employer so affected, authorize with the consent of the Board of Industrial Relations as constituted under or by virtue of The Hours of Work Act, Statutes

of Alberta, 1936, extending the standard week to 50 hours without overtime pay, but at the regular hourly rate of wages, provided that not more than 3 hours of overtime be worked in any one-day shift. Agreements as between employers and organized labour are not affected by anything contained herein, but hours of labour, scales of wages, and working conditions established by such agreements shall be binding upon not only the parties to the agreements but upon all persons or establishments carrying on business in the vicinity where the respective agreements are in effect.

2. In municipalities, villages, towns or cities where Canadian or International Union Agreements are in effect in connection with the printing industry the said Agreement shall be binding upon all persons or establishments subject to the provisions and regulations of the Code who operate under "open shop" conditions. In the case of more than one such Union Agreement being in force the member of the industry operating an open shop shall notify the Department within thirty days after the coming into force of this Code which said Union Agreement has been adopted by his establishment, and failure to so notify the Department shall be a contravention of Code regulations and provisions.

3. In municipalities, villages, towns and cities where agreements by collective bargaining are not in effect, hours of labour, scales of wages and working conditions prevailing in any printing establishment subject to the provisions of the Code must be approved by the Board of Industrial Relations as constituted under and by virtue of The Hours of Work Act, Statutes of Alberta, 1936.

4. *Maximum Hour Exceptions.*—The maximum standard working hours shall not apply to professional persons, technical employees, or employees on emergency maintenance, or repair work, nor to employees in cases where the restriction of hours of highly skilled artistic or mechanical workers on continuous processes would unavoidably reduce production; but in the case of such a highly skilled artistic or mechanical worker, the local overtime rate shall be paid for the hours worked in excess of the maximum.

A tolerance of ten per cent, without overtime pay, over the maximum hours shall be permitted in the cases of wash-up crews, shipping crews, material handlers, elevator operators, and other mechanical employees whose duties have no direct connection with the Graphic Arts processes, and tolerance of twenty per cent, without overtime pay, shall be permitted in the cases of outside delivery men, porters, engineers, firemen, janitors, or watchmen. The maximum of six shifts per week

shall not apply to engineers, firemen, janitors, or watchmen.

### World Textile Conference to be held in Washington

Announcement was made on November 13 from Geneva by the Governing Body of the International Labour Organization that a textile conference would be held in Washington early in April on the invitation of the President of the United States. By action of the 20th session of the International Labour Conference, held at Geneva in June it was decided to place the question of reduction of hours in the textile industry on the agenda of 1937 session (LABOUR GAZETTE, July, 1936, page 617). In the meantime a preparatory tripartite conference of delegates from all textile countries (including government employers' and employees' delegates) will meet in Washington "to consider all aspects of the industry which directly or indirectly may have a bearing on the improvement of social conditions in the industry."

One of the first "socialized medicine" schemes in Eastern Canada has been set up in Arundel, P.Q., under the name of the Arundel League for Health Insurance and Medical Care. Similar societies are in operation in Western Canada.

Under the Arundel scheme, members of the league are guaranteed full service of a physician throughout the year, the cost of membership is \$5 annually for an individual and \$15 for a family. Although free medical service is guaranteed, members may have to meet special fees for medicine and travelling expenses on distant calls. There is also a special fee of \$10 in maternity cases.

According to "Prevention" the official publication of the Quebec Safety League, the Quebec Association for the Prevention of Industrial Accidents and the St. John Ambulance Associations, a comparative analysis of twenty classes serviced by the Association for the Prevention of Industrial Accidents, reveals that fifteen of the twenty classes show an increase of 449 accidents for the first six months of the current year compared with the corresponding period of last year. The total number of accidents reported for the period was 2,983 compared with 2,534 in 1935. The increase in accidents includes 19 fatalities as against 9 during the same period of 1935.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Maritime Sessions of the International Labour Conference

#### Twenty-first Session

THE Twenty-first Session of the International Labour Conference (League of Nations), constituted under the provisions of the Treaties of Peace, was held at Geneva, Switzerland, from October 6 to 24, 1936, and dealt exclusively with maritime matters.

This is the first Maritime Session that the Conference has held for seven years. At the Thirteenth Session, in October 1929, four questions were submitted to a first discussion: the regulation of hours of work on board ship, the protection of seamen in case of sickness, the promotion of seamen's welfare in port, and the minimum professional capacity of captains and officers in the mercantile marine. On the conclusion of this examination the Conference decided to place these four questions on the agenda of a subsequent session for second discussion. With a view to this discussion the Office at once proceeded to the usual consultation of Governments. It drew up and sent out the necessary questionnaires, and on the basis of the replies received it published four blue reports. But for some years matters remained at a standstill. A variety of reasons—notably the difficulty of reaching an agreement between the organizations of the ship-owners and of the seamen regarding the procedure to be followed for the study of the problem of hours of work—prevented the Governing Body from fixing the date of a new Maritime Session, and the four questions discussed in 1929 remained in abeyance. Early in 1935, however, as a result of the negotiations undertaken to surmount the difficulty, an agreement was reached between the ship-owners' and seamen's organizations represented on the Joint Maritime Commission, and was subsequently approved by the Governing Body. The substance of this agreement was that the question of manning should be discussed in connection with the question of hours of work on board ship.

In preparation for the discussion of the question as thus extended, a Preparatory Technical Maritime Meeting was convened at the end of November, 1935. The Governing Body, which had in the meantime placed the question of holidays with pay in industry and commerce on the agenda of the Nineteenth Session, decided also to submit the question of holidays with pay for seamen to this Technical Meeting. The reports adopted by the Meeting, on hours of work and manning, and on holidays with pay for seamen, were sent to the Governments for observations, and on the basis of the replies received the Office

published two blue reports which were submitted to the Twenty-First Session.

The agenda of the Twenty-First Session accordingly included five items, all of which came up for final decision. They were as follows:—

- I. (a) Regulation of hours of work on board ship.  
(b) Manning in conjunction with hours of work on board ship.
- II. Protection of seamen in case of sickness (including the treatment of seamen injured on board ship).
- III. Promotion of seamen's welfare in port.
- IV. Minimum professional capacity of captains and officers in the mercantile marine.
- V. Holidays with pay for seamen.

After the Governing Body had decided on the agenda of the Twenty-First Session of the Conference, a further question arose. One result of the widespread and severe unemployment accompanying the depression has been a fairly general movement of opinion in favour of raising the age for the admission of children to employment. The Governing Body accordingly decided to consider the revision of all the Conventions already adopted by the Conference on this subject. As regards employment in industry and commerce, the question has been placed on the agenda of the 1937 Session. As regards employment at sea, after consulting the Joint Maritime Commission, the Governing Body wished to take advantage of the Maritime Session already convened for October, 1936, in order to examine the desirability of revising the 1920 Convention. Difficulties of procedure, however, notably the period of notice prescribed by the Standing Orders for placing a question on the agenda of the Conference, prevented the question from being added to the agenda of the Twenty-first Session. The Governing Body, therefore, decided to convene a Twenty-second Session with a single item on its agenda, namely, the partial revision of the Convention on the age of admission of children to employment at sea. The proposal submitted to the Conference on this point was the raising of the minimum age from fourteen to fifteen years.

#### Director's Report on Maritime Work

A brief report on the maritime work of the International Labour Organization, 1929-36, was prepared by the Director of the Interna-

tional Labour Office in advance of the Twenty-first and Twenty-second Sessions and was communicated to these gatherings. The report in question listed the seven "maritime" Conventions and the six Recommendations which had been adopted at previous sessions of the International Labour Conference. An indication was given of the extent to which these maritime Conventions had been ratified by individual countries and the measures which had been taken in these countries to give effect thereto. In bringing the report to a close, the Director observed that it had been agreed between shipowners and seamen that the Maritime Conferences in October would liquidate all of the outstanding maritime questions which are on the agenda. He mentioned also that it was not likely that any further maritime conference would be held for some years to come. Meanwhile, the International Labour Office would continue to carry on and in some respects intensify its work of collecting and distributing information on maritime questions, preparing and issuing documentary studies and following up ratifications. "It is clear," he added, "that there are still many fields in which the formulation of international standards for the conditions of employment of seamen might be considered. In this connection it might be advisable after a reasonable interval to consult the Joint Maritime Commission of the International Labour Office as to which of these questions should be taken into special consideration."

### Plan of Organization

The objects for which the International Labour Organization was formed are set out in Part XIII of the Treaties of Peace and are, briefly, to promote the improvement of industrial conditions by legislative action and international agreement.

Each Member State is entitled, under the terms of the Treaties of Peace, to send four delegates to the Conference, two of whom must be government delegates and the two others are to represent, respectively, employers and workpeople. These representatives must be chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople. Each delegate may be accompanied by advisers not exceeding two in number for each item on the agenda of the meeting.

The decisions of the Conference may take the form of Recommendations or Draft Conventions. A two-thirds majority of the votes cast by the delegates is required for the adoption of any Recommendation or Draft Convention by the Conference. The Recommendations and Draft Conventions are after-

wards communicated by the Secretary-General of the League of Nations to the countries represented in the International Labour Organization. Each country is obliged under the Treaties, within the period of one year at most from the closing of the Conference, or if it is impossible owing to exceptional circumstances to do so within one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the Conference, to bring the Recommendations or Draft Conventions before the authority or authorities within whose competence the matters lie, for the enactment of legislation or other action.

In Canada, the Draft Conventions and Recommendations adopted at each session of the Conference have been examined by the Law Officers of the Crown to determine whether the subject-matters were within federal or provincial jurisdiction, and they, together with the law officers' reports on the question of jurisdiction, have thereupon been brought before the Dominion Parliament and the respective Provincial authorities.

### Countries Represented

Thirty-one maritime countries were represented at the 21st Session of the International Labour Conference by 95 delegates and 126 advisers, representing some 51 million tons of shipping, or 82 per cent of the total seagoing merchant tonnage of the world. The only important shipping countries absent were Germany and Italy. A list of the countries represented follows:—

Argentine Republic, Australia, Belgium, Brazil, Canada, China, Czechoslovakia, Denmark, Egypt, Estonia, Finland, France, Great Britain, Greece, Hungary, India, Japan, Latvia, Mexico, Norway, Netherlands, Peru, Poland, Rumania, Siam, Spain, Sweden, United States of America, Union of Socialist Soviet Republic, Venezuela, Yugoslavia.

### Canadian Delegation

The Canadian delegation in attendance at the Conference was as follows:—

*Government Delegates.*—Honourable Norman McL. Rogers, Minister of Labour; and Dr. W. A. Riddell, Canadian Advisory Officer, League of Nations, Geneva, Switzerland.

*Employers' Delegate.*—Mr. A. L. W. MacCallum, Manager and Secretary of the Shipping Federation of Canada, Montreal, P.Q.

*Workers' Delegate.*—Mr. W. A. MacDonald, General Secretary, National Association of Marine Engineers of Canada, Halifax, N.S.

### Officers of the Conference

The following were elected as officers of the Conference:—

*President.*—Mr. Paul Berg, President of the High Court of Norway.

*Vice-Presidents.*—Honourable Norman McL. Rogers, Government Delegate, Canada; Mr. Garrett, British Employers' Delegate; and Mr. Tomas Taegua, Spanish Workers' Delegate. Mr. Ehlers, French Workers' Delegate, later replaced Mr. Taengua as Workers' Vice-President due to the departure of the latter, and Mr. East, Government Delegate for Australia, replaced Honourable Norman McL. Rogers as Government Vice-President, as the latter was unable to remain in Geneva until the close of the Conference.

*Secretary-General.*—Mr. H. B. Butler, Director of the International Labour Office.

### Committees Appointed

The following committees were appointed in connection with the work of the Conference, eight in all, viz: a Selection Committee, Credentials Committee, Committee on hours of work and manning, Committee on the protection of seamen in case of sickness, Committee on seamen's welfare in ports, Committee on minimum professional capacity of captains, etc., Committee on holidays with pay, and Resolutions Committee.

### Opening Addresses

The Conference was opened by Dr. W. A. Riddell, Canadian Government Delegate, as chairman of the Governing Body of the International Labour Office. The tradition of holding special Sessions of the International Labour Conference to deal with maritime matters was, Dr. Riddell said, now well established. It had grown out of a desire of the Governing Body to satisfy the expressed wishes of shipowners and seamen who preferred that maritime matters should not be dealt with by the general Conferences.

The speaker described briefly the circumstances in which the various items had been placed on the agenda, and mentioned that the Twenty-First Session would be followed immediately by another Maritime Session which was being called to deal with a proposed revision of the Convention of 1920 relating to the minimum age for admission to employment at sea. He referred to a preparatory meeting which had been held in Geneva last winter for the consideration of the various items inscribed on the agenda of the present Conference, and expressed the

hope that the spirit of conciliation which prevailed at the preparatory meeting would animate the present gathering and assure the success of the deliberations.

Mr. Paul Berg, who had previously served as President of the Preparatory Maritime Conference in the month of March last, on his election as chairman of the present Conference said he had happy recollections of his experience at the preparatory meeting, the discussions of which were animated by friendly co-operation and goodwill. The spirit that prevailed at that meeting was a happy augury for the present Conference. Some of the questions had very pronounced economic aspects which might make them difficult of solution in some respects, but which likewise made an international agreement on them all the more desirable. An international agreement, could hardly be expected to come up to the highest standards practised in the most advanced countries. It was equally true, however, that independent national progress was arrested unless some international minimum standards were created by agreement among the different countries. It was, in fact, the double purpose of the international agreement to bring about the maximum of progress obtainable at the time all round, and at the same time to lay a foundation on which further progress could be built both nationally and internationally in the future. In making these observations, he had in mind, more particularly the hours of work and manning, which in the eyes of many of the delegates overshadowed all others. This was, he supposed, one of the most difficult international questions which had even been dealt with in the Conference. The preparatory meeting had, however, shown that a basis of agreement was beginning to emerge. The agenda was big with responsibility for the future of the Organization, in which seamen had placed their confidence. It also gave an opportunity of establishing milestones on the path of progress in international collaboration and in raising the dignity and standing of one of the oldest and most attractive of occupations in which men earned their living and added to the world's wealth.

### Decisions of Conference

The different items of the Conference agenda were all referred to committees for examination and were also discussed in the Conference when the committee reports were received. None of the proposals which had been inscribed on the Conference agenda failed of adoption and the following is a list of the Draft Conventions and Recommendations

which were adopted by the Conference at its Twenty-first Session:—

Draft Convention concerning the regulation of hours of work on board ship and manning. (By 62 votes to 17).

Recommendation concerning the regulation of hours of work on board ship and manning. (By 61 votes to 15).

Draft Convention concerning the liability of the shipowner in case of sickness, injury or death of seamen. (By 70 votes to 14).

Draft Convention concerning sickness insurance for seamen. (By 60 votes to 5).

Recommendation concerning the promotion of seamen's welfare in ports. (By 88 votes to nil).

### RECOMMENDATION CONCERNING THE PROMOTION OF SEAMEN'S WELFARE IN PORTS

The General Conference of International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6th October, 1936, and

Having decided upon the adoption of certain proposals with regard to the promotion of seamen's welfare in ports, which is the third item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Recommendation which may be cited as the Seamen's Welfare in Ports Recommendation, 1936:

Whereas by the nature of their calling seamen are frequently deprived for long periods of the advantages of family life, and may be exposed while in ports, particularly in foreign countries, to special dangers and difficulties, and whereas it is not always possible for them to have the benefit of arrangements made to organize the spare time, promote the welfare, and safeguard the health of the general body of workers;

Whereas certain Governments and different private associations have successfully taken various measures for the special help and protection of seamen in ports, and whereas such protection should be extended to as large a number of seamen as possible; and

Whereas it is important, notwithstanding differences which may exist in national and local needs and customs, to develop and co-ordinate nationally and internationally the principal forms of action, in a manner which draws no distinction of race between seamen;

The Conference recommends that each Member of the International Labour Organization should take the following principles and methods into consideration for the promotion of the welfare of both national and foreign seamen in ports.

Draft Convention concerning the minimum requirement of professional capacity for masters and officers on board merchant ship. (By 80 votes to 9).

Draft Convention concerning annual holidays with pay for seamen. (By 60 votes to 15).

The Conference also adopted resolutions at this session concerning: 1 compensation for accidents and unemployment insurance; 2 the calling of an economic conference for the purpose of removing trade restrictions which are a special handicap to the shipping industry; 3 equality of treatment for national and foreign seamen; 4 desirability of abolishing the "Contractor System" of employment; 5 seamen's wages; and 6 safety conditions and accommodation of crews on board cargo vessels.

#### PART I.—GENERAL ORGANIZATION

1. It is desirable to create in every important port an official or officially recognized body, which might comprise representatives of ship-owners, seamen, national and local authorities and the chief associations concerned, for the purposes of:—

- (a) collecting, as far as possible in conjunction with the different authorities or organizations concerned, including the consular authorities of maritime States, all useful information and suggestions on the conditions for seamen in the port;
- (b) advising the competent departments, authorities and associations as to the adoption, adaptation, and co-ordination of measures for the improvement of such conditions; and
- (c) collaborating if required with other competent bodies in carrying out such measures.

2. It is desirable, in order to enable the International Labour Office, to inform the Governments of the maritime States and to assist them to co-ordinate their action, that each of them should keep in touch with the Office and furnish it every three years with all useful information on the experience acquired in the promotion of seamen's welfare in ports and on the progress made in this field.

#### PART II.—REGULATION

3. There should be laws or regulations to protect seamen, by measures including the following, from the dangers to which they are exposed in certain establishments or in the docks as such:

- (a) the regulation of the sale of intoxicating liquor;
- (b) the prohibition of the employment in public houses of young persons of either sex under a certain age;
- (c) the application of the provisions of international agreements limiting the sale and use of narcotics to all seamen without distinction of nationality;

- (d) the prohibition of the entry into the docks and harbour area generally of undesirable persons;
  - (e) the fencing off of dock areas and the protection of the edges of wharves and quays and other dangerous parts of docks by fixed or movable barriers, wherever such measures are practicable;
  - (f) the provision of sufficient lighting and, where necessary, of signposts for docks and approaches.
4. In order to ensure the strict enforcement of the measures indicated above and to increase their efficacy, there should be arrangements for supervision, including:
- (a) supervision of establishments where intoxicating liquors are sold and, where necessary and practicable, of hotels, cafés, lodging houses and other similar establishments in the harbour area;
  - (b) supervision, which might be carried out jointly by masters and the public authorities, of persons visiting ships, including boatmen plying between ships and the shore, with a view to preventing intoxicating liquor or narcotics being wrongfully brought on board or the fulfilment of any other illicit purpose;
  - (c) the maintenance in the harbour area of adequate police forces, specially trained and equipped, which should keep in touch with the other supervising bodies.
5. For the better protection of foreign seamen, measures should be taken to facilitate
- (a) their relations with their consuls; and
  - (b) effective co-operation between consuls and the local or national authorities.

### PART III.—HEALTH

6. Soliciting and enticing, whether directly or indirectly, in the neighbourhood of the harbour and in districts frequented by seamen should be energetically repressed.

7. All suitable measures should be taken to make known to seamen entering the port, irrespective of their nationality:

- (a) the dangers and means of preventing diseases to which they are exposed, including more particularly tuberculosis and tropical and venereal diseases;
  - (b) the necessity for persons suffering from disease to undergo treatment, and the facilities available for such treatment; and
  - (c) the dangers arising from the habit of using narcotics.
8. The treatment of seamen suffering from disease should be facilitated by suitable measures including:
- (a) as wide extension as possible, especially in the dock area, of free and continued treatment for venereal diseases, as provided, for example, by the Agreement concerning Facilities to be given to Merchant Seamen for the Treatment of Venereal Diseases, signed at Brussels, 1 December, 1924.
  - (b) the admission of seamen to clinics and hospitals, in ports, without difficulty and irrespective of nationality or religious belief;
  - (c) as wide application as possible to foreign seamen of the provision made for the protection of nationals against tuberculosis;
  - (d) the provision, whenever possible, of arrangements, designed to ensure, when

necessary, continuation of treatment with a view to supplementing the medical facilities available to seamen.

### PART IV.—ACCOMMODATION AND RECREATION

9. Arrangements should be made, at least in the larger ports, for the material and general assistance of seamen while in the port, and such arrangements should more particularly include:

- (a) the institution or development of seamen's hostels of a satisfactory character and furnishing suitable board and lodging at reasonable prices;
- (b) the institution or development of institutes—which might be distinct from the seamen's hostels, but should keep as far as possible in touch with them—providing meeting and recreation rooms (canteens, rooms for games, libraries, etc.);
- (c) the organization, where possible in co-operation with ships' sports clubs, of healthy recreations, such as sports, excursions, etc.;
- (d) the promotion, by every possible means, of the family life of seamen.

### PART V.—SAVINGS AND REMITTANCE OF WAGES

10. In order to help to save and to transmit their savings to their families:

- (a) there should be adopted a simple, rapid and safe system, operating with the assistance of consuls, masters, ship-owners' agents or reliable private institutions, for enabling seamen, and more especially those who are in a foreign country, to deposit or remit the whole or part of their wages;
- (b) a system for enabling seamen, at the time of their signing on or during the voyage, to allot, if they so desire, a proportion of their wages for remittance at regular intervals to their families, should be instituted or made of more general application.

### PART VI.—INFORMATION FOR SEAMEN

11. In view of the fact that the success of most of the measures recommended above must depend to a large extent on suitable publicity among seamen, such publicity should be organized and undertaken by the public authorities, the bodies referred to in Part I of this Recommendation, and the competent associations, assisted as far as possible by the ship's officers and doctor and by ships' sports clubs.

12. Such publicity might include:

- (a) the distribution on shore and, subject to the consent of the master, on board ship, of pamphlets in the most appropriate languages giving clear information as to the facilities available for seamen in the port of call or in the next ports for which the ship is bound;
- (b) the creation in the larger ports of information offices, either at shipping offices or elsewhere, easily accessible to seamen and staffed by persons capable of giving directly such explanations or guidance as may be useful;
- (c) the inclusion of some useful information for the physical well-being and general protection of seamen in seamen's books, discharge books or other documents habitually carried by seamen, or in notices posted in a conspicuous place in the crew's quarters;

- (d) the frequent publication of articles of general and educational interest to seamen in periodicals read by seamen, both of specialized and general interest, and also the use of the cinema for this purpose;
- (e) the distribution of information concerning the tariffs of local transport and of local places of interest and entertainment.

## DRAFT CONVENTION CONCERNING THE MINIMUM REQUIREMENT OF PROFESSIONAL CAPACITY FOR MASTERS AND OFFICERS ON BOARD MERCHANT SHIPS.

The General Conference of the International Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6th October, 1936, and

Having decided upon the adoption of certain proposals with regard to the establishment by each maritime country of a minimum requirement of professional capacity in the case of captain, navigating and engineer officers in charge of watches on board merchant ships, which is the fourth item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention.

adopt, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Draft Convention, which may be cited as the Officers' Competency Certificates Convention, 1936:

### Article 1

1. This Convention applies to all vessels registered in a territory for which this Convention is in force and engaged in maritime navigation with the exception of:

- (a) ships of war;
- (b) Government vessels, or vessels in the service of a public authority, which are not engaged in trade;
- (c) wooden ships of primitive build such as dhows and junks.

2. National laws or regulations may grant exemptions or exceptions in respect of vessels of less than 200 tons gross registered tonnage.

### Article 2

For the purpose of this Convention the following expressions have the meanings hereby assigned to them:

- (a) "master or skipper" means any person having command or charge of a vessel;
- (b) "navigating officer in charge of a watch" means any person, other than a pilot, who is for the time being actually in charge of the navigation or manœuvring of a vessel;
- (c) "chief engineer" means any person permanently responsible for the mechanical propulsion of a vessel;
- (d) "engineer officer in charge of a watch" means any person who is for the time being actually in charge of the running of a vessel's engines.

### Article 3

1. No person shall be engaged to perform or shall perform on board any vessel to which this Convention applies the duties of master or skipper, navigating officer in charge of a watch, chief engineer, or engineer officer in

## PART VII.—EQUALITY OF TREATMENT

13. Governments, authorities and organizations which may have to administer funds for the welfare of seamen are specially urged not to concern themselves solely with seamen of a particular nationality, but to act as generously as possible in the spirit of international solidarity.

charge of a watch, unless he holds a certificate of competency to perform such duties, issued or approved by the public authority of the territory where the vessel is registered.

2. Exceptions to the provisions of this Article may be made only in cases of *force majeure*.

### Article 4

1. No person shall be granted a certificate of competency unless:

- (a) he has reached the minimum age prescribed for the issue of the certificate in question;
- (b) his professional experience has been of the minimum duration prescribed for the issue of the certificate in question; and
- (c) he has passed the examinations organized and supervised by the competent authority for the purpose of testing whether he possesses the qualifications necessary for performing the duties corresponding to the certificate for which he is a candidate.

2. National laws or regulations shall:

- (a) prescribe a minimum age to have been attained by and a minimum period of professional experience to have been completed by candidates for each grade of competency certificate;
- (b) provide for the organization and supervision by the competent authority of one or more examinations for the purpose of testing whether candidates for competency certificates possess the qualifications necessary for performing the duties corresponding to the certificates for which they are candidates.

3. Any Member of the Organization may, during a period of three years from the date of its ratification, issue competency certificates to persons who have not passed the examinations organized in virtue of paragraph 2 (b) of this Article who:

- (a) have in fact had sufficient practical experience of the duties corresponding to the certificate in question; and
- (b) have no record of any serious technical error against them.

### Article 5

1. Each Member which ratifies this Convention shall ensure its due enforcement by an efficient system of inspection.

2. National laws or regulations shall provide for the cases in which the authorities of a Member may detain vessels registered in its territory on account of a breach of the provisions of this Convention.

3. Where the authorities of a Member which has ratified this Convention find a breach of its provisions on a vessel registered in the territory of another Member which has also

ratified the Convention, the said authorities shall communicate with the consul of the Member in the territory of which the vessel is registered.

#### Article 6

1. National laws or regulations shall prescribe penalties or disciplinary measures for cases in which the provisions of this Convention are not respected.

2. In particular, such penalties or disciplinary measures shall be prescribed for cases in which:—

- (a) a shipowner, shipowner's agent, master, or skipper has engaged a person not certificated as required by this Convention;
- (b) a master or skipper has allowed any of the duties defined in Article 2 of this Convention to be performed by a person not holding the corresponding or a superior certificate;
- (c) a person has obtained by fraud or forged documents an engagement to perform any of the duties defined in the said Article 2 without holding the requisite certificate.

#### Article 7

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organization, each Member of the Organization which ratifies this Convention shall append to its ratification a declaration stating:—

- (a) the territories in respect of which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories in respect of which it undertakes to apply the provisions of the Convention subject to modifications, together with details of the said modifications;
- (c) the territories in respect of which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertakings referred to in subparagraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of subparagraphs (b), (c) or (d) of paragraph 1 of this Article.

#### Article 8

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 9

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 10

As soon as the ratification of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 11

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 12

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 13

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 11 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 14

The French and English texts of this Convention shall both be authentic.

## DRAFT CONVENTION CONCERNING ANNUAL HOLIDAYS WITH PAY FOR SEAMEN

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6 October, 1936, and

Having decided upon the adoption of certain proposals with regard to holidays with pay for seamen which is the fifth item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,  
adopts, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Draft Convention which may be cited as the Holidays with Pay (Sea) Convention, 1936:

### Article 1

1. This Convention applies to the master, officers, and members of the crew, including wireless operators in the service of a wireless telegraphy company, of all sea-going vessels, whether publicly or privately owned, which are registered in a territory for which the Convention is in force and are engaged in the transport of cargo or passengers for the purpose of trade.

2. National laws or regulations shall determine when vessels are to be regarded as sea-going vessels for the purpose of this Convention.

3. This Convention does not apply to:

- (a) persons employed in vessels engaged in fishing, whaling or similar pursuits or in operations directly connected therewith;
- (b) persons employed in any vessels the crew of which consists entirely of members of the owner's family as defined by national laws or regulations;
- (c) persons not remunerated for their services, or remunerated only by a nominal salary or wage, or remunerated exclusively by a share of profits;
- (d) persons working exclusively or mainly on their own account;
- (e) persons employed in wooden ships of primitive build such as dhows and junks;
- (f) persons whose duties are connected solely with the cargo carried on board and who are not in fact in the employment either of the owner or of the master;
- (g) travelling dockers.

### Article 2

1. Every person to whom this Convention applies shall be entitled after one year of continuous service with the same undertaking to an annual holiday with pay the duration of which shall be:

- (a) in the case of masters, officers, and wireless operators, not less than twelve working days;
- (b) in the case of other members of the crew, not less than nine working days.

2. For the purpose of calculating when a holiday is due:

- (a) service off articles shall be included in the reckoning of continuous service;
- (b) short interruptions of service not due to the act or fault of the employee and not exceeding a total of six weeks shall not

be deemed to break the continuity of the periods of service which precede and follow them;

- (c) continuity of service shall not be deemed to be interrupted by any change in the management or ownership of the vessel or vessels in which the person concerned has served.

3. The following shall not be included in the annual holiday with pay:

- (a) public and customary holidays;
- (b) interruptions of service due to sickness;
- (c) any time off allowed in compensation for weekly rest days and public holidays worked at sea.

4. There may be defined by national laws or regulations or by collective agreement special circumstances in which, subject to conditions prescribed by such laws or regulations or fixed by such agreement,

- (a) an annual holiday with pay due in virtue of this Convention may be divided into parts or be accumulated with a subsequent holiday;
- (b) there may be substituted for such a holiday, when in exceptional circumstances the service so requires, a cash payment at least equivalent to the remuneration provided for in Article 4.

### Article 3

1. The annual holiday shall be given in the territory in which the vessel is registered at one of the following ports:

- (a) the port from which the vessel trades;
- (b) the port at which the person entitled to the holiday was engaged; or
- (c) the port of the vessel's final destination.

2. Provided that the holiday may be given at any other port by mutual consent.

3. When an annual holiday is due it shall be given by mutual agreement at the first opportunity as the requirements of the service allow.

### Article 4

1. Every person taking a holiday in virtue of Article 2 of this Convention shall receive in respect of the full period of the holiday his usual remuneration.

2. The usual remuneration payable in virtue of the preceding paragraph shall include a suitable subsistence allowance and shall be calculated in a manner which shall be prescribed by national laws or regulations or fixed by collective agreement.

### Article 5

Any agreement to relinquish the right to an annual holiday with pay, or to forego such a holiday, shall be void.

### Article 6

National laws or regulations may provide that a person who engages in paid employment during the course of his annual holiday may be deprived of his right to payment in respect of the period of the holiday.

### Article 7

A person who leaves or is discharged from the service of his employer before he has taken

a holiday due to him shall receive in respect of every day of holiday due to him in virtue of this Convention the remuneration provided for in Article 4.

#### Article 8

Each Member which ratifies this Convention shall require employers to keep records for the purpose of facilitating its effective enforcement.

#### Article 9

Each Member which ratifies this Convention shall establish a system of penalties to ensure the application of its provisions.

#### Article 10

Nothing in this Convention shall affect any law, award, custom or agreement between ship-owners and seamen which ensures more favourable conditions than those provided by this Convention.

#### Article 11

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organization, each Member of the Organization which ratifies this Convention shall append to its ratification a declaration stating:

- (a) the territories in respect of which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories in respect of which it undertakes to apply the provisions of the Convention subject to modifications, together with details of the said modifications;
- (c) the territories in respect of which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertakings referred to in sub-paragraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part

of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of sub-paragraphs (b), (c) or (d) of paragraph 1 of this Article.

#### Article 12

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 13

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force six months after the date on which there have been registered by the Secretary-General of the League of Nations the ratifications of five Members of the Organization, each of which has more than one million tons gross of sea-going merchant shipping.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

#### Article 14

As soon as the ratifications of five of the Members mentioned in the second paragraph of Article 13 have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other members of the Organization.

#### Articles 15-18

(These articles respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning the minimum requirement for masters and officers on merchant ships—Articles 11-14 inclusive).

### DRAFT CONVENTION CONCERNING THE LIABILITY OF THE SHIPOWNER IN CASE OF SICKNESS, INJURY OR DEATH OF SEAMEN

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6th October, 1936, and

Having decided upon the adoption of certain proposals with regard to the liability of the shipowner in case of sickness, injury or death of seamen, which is included in the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Draft Convention which may be cited as the Shipowners' Liability (Sick and Injured Seamen's Convention, 1936:—

#### Article 1

1. This Convention applies to all persons employed on board any vessel, other than a ship of war, registered in a territory for which this Convention is in force and ordinarily engaged in maritime navigation.

2. Provided that any Member of the International Labour Organization may in its national laws or regulations make such exceptions as it deems necessary in respect of:—

(a) persons employed on board:

- (i) vessels of public authorities when such vessels are not engaged in trade;
- (ii) coastwise fishing boats;
- (iii) boats of less than twenty-five tons gross tonnage;
- (iv) wooden ships of primitive build such as dhows and junks;

- (b) persons employed on board by an employer other than the shipowner;
- (c) persons employed solely in ports in repairing, cleaning, loading or unloading vessels;
- (d) members of the shipowner's family;
- (e) pilots.

#### Article 2

1. The shipowner shall be liable in respect of:—

- (a) sickness and injury occurring between the date specified in the articles of agreement for reporting for duty and the termination of the engagement;
- (b) death resulting from such sickness or injury.

2. Provided that national laws or regulations may make exceptions in respect of:—

- (a) injury incurred otherwise than in the service of the ship;
- (b) injury or sickness due to the wilful act, default or misbehaviour of the sick, injured or deceased person;
- (c) sickness or infirmity intentionally concealed when the engagement is entered into.

3. National laws or regulations may provide that the shipowner shall not be liable in respect of sickness, or death directly attributable to sickness, if at the time of the engagement the person employed refused to be medically examined.

#### Article 3

For the purpose of this Convention, medical care and maintenance at the expense of the shipowner comprises:—

- (a) medical treatment and the supply of proper and sufficient medicines and therapeutical appliances; and
- (b) board and lodging.

#### Article 4

1. The shipowner shall be liable to defray the expense of medical care and maintenance until the sick or injured person has been cured, or until the sickness or incapacity has been declared of a permanent character.

2. Provided that national laws or regulations may limit the liability of the shipowner to defray the expense of medical care and maintenance to a period which shall not be less than sixteen weeks from the day of the injury or the commencement of the sickness.

3. Provided also that if there is in force in the territory in which the vessel is registered a scheme applying to seamen of compulsory sickness insurance, compulsory accident insurance, or workmen's compensation for accidents, national laws or regulations may provide:—

- (a) that a shipowner shall cease to be liable in respect of a sick or injured person from the time at which that person becomes entitled to medical benefits under the insurance or compensation scheme;
- (b) that the shipowner shall cease to be liable from the time prescribed by law for the grant of medical benefits under the insurance or compensation scheme to the beneficiaries of such schemes, even when the sick or injured person is not covered by the scheme in question, unless he is excluded from the scheme by reason of any restriction which affects particularly foreign workers or workers not resident in the territory in which the vessel is registered.

#### Article 5

1. Where the sickness or injury results in incapacity for work the shipowner shall be liable:—

- (a) to pay full wages as long as the sick or injured person remains on board;
- (b) if the sick or injured person has dependents, to pay wages in whole or in part as prescribed by national laws or regulations from the time when he is landed until he has been cured or the sickness or incapacity has been declared of a permanent character.

2. Provided that national laws or regulations may limit the liability of the shipowner to pay wages in whole or in part in respect of a person no longer on board to a period which shall not be less than sixteen weeks from the day of the injury or the commencement of the sickness.

3. Provided also that if there is in force in the territory in which the vessel is registered a scheme applying to seamen of compulsory sickness insurance, compulsory accident insurance, or workmen's compensation for accidents, national laws or regulations may provide:—

- (a) that a shipowner shall cease to be liable in respect of a sick or injured person from the time at which that person becomes entitled to cash benefits under the insurance or compensation scheme;
- (b) that the shipowner shall cease to be liable from the time prescribed by law for the grant of cash benefits under the insurance or compensation scheme to the beneficiaries of such schemes, even when the sick or injured person is not covered by the scheme in question, unless he is excluded from the scheme by reason of any restriction which affects particularly foreign workers or workers not resident in the territory in which the vessel is registered.

#### Article 6

1. The shipowner shall be liable to defray the expense of repatriating every sick or injured person who is landed during the voyage in consequence of sickness or injury.

2. The port to which the sick or injured person is to be returned shall be:—

- (a) the port at which he was engaged;
- (b) the port at which the voyage commenced; or
- (c) a port in his own country or the country to which he belongs; or
- (d) another port agreed upon by him and the master or shipowner, with the approval of the competent authority.

3. The expense of repatriation shall include all charges for the transportation, accommodation and food of the sick or injured person during the journey and his maintenance up to the time fixed for this departure.

4. If the sick or injured person is capable of work, the shipowner may discharge his liability to repatriate him by providing him with suitable employment on board a vessel proceeding to one of the destinations mentioned in paragraph 2 of this Article.

#### Article 7

1. The shipowner shall be liable to defray burial expenses in case of death occurring on board, or in case of death occurring on shore if at the time of his death the deceased person was entitled to medical care and maintenance at the shipowner's expense.

2. National laws or regulations may provide that burial expenses paid by the shipowner shall be reimbursed by an insurance institution in cases in which funeral benefit is payable in respect of the deceased person under laws or regulations relating to social insurance or workmen's compensation.

#### Article 8

National laws or regulations shall require the shipowner or his representative to take measures for safeguarding property left on board by sick, injured or deceased persons to whom this Convention applies.

#### Article 9

National laws or regulations shall make provision for securing the rapid and inexpensive settlement of disputes concerning the liability of the shipowner under this Convention.

#### Article 10

The shipowner may be exempted from liability under Articles 4, 6 and 7 of this Convention in so far as such liability is assumed by the public authorities.

#### Article 11

This Convention and national laws or regulations relating to benefits under this Convention shall be so interpreted and enforced as to ensure equality of treatment to all seamen irrespective of nationality, domicile or race.

#### Article 12

Nothing in this Convention shall affect any law, award, custom or agreement between shipowners and seamen which ensures more favourable conditions than those provided by this Convention.

#### Article 13

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organisation, each Member of the Organisation which ratifies this Convention shall append to its ratification a declaration stating:

- (a) the territories in respect of which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories in respect of which it undertakes to apply the provisions of the Convention subject to modifications,

together with details of the said modifications;

- (c) the territories in respect of which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertaking referred to in sub-paragraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of sub-paragraphs (b), (c) or (d) of paragraph 1 of this Article.

#### Article 14

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 15

1. This Convention shall be binding only upon those Members of the International Labour Organisation whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 16

As soon as the ratifications of two Members of the International Labour Organisation have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organisation. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organisation.

#### Articles 17-20

(These articles respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning the minimum requirement for masters and officers on merchant ships—Articles 11-14 inclusive).

## DRAFT CONVENTION CONCERNING SICKNESS INSURANCE FOR SEAMEN

The General Conference of the International Labour Organisation,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6 October 1936, and

Having decided upon the adoption of certain proposals with regard to sickness insurance for seamen which is included in the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Draft Convention which may be cited as the Sickness Insurance (Sea) Convention, 1936:

#### Article 1

1. Every person employed as master or member of the crew or otherwise in the service of the ship, on board any vessel, other than a ship of war, registered in a territory for which this Convention is in force and engaged in maritime navigation or sea-fishing, shall be insured under a compulsory sickness insurance scheme.

2. Provided that any Member of the International Labour Organisation may in its national laws or regulations make such exceptions as it deems necessary in respect of:

- (a) persons employed on board vessels of public authorities when such vessels are not engaged in trade;
- (b) persons whose wages or income exceed a prescribed amount;

- (c) persons who are not paid a money wage;
- (d) persons not resident in the territory of the Member;
- (e) persons below or above prescribed age-limits;
- (f) members of the employer's family;
- (g) pilots.

#### Article 2

1. An insured person who is rendered incapable of work and deprived of his wages by reason of sickness shall be entitled to a cash benefit for at least the first twenty-six weeks or one hundred and eighty days of incapacity from and including the first day for which benefit is payable.

2. The right to benefit may be made conditional upon the completion of a qualifying period and of a waiting period of a few days counted from the beginning of the incapacity.

3. The cash benefit granted to the insured person shall never be fixed at a rate lower than that fixed by the general scheme of compulsory sickness insurance, where such a scheme exists but does not apply to seamen.

4. Cash benefit may be withheld:

- (a) while the insured person is on board or abroad;
- (b) while the insured person is maintained by the insurance institution or from public funds: Provided that in such case it shall only partially be withheld when the insured person has family responsibilities;
- (c) while in respect of the same illness the insured person receives compensation from another source to which he is entitled by law, so however that in such case benefit shall only be wholly or partially withheld if and so far as such compensation is equal to or less than the amount of the benefit payable under the sickness insurance scheme.

5. Cash benefit may be reduced or refused in the case of sickness caused by the insured person's wilful misconduct.

#### Article 3

1. The insured person shall be entitled free of charge, as from the commencement of his illness and at least until the period prescribed for the grant of sickness benefit expires, to medical treatment by a fully qualified medical practitioner and to the supply of proper and sufficient medicines and appliances.

2. Provided that the insured person may be required to pay such part of the cost of medical benefit as may be prescribed by national laws or regulations.

3. Medical benefit may be withheld while the insured person is on board or abroad.

4. Whenever the circumstances so require, the insurance institutions may provide for the treatment of the sick person in hospital and in such case shall grant him full maintenance together with the necessary medical attention and care.

#### Article 4

1. When the insured person is abroad and by reason of sickness has lost his right to wages, whether previously payable in whole or in part, the cash benefit to which he would have been entitled had he not been abroad shall be paid in whole or in part to his family until his return to the territory of the Member.

2. National laws or regulations may prescribe or authorize the provision of the following benefits:

- (a) when the insured person has family responsibilities, a cash benefit additional to that provided for in Article 2;
- (b) in case of the sickness of members of the insured person's family living in his home and dependent on him, aid in kind or in cash.

#### Article 5

1. National laws or regulations shall prescribe the conditions under which an insured woman, while in the territory of the Member, shall be entitled to maternity benefit.

2. National laws or regulations may prescribe the conditions under which the wife of an insured man, while in the territory of the Member, shall be entitled to maternity benefit.

#### Article 6

1. On the death of the insured person, a cash benefit of an amount prescribed by national laws or regulations shall be paid to the members of the family of the deceased or be applied for defraying the funeral expenses.

2. Where there is in force a pension scheme for the survivors of deceased seamen, the grant of the cash benefit provided for in the preceding paragraph shall not be compulsory.

#### Article 7

The right to insurance benefit shall continue even in respect of sickness occurring during a definite period after the termination of the last engagement, which period shall be fixed by national laws or regulations in such a way as to cover the normal interval between successive engagements.

#### Article 8

1. The insured persons and their employers shall share in providing the financial resources of the sickness insurance scheme.

2. National laws or regulations may provide for a financial contribution by the public authorities.

#### Article 9

1. Sickness insurance shall be administered by self-governing institutions, which shall be under the administrative and financial supervision of the public authorities and shall not be carried on with a view to profit.

2. Insured persons, and in the case of insurance institutions set up specially for seamen under laws or regulations the employers also, shall participate in the management of the institutions under such conditions as may be prescribed by national laws or regulations, which may also provide for the participation of other persons concerned.

3. Provided that the administration of sickness insurance may be undertaken directly by the State where and so long as its administration by self-governing institutions is rendered difficult or impossible by reason of national conditions.

#### Article 10

1. The insured person shall have a right of appeal in case of dispute concerning his right to benefit.

2. The procedure for dealing with disputes shall be rendered rapid and inexpensive for the insured person by means of special courts or any other method deemed appropriate under national laws or regulations.

*Article 11*

Nothing in this Convention shall affect any law, award, custom or agreement between ship-owners and seamen which ensures more favourable conditions than those provided by this Convention.

*Article 12*

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organization, each Member of the Organization which ratifies this Convention shall append to its ratification a declaration stating:

- (a) the territories in respect of which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories in respect of which it undertakes to apply the provisions of the Convention subject to modifications, together with details of the said modifications;
- (c) the territories in respect of which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertakings referred to in subparagraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of subparagraphs (b), (c) or (d) of paragraph 1 of this Article.

*Article 13*

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

*Article 14*

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

*Article 15*

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

*Articles 16-19*

(These articles respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning minimum requirement for masters and officers on merchant ships—Articles 11-14 inclusive).

## DRAFT CONVENTION CONCERNING HOURS OF WORK ON BOARD SHIP AND MANNING

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-first Session on 6 October 1936, and

Having decided upon the adoption of certain proposals with regard to the regulation of hours of work on board ship and manning in conjunction with hours of work on board ship

which is the first item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 24th day of October of the year one thousand nine hundred and thirty-six, the following Draft Convention which may be cited as the Hours of Work and Manning (Sea) Convention, 1936:

### PART I.—SCOPE AND DEFINITIONS

*Article 1*

1. This Convention applies to every seagoing mechanically-propelled vessel, whether publicly or privately owned, which:

- (a) is registered in a territory for which the Convention is in force;
- (b) is employed in the transport of cargo or passengers for the purpose of trade; and

- (c) is engaged on an international voyage, by which is meant any voyage from a port of one country to a port outside such country, every colony, overseas territory, protectorate or territory under suzerainty or mandate, being regarded as a separate country.

2. This Convention does not apply to:

- (a) sailing vessels with auxiliary engines, or
- (b) vessels engaged in fishing, whaling or similar pursuits, or in operations directly connected therewith.

3. Any Member may exempt vessels registered in its territory from the application of this Convention while such vessels are exclusively engaged in voyages upon which they do not proceed further from the country from which they trade than the nearby ports of neighbouring countries within geographical limits which:

- (a) are clearly specified by national laws or regulations;
- (b) are uniform in respect of the application of all the provisions of this Convention;
- (c) have been notified by the Member when registering its ratification by a declaration annexed thereto; and
- (d) have been fixed after consultation with the other Members concerned.

*Article 2*

For the purpose of this Convention the following expressions have the meanings hereby assigned to them:

- (a) "tons" means gross registered tons;
- (b) "officer" means a person other than a master ranked as an officer by national laws or regulations, collective agreement or custom;
- (c) "rating" means a member of the crew other than an officer;
- (d) "hours of work" means time during which a member of the crew is required by the orders of a superior to do any work on account of the vessel or the owner, or to be at the disposal of a superior outside the crews' quarters.

## PART II.— HOURS OF WORK

### Article 3

This Part of this Convention does not apply to:

- (a) officers in charge of departments who do not keep watch;
- (b) wireless operators and telephonists;
- (c) pilots;
- (d) doctors;
- (e) nursing staff exclusively engaged on nursing duties or hospital staff;
- (f) persons working exclusively on their own account;
- (g) persons remunerated exclusively by a share of profits;
- (h) persons whose duties are connected solely with the cargo carried on board and who are not in fact in the employment either of the owner or of the master;
- (i) travelling dockers;
- (j) crews consisting entirely of members of the family, as defined by national laws or regulations, of the owner of the vessel.

### Article 4

1. In vessels of over 2,000 tons the hours of work at sea and on arrival and sailing days of deck ratings whose time is divided into watches shall not exceed eight in the day nor shall they exceed fifty-six in the week.

2. In vessels of over 700 tons the hours of work at sea and on arrival and sailing days of deck ratings employed as day workers shall not exceed eight in the day nor shall they exceed forty-eight in the week.

3. Hours in excess of the limits prescribed in paragraphs 1 and 2 may be worked on arrival and sailing days. Whether or not such hours are to be worked and where such hours are allowed the conditions under which they may be worked shall be determined by national laws or regulations or collective agreements.

### Article 5

1. In vessels of over 700 tons the hours of work at sea and on arrival and sailing days of engine-room and stokehold ratings whose time is divided into watches shall not exceed eight in the day nor shall they exceed fifty-six in the week: Provided that extra time may be worked for the normal relieving of watches and the hoisting and dumping of ashes.

2. In vessels of over 700 tons the hours of work at sea and on arrival and sailings days of engine-room and stokehold ratings employed as day workers shall not exceed eight in the day nor shall they exceed forty-eight in the week.

3. Hours in excess of the limits prescribed in paragraphs 1 and 2 may be worked on arrival and sailing days. Whether or not such hours

are to be worked and where such hours are allowed the conditions under which they may be worked shall be determined by national laws or regulations or collective agreements.

### Article 6

1. In vessels of over 2,000 tons the hours of work at sea and on arrival and sailing days of deck officers shall not exceed eight in the day nor shall they exceed fifty-six in the week.

2. Provided that one additional hour per day may be worked at sea and on arrival and sailing days for navigational or clerical purposes.

3. Provided also that additional hours may be worked occasionally when the master deems it necessary to order two officers to keep watch simultaneously, so however that in no case shall any officer be required in virtue of this paragraph to work more than twelve hours in any day.

4. In vessels of over 700 tons the hours of work at sea and on arrival and sailing days of deck officers employed as day workers shall not exceed eight in the day nor shall they exceed forty-eight in the week.

5. Hours in excess of the limits prescribed in paragraphs 1 and 4 may be worked on arrival and sailing days. Whether or not such hours are to be worked and where such hours are allowed the conditions under which they may be worked shall be determined by national laws or regulations or collective agreements.

6. The provisions of this Article apply to apprentices and cadets in the deck department.

### Article 7

1. In vessels required under Article 16 to carry three or more engineer officers, the hours of work of such officers at sea and on arrival and sailing days shall not exceed eight in the day nor shall they exceed fifty-six in the week.

2. In vessels of over 700 tons the hours of work at sea of engineer officers employed as day workers shall not exceed eight in the day nor shall they exceed forty-eight in the week.

3. The provisions of this Article apply to apprentices and cadets in the engine-room department.

### Article 8

1. In vessels to which this Convention applies the following provisions shall apply to deck, engine-room and stokehold ratings and to deck and engineer officers, including apprentices and cadets in the deck and engine-room departments, whenever sea watches are suspended in any port:

- (a) hours of work shall not exceed eight in the day nor shall they exceed forty-eight in the week;
- (b) the weekly rest day shall be observed and on that day no work shall be required except as overtime or for the purpose of ordinary routine and sanitary duties, any work required for the purpose of such duties to be included in the ordinary limit of forty-eight hours;
- (c) exceptions to these provisions may be made in accordance with national laws or regulations or collective agreement in the case of ratings required for the safety of the vessel, or persons on board or for the preservation of the cargo.

2. Sea watches shall normally be suspended if the vessel is expected to stay in the port for more than twenty-four hours following its arrival, unless in the judgment of the master the safety of the vessel would be prejudiced thereby.

3. If sea watches are maintained in port, all time worked in excess of the limits of hours prescribed by or permitted under paragraph 1 of this Article shall, except in the case of:

- (a) watches maintained for the safety of the vessel; and
- (b) watches worked within twelve hours after arrival or within twelve hours before sailing,

be regarded as overtime for which the rating or officer shall be entitled to be compensated.

#### Article 9

1. In all vessels to which this Convention applies in respect of which there is in force:

- (a) a safety certificate issued in accordance with the provisions of the International Convention for the Safety of Life at Sea for the time being in force; or

(b) a passenger certificate, the hours of work at sea of ratings in the catering and clerical departments shall be so arranged as to ensure to each such rating not less than twelve hours rest during any period of twenty-four hours, including a rest period of at least eight consecutive hours.

2. In all vessels to which this Convention applies, other than vessels in respect of which there is in force one of the certificates referred to in the preceding paragraph, the hours of work at sea and on arrival and sailing days of ratings in the catering and clerical departments shall not exceed ten in the day.

3. In all vessels to which this Convention applies the hours of work in port of ratings in the catering and clerical departments shall not exceed eight in the day, subject to such exceptions as may be permitted by national laws or regulations.

#### Article 10

1. Ratings and deck and engineer officers including apprentices and cadets may be required to work in excess of the limits of hours prescribed by or permitted under the preceding Articles of this Part of this Convention, subject to the conditions that:

- (a) all such time worked shall be regarded as overtime for which they shall be entitled to be compensated; and
- (b) there shall be no consistent working of overtime.

2. The manner or rate or rates of such compensation shall be prescribed by national laws or regulations or be fixed by collective agreement.

#### Article 11

1. No rating under the age of 16 years shall work at night.

2. For the purpose of this Article the expression "night" means a period of at least nine consecutive hours between times before and after midnight to be prescribed by national laws or regulations.

#### Article 12

The provisions of this Part of this Convention do not apply to:

- (a) work which the master deems to be necessary and urgent for the safety of

the vessel, cargo, or persons on board;

- (b) work required by the master for the purpose of giving assistance to other vessels or persons;
- (c) musters, fire, lifeboat and similar drills of the kind prescribed by the International Convention for the Safety of Life at Sea for the time being in force;
- (d) extra work resulting from the sickness of or from injury to any officer or rating or from any unforeseeable reduction in the number of officers or ratings in the course of the voyage;
- (e) extra work for the purpose of customs, quarantine or other health formalities;
- (f) work by officers for the determination of the position of the vessel at noon.

### PART III.—MANNING

#### Article 13

Every vessel of over 700 tons shall be sufficiently and efficiently manned for the purposes of:—

- (a) safety of life at sea; and
- (b) making possible the application of the rules relating to hours set forth in Part II of this Convention,

and more particularly every such vessel shall comply with the minimum requirements as to manning set forth in this Part of this Convention.

#### Article 14

1. In vessels of over 700 but not exceeding 2,000 tons there shall be carried at least two certificated deck officers in addition to the master.

2. In vessels of over 2,000 tons there shall be carried at least three certificated deck officers in addition to the master.

#### Article 15

1. In vessels of over 700 tons the number of deck ratings carried shall be sufficient to allow of three ratings being available for each navigational watch.

2. In particular, the following minimum numbers of ratings shall be carried:—

- (a) in vessels of over 700 but not exceeding 2,000 tons: 6;
- (b) in vessels of over 2,000 tons: 9 or such larger number as may be prescribed by national laws or regulations or fixed by collective agreement.

3. The following minimum numbers of the ratings required to be carried by paragraph 2 shall comply with the conditions as to physical capacity and efficiency stated in paragraph 4:—

- (a) in vessels of over 700 but not exceeding 2,000 tons: 4;
- (b) in vessels of over 2,000 tons: 5 or such larger number as may be prescribed by national laws or regulations or fixed by collective agreement.

4. The conditions as to physical capacity and efficiency to be fulfilled by certain ratings in accordance with paragraph 3 are that each such rating:—

- (a) is 18 years of age; and
- (b) either has had at least three years' sea service on deck or holds a certificate, issued by the competent authority, that his standard of efficiency is equal to that of the average rating who has had three years' sea service on deck.

5. National laws or regulations or collective agreement shall limit the number of ratings with less than one year's sea service on deck

who may be counted as deck ratings for the purpose of satisfying the requirements of this Article.

6. No rating signed on in a dual capacity whose services may be required in any department other than the deck department shall be counted as a deck rating for the purpose of satisfying the requirements of this Article.

7. Whether or not a wireless operator or telephonist is to be considered as belonging to the deck department for the purpose of the preceding paragraph shall be determined by national laws or regulations or by collective agreement.

#### Article 16

1. In vessels to which this Article applies at least three certificated engineer officers shall be carried.

2. This Article applies either:—

- (a) to vessels of over 700 tons; or
- (b) to vessels with engines exceeding 800 indicated horse-power,

according as a tonnage or horse-power criterion is prescribed by national laws or regulations.

3. Provided that any Member may postpone the application of this Article for a period not exceeding five years from the coming into force of the Convention in the case of existing vessels not exceeding 1,500 tons or with engines not exceeding 1,000 indicated horse-power according as the Member applies the tonnage or horse-power criterion.

#### Article 17

If in the course of a voyage as a result of death, accident or any other cause a vessel ceases to have available the number of officers or ratings required by the preceding Articles the master shall make up the deficiency at the first reasonable opportunity.

### PART IV.—GENERAL PROVISIONS

#### Article 18

The shipowners', officers' and seamen's organizations concerned shall, so far as is reasonable and practicable, be taken into consultation in the framing of all laws or regulations for giving effect to the provisions of this Convention.

#### Article 19

1. Each Member which ratifies this Convention shall be responsible for the application of its provisions to vessels registered in its territory and shall maintain in force national laws or regulations which:—

- (a) determine the respective responsibilities of the shipowner and the master for ensuring compliance therewith;
- (b) prescribe adequate penalties for any violation thereof;
- (c) provide for adequate public supervision of compliance with Part III before a vessel leaves a home port on an international voyage;
- (d) require the keeping of records of all overtime worked in pursuance of Article 10 and of the compensation granted in respect thereof; and
- (e) ensure to seamen the same remedies for recovering extra payments in respect of overtime as they have for recovering other arrears of wages.

2. In any case in which it comes to the knowledge of the competent authority of a port that a vessel registered in a territory for

which this Convention is in force in virtue of ratification by another Member is not carrying the number of officers and ratings required by Part III of this Convention the said authority shall so notify the consul of the said Member.

#### Article 20

Nothing in this Convention shall affect any law, award, custom or agreement between shipowners and seamen which ensures more favourable conditions than those provided by this Convention.

#### Article 21

1. Vessels existing at the date of the coming into force of this Convention in respect of which the competent authority of the territory of registration is satisfied, after consulting the organizations interested, that the circumstances are such that the provision of fresh accommodation or other permanent equipment necessary for an increased crew is not reasonably possible may be exempted from the application of the Convention.

2. Such exemption shall be granted by the issue of an exemption certificate, which shall be carried on the vessel, exempting the said vessel from such of the requirements of this Convention as are specified in the said certificate.

3. Exemption certificates shall not be issued for a period exceeding four years at a time.

4. Every Member taking advantage of the provisions of this Article shall communicate to the International Labour Office in its annual report upon the application of this Convention:—

- (a) the texts of all laws and regulations relating to the grant of exemption under this Article;
- (b) particulars as to the number of vessels and total tonnage in respect of which exemption certificates are for the time being in force; and
- (c) any observations as to the grant of exemption made by the shipowners', officers and seamen's organizations concerned.

### PART V.—FINAL PROVISIONS

#### Article 22

1. In respect of the territories referred to in Article 35 of the Constitution of the International Labour Organization, each Member of the Organization which ratifies this Convention shall append to its ratification a declaration stating:—

- (a) the territories in respect of which it undertakes to apply the provisions of the Convention without modification;
- (b) the territories in respect of which it undertakes to apply the provisions of the Convention subject to modifications, together with details of the said modifications;
- (c) the territories in respect of which the Convention is inapplicable and in such cases the grounds on which it is inapplicable;
- (d) the territories in respect of which it reserves its decision.

2. The undertakings referred to in subparagraphs (a) and (b) of paragraph 1 of this Article shall be deemed to be an integral part of the ratification and shall have the force of ratification.

3. Any Member may by a subsequent declaration cancel in whole or in part any reservations made in its original declaration in virtue of sub-paragraphs (b), (c) or (d) of paragraph 1 of this Article.

#### Article 23

The formal ratification of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 24

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force six months after the date on which there have been registered by the Secretary-General of the League of Nations the ratifications of five Members of the Organization each of which has a mercantile marine tonnage of not less than one million tons.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

#### Article 25

As soon as the ratifications of five of the Members mentioned in the second paragraph of Article 24 have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 26-29

(These articles respecting ratification of this Convention are identical with those detailed above in the Draft Convention concerning minimum requirement for masters and officers on merchant ships—Articles 11-14 inclusive.)

### RECOMMENDATION CONCERNING HOURS OF WORK ON BOARD SHIP AND MANNING, SUBMITTED BY THE DRAFTING COMMITTEE

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its twenty-first Session on 6 October 1936, and

Having decided upon the adoption of certain proposals with regard to the regulation of hours of work on board ship and manning in conjunction with hours of work on board ship which is the first item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation, adopts, this ..... day of October of the year one thousand nine hundred and thirty-six, the following Recommendation which may be cited as the Hours of Work and Manning (Sea) Recommendation, 1936:

Having regard to the fact that the Hours of Work and Manning (Sea) Convention, 1936,

does not regulate hours of work or manning in vessels engaged only in national coasting trade;

That it allows each Member to except from the application of its provisions the vessels referred to in Article 1, paragraph 3, of the said Convention; and

That some of its provisions do not apply to vessels below a certain tonnage;

The Conference recommends that each Member which has not already regulated hours of work and manning in these different classes of vessels should investigate the conditions obtaining in them in the light of the rules laid down in the said Convention; and

Further recommends that each such Member should take all necessary measures to prevent overwork and insufficient manning on such vessels.

### Twenty-second Session of the Conference

The Twenty-second (Maritime) Session of the International Labour Conference was held on October 22-24, 1936. There was only one item on the agenda, namely:—

Partial revision of the Minimum Age (Sea) Convention, 1920, with reference to the following points:

- (1) The raising of the minimum age from 14 to 15 years and any related revision of the exceptions provided for in the Convention;
- (2) Substitution for Articles 5-12 of the 1920 Convention of the standard articles included in the Draft Conventions submitted to the Conference at its Twenty-first Session.

It had been decided by the Governing Body in the month of June last that two

Conventions, relating to the minimum age for employment in industrial and non-industrial employment respectively, should be included in the agenda of the Twenty-third Session of the International Labour Conference which is to be held in 1937. At the same time the Governing Body decided to place the revision of the Convention relating to the age limit for employment at sea on the agenda of a maritime session of the Conference. Under the Standing Orders, it was necessary however to give four months' notice to the member countries. In these circumstances, it was impossible that the revision of the Minimum Age (Sea) convention could be dealt with at the Twenty-first (Maritime) Session opening on October 6. It was accordingly decided that a separate Maritime

Session should be held in October 22 for the particular purpose in question, either concurrently with or after the close of the twenty-first Session.

The Twenty-second Session had before it a report reproducing the substance of observations received from various Governments on the amendment which had been proposed by the International Labour Office for the substitution of fifteen years for fourteen as the age below which children should not be employed or work on vessels other than vessels upon which only members of the same family are employed. As regards the second part of the proposed revision, the suggestion was that the "standard" articles (i.e., articles of a general character, common to all Conventions and relating to matters such as ratification, coming into force, and denunciation of the Convention) should be brought into conformity with the text as modified by the Conference in 1929 and 1933.

The Twenty-second Session was opened on October 22, during a recess of the Twenty-first Session, by Dr. W. A. Riddell, Government Delegate for Canada, acting as Chairman of the Governing Body of the International Labour Office. The officers of the Twenty-first (Maritime) Session were design-

nated also as officers of the Twenty-second (Maritime) Session, the personnel of the Selection Committee, the Credentials Committee and the Drafting Committee being the same as at the Twenty-first Session.

The subject-matter of the agenda was referred to a special committee of the Conference for examination. A draft amendment which had previously been submitted by the International Labour Office was approved by the Committee without opposition, a paragraph being added thereto, however, at the request of the British Government to permit of exceptions in special cases.

The text of the revised draft convention concerning the Minimum Age for the Admission of Children to Employment at Sea appears at the close of the present article.

A resolution which had been proposed by the Conference Committee was adopted by the Conference, providing that this convention would not go into force until after the adoption by the Conference of draft conventions revising the Minimum Age (Industry) Convention, 1919, and the Minimum Age (Non-Industrial Employment) Convention, 1932. As already stated, it is proposed that these latter Conventions will come before the International Labour Conference for revision in 1937.

## DRAFT CONVENTION FOR THE REVISION OF THE MINIMUM AGE (SEA) CONVENTION ADOPTED IN 1920

### *Article 1*

For the purpose of this Convention, the term "vessel" includes all ships and boats, of any nature whatsoever, engaged in maritime navigation, whether publicly or privately owned; it excludes ships of war.

### *Article 2*

Children under the age of fifteen years shall not be employed or work on vessels, other than vessels upon which only members of the same family are employed; provided that national laws or regulations may provide for the issue in respect of children of not less than fourteen years of age of certificates permitting them to be employed in cases in which an educational or other appropriate authority designated by such laws or regulations is satisfied, after having due regard to the health and physical condition of the child and to the prospective as well as to the immediate benefit of the child of the employment proposed, that such employment will be beneficial to the child.

### *Article 3*

The provisions of Article 2 shall not apply to work done by children on school-ships or training-ships, provided that such work is approved and supervised by public authority.

### *Article 4*

In order to facilitate the enforcement of the provisions of this Convention, every shipmaster shall be required to keep a register of all persons under the age of sixteen years employed on board his vessel, or a list of

them in the articles of agreement, and of the dates of their births.

Articles 5 to 12 (concerning ratification, etc.) are identical with those included in the Draft Conventions of the Twenty-first Session shown above.

The preamble is also identical with those of preceding Conventions.

In addition to the wage increases announced by the steel industry in the United States (referred to elsewhere in this issue) several other large American corporations have advanced workers' wages according to press reports. The Eastern Kodak Company declared a wage dividend (payable March 1, 1937) of \$2,220,000 more than \$1,000,000 in excess of the 1936 payment. The Du Pont Rayon Company at Richmond, Va., granted an immediate wage increase of from seven to ten per cent. An upward revision (rate not disclosed) was accorded workers in the footwear factory of the United States Rubber Products, Inc. A wage advance of from five to ten per cent was voted all employees of the Simonds Saw and Steel Company, while the Ritter Dental Manufacturing Company granted a second five per cent wage increase within the year. Several other companies engaged in manufacturing also announced wage increases.

## BIOGRAPHY OF ALBERT THOMAS

### Life Work of First Director of International Labour Office

IN a volume of 270 pages entitled "Yes and Albert Thomas," the story is told of one of the most significant figures of our time, Monsieur Albert Thomas, first Director of the International Labour Office, whose death occurred with tragic suddenness on May 8, 1932. This self-imposed task was undertaken by Mr. E. J. Phelan, Assistant Director of the International Labour Office, who assisted in drafting the Labour Part of the Treaty of Versailles and has been intimately associated with the work of the International Labour Organization from its inception in 1919 to date.

The story is not told in the form of a dry official record, but through a series of selected incidents occurring in Europe, Asia and America during the life of this great international personality. The book, however, is much more than a narrative of incidents, both dramatic and humorous. From the recorded incidents there emerges a clear portrait of the most dominating figure in the world-wide movement for social justice which was launched at the close of the Great War. The picture drawn by the biographer is that of a personality which overshadowed all others in this work, for Albert Thomas, he declares, "had secured the unchallenged leadership of the organization which had been committed to his charge and he had seemed to embody in his own person the soul and the energy of a world-wide movement."

It is not part of the scheme of this book to enumerate the achievements of the International Labour Organization (League of Nations) for which he was responsible, nor to assess their value. It contains, therefore, no list of the 52 draft conventions and the 44 recommendations which have been adopted to date by the International Labour Conference and no reference to the widespread acceptance by individual countries of these proposals and of their embodiment in national legislation. The hope is expressed that some day a biographer will be found who will present a balanced account of Albert Thomas' achievements. Meanwhile, those who worked with him have felt that something should be done in the way of providing or preserving raw material for future biographical use. Accordingly the present volume is modestly dedicated to that purpose.

The writer says of Albert Thomas that he was interested in men as men—"men in their

numbers, in their diversity, in their dignity, in their ambitions, in their hopes and fears, and above all in their imprescriptible rights to spiritual and economic independence."

Hence his conception of the Office as a "living" instrument, his criticism of the League as "divorced from the peoples," his belief that the only sure foundation for the Office was the support of public opinion, his rejection of the idea that the Organization was no more than a mechanism to correct inequalities in the possibilities of commercial competition as between nation and nation. This it is which explains his conception of the Organization as something which was more even than machinery for collaboration between nation and nation. He saw the Organization not as a mechanism for collaboration, but "as the collaboration itself in full action. He saw it not in any sense as a super-State—such a conception would have been in contradiction with his whole outlook—but he saw it as much more than inter-State. He saw it as an organization of the peoples of the world, an organization in which cabinets and parliaments, national and colonial civil services, factory and medical inspectorates, associations of workers and employers, and the individuals composing them—ministers, deputies, civil servants, employers and workers—had all their appointed place and function."

Social justice is not easy to define. "To Albert Thomas," the writer says, "it meant much more than the removal of social injustice. It meant a positive policy through which the individual might attain his political, economic and moral rights. This was the doctrine which he believed could alone give the Organization a real unity and personality, which could guide it safely where narrower doctrines would inevitably lead it to a division along lines of national interest."

To all of the three groups in the International Labour Organization, that is, Governments, Employers and Workers, Monsieur Thomas emphasized the same fundamental idea, the creation or encouragement of trade unions, and there is no doubt that he regarded this as the fundamental step which must precede or at least accompany any program of social requirement. "Trade unionism," the writer says, "was not to Albert Thomas so much an end in itself or a factor in the improvement of labour conditions, as a means of securing for the masses of the people a real political apprenticeship, an experience of 'government of the people,—

by the people, for the people.' Through such experience they would become capable of a measure of government based on a knowledge of industrial facts fully within their competence. . . Through the trade unions, therefore, the people could become a real factor in government, and could exert through their own chosen representatives an influence and an authority based on first-hand knowledge, which they could not otherwise ever acquire. . . Behind his activity lay a plan and behind the plan a philosophy which unfortunately he never developed in any connected form. Perhaps there were socialistic elements in that philosophy, perhaps his socialist creed had been its inspiration. All that can be said is that it led him to methods which stood every practical test, judged by the needs of the Organization, and that he used it to no other end and to no other advantage. . .

"It is by concrete results that he would wish to be judged. In what measure did he

achieve them? The reader has been warned that the authoritative answer to that question must come from the historian and the biographer. But there can be little doubt that when the social legislation which he inspired or initiated is examined, when his influence on the social movement and thought of his time can be weighed and measured, it will be found that his achievement did not fall far short of his ambition."

The biographer closes with a statement that the seeds sown by the first Director of the International Labour Office had produced their harvest and the reapers were trained and ready when his death occurred. "There was deep sorrow at the loss of a leader as loved as he was admired. But there was no jolt and no jar; no change of method; no timid shrinking from responsibilities once thought dangerous or inappropriate. All that happened was that one international servant succeeded another and the work went on."

## REPORTS OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1936

The business of the offices of the Employment Service of Canada during the third quarter of 1936 showed a marked decline from that transacted during the corresponding quarter of last year, as there was a decrease of over 19 per cent both in opportunities for employment and also in placements effected in regular and casual work. Construction and maintenance, in which group relief placements were recorded, and farming were the only two industrial divisions to register losses, but these were very heavy and much more than offset the gains shown in all remaining sections, the largest of which were in services and logging. All Provinces recorded declines in vacancies and placements, the most marked being that shown in Ontario, where relief work had diminished considerably in volume when compared with that recorded during the corresponding quarter of 1935. The accompanying table gives the vacancies and placements of the Employment Service of Canada by industrial groups in the various Provinces from July to September, 1936.

From the chart on page 1044, which accompanies the article on the work of the Employment Offices for the month of September, it will be noted that the trend of the curves of vacancies and placements in relation to applications was downward throughout the greater part of the quarter, showing an upward tendency only during the first half of July

and the first half of August, and at the close of the period under review had reached levels from 20 to 21 points below those recorded at the end of September a year ago.

During the period July to September, 1935, there was an average of 64.4 vacancies and 60.2 placements for each 100 applications for employment, as compared with 54.3 vacancies and 50.8 placements for each 100 applications during the period under review.

The average number of positions offered daily during the current quarter was 1,194, of applicants registered 2,198 and of placements effected 1,116, in contrast with the daily average of 1,478 vacancies, 2,294 applications and 1,382 placements in regular and casual employment during the corresponding quarter of 1935.

During the three months, July to September, 1936, the Offices reported that they had made 90,831 references of persons to positions, and effected a total of 85,918 placements, of which 58,111 were in regular employment and 27,807 in casual work. Of the placements in regular employment, 44,079 were of men and 14,032 of women, while casual work was found for 17,874 men and 9,933 women. Comparison with the corresponding period of 1935 showed that 106,384 placements were then made, of which 70,799 were in regular employment and 35,585 in casual work. Applications for employment during the period under

62,494 were for men and 29,403 for women, as compared with 113,742 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1936.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1936

### Reports of Superintendents of the Employment Service

THE employment situation at the end of October was reported by the Superintendents of the Employment Service to be as follows:—

Farming in the Maritimes was about completed, nevertheless some fall ploughing was being done and a small balance of root crops gathered. Logging was rather quiet, although a number of men had been sent out and prospects were favourable for more to go. Sawmills continued to operate on the Miramichi. Stormy weather accounted for small catches of cod and haddock, but the presence of dog fish destroyed a large portion of the fall run of mackerel. Coal mines in the New Glasgow area operated from three to six days per week, while those in Cape Breton and vicinity worked five and six days, with the exception of one mine, which was idle. Manufacturing concerns were busy, with improvement noted in some divisions and no idleness reported by the iron and steel companies. Construction of private dwellings and repair work were fairly heavy, providing considerable work for carpenters and labourers, but few new large projects were under way. Road paving was finished at St. John, affecting a large number of men; elsewhere, highway construction was being carried on, though with fewer persons employed. Passenger traffic continued well up to the average and freight traffic also was good. Fall trade was considered normal, with collections fair. A heavy demand was listed for maids and charworkers in the Women's division.

Farm placements in the Province of Quebec were considerably lighter than during the previous month, adverse weather conditions having something to do with this situation. Logging was active and miners found employment in the mines at Rouyn. Manufacturing was reported as follows: Chicoutimi, unchanged; Hull, quiet; Montreal: metals, tobacco, boots and shoes, inactive, clothing fairly busy, rubber a slight improvement; Quebec City, boots and shoes slack, but furs and clothing very active; Three Rivers, situation satisfactory, especially in the paper industry, where conditions were much more favourable than in the corresponding month last year. Building construction registered a downward movement at Chicoutimi, Hull and Rouyn, but at Three Rivers more employment was available, owing to a few repair jobs, while in Montreal, as a result of relief works undertaken by the Provincial Relief Commission,

the demand for men was much greater. Transportation was unchanged, but trade, in most localities, was somewhat better. The call for general maids, cooks and other domestic help in the Women's Section was also more favourable and many placements were made.

The demand for farm hands for both regular and casual work continued in the Province of Ontario, a number of requests being received for fall ploughing, as well as for corn husking and beet and turnip pulling. The movement of labour in the logging industry was steady, many of the camps in Northern Ontario being supplied with seasonal workers and others, who have invaded the lumbering districts from every point in Canada. There was some difficulty, however, in securing men who were thoroughly experienced in bush work. Mining was active at Port Arthur and Timmins, but quiet at Sudbury and Fort William, various kinds of surface mechanics being the principal class of help requested at present by the mining companies. Nearly all manufacturing concerns reported steady progress and increased business and skilled mechanics were in demand, with the occasional untrained worker. The iron and steel industry, as a whole, was better than for some time past, the Collingwood Shipbuilding Company reporting one of the busiest seasons in a number of years. The Dominion Sugar Company at Chatham worked at capacity putting through 3,000 tons of sugar beets every 24 hours, but the rubber industry was not quite so active, this being generally considered the tapering off season for that trade. Building construction varied throughout the province. In some districts little new work was under way, while in others, the industry remained active with a steady demand for carpenters and bricklayers. Highway construction progressed favourably, though somewhat handicapped by inclement weather. Trade was brisk. There were many calls for experienced cooks-general and housemaids in the Women's Section, with a shortage of applicants in some localities.

While the call for farm help in the Prairie Provinces was fairly good, many of the placements made were under the Government Farm Relief Plan, the response to work opportunities under this arrangement being most encouraging. The supply of physically fit and experienced help in some districts, however, was becoming limited. There was a better demand for loggers, particularly in the Winnipeg zone, where the bulk of the orders was for piece

workers within the province, with a few going to operators in Western Ontario. These men were, for the most part, former employees recruited at the request of the employer. Mining was active but as nearly all mines were carrying full crews, there were few vacancies listed. Coal shipments from Drumheller compared favourably with those of other years. Manufacturing was busy at Winnipeg, somewhat better at Medicine Hat, but quiet at Calgary. Little building construction was in evidence and permits at Winnipeg for the year were more than \$1,000,000 less than at the corresponding date last year. Highway construction about Moose Jaw was completed, but in other sections roadwork was still being carried on. Trade showed improvement. There was a steady demand for household workers in the Women's Section, a number of orders being for farm domestics under the bonus scheme. Many of these vacancies were filled, nevertheless, difficulty was experienced in persuading some of the applicants to take country positions.

Harvesting was practically completed in British Columbia, so that few calls were reported for farm labour, although many requests for details concerning the Farm Labour Relief Plan were being received. Apple picking was finished, but the unusual demand for all varieties and grades of fruit kept packing houses working at full capacity; canneries,

however, had closed with a good tomato pack recorded. While there was no great movement of labour in logging, there did not appear to be any contraction in bush activities and saw and shingle mills were running full time, with prospects bright for the balance of the year. Work at gold mining properties was brisk, for, due to favourable weather conditions extra miners had been retained doing outside development work; despite this, there was no shortage of labour. Local coal mines at Nanaimo worked 5 days during the last week of October, with no great change of numbers on the payroll. Salmon, chum and herring fishing also continued at Nanaimo, but did not provide employment for any great number of men. Construction was fairly active, as there was quite an amount of building and alterations being carried on. Highway construction was in progress and extra railroad gangs were still busy, but no replacements were made as men left the jobs. Drydocks and shipyards were quiet at Prince Rupert, but busy at Victoria. Longshoremen had a good week on the waterfront at New Westminster, Prince Rupert and Victoria, but were slack at Vancouver. Trade was fair. The Women's Division made a number of placements in domestic service, although many of the applicants were young girls without any experience, for whom the only positions available were those of mother's help.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN SEPTEMBER, 1936

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 10,020, the employees on their payrolls numbering 1,044,178 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,825, having an aggregate membership of 180,306 persons, 10.9 per cent of whom were without employment on

October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

## (1) The Employment Situation at the Beginning of October, as Reported by Employers

Industrial employment at the beginning of October showed a substantial improvement, according to statements received by the Dominion Bureau of Statistics from 10,020 firms, whose staffs aggregated 1,044,178 persons, as compared with 1,015,639 in the preceding month. This increase of 28,539 workers is the largest so far reported in any month of the present year; while it was smaller than that noted at October 1, 1935, it exceeded the gain indicated between September 1 and October 1 in any other of the nine preceding years since

recession for seasonal influences, the index increased from 102.7 in the preceding month to 105.0 at October 1, 1936.

The unadjusted index, (based upon the average for the calendar year 1926 as 100) has been as follows at October 1 in the sixteen years for which data are on record: 1936, 110.1; 1935, 106.1; 1934, 100.0; 1933, 90.4; 1932, 86.7; 1931, 103.9; 1930, 116.2; 1929, 125.6; 1928, 118.8; 1927, 110.3; 1926, 106.5; 1925, 99.5; 1924, 95.0; 1923, 100.7; 1922, 95.8 and 1921, 91.3.

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

1920 in which the trend has been upward. In the remaining six autumns, losses had been shown at the beginning of October, with the result that the average change from September 1 to October 1 in the last fifteen years is only a fractional increase. The considerable advance taking place at the latest date, which compares favourably with this slight, average gain, raised the index of employment from 107.1 at September 1, to 110.1 at the beginning of October; this was the highest point reached since November 1, 1930. At October 1, 1935, the index had been 106.1. After cor-

The most outstanding features of the October 1 survey of employment were the unusually pronounced increases in manufacturing, in which the co-operating establishments absorbed nearly 15,600 additional workers, and in logging, which directly provided work for practically 16,700 more persons than at September 1. The expansion in each of these industries was greater than at October 1 in any other year for which statistics are available. Mining and trade also recorded substantially heightened activity, while the trend was seasonally downward in services and con-

struction and maintenance; there were also losses in transportation.

The records show that for October 1, 1935, 9,414 employers had reported payrolls aggregating 997,017 workers, or 32,040 more than at September 1; that increase was the largest indicated in any month of last year. The most marked improvement over September 1, 1935, was in manufacturing and logging, although the trend was also favourable in most of the main industrial groups.

#### Employment by Economic Areas

Firms in all provinces except British Columbia showed considerable improvement, that in Quebec and Ontario being most pronounced. The situation generally was better than at the beginning of October in any of the last four years.

*Maritime Provinces.*—A further and much larger increase was indicated in the Maritime Provinces, where the 697 co-operating employers enlarged their payrolls from 82,192

persons at September 1, to 84,721 at the beginning of October. This was the seventh consecutive monthly advance recorded since March 1; although it was smaller than the gain noted at the same date last year, it compared favourably with the decline that, on the average, has been reported at October 1 in the years since 1920. The index, at 117.9 at the latest date, was five points higher than at October 1, 1935. Manufacturing as a whole showed improvement at the beginning of October, 1936, as compared with the preceding month, mainly in vegetable food, pulp and paper and iron and steel plants. Among the non-manufacturing groups, logging afforded greatly increased employment, while there were smaller gains in coal-mining and trade. On the other hand, transportation, construction and hotels and restaurants showed curtailment.

The 657 firms furnishing data for October 1, 1935, had employed 80,591 persons, an in-

Relative Weight of Employment by Economic Areas as at Oct. 1, 1936.....	100.0	8.1	28.1	41.8	13.2	8.8

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

crease of 4,138 over their payrolls in the preceding month.

*Quebec.*—Activity again advanced in Quebec. The expansion took place chiefly in logging and manufacturing, but mining, local transportation and trade also showed increases. Within the group of factory employment, the greatest gains were in textile, food, rubber, clay, glass and stone and non-ferrous metal works; on the other hand, employment in lumber mills was not so brisk as at September 1, 1936. Services and construction and maintenance also showed a falling-off in activity. Statistics were compiled from 2,368 firms in Quebec with 293,665 workers, compared with 285,522 at the beginning of September. A large advance had been noted at October 1, 1935, but, on the whole, the tendency at the beginning of October in the last fifteen years had been slightly retrogressive. The index rose from 103.0 at September 1, 1936, to 106.0 at the date under review, when it was nearly three points higher than at October 1, 1935.

Returns were then tabulated from 2,234 establishments having 283,468 men and women in their employ, as compared with 273,190 in the preceding month.

*Ontario.*—The trend was upward in Ontario, according to 4,434 employers of 436,435 persons, or 17,258 more than at the beginning of September. A smaller gain over the preceding month had been reported at October 1, 1935, when the index, at 108.1, was several points lower than that at the latest date, viz., 112.6. While the movement in employment has usually been favourable at the beginning of October in the experience of the years since 1920, the advance at the date under review was substantially larger than the average increase between September 1 and October 1, 1921-1935. Manufacturing, as a whole, (particularly in vegetable food, iron and steel and textile factories), logging, mining and trade showed heightened activity as compared with September 1, 1936, while employment declined in animal food, tobacco and beverage and

Oct. 1, 1936.....	95.6	98.1	105.5	110.9	98.0	120.3	95.3	109.1
Relative Weight of Employment by Cities as at Oct. 1, 1936.....	13.7	1.3	12.5	1.4	3.0	1.6	3.9	3.4

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

clay, glass and stone plants and in services. Little general change occurred in transportation, communications and construction; within the last-named improvement in building and highway work was just about offset by curtailment in the railway construction and maintenance departments.

For October 1, 1935, 4,149 firms had reported 414,523 workers on their payrolls, as compared with 398,151 in the preceding month.

*Prairie Provinces.*—There was a further increase in employment in the Prairie Provinces at the beginning of October, improvement occurring in manufacturing, mining, logging, building and highway construction and trade, while railway operation and construction, services and communications were quieter; the reductions in payroll in railway construction and maintenance were considerable. Within the manufacturing group, food, textile, iron and steel and other plants showed heightened activity. Returns for the date under review

were received from 1,457 firms with an aggregate working force of 137,933 employees, compared with 136,353 at September 1. A larger advance had been recorded at the beginning of October in 1935, when the index was nearly six points lower than the 108.6 of the latest date. The 1,376 co-operating employers had then reported 129,765 persons on their payrolls, compared with 126,921 at September 1, 1935.

*British Columbia.*—Employment in British Columbia showed curtailment, mainly in manufacturing (owing to the termination of the fish-canning season), while transportation and services also released employees. On the other hand, logging, mining and trade reported greater activity, and, within the group of factory employment, vegetable food and some other factories also recorded improvement. Data were tabulated from 1,064 employers, whose payrolls declined from 92,395 persons at September 1, to 91,424 at the beginning

Relative Weight of Employment by Industries as at Oct. 1, 1936.....	100.0	52.9	3.9	6.5	2.1	10.2	11.7	2.7	10.0

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

of October. Losses on a larger scale had been registered at October 1, 1935, and the index, at 106.0, was then rather lower than at the date under review, when it stood at 108.1. An aggregate working force of 88,670 men and women was reported by the 999 firms furnishing statistics for October 1, 1935; this was a decline of nearly 1,600 from their September 1 staffs.

Table 1 gives index numbers by economic areas.

### Employment by Cities

The trend at the beginning of October was upward in Montreal, Toronto, Hamilton, Windsor and Winnipeg; in Quebec and Ottawa, little change on the whole was shown, while activity declined in Vancouver.

*Montreal.*—There was a further increase in employment in Montreal, where the 1,358 co-operating establishments employed 143,407 per-

sons, or 1,881 more than at September 1. Manufacturing, transportation, road construction and trade showed the greatest gains; within the manufacturing group, vegetable food, textile and non-ferrous metal factories indicated considerable expansion, while the iron and steel industry was rather slacker. Much larger advances had been noted at the beginning of October of last year, but the index of employment was then over four points lower. For October 1, 1935, data had been furnished by 1,307 firms having 136,947 employees, which was an increase of 4,150 over their staffs in the preceding month.

*Quebec.*—Employment in Quebec showed little general change at the date under review, 22 workers having been taken on since September 1 by the 173 employers whose returns were compiled, and who had 13,096 on their paylists at October 1. There were seasonal losses in services, but manufacturing as a

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Oct. 1, 1936	Sept. 1, 1936	Oct. 1, 1935	Oct. 1, 1934	Oct. 1, 1933	Oct. 1, 1932	Oct. 1, 1931

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

whole was rather brisker, while moderate improvement also occurred in transportation and construction. The index was slightly lower than at the beginning of October, 1935, when 167 establishments had employed 13,364 men and women, a decrease of 133 from the preceding month.

**Toronto.**—Continued expansion was indicated in Toronto, according to 1,502 firms employing 130,803 persons, compared with 128,221 in their last report. Manufacturing was much busier, particularly in the textile, vegetable, food, printing and paper goods, chemical and iron and steel groups; road construction, services and trade also absorbed more workers. On the other hand, building was quieter. Rather larger additions to staffs, on the whole, had been reported at October 1 of a year ago, but employment generally continues at a better level, the index, at 105.5 at the latest date, being 4.4 points higher. Some 1,400 employers had then reported a combined working force of 123,300 persons, compared with 120,379 at September 1, 1935.

**Ottawa.**—Trade and construction were rather more active, while manufacturing showed a decline. The forces of the 196 employers furnishing data aggregated 14,601 workers, or 34 fewer than at September 1. The index of employment was over five points higher than at the same date in 1935, when an increase had been indicated by the 176 co-operating establishments whose payrolls had included 13,612 persons.

**Hamilton.**—Moderate improvement was noted in Hamilton, mainly in manufacturing, where there were gains in textile and iron and steel plants. Building construction was also rather busier and there was a minor increase in trade, while losses occurred in road construction and some other groups. Statements were tabulated from 286 firms with 31,553 employees, compared with 31,451 in the preceding month. The index number at the beginning of October of last year was slightly higher, larger additions to staffs having then been reported by the 272 employers whose statistics were included in the survey for October 1, 1935, and who had a personnel of 32,027.

**Windsor.**—There was an increase in the number working in Windsor, chiefly in automobile and other iron and steel plants. One hundred and seventy-five establishments employed 16,393 workers, as against 14,557 at September 1. A much smaller advance had been noted at October 1, 1935, when the 169 co-operating establishments had reported 14,456 employees, or 231 more than at September 1 of that year; the index then was decidedly lower than at the date under review.

**Winnipeg.**—Considerable improvement was indicated in Winnipeg at October 1, when the 484 firms furnishing data employed 40,756 workers, or 1,064 more than in the preceding month. Manufacturing, construction, services and trade were more active, while communications reported moderate curtailment. A smaller gain had been shown at the beginning of October a year ago by the 458 employers whose statistics were then received, and who had 38,989 men and women on the paylists; the index then was somewhat lower, standing at 91.1, as compared with 95.3 at October 1, 1935.

**Vancouver.**—Employment in Vancouver showed its first curtailment since the beginning of March, according to 441 establishments with 35,098 persons on their payrolls, compared with 35,324 at September 1. Manufacturing and trade reported improvement, but there was a falling-off in communications, transportation and services. A larger reduction on the whole had been recorded at October 1, 1935, when the index stood at 103.5, as compared with 109.1 at the beginning of October of the present year. Statements for October 1 of last year had been received from 413 firms whose employees aggregated 32,867.

Index numbers by cities are given in Table 2.

## Employment by Manufacturing Industries

There was a further substantial advance in factory employment at October 1, when the 5,831 co-operating establishments reported 552,248 operatives, or 15,597 more than at September 1. Seasonal curtailment was noted in fish-canneries and lumber mills, and there were also slight declines in tobacco and glass factories. Most other manufacturing groups, however, showed improvement. The gains in iron and steel were especially pronounced, this industry absorbing nearly 5,500 additional workers since September 1; the increase was of particular interest because it is contrary to the usual seasonal trend at the beginning of October in the experience of the years, 1921-1935. There were also large additions to staffs in textile and vegetable food factories, while the expansion in pulp and paper, rubber, electrical apparatus, non-ferrous metal, non-metallic mineral and chemical works was considerable.

On the average, employment in manufacturing at the beginning of October in the last fifteen years has shown comparatively little change from September 1, the gains recorded in some of these autumns just about offsetting the declines indicated in the remainder; the advance at the date under review greatly exceeds that noted at October 1 in any other

year since 1920 in which the trend has been favourable. The unadjusted index of employment, at 109.0, was 5.5 per cent higher than at October 1, 1935, and was also higher than in any other month since August 1, 1930. After correction for seasonal influences, the index rose from 103.0 at September 1, 1936, to 106.1 at the date under review.

The unadjusted index numbers in manufacturing at the beginning of October in the sixteen years of the record are as follows: 1936, 109.0; 1935, 103.3; 1934, 94.4; 1933, 86.7; 1932, 84.1; 1931, 91.8; 1930, 107.8; 1929, 120.2; 1928, 115.7; 1927, 106.4; 1926, 104.6; 1925, 98.8; 1924, 92.7; 1923, 99.4; 1922, 93.8 and 1921, 88.0. The 1926 average is the base used in computing these indexes.

The increase noted at October 1, 1936, continues the uninterruptedly favourable movement that has characterized factory employment since the opening of the year. During the last nine months, nearly 68,200 persons have been added to the staffs of the approximately 5,700 reporting firms, while the index has advanced from 96.8 at January 1 to 109.0 at the beginning of October, or by 12.6 per cent. Expansion was indicated in the same months of 1935, during which period the number of persons re-employed was larger; however, activity was then at a lower level, the index at October 1, 1935, standing at 103.3, compared with 109.0 at the latest date.

The manufacturers making returns for the beginning of October of last year, numbering 5,565, had employed 519,711 workers, compared with 507,163 in the preceding month. Marked gains had then been made in iron and steel plants, but many other lines of factory employment had also shown considerable improvement.

*Animal Products—Edible.*—There were losses in dairies and fish-preserving establishments, those in the latter being pronounced following an unusually active season. Statistics were received from 310 manufacturers, employing 25,013 persons, as compared with 26,580 in the preceding month. This contraction, which was most marked in British Columbia, was on a smaller scale than that registered at the corresponding date of last year, when the index was a few points lower.

*Leather and Products.*—A slight decline was indicated in the leather industry at October 1, tanning and footwear factories showing reductions in staffs, while the production of miscellaneous leather goods was rather more active. The 298 employers making returns reported 22,790 workers, or 86 fewer than at September 1. Employment at the beginning of October a year ago also decreased moder-

ately from the preceding month; the index number then stood at 110.1, compared with 112.4 at the date under review.

*Lumber and Products.*—Further seasonal contractions in personnel were indicated in the lumber group, in which employment was at a higher level than at October 1, 1935. The decrease at the date under review took place very largely in rough and dressed lumber mills, but container and vehicle plants were also slacker. On the other hand, furniture factories were decidedly busier. A combined working force of 45,076 persons was reported by the 845 co-operating manufacturers, as compared with 46,108 at the beginning of September. The tendency was downward in all provinces.

*Musical Instruments.*—A slight gain was registered in musical instrument plants, in which employment was at a higher level than during last autumn. Thirty-five establishments reported 1,599 employees, as compared with 1,521 in the preceding month.

*Plant Products, Edible.*—Practically all branches of the vegetable food division showed improvement; the largest gains, however, occurred in canneries, while those in confectionery and sugar and syrup factories were also considerable. The staffs of the 478 reporting firms aggregated 46,908 persons, or 8,168 more than in their last return. Employment was more active in all provinces, firms in Ontario showing the most pronounced advances. The general increase was very much greater than that registered at the corresponding date in 1935, when the index was many points lower.

*Pulp and Paper Products.*—Additions to their staffs were reported by 606 employers in this group; they had 63,740 workers on their payrolls, as compared with 63,038 at the beginning of September. Improvement took place in pulp and paper and paper products factories and in printing and publishing houses, the gains occurring mainly in Ontario and the Maritime Provinces. A smaller advance, on the whole, had been indicated at the beginning of October a year ago, and the index number then was several points lower.

*Rubber Products.*—Employment in rubber goods showed improvement at October 1, 1936; data were compiled from 52 firms with 13,150 employees, as against 12,934 in their last report. A gain had also been recorded at the same date in 1935, when the index of employment was much lower.

*Textile Products.*—Thread, yarn and cloth, hosiery and knitting and garment and other textile factories reported heightened activity;

1,042 manufacturers enlarged their payrolls from 102,209 workers at the beginning of September, to 104,955 at the date under review. Quebec and Ontario recorded the bulk of this expansion, although the tendency was generally favourable. Larger gains had been noted at the beginning of October last year, but the index then was lower by over five points than at October 1, 1936.

*Tobacco, Distilled and Malt Liquors.*—A moderate reduction in employment occurred in these industries at the beginning of October, according to the 184 establishments furnishing statistics, which employed 15,273 workers; distilled and malt liquor factories showed greater activity, but tobacco and other branches of the group were slacker. Employment was in smaller volume than at October 1, 1935, when little general change had been shown by the co-operating firms.

*Chemicals and Allied Products.*—Continued gains were indicated in chemical factories, 200 of which reported a staff of 11,585, as compared with 11,442 in the preceding month. Most of the increase was in Ontario. A higher level of activity was indicated at the first of October than at the same date of last year.

*Clay, Glass and Stone Products.*—Glass factories showed reduced activity, while brick and stone works were rather busier. Statements were received from 207 manufacturers employing 9,688 persons at October 1, compared with 9,829 at the beginning of September. The index was slightly higher than at the corresponding date in 1935, although the general tendency had then been favourable.

*Electric Light and Power.*—A slight decline occurred in electric current plants at October 1, when 97 establishments employed 15,551 workers, compared with 15,624 at September 1. A small increase had been noted at the same date of last year; however, the index number then stood at 119.6, compared with 123.2 at October 1, 1936.

*Electrical Appliances.*—Heightened activity was indicated in electrical apparatus works, 127 of which had 17,366 employees, or 260 more than in their last report. This gain, which took place mainly in Ontario, was smaller than that noted at October 1, 1935, when the index was two points higher.

*Iron and Steel Products.*—Many branches of the iron and steel industry shared in the upward movement indicated at the beginning of October; the largest increases were in the automobile, railway car, crude, rolled and forged and heating appliance divisions, but machinery, steel shipbuilding, wire, hardware

and other groups also showed considerable improvement. Statements were received from 859 manufacturers, whose payrolls aggregated 113,603 persons, as compared with 108,118 in the preceding month. Employment advanced in the Maritime and Prairie Provinces and Ontario. Rather more pronounced expansion had been indicated at the beginning of October of last year, but the tendency in most other years of the record has been downward. Employment at October 1, 1935, was at a slightly lower level, the index then standing at 84.7, compared with 87.2 at the latest date.

*Non-ferrous Metal Products.*—A combined working force of 22,712 persons was reported by the 169 co-operating employers, who had 22,175 at the beginning of September. There was improvement in the precious and the base metal divisions, and in smelters and refineries. The index was some seventeen points higher than in the autumn of 1935.

*Non-metallic Mineral Products.*—The personnel of the 143 firms furnishing data in these industries aggregated 14,767, or 172 more than in the preceding month. This increase exceeded that noted at October 1, 1935, when employment was not so active.

### Logging

Statements were tabulated from 324 logging companies, whose staffs were enlarged by 16,685 workers to 40,184 at the date under review. This advance was on a much greater scale than in the early autumn of 1935, or of any other year of the record. The index, at 141.7 at October 1, 1936, was higher than at that date in any of the last fifteen years. Camps in Quebec absorbed a large proportion of the men added to payrolls at October 1 of the present year, but the trend was generally upward.

### Mining

*Coal-Mining.*—There was an important increase in coal-mines, in which the index of employment was higher by 3.7 points than at October 1, 1935, when the improvement over the September 1 payrolls had been on a much smaller scale. Returns were received from 104 operators employing 25,108 persons at October 1, 1936, as compared with 23,193 in their last report. The gains took place mainly in the coal-fields of the Prairie Provinces.

*Metallic Ores.*—Employment in this group showed continued improvement, 214 employers reported 34,303 workers, or 1,069 more than at the beginning of September. Quebec and Ontario registered most of the advance. A

reduction had been noted at the corresponding date last year, and the index number was then many points lower.

*Non-Metallic Minerals, other than Coal.*—Heightened activity was reported in this group, in which statistics were received from 82 firms employing 8,812 persons, compared with 8,269 in the preceding month. The index was decidedly higher than at October 1, 1935, when little general change had been recorded.

### Communications

Communications showed a decline in personnel from the last report, the companies and branches furnishing data indicating a staff of 22,415 employees, as compared with 22,790 at September 1. The index was slightly higher than in the autumn of 1935, although employment on the whole had then been practically unchanged from the preceding month.

### Transportation

*Street and Electric Railways and Cartage.*—An increase was indicated in local transportation, 366 persons being added to the forces of the 236 co-operating firms, who had 27,535 on their payrolls. Employment in this industry was in rather greater volume than at October 1 of last year, a smaller advance having then been shown.

*Steam Railways.*—Statistics were tabulated from 101 employers in the steam railway operation group, whose payrolls decreased from 62,824 at September 1 to 61,976 at the beginning of October. An increase had been indicated at the same date of last year, when the index, at 75·8, was slightly lower than at the latest date, viz., 77·9. The tendency in each of the five economic areas was downward.

*Shipping and Stevedoring.*—A contraction was registered in the water transportation group, in which 111 companies employed 16,520 workers; this was a decline of 751 as compared with their payrolls in the preceding month. An advance had been noted at October 1 of last year, when the index stood at 94·0, as compared with 91·6 at the beginning of October of the present year.

### Construction and Maintenance

*Building.*—There was an increase in employment in building, 567 persons being added to the forces of the 738 co-operating contractors. They had 25,065 employees; this number was smaller than that reported at the beginning of October of a year ago, a larger gain having then been indicated. In

Ontario and the Prairie Provinces, the trend was favourable, but elsewhere curtailment took place.

*Highways.*—Employment in this group declined in the Maritime Provinces and Quebec, while the remaining provinces reported heightened activity. Statements were tabulated from 383 employers, whose staffs, standing at 59,671, were smaller by 881 workers than at September 1. The number of persons employed in the group was not so large as that reported at October 1, 1935, when a considerable increase had been noted.

*Railways.*—A pronounced falling-off in employment took place on railway construction work. The forces of the 33 companies and divisional superintendents furnishing returns declined from 43,710 at the beginning of September, to 37,899 at the date under review. A smaller reduction had been registered at October 1, 1935, but the level of employment was then much lower.

### Services

The closing of summer hotels caused a large contraction in employment in this group, in which other divisions showed little general change. The staffs of the 475 service firms whose returns were received, numbered 27,831 at October 1, as against 30,031 in the preceding month. The seasonal declines indicated at the same date last year had been on a smaller scale, in spite of which employment in the service division was then not so active as at the date under review.

### Trade

Retail and wholesale trading establishments increased their personnel; 1,302 firms reported 104,611 employees, compared with 101,948 in the preceding month. This advance was greater than that recorded at October 1 of 1935, considerably exceeding the average gain noted at the beginning of October in the years, 1921-1935. The index at the date under review stood at 129·6, compared with 123·8 at October 1, 1935.

### Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

## (2) Unemployment in Trade Unions at the Close of September, 1936

The term "unemployment," as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle on account of illness are not considered as unemployed. Unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Unemployment stood at 13 per cent. The changes in the various provinces from August were very slight, Nova Scotia, Saskatchewan and Alberta unions showing an upward employment trend which was just more than offset by the fractional recessions apparent in New Brunswick, Quebec, Ontario, Manitoba and British Columbia. Compared with the returns for September of last year, British Columbia members showed a gain of over 5 per cent in available work which was rather widely distributed throughout the various trades and industries, while in Alberta greater activity in coal mining, and in building and

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The level of activity among local Trade Unions at the close of September remained almost identical with that of the previous month, unemployment standing at 10.9 per cent as compared with a percentage of 10.8 in August. This very slight tendency toward retarded employment was the first interruption in the favourable movement which has characterized the trade unions situation since the close of April. The percentage for the month reviewed was based on the returns compiled from 1,825 labour organizations, embracing a total of 180,306 members, 19,699 of whom were out of work on the last day of the month. Somewhat better conditions, however, prevailed than in September a year ago when

construction operations was largely responsible for the increase of over 4 per cent reported from that province. Quebec unions showed moderate improvement in conditions from September last year and in New Brunswick, Ontario, Manitoba and Saskatchewan there was a slight rise in work afforded. In Nova Scotia, however, employment curtailment of less than one per cent was manifest.

Unemployment among local Trade Union members in the largest city in each province, with the exception of Prince Edward Island, is tabulated separately each month. Regina unions during September indicated an employment advance of over 3 per cent from the previous month, while minor gains were

evident among Halifax and Vancouver members. Nominal adverse changes only were reflected from Saint John, Montreal, Toronto, Winnipeg and Edmonton. Employment in all cities used for comparison was better maintained than in September of last year, Montreal and Vancouver unions especially showing noteworthy expansion. In Saint John, Toronto, Regina and Edmonton moderate increases in activity were evident, Halifax and Winnipeg unions indicating but a slightly more favourable tendency.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4
Average 1920.....	1.3	2.0	7.2	3.4	3.1	3.2	2.8	11.2	4.9
Average 1921.....	11.3	8.5	16.6	9.7	8.5	7.8	7.8	23.5	12.7
Average 1922.....	7.1	4.3	8.6	5.0	8.9	5.4	6.1	12.4	7.1

The chart which accompanies this article shows the trend of unemployment by months from January, 1930, to date. The level of the curve at the close of September remained approximately the same as in the previous month, there being but a very nominal tendency toward retarded activity. The point reached at the end of the month was, however, below that of September, 1935, denoting more favourable employment conditions during the month surveyed.

The manufacturing industries, as a whole, reported an almost unchanged employment volume during September from the previous month according to the returns received from a total of 510 labour organizations with 60,583 members. Of these, 6,629 or a percentage of 10.9, were without work on the last day of the month, contrasted with 10.8 per cent in August. Fluctuations were apparent, however, in the various groups of trades. Metal polishers, hat, cap and glove, and cigar and tobacco workers, showed a substantially improved situation from August and general labourers and garment workers gains of moderate proportions, while the change among bakers and confectioners, and printing tradesmen was very slight though favourable. On the contrary, glass workers registered a sharp drop in work afforded from August and recessions, of much lesser degree, were evident among iron and steel, leather, brewery, wood and fur workers, and paper-makers. Textile and carpet, and jewelry workers, however, recorded the same percentage of unemployment as in August. Contrasted with the returns in the manufacturing industries for September last year, when 12.7 per cent of idleness was reported, textile and carpet, and leather workers were afforded a much better volume of work during the month reviewed and noteworthy increases were manifest by iron and steel, jewelry, and cigar and tobacco workers. Among hat, cap, and glove workers, improvement on a smaller scale was noted. Bakers and confectioners, paper-makers, printing tradesmen and metal polishers showed little variation in conditions from September a year ago, though the trend was toward greater employment. Pronounced curtailment of activity was evident, however, among glass workers, and in the garment trades fair sized losses in available work were shown. Employment was also somewhat retarded among general labourers, fur, brewery and wood workers.

From unions in the coal mining industry, 48 reports were forwarded during September, embracing a membership of 14,555 persons, 1,285 of whom were unemployed on the last day of the month, a percentage of 8.8 in

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing Industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current	Wood products	Fibres, textiles and textile workers	Garment workers	Hat, cap and glove makers	Animal products	Iron and its products	Non-ferrous metals	Clay glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop clerks)	Services	Governmental	Miscellaneous	All occupations

comparison with percentages of 9.3 in August and 9.8 in September last year. In both the Alberta and British Columbia coal fields a better situation obtained than in either the previous month or September, 1935, the improvement in the latter comparison being the more substantial. In Nova Scotia the volume of employment afforded remained practically unchanged from August, though there was some slowing-up in activity manifest from September last year. In addition to the miners reported as entirely out of work, a number were shown as working at reduced time.

The unemployment volume in the building and construction trades during September was slightly in excess of that shown in the previous month, though the situation was considerably improved from September a year ago. This was evident from the reports tabulated for September from an aggregate of 199 Associations with a membership numbering 19,067 persons, 6,152 of whom were out of work on the last day of the month, a percentage of 32.3 as compared with percentages of 29.9 in August and 41.5 in September, 1935. Painters, decorators and paper-hangers, and tile layers, lathers and roofers suffered large losses in employment from August, and among bridge and structural iron workers, and brick-layers, masons and plasterers, contractions in activity of lesser degree, though noteworthy, were reflected. Electrical workers, and hod carriers and building labourers recorded moderate employment recessions, and among granite and stone-cutters, and steam-shovelmen slight adverse tendencies were noted. Carpenters and joiners, however, were afforded a somewhat better volume of work than in August and among plumbers and steam-fitters the change was very slight though favourable. In making a comparison with the returns for September of last year in the building and construction trades, carpenters and joiners, and steam-shovelmen reported extensive employment recovery during the month reviewed, and among electrical workers improvement on a much smaller scale was recorded. Among painters, decorators and paper-hangers, and brick-layers, masons and plasterers, heightened activity of rather moderate degree was manifest, plumbers and steamfitters showing but a slightly upward tendency. Granite and stone-cutters and hod carriers and building labourers, however, reflected decidedly less favourable conditions than in September, 1935, and among bridge and structural iron workers and tile layers, lathers and roofers some employment cessation was apparent.

In the transportation industries at the close of September the percentage of idleness shown was 5.8 in contrast with 5.3 per cent in August and 6.5 per cent in September a year ago. The percentage for September was based on the reports received from 812 Local Unions with a combined membership of 58,959 persons, 3,425 of whom were unemployed on the last day of the month. In the navigation division a higher level of employment was indicated than in either the preceding month or September a year ago, while among steam railway employees, whose returns constituted over 78 per cent of the total group membership reporting, and among street and electric railway employees activity eased off very slightly from August, though the trend of employment was nominally better than in September of last year. There was no change in the volume of work accorded teamsters and chauffeurs from August but minor contractions were noted from September 1935.

Retail shop clerks showed a slightly adverse employment tendency during September from the previous month, but conditions were considerably improved from September, 1935. This was evident from the reports compiled from 5 associations of these workers with 1,457 members, 5.3 per cent of whom were idle at the end of the month as compared with 4.7 per cent in August and 10.4 per cent in September, 1935.

Civic employees were more busily engaged than in either the previous month or September last year as manifest from the reports tabulated from 82 Unions, with an aggregate of 8,601 members. Of these, 190 were out of work on the last day of the month, a percentage of 2.2 in contrast with percentages of 3.7 in August and 2.9 in September last year.

The 130 organizations in the miscellaneous group of trades furnishing reports at the close of September and covering a membership of 6,356 persons, showed that 510 or a percentage of 8.0 were unemployed at the end of the month as compared with 10.2 per cent in August. A much higher level of activity was apparent than in September, 1935, when 19.4 per cent of idleness was registered. Theatre and stage employees were afforded a considerably better volume of work than in August, and among stationary engineers and firemen moderate advances were noted. The trend for unclassified workers and barbers was also upward, though the variation from August was very slight. Some falling off in available work, however, was reflected among hotel and restaurant employees. As contrast-

ed with the returns for September last year, decidedly more favourable conditions prevailed for barbers during the month reviewed, and hotel and restaurant employees were much better engaged. Increases in activity of lesser importance, were noted by theatre and stage employees and slight gains by stationary engineers and firemen, and unclassified workers.

Employment for fishermen was at a slightly lower level during September than in the preceding month, but the situation was considerably improved from September, 1935. This was apparent from the reports tabulated from 3 Unions with a membership numbering 590 persons, 6.3 per cent of whom were unemployed on the last day of the month as compared with 4.2 per cent in August and with 16.7 per cent in September a year ago.

Lumber workers and loggers showed but a fractional drop in activity during September

from the previous month, the percentage of idleness standing at 1.9 as compared with 1.5 per cent in August. This percentage for September was established from the reports received from 2 unions with 1,067 members. A greater volume of work was available, however, than in September, 1935, when 6.9 per cent of the members reported were without work.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935, inclusive, and also the percentages of unemployment by provinces for September of each year from 1919 to 1933, inclusive, and for each month from September, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for September, 1936

The volume of business transacted by the offices of the Employment Service of Canada, as shown by the average daily placements effected during September, 1936, recorded a decline of over 8 per cent from that of the previous month, and one of nearly 28 per cent from the corresponding month a year ago. Under both comparisons farming and construction and maintenance, in which group relief placements were registered, reported heavy declines, which much more than offset the gains made in services, logging and manufacturing. Trade also showed a gain over the preceding month but no change over the corresponding period last year, while mining and transportation recorded losses from August, 1936, but gains over September, 1935, no one of which was large.

The accompanying chart shows the trend of employment since January, 1934, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined sharply throughout the month, and at the close of the period under review reached levels which were from 20 to 21 points below those recorded at the end of September a year ago. The ratio of vacancies to each 100 applications was 51.3 during the first half and 42.1 during the second half of September, 1936, in contrast with the ratios

of 63.9 and 63.1 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods under review were 46.4 and 39.4, as compared with 59.1 and 59.2 during the corresponding month of 1935.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September, 1936, was 1,173, as compared with 1,259 during the preceding month and with 1,601 in September a year ago.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,540, in comparison with 2,019 in August, 1936, and with 2,521 in September last year.

The average number of placements made daily by the offices of the Service during September, 1936, was 1,080, of which 701 were in regular employment and 379 in work of one week's duration or less, as compared with a total daily average of 1,179 during the preceding month. Placements in September a year ago averaged 1,491 daily, consisting of 998 placements in regular and 493 in casual employment.

During the month of September, 1936, the offices of the Service referred 29,186 persons to vacancies and effected a total of 26,996 placements. Of these, placements in regular employment were 17,520, of which 12,438 were of men and 5,082 of women, while placements in casual work totalled 9,476. The number of vacancies reported by employers

was 18,742 for men and 10,583 for women, a total of 29,325, while applications for work numbered 63,484, of which 48,062 were from men and 15,422 from women. Reports for August, 1936, showed 32,721 positions available, 52,475 applications made and 30,651 placements effected, while in September, 1935, there were recorded 38,410 vacancies, 60,496 applications for work and 35,775 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1926, to date:—

month, but 13 per cent less than during the corresponding month of last year. There was a decrease also in placements of over 2 per cent when compared with August and of nearly 16 per cent in comparison with September, 1935. The reduction in placements from September of last year was due to a decrease under construction and maintenance, offset, in part, by a gain in logging. Small changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were logging, 78; construction and maintenance, 363; and services, 231, of which 192 were of

NOVA SCOTIA

During September, employment offices in Nova Scotia received orders for about the same number of workers as in the preceding

household workers. During the month 200 men and 86 women were placed in regular employment.

NEW BRUNSWICK

There was an increase of over 16 per cent in the number of positions offered through employment offices in New Brunswick in September when compared with the preceding month, but a decrease of over 21 per cent in comparison with the corresponding month of last year. Placements were over 13 per cent higher than in August, but nearly 26 per cent below September, 1935. A reduction in relief placements under construction and maintenance accounted for the decrease from September of last year, as a small gain in trade was offset by a loss in services, and other

\* 242 placements effected by offices since closed.

groups showed nominal changes only. Placements under construction and maintenance numbered 170 and in services, 534. Of the latter 430 were of household workers. There were 171 men and 103 women placed in regular employment.

#### QUEBEC

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec during September, was nearly 11 per cent higher than in the preceding month, but nearly 11 per cent below the corresponding month of last year. There was an increase of over 12 per cent in placements when compared with August, but a decline of nearly 20 per cent in comparison with September, 1935. A large decrease in placements under construction and maintenance accounted for the decline from September of last year. There was also a small loss in trade. Services and farming showed the only gains of importance. Placements by industrial divisions included manufacturing, 133; logging, 913; farming, 92; construction and maintenance, 150; trade, 93; and services, 2,619, of which 2,456 were of household workers. Placements in regular employment numbered 1,339 of men and 1,899 of women.

#### ONTARIO

Orders received at employment offices in Ontario during September called for over 13 per cent more workers than in the preceding month, but over 16 per cent less than during the corresponding month of last year. There was an increase of 20 per cent in placements when compared with August, but a decrease of over 16 per cent when compared with September, 1935. The decrease from September of last year was due to a large reduction in relief placements under construction and maintenance. A small loss, however, was also reported in farming. Of the gains in all other groups, those in services and logging were the largest. Placements by industrial divisions included manufacturing, 733; logging, 733; farming, 1,731; transportation, 150; construction and maintenance, 5,299; trade, 314; and services, 3,736, of which 2,490 were of household workers. There were 5,919 men and 1,660 women placed in regular employment during the month.

#### MANITOBA

There was a decline of nearly 53 per cent in the number of positions offered through employment offices in Manitoba during September, when compared with the preceding month, and of over 21 per cent in comparison with the corresponding month of last year.

Placements also were nearly 51 per cent less than in August and nearly 20 per cent below September, 1935. A large decrease in farm placements, when compared with September of last year and small losses in services and trade accounted for the decline under this comparison. Increases were reported in all other groups, but none were large. Industrial divisions in which most of the placements were effected during the month were manufacturing, 55; logging, 77; farming, 393; construction and maintenance, 779; and services, 654, of which 527 were of household workers. During the month 1,249 men and 309 women were placed in regular employment.

#### SASKATCHEWAN

Opportunities for employment, as indicated by orders received at employment offices in Saskatchewan during September, were 58 per cent less favourable than in both the preceding month and also in the corresponding month of last year. There was a decrease also in placements of nearly 59 per cent when compared with August and of over 55 per cent in comparison with September, 1935. A substantial reduction in farm placements was responsible for the decline from September of last year, as, except for minor losses in logging, trade and mining, all other groups showed improvement. Of the latter, the largest gain was in services. Placements by industrial divisions included manufacturing, 68; farming, 936; construction and maintenance, 264; and services, 785, of which 557 were of household workers. Placements in regular employment numbered 1,134 of men and 382 of women.

#### ALBERTA

During September, positions offered through employment offices in Alberta were 5 per cent higher than in the preceding month, but nearly 32 per cent below the corresponding month of last year. There was an increase in placements of 4 per cent when compared with August, but a decrease of over 31 per cent in comparison with September, 1935. A reduction in farm placements was mainly responsible for the decline from September of last year, although losses were also reported in construction and maintenance, trade and mining. The only gains of importance were in logging and services. Placements by industrial divisions included farming, 1,263; mining, 66; construction and maintenance, 335; and services, 563, of which 419 were of household workers. Placements in regular employment numbered 1,601 of men and 526 of women.

### BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during September, were over 17 per cent less favourable than in the preceding month and nearly 25 per cent below the corresponding month of last year. Slightly lower percentages of loss were reported in placements under both comparisons. A considerable reduction in placements under construction and maintenance and farming, when compared with September, 1935, accounted for the decline under this comparison. These losses, however, were partly offset by gains in all other groups, the largest of which were in services and manufacturing. Placements by industrial divisions included manufacturing, 88; logging, 90; farming, 193; construction and maintenance, 967; and services, 781, of which 502 were of household workers. There were 825 men and 317 women placed in regular employment during the month.

### Movement of Labour

During the month of September, 1936, the office of the Employment Service of Canada made 17,520 placements in regular employment, 9,537 of which were of persons for whom the employment found was outside the immediate vicinity of the office at which they were registered. Of the latter, 810 were granted the Employment Service reduced transportation rate, 723 going to centres within the same province as the despatching office and 87 to other provinces. The reduced transportation rate which is 2·7 cents per mile with a minimum fare of \$4.00, is granted by the Railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

The movement of labour in Quebec during September originated at Hull and included the transfer of 50 bushmen, 38 of whom travelled to employment in the Pembroke zone and 12 to Sudbury. Benefiting by the Employment Service reduced transportation rate in Ontario during September, 595 persons were carried to provincial centres. The Port Arthur office was

instrumental in transferring 324 bushmen, 12 saw-mill workers, 10 mine workers, 6 hotel employees and 2 painters to situations at various points in the same zone. For employment within their respective zones also the Fort William office despatched 146 bush workers, 3 mine workers, 2 taxi drivers, 1 carpenter and 1 hotel cook, and the Sudbury office 72 bush workers. At Timmins 4 miners secured certificates for Fort William and one miner for Sault Ste Marie. The Sault Ste Marie zone was also the destination of 4 carpenters shipped from Port Arthur. The 7 remaining transfers were of bushmen, journeying from North Bay to Timmins. Reduced rate certificates issued in Manitoba during September numbered 135 of which 98 were provincial and 37 inter-provincial. All of these were granted at the Winnipeg office, the movement within the province being entirely of highway construction workers for employment in the territory covered by that city office. Of the persons going outside the province, 22 bush workers, 8 mine workers, 3 farm hands, 2 cooks and 1 labourer, were bound for the Port Arthur zone, while one farm hand was carried to Weyburn. In Alberta 23 persons availed themselves of reduced rate certificates during September, these going to provincial employment. The Edmonton office effected transfers of 6 farm hands, 6 mine workers, 5 labourers, 3 bushmen and one maid, and the Calgary office of 2 farm hands within their respective zones. Vouchers of transportation were granted by British Columbia offices during September to 7 persons travelling to centres within the province. From Vancouver one cannery worker was conveyed to Kamloops and 2 hotel workers within the Vancouver zone. Destined to the Kamloops zone also were two bush workers sent from Nelson. At the New Westminster office 2 apple sorters received certificates for transportation to Penticton.

Of the 810 persons who profited by the Employment Service reduced transportation rate during September, 296 travelled over the Canadian National Railways, 501 over the Canadian Pacific Railway, 12 over the Temiskaming and Northern Ontario Railway and one over the Northern Alberta Railway.

### Building Permits issued in Canada during September, 1936

The value of the building authorized in 58 cities during September stood at \$3,644,560; this was a seasonal decrease of \$28,285 or 0·8 per cent from the total of \$3,672,845 in August, 1936, but an increase of \$312,645 or 9·4 per cent in the more significant comparison with September of last year, when the permits granted represented building valued at \$3,331,915.

The value of the building authorized in the first nine months of the present year was \$29,433,327; this was lower than the aggregate of \$36,680,796 reported in the period January-September, 1935, although it was decidedly higher than in the first nine months of either 1934 or 1933. The cumulative total for the same period in each of the last five years has been very much lower than in any

ESTIMATED VALUE OF CONSTRUCTION WORK AS INDICATED BY BUILDING PERMITS  
ISSUED BY 58 CITIES

other year on record; the wholesale prices of building materials since 1931 have also been decidedly lower than in any preceding year since 1920.

Some 50 cities furnished detailed statistics for September, showing that they had issued about 360 permits for dwellings estimated to cost approximately \$1,135,000 and more than 1,800 permits for other buildings valued at about \$2,170,000. In addition, two cities authorized engineering projects valued at \$16,270. During August, permits were granted for the erection of about 350 dwellings and 1,500 other buildings, estimated to cost approximately \$1,500,000 and \$1,850,000, respectively.

Prince Edward Island, New Brunswick, Quebec and Ontario reported moderate increases in the estimated value of building as compared with August, 1936, that of \$54,348 in Quebec being largest. In Manitoba, practically no change was indicated, while of the declines in the remaining provinces, that of \$72,794 or 50.4 per cent in Saskatchewan was most pronounced.

As compared with September, 1935, there was improvement in Prince Edward Island, Nova Scotia, Quebec, Ontario, Manitoba, Alberta and British Columbia. The greatest

gain of \$310,310 or 53.2 per cent was reported in Quebec.

Of the larger cities, Montreal, Toronto and Vancouver showed larger totals of authorized building than in August, and the value in each case was also higher than in September, 1935; in Winnipeg, there was a decline in the first comparison, but an increase over September of last year. Of the other centres, Charlottetown, Fredericton, Shawinigan Falls, Sherbrooke, Three Rivers, Fort William, Guelph, Kitchener, London, Owen Sound, Peterborough, Stratford, Sault Ste. Marie, Riverside, Woodstock, Brandon, Saskatoon, Edmonton, Nanaimo and Prince Rupert recorded increases as compared with both August, 1936, and September, 1935.

Cumulative Record for First Nine Months, 1936.—The following table gives the value of the building authorized by 58 cities during September, and in the first nine months of each year since 1920, as well as index numbers for the latter, based upon the total for the corresponding period of 1926 as 100. The average index numbers of wholesale prices of building materials in the period January–September of the years since 1920 are also given, (average 1926=100).

Year	Value of permits issued in September	Value of permits issued in first nine months	Indexes of value of permits issued in first nine months, (1926=100)	Average indexes of wholesale prices of building materials in first nine months, (Average 1926=100)
1936.....	\$ 3,644,560	\$ 29,433,327	24.5	84.8
1935.....	3,672,845	36,680,796	30.5	81.2
1934.....	2,281,874	19,715,146	16.5	82.8
1933.....	2,986,903	16,394,014	13.6	77.5
1932.....	2,449,735	35,026,190	29.1	77.6
1931.....	10,407,999	58,602,965	73.7	82.7
1930.....	11,093,020	126,361,350	105.2	92.7
1929.....	17,117,017	186,011,017	154.8	99.2
1928.....	20,374,149	165,621,634	137.8	96.7
1927.....	14,462,243	141,152,535	117.5	96.3
1926.....	11,047,503	120,163,936	100.0	100.7
1925.....	10,140,853	98,364,181	81.9	103.1
1924.....	15,055,250	96,817,333	80.6	103.2
1923.....	10,768,898	103,319,972	90.1	111.8
1922.....	11,597,034	116,778,450	97.2	103.5
1921.....	10,907,828	88,573,442	73.7	126.8
1920.....	9,842,677	96,146,278	80.0	144.2

The aggregate for the first nine months of this year was lower by 19.8 per cent than in 1935, but was substantially higher than in 1934 and 1933. The average index number of wholesale prices of building materials, though higher than in any of the years, 1931-1935, was considerably lower than in any other year since 1920.

The accompanying table gives the value of the building permits issued by 58 cities during August and September, 1936, and September, 1935. The 35 cities for which data are available since 1910 are marked thus \*.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, October, 1936, summarized the employment situation as follows:—

Employment in September showed little change on the whole, as compared with the previous month, but was much better than in September, 1935. There was an increase in employment between August 24 and September 21, in the woollen and worsted industry, pottery and earthenware manufacture, the iron and steel, engineering, shipbuilding and motor vehicle industries, metal goods manufacture, the boot and shoe industry, the dressmaking and millinery trades, furniture making, and dock and harbour service. On the other hand, there was a seasonal decline in employment in hotel and boarding house service, the distributive trades, the fishing industry, certain food preparation trades, and the building industry; there was also an increase in the numbers temporarily stopped in the coal mining industry.

It is provisionally estimated that, at September 21, 1936, the number of insured persons, aged 16-64, in employment in Great Britain exclusive of agricultural workers, was approximately 10,966,000. This was 5,000 more than at August 24, 1936, and 488,000 more than at September 23, 1935.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural workers) the percentage unemployed in Great Britain and Northern Ireland at September 21,

1936 (including those temporarily stopped as well as those wholly unemployed), was 12.4 as compared with 12.3 at August 24, 1936, and with 15.0 at September 23, 1935. In Great Britain the percentage at September 21, was 12.2, compared with 12.1 at August 24, and with 14.7 at September 23, 1935.

At September 21, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,322,934 wholly unemployed, 232,122 temporarily stopped, and 69,283 normally in casual employment, making a total of 1,624,339. This was 10,399 more than a month before but 334,271 less than a year before. The total of 1,624,339 included 1,266,428 men, 54,681 boys, 250,733 women, and 52,497 girls.

The persons on the Registers included 1,367,004 insured persons who were applying for insurance benefit or unemployment allowances, 136,695 other insured persons (including insured juveniles under 16 years of age and insured agricultural workers), and 120,640 uninsured persons. Of the 1,367,004 applicants for benefit or allowances, 690,374 had claims admitted for insurance benefit, 592,382 had applications authorized for allowances at September 21; the balance of 84,248 included 50,034 persons whose position under the conditions relating to contributions paid and benefit received had not been determined, 6,779 persons who had been disqualified for short periods from receiving benefit, and 27,435 persons whose needs had been held not to justify payment of unemployment allowances.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at September 21, 1936, was 1,689,715, as compared with 1,678,277 at August 24, 1936, and 2,032,221 at September 23, 1935.

#### United States

Approximately 355,000 workers were returned to jobs between August and September 1936 in the combined manufacturing and nonmanufacturing industries regularly surveyed by the United States Bureau of Labour Statistics. Weekly pay rolls in September were more than \$2,500,000 greater than in the preceding month.

#### MANUFACTURING INDUSTRIES

Factory employment increased 1·8 per cent between August and September while pay rolls declined 0·1 per cent over the month interval. The expansion in employment raised the September index (90·6) to the highest level recorded in any month since June 1930. With the exception of the immediately preceding month, the September payroll index (81·0) stands above the maximum registered since October 1930. Comparisons with September of a year ago show gains of 8·2 per cent in employment and 13·0 per cent in pay rolls over the year interval.

The September advance in employment is seasonal, gains having been shown from August to September in 15 of the preceding 17 years for which information is available. Factory pay rolls during the September 15th pay period have been affected to some extent each year by shut-downs for the Labor Day holiday. The effect this year, however, was greater because Labor day occurred later in the month than usual and therefore affected a larger number of reports which covered a one-week period. Other religious and State holidays also affected pay rolls to some extent in the current report.

The gains in employment over the month interval were widespread, 69 of the 90 manufacturing industries surveyed reporting more workers in September than in the preceding month. In 38 of these 69 industries, the gains ranged from 3·0 per cent to 112·2 per cent. The more pronounced increases in employment were seasonal in character, cottonseed oil-cake-meal mills reporting an increase of 112·2 per cent; fertilizers, 28·7 per cent; confectionery, 20·0 per cent; and canning, 19·4 per cent. Employment in the cash register industry increased 16·1 per cent, due largely to a resumption of operation in September, following vacation shut-downs in August. Seasonal gains were reported in jewelry, 11·7

per cent; lighting equipment, 10·3 per cent; and beet sugar, 9·1 per cent. Employment in the machine tool industry climbed to a new high for recent years following a slight recession in August which was due largely to vacation. The gain of 8·8 per cent in employment in this industry between August and September brought the September level of employment above that of any month since July 1930. Employment in the millinery industry increased 8·5 per cent (seasonal) and in the hardware industry, 7·9 per cent. The pottery and paper box industries reported gains of 6·2 per cent and 6·1 per cent, respectively, while carpet and rug firms reported a gain of 5·8 per cent, soap firms an increase of 5·7 per cent, and typewriter and parts plants a gain of 5·0 per cent. Twelve industries reported gains ranging from 4·0 per cent to 4·6 per cent, among them being industries of such major importance as electrical machinery, steam and hot-water heating apparatus, women's clothing, and furniture. Gains ranging from 3·0 per cent to 3·9 per cent were shown in 10 industries, among which were newspapers and periodicals, knit goods, chemicals, and shipbuilding. Smaller gains in employment over the month interval were reported in 31 industries among which are foundries and machine shops (2·1 per cent), blast furnaces, steel works, rolling mills (1·4 per cent), steam railroad repair shops (0·8 per cent), sawmills (1·5 per cent), millwork (1·1 per cent), cement (1·7 per cent), cotton goods (1·6 per cent), silk and rayon (2·3 per cent), leather (2·1 per cent), cigars and cigarettes (1·2 per cent), paper and pulp (1·1 per cent), rubber tires (1·9 per cent), and petroleum refining (0·5 per cent).

Among the 21 industries in which decreased employment was shown from August to September the most pronounced and the most important decline (8·5 per cent) was in the automobile industry and resulted from temporary shut-downs due to changes in models. A seasonal decline was shown in ice cream (7·8 per cent). Declines were also shown in fur-felt hats (5·4 per cent), butter (4·6 per cent), and woollen and worsted goods (4·5 per cent). Employment in the electric and steam-railroad car building industry decreased 4·2 per cent and the agricultural implement industry showed a falling-off of 3·1 per cent. Seven industries showed declines ranging from 1·2 per cent to 2·9 per cent, and the remaining seven showed decreases ranging from 0·1 to 1·0 per cent.

The indexes of factory employment and pay rolls are computed from returns supplied

by representative establishments in 90 manufacturing industries. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. They have not been adjusted for seasonal variation. Reports were received in September 1936 from 23,144 establishments employing 4,157,747 workers, whose weekly earnings during the pay period ending nearest September 15 were \$91,591,979.

*Manufacturing.*—Eleven of the 16 non-manufacturing industries regularly surveyed by the U. S. Bureau of Labor Statistics showed gains in employment between August and September and 10 industries reported gains in pay-roll totals.

*Wholesale and Retail Trade.*—Employment in wholesale trade establishments increased 1.7 percent over the month interval, according to reports received from 14,021 wholesalers employing more than one quarter of a million workers in September.

Seasonal demands caused a sharp advance in employment in retail trade establishments. Reports received from 49,997 retail outlets employing 830,342 workers in September showed a net gain of 5.4 percent in employment over the month interval. Fall buying stimulated employment in September in many lines. In the general merchandising group of retail stores, which is comprised of department, variety, general merchandise stores and mail-order houses, a gain of 11.0 percent was shown. Apparel stores also showed a pronounced seasonal expansion, employment increasing 19.1 percent over the month interval. Among the other lines of retail trade in which gains were reported were furniture, lumber and building materials, jewelry, coal, hardware, and retail food. Establishments in the retail automotive group reported a decrease of 1.3 percent in employment from August to September.

*Public Utilities.*—Each of the three public utility industries surveyed reported a small gain in number of workers between August and September. Continuing the expansion which began in March of this year, a further increase in employment of 0.3 percent was shown in the electric light and power and manufactured gas industry. The level of employment in this industry was above the maximum recorded in any month since September 1931. In the electric-railroad and motor-bus operation and maintenance industry, an increase of 0.5 percent was shown between August and September and a further slight gain in employment (0.2 percent) was shown by reports received from telephone and telegraph companies.

*Service Industries.*—Two of the five service industries surveyed reported additional work-

ers on their pay rolls in September. Dyeing and cleaning establishments reported a seasonal expansion of 3.7 percent in employment and year-round hotels also reported a seasonal gain of 0.8 percent. Insurance companies reported no change in number of workers from August to September, while in the remaining two industries, laundries and brokerage, decreases of less than one-tenth of one percent and 0.4 percent, respectively, were shown.

*Mining Industries.*—With the exception of a seasonal decline of one percent in employment in the quarrying and nonmetallic mining industry, gains in number of workers were shown in three of the remaining four mining industries surveyed. Increased activity resulted in a sharp seasonal advance in anthracite mining employment (15.9 percent), while bituminous coal mining reported a gain of 1.6 percent. A further gain in employment was shown in the metalliferous mining industry, the increase of 1.8 percent raising the September level of employment above that shown in any month since April 1931. Crude petroleum producing firms reported a small decrease in number of workers over the month interval (0.8 percent).

*Public Employment.*—During September more than 3,200,000 wage earners were employed on projects financed by The Works Program. Of this total 2,586,000 were working on projects operated by the Works Progress administration. Compared with August employment, this is an increase of approximately 100,000. The increase occurred on that part of the program operated by the Works Progress Administration and was accounted for wholly by additional employees in the drought area. Total pay-roll disbursements for all wage earners employed on projects financed by The Works Program were in excess of \$165,000,000. The value of orders placed for materials in September was \$57,000,000.

*Private Building Construction.*—Employment in the private building construction industry increased 2.2 percent over the month interval while pay rolls increased 1.5 percent. Employment in this industry in September 1936 was 23.2 percent above the corresponding month of last year and pay rolls were 36.6 percent greater than in September 1935. The reports supplied by 8,758 contractors in September 1936 covered 107,965 employees engaged in erecting, altering, and repairing private buildings. Employees on projects financed by the Public Works Administration, Reconstruction Finance Corporation funds, or regular appropriations of the Federal, State, and local governments are not included in the private building construction totals.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wage scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages

and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodeling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodeling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodeling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract

for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing

fair wage conditions have recently been executed by the Government of Canada.

#### DEPARTMENT OF MARINE

##### *Contracts in Group "A" (Construction, Remodelling, Repair, etc.)*

Construction of a combined dwelling and light, fog gun house, barn and store shed and boat house at Point Enragee, N.S. Name of contractor, Mr. John M. MacDonald, Louisburg, N.S. ### Contracts in Group "B" (Manufacture of Equipment and Supplies)

The following is a statement of contracts awarded by the Department of National Defence during the month of October, 1936, for the manufacture and repair of various classes of equipment and supplies, which contracts included in all cases the "B" labour conditions above referred to:—

Nature of contract	Contractor
Parachutes for aeroplanes....	Irving Air Chute Co., Fort Erie, Ont.
Barrack room lockers.....	Dennistell Corporation Ltd., London, Ont.
Cylinders, CO-2 (fully charged).....	C. Kirkland McLeod, Montreal, P.Q.
Reconditioning and modifying Fairchild Monoplane.....	Fairchild Aircraft Ltd., Longueuil, P.Q.
Aircraft.....	Fleet Aircraft of Canada, Ltd., Fort Erie, Ont.
Transparent hoods and wind-shields for Atlas Aircraft....	Armstrong Siddeley Motors, Ltd., Ottawa, Ont.
Aircraft.....	Canadian Vickers Ltd., Montreal, P.Q.
Aeroplane skis.....	Ottawa Car Mfg. Co., Ltd., Ottawa, Ont.
Warm greatcoats.....	Workman Uniform Co., Ltd., Montreal, P.Q.
Serge jackets, drab.....	Workman Uniform Co., Ltd., Montreal, P.Q.

Nature of contract	Contractor
Serge, drab.....	Dominion Woollens & Worstedes Ltd., Toronto, Ont.
Parts for anti-gas respirators..	B. F. Goodrich Rubber Co. of Canada, Ltd., Kitchener, Ont.
Parts for anti-gas respirators..	Coulter Copper & Brass Co., Ltd., Toronto, Ont.
Parts for anti-gas respirators..	Canadian Die Casters, Galt, Ont.
Horse rugs.....	Hugh Carson Co., Ltd., Ottawa, Ont.
Whipcord, drab.....	Dominion Woollens & Worstedes, Ltd., Toronto, Ont.
Serge trousers, drab.....	Workman Uniform Co., Ltd., Montreal, P.Q.
Tent cordage.....	Doon Twines Ltd., Kitchener, Ont.
Cloth, drab.....	Paton Mfg. Co., Montreal, P.Q.
Kahki drill.....	Montreal Cottons Ltd., Montreal, P.Q.
Boundary marker sets.....	Canadian Bridge Co., Ltd., Walkerville, Ont.
Dowty pedestals.....	B. J. Coghlin Co., Ltd., Montreal, P.Q.

### Contracts in Group "A" (Construction, Remodelling, Repair, etc.)

Reconditioning the ferry wharf and the C.N.R. wharf at Three Rivers, P.Q. Name of contractors, The Foundation Company of Canada, Ltd., Montreal, P.Q. Date of contract, September 23, 1936. Amount of contract, approximately, \$9,788. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmiths.....	\$0 55	8	44
Burners and welders, elec. acetylene.....	0 55	8	44
Carpenters and joiners.....	0 55	8	44
Cement finishers.....	0 50	8	44
Compressor operators, gas. or electric.....	0 45	8	44
Concrete mixer operators, steam.....	0 60	8	44
Concrete mixer operators, gas. or electric.....	0 45	8	44
Crane operators, gas. or electric.....	0 50	8	44
Divers (half day's pay to be allowed for work done in any forenoon or afternoon).....	1 75	8	44
Divers' tenders.....	0 50	8	44
Drill runners.....	0 45	8	44
Drivers.....	0 35	8	44
Driver, horse and cart.....	0 50	8	44
Driver, team and wagon.....	0 60	8	44
Electricians.....	0 60	8	44
Hoise runner—gas. or electric.....	0 45	8	44
Hoise runner—steam.....	0 65	8	44
Labourers.....	0 35	8	44
Machinists.....	0 55	8	44
Motor truck drivers.....	0 40	8	44
Motor truck drivers and truck—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
4 tons.....	2 40	8	44
Painters.....	0 50	8	44
Pile driver engineers.....	0 65	8	44
Pile driver firemen.....	0 40	8	44
Pile driver labourers.....	0 35	8	44
Plumbers and steamfitters.....	0 60	8	44
Plumbers and steamfitters' helpers.....	0 40	8	44
Pumpmen.....	0 45	8	44
Riggers (general).....	0 45	8	44
Rodmen—Reinforcing steel.....	0 45	8	44
Steam shovel engineers.....	0 85	8	44

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Steam shovel cranemen.....	\$0 65	8	44
Steam shovel firemen.....	0 55	8	44
Steam shovel oilers.....	0 50	8	44
Shovel operators—gas.....	0 85	8	44
Structural steel workers.....	0 75	8	44
Timbermen and cribmen (using interchangeable such tools as broad-axe, saw, hammer, cross-cut saw, adze, auger, etc.).....	0 42	8	44
Tractor operators.....	0 45	8	44
Watchmen.....	0 30	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded in this work.

	Per month and board	Customary hours
<i>Floating Derrick Crews—</i>		
Engineer.....	\$125 00	"
Assistant engineer.....	100 00	"
Fireman.....	60 00	"
Oiler.....	65 00	"
Deckhand.....	55 00	"
Watchman.....	50 00	"
<i>Tug Crews—</i>		
Captain.....	140 00	"
Mate.....	100 00	"
1st engineer.....	125 00	"
2nd engineer.....	100 00	"
Fireman.....	60 00	"
Deckhand.....	55 00	"
Cook.....	50 00	"
2nd cook.....	40 00	"
Watchman.....	40 00	"
Scowmen.....	55 00	"

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Repairing west wall of Pier No. 1, Princess Louise Docks, and construction of freight shed in Harbour, Quebec, P.Q. Name of contractors, The Ogilvie Construction Co., Ltd., Montreal, P.Q. Date of contract, September 14, 1936. Amount of contract, approximately, \$665,078. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Boatmen.....	\$0 40	8	44
Carpenters and joiners.....	0 60	8	44
Cement finishers.....	0 55	8	44
Cement and concrete mixer operators—steam.....	0 60	8	44
Cement and concrete mixer operators—gas and electric.....	0 50	8	44
Compressor operators, gas and electric.....	0 50	8	44
Crane operators—steam.....	0 60	8	44
Crane operators—gas and electric.....	0 55	8	44
Divers (half day's pay to be allowed for work done in any forenoon or afternoon).....	1 75	8	44
Divers' tenders.....	0 50	8	44
Dragline operators—steam.....	0 85	8	44

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Dragline fireman.....	\$0 55	8	44
Dragline oilers.....	0 50	8	44
Drivers.....	0 40	8	44
Drivers, horse and cart.....	0 55	8	44
Drivers, team and wagon.....	0 65	8	44
Electricians.....	0 65	8	44
Engineers, operating, steam—single or double drums.....	0 65	8	44
Firemen—stationary.....	0 45	8	44
Hoist operators, gas or electric.....	0 50	8	44
Labourers.....	0 40	8	44
Machinists.....	0 65	8	44

Dredging work in the Saguenay River, P.Q. Name of contractors, The Federal Dredging Co., Ltd., Ottawa, Ont. Date of contract, October 9, 1936. Amount of contract, approximately \$244,440.00. The General Fair Wages Clause was inserted in the contract.

Dredging work in Stokes Bay, Ont. Name of contractors, Messrs. T. H. and W. A. McKenzie, Oliphant, Ont. Date of contract, October 5, 1936. Amount of contract, approximately \$4,200.00. The General Fair Wages Clause was inserted in the contract.

*Contracts in Group "B" (Interior Fittings, etc.)*

Construction and installation of interior fittings in the public building at Stanstead, P.Q. Name of contractors, The Valley City Heating Co., Ltd., Dundas, Ont. Date of contract, August 25, 1936. Amount of contract, \$875.19. The "B" labour conditions above mentioned were included in the contract.

Construction and installation of interior fittings in the public building at Cochrane, Ont. Name of contractors, The Valley City Seating Co., Ltd., Dundas, Ont. Date of contract, September 16, 1936. Amount of contract, \$1,300.00. The "B" labour conditions above mentioned were included in the contract.

Construction and installation of interior fittings in the public building at Claresholm, Alta. Name of contractors, Canadian Office & School Furniture Ltd., Preston, Ont. Date of contract, September 23, 1936. Amount of contract, \$1,162.00. The "B" labour conditions were included in the contract.

Construction and installation of interior fittings in the public building at Okotoks, Alta. Name of contractors, A. B. Cushing Mills Ltd., Calgary, Alta. Date of contract, September 24, 1936. Amount of contract, \$1,250.00. The "B" labour conditions were inserted in the contract.

Construction and installation of interior fittings in the public building at Watford, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, October 4, 1936. Amount of contract, \$644.00. The "B" labour conditions were inserted in the contract.

Construction and installation of interior fittings in the public building at Hollyburn, B.C. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, October 4, 1936. Amount of contract, \$1,991.00. The "B" labour conditions were inserted in the contract.

Construction and installation of interior fittings in the public building at Richmond Hill, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, October 4, 1936. Amount of contract, \$737.00. The "B" labour conditions were inserted in the contract.

Construction and installation of interior fittings in the public building at Innisfail, Alta. Name of contractors, W. H. Cushing Ltd., Calgary, Alta. Date of contract, November 5, 1936. Amount of contract, \$1,070.00. The "B" labour conditions were inserted in the contract.

Construction and installation of interior fittings in the public building at Penticton, B.C. Name of contractors, A. B. Cushing Mills Ltd., Calgary, Alta. Date of contract, October 20, 1936. Amount of contract, \$2,650.00. The "B" labour conditions were inserted in the contract.

Construction and delivery of metallic fittings for the new public building at Hamilton, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, October 16, 1936. Amount of contract \$4,117.07. The "B" labour conditions were inserted in the contract.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given; with other information of general interest.

### Manufacturing: Pulp, Paper and Paper Products

**THOROLD, ONTARIO.**—**ONTARIO PAPER COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE & PAPER MILL WORKERS AND OTHER UNIONS.**

The agreement which came into effect June 24, 1934 and was summarized in the *LABOUR GAZETTE*, October, 1934, page 964, and renewal noted in the *LABOUR GAZETTE*, December, 1935, page 1153, was again renewed without change from May 1, 1936 to May 1, 1937.

**THOROLD, ONTARIO.**—**BEAVER WOOD FIBRE COMPANY, LIMITED, AND THE BEAVER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS.**

Agreement to be in effect from May 1, 1936 to May 1, 1937. If either party wishes a change, notice to be given 30 days before expiration date.

If any question of jurisdiction comes up between the labour unions, it shall be decided by the American Federation of Labour and the Trades and Labour Congress of Canada. Only members of the Paper Makers' Union, assisted by swipers, sweepers and labourers to clothe and operate paper machines.

Hours: 8 per day, 6 days per week, a 48 hour week.

Overtime for day workers except if called after regular hours for repair work, time and one-half; day workers called after regular hours for repair work to receive at least 4 hours pay.

A tour worker who is not relieved by the next tour man, to continue to work the second tour. If called on for overtime work at other than tour work, time and one-half to be paid. Work between 8 a.m. Sunday and 8 a.m. Monday and work on Dominion Day, Labour Day and Christmas Day, time and one-half.

Wages: the agreement provided that wage rates were to be decided later at a joint meeting. It was reported in the press that it was decided that from October 1, 1936, wage rates of under 45 cents an hour be increased by 10 per cent and those over 45 cents per hour by 5 per cent.

In making promotions or in reducing staff, preference to be given to men older in the service, when efficient.

No strikes or lockouts to occur during the period of the agreement. Provision is made for the settlement of disputes through reference to the superintendent and union officers, and if necessary to a board of arbitration whose decision will be final.

**IROQUOIS FALLS, ONTARIO.**—**ABITIBI POWER AND PAPER COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL No. 90.**

This agreement covers railway employees on the railway division operated by the Woods Department of the Company at Iroquois Falls, but does not include construction work.

The agreement was made May 1, 1934 to run to May 1, 1935 and thereafter from year to year until notice.

Men working more than 30 days to be considered permanent employees and must belong to the union except mechanics and mechanics' helpers who belong to the International Association of Machinists. The Company will deduct \$1 per month from each man's pay to be given to the Union to cover dues, if such man so authorizes them.

Hours: 6 per day, 6 days per week, a 36 hour week.

Overtime to be paid only to car repairmen at Iroquois Falls, car foreman, mechanics, mechanics' helpers and hostlers for time worked in excess of 8 hours in a day. Any man called to work one hour or more after work finished, if not previously notified, to be paid for at least 4 hours. All employees to be paid time and one-half for work on Sundays and on Dominion Day, Labour Day and Christmas Day.

Wages per hour: locomotive engineers, conductors, locomotive crane engineer 75 cents; locomotive firemen, brakemen, locomotive crane fireman 64 cents; section gang foremen 70 cents; section gang labourers 43 cents; gasoline mechanic and runner 69 cents; car foreman, mechanics 80 cents, car repairman at Iroquois Falls 69 cents; mechanics' helpers, hostlers, 55 cents.

Provision is made for the settlement of disputes through reference to the management and union officers and, failing this, to arbitration. If a third member of the arbitration board cannot be agreed upon, the Minister of Labour will be asked to appoint one.

**PORT ARTHUR, ONTARIO.**—**PROVINCIAL PAPER LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS.**

The agreement which came into effect June 1, 1934 and was summarized in the *LABOUR GAZETTE*, December, 1934, page 1148, has been

renewed from May 1, 1936 to May 1, 1937, and thereafter from year to year until notice. Certain adjustments in wages have been made over those shown in the LABOUR GAZETTE, December, 1934.

Hourly wage rates, May 1, 1936 for those classes which have been changed: Wood room foreman, 61 cents, acid makers, 61 cents; digester house—cooks, 78 cents, cooks' helpers, 55 cents, liquor men, 61 cents; sulphite machine room foreman, 61 cents; groundwood mill foreman, 65 cents, other groundwood mill employees, 43 to 46 cents; mechanics, 69 to 73 cents, mechanics' helpers, 53 to 56 cents, apprentice mechanics, 43 to 53 cents; head painter, 64 cents, painter helper on gun work, 56 cents; alternate engineer in boiler house, 66 cents, turbine operators, 66 cents. In paper mill, beater engineer, 79 cents, machine tenders, 95 cents and \$1.13, back tenders, 78 and 96 cents, third hand, 71 and 74 cents, fourth hand, 57 and 58 cents, fifth hand, 50 and 52 cents, clothing man, 68 cents; in finishing room—stack runners, 67 and 69 cents, head loader, 51 cents, assistant foreman, 61 cents; other employees, 43 to 51 cents.

**FORT WILLIAM, ONTARIO.—GREAT LAKES PAPER COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS.**

Agreement to be in effect from May 1, 1936 to May 1, 1937 and thereafter from year to year until notice.

Preference of employment to be given union members; others employed permanently must join their respective union.

Hours: 8 per day, a 48 hour week.

Overtime for day workers and for tour workers on other than tour work, time and one-half. Work between 8 a.m. Sunday and 8 a.m. Monday and on Dominion Day, Labour Day, Christmas and New Year's Day, time and one-half.

No strike or lockout to occur during the time of the agreement. Provision is made for the settlement of disputes through the management and the union, or if necessary by arbitration.

If the third member of such arbitration board cannot be agreed upon, the Federal Minister of Labour will be asked to appoint him.

Wages per hour in paper mill: machine tenders, \$1.56 and \$1.68, back tenders, \$1.39 and \$1.51, third hand, \$1.03 and \$1.11, fourth hands, 65 cents, fifth hands, 55 cents, sixth hands, 45 cents; boss machine tender, 10 cents per hour per machine higher than the rate paid to the highest machine tender; clothing man, \$1.03, rewinderman, 63 cents, rewinder helper, 45 cents, boss oiler, 71 cents, oilers, 54 cents, beater engineers, 77, 78 and 89 cents.

Wages per hour for pulp and sulphite workers: wood yard—tour foremen, 52 cents, others, 43 to 47 cents; groundwood mill—sharpeners, 57 cents, grindermen and screenmen, 46 cents, others, 43 cents; sulphite mill—cooks, 83 cents, lead burner, 71 cents, acid makers, 69 cents, cooks' helpers, 54 cents, deckerman, 48 cents, blowpit men, 45 cents, sulphur and stonemen, 44 cents; chipper—saw sharpener, 71 cents, labourers, 43 cents; beater room—broke beatermen, 44 cents; paper mill—cleaners, 43

cents; finishing room—truckers and crane operators, 49 cents; weighman, 47 cents, boss coreman, 46 cents; coreman, 43 cents, finishers, headermen, carmen, loader and checker, 45 cents, sampler and warehouseman, 43 cents; electrical department—operators, 73 cents, maintenance men, 71 cents, electrician's helper, 54 cents; yard—labourer, 43 cents; boiler house—shift engineers, 73 cents, repair man, 71 cents, electric boiler operators and fireman, 59 cents, filter pump house operators, 45 cents, coal and ash handlers, 44 cents; mechanical department—crane engineers, 72 cents, millwrights, roll grindermen, machinists, blacksmiths, tin-smiths, pipefitters, 71 cents; concrete man and painter, 60 cents, machinists' helpers, 59 cents, blacksmiths' helpers, pipefitters' helpers, millwrights' helpers, 54 cents, boss rigger, 49 cents, pipe machine man and crane fireman, 48 cents, oilers, 46 cents, riggers, 45 cents.

**KENORA AND FORT FRANCES, ONTARIO.—KENORA PAPER MILLS, LIMITED, FORT FRANCES PULP AND PAPER COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCALS Nos. 238 (KENORA) AND 306 (FORT FRANCES)**

Agreement in effect from May 1, 1936 to May 1, 1937. This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, December, 1935, page 1154, except for certain wage increases made in accordance with the standard rates which vary with the size and speed of the paper machines.

**Transportation and Public Utilities: Street and Electric Railways:**

**HALIFAX, N.S.—NOVA SCOTIA LIGHT AND POWER COMPANY, LIMITED, AND THEIR EMPLOYEES OF THE STREET CAR OPERATION, STREET CAR MAINTENANCE, ELECTRICAL DISTRIBUTION, POWER HOUSE AND SUBSTATION AND GAS DEPARTMENTS.**

### General

The agreement is in effect from June 1, 1936, to May 31, 1937, and thereafter until either party gives one month's notice of termination. Modification of this agreement may be made at any time by mutual consent. Such change to be written and signed by both parties.

Minimum wage rate for regular employees. 38 cents per hour, except employees kept as watchmen, messengers or at other work lighter than their original duties, for whom wage rates and hours to be decided by the Company.

Employees to be considered for promotion in the order of ability and seniority. Free transportation to be furnished employees after six months' service.

All employees after one year's service to have one week's holiday per year. For this week regular operators on the street railway will be paid \$18, spare operators \$13.50, trackmen and hillmen \$12.50. Shops, light and power and gas departments to be paid 60 per cent of weekly pay, with a minimum of \$13.50 (except gas department where minimum is \$12) and a maximum of \$16.50.

Officials of the Company will meet and treat with a duly authorized committee of the employees; such committee must always contain at

least one employee of the department, the affairs of which are being discussed. If such officials do not satisfy the committee they may appeal to the Manager or the Board of Directors. If the committee does not satisfy the Board of Directors or the Manager, they or he may call a general meeting of the employees and treat with them direct. All charges laid against any employee will be fully investigated by an official selected by the Company, and if the employee is found not guilty he will be reinstated and paid for time lost.

#### *Platform Employees*

Except in case of emergency, regular men will have one day off in every eight days in regular rotation.

Overtime to be paid for at the rate of time and one half for time in excess of the regular schedule run for regular men and time in excess of 9½ hours in any one day for spare man, but not to include the time cars are late. On Sundays and seven specified holidays, 10 cents per hour to be added to the regular rate of all men working.

Wages per hour for car operators: first year's service 46 cents, second year's service 48 cents, third year's service 53 cents, over three years' service 58 cents. Operators instructing new employees to be paid 10 cents per hour extra.

The Company to pay half the cost of uniforms for employees with less than three years' service and the total cost of the uniforms for all other employees.

In case an employee is involved in a serious accident or his accident record indicates an investigation at the instance of the Company, it will be referred to a joint Committee whose report will be considered by the Manager.

#### *Car House and Machine Shop Employees*

Hours: 8 per day, 4 on Saturdays, a 44 hour week, but such employees as are regularly required will work longer hours at their straight time rate. Night men to work 8 hours with 20 minute allowance off for lunch, but one night foreman and such other employees as are regularly required will work at night for longer hours at their straight time rate.

Overtime: regular employees to be paid time and one half for time worked in excess of their regular day's work; double time for work on Sundays and holidays except for regular night men. If called for work after hours and before midnight, at least three hours' pay at the regular rate; if called after midnight at least four hours' pay at the regular rate.

Wages per hour in Car House: first class carpenters 69 cents, second class carpenters 63 cents, third class carpenters 57 cents, carpenters' helpers 50 cents, first class painters 69 cents, second class painters 63 cents, third class painters 57 cents, head repairman 69 cents, armature winders 74 cents; first class pitmen and special repairmen 65 cents, second class 63 cents, third class 58 cents; general utility man (experienced) 58 cents, second class 50 cents; car cleaners 50 cents, cleaners general 48 cents.

Wages per hour in machine shop: first class machinists 74 cents, second class 68 cents, third class 60 cents, welders 74 cents, blacksmiths 68 cents, blacksmiths' helpers 52 cents.

#### *Rail Attendants*

Regular hours for rail attendants to be not less than 8 hours per day, 7 days per week. Overtime to be paid at straight time. The Company to furnish rubber boots and weather proof clothing as required.

Wages: men engaged in cleaning, sanding and greasing the tracks and doing general attendance work on same to be paid 42 cents per hour on week days and 50 cents per hour on Sundays and holidays.

#### *Track Department*

Regular trackmen and chauffeurs to be paid 10 cents per hour extra on night jobs and for repair work on Sundays and seven specified holidays.

For work during wet and stormy weather, to be furnished with rubber boots and weather proof clothing as required.

#### *Power Receiving, Operating and Distributing Department*

Hours: 8 per day, 4 on Saturdays, a 44 hour week. Any employee called after hours and before midnight to be paid not less than 3 hours pay at regular rate; if called after midnight not less than 4 hours at regular rate. Regular hours for troubleshooters to be from 2 p.m. to 11 p.m. with one hour off for lunch, 7 days per week. Regular hours for switchboard operators 8 hours per day, revolving shift, with one day off in every 8 days in regular rotation.

Overtime: time and one half. Any employee, except regular seven day men and men relieving troubleshooters and switchboard operators, working on Sundays or on seven specified holidays, double time.

Wages per hour for power house, line and meter employees: first class linemen 74 cents, second class 68 cents, third class 63 cents; first class groundmen 53 cents, second class 47 cents; troubleshooters 74 cents, meter inspector 74 cents; first class metermen 68 cents, second class 63 cents, third class (with over one year's service) 58 cents; lamp repairmen 74 cents, switchboard operators 69 cents, switchboard electricians 79 cents; first class electricians 74 cents, second class 69 cents, third class 60 cents.

#### *Steam Department*

Hours: 8 per day, 4 on Saturdays, a 44 hour week. Firemen's regular hours 8 per day, 7 days per week, revolving shift.

Overtime: time and one half. Any employee except regular 7-day men and men relieving firemen to be paid double time for work on Sundays and holidays. Any employee called outside regular hours to be paid 3 hours pay if he begins such work before midnight and 4 hours pay if he begins after midnight.

Wages per hour: masons and boiler repairmen 63 cents, senior steam helpers 61 cents, junior steam helpers 47 cents, ash handlers 50 cents, firemen 61 cents, assistant firemen 54 cents.

#### *Gas Department*

Hours: revolving shift men will work 8 hours per day, 7 days per week; other employees 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one half. Any employee, except 7-day men, working on Sundays and seven specified holidays, double time.

Wages per hour: first class fitters 74 cents, second class fitters 65 cents, fitters' helpers 58 cents, meter repairmen 58 cents, meter repairmen's helper 47 cents; blacksmith 63 cents, skilled labour 48 to 53 cents, common labour 38 to 47 cents, leading firemen 65 cents, firemen 57 cents.

### Quebec Collective Labour Agreements Extension Act

The following agreement and amendment to an agreement have recently been made obligatory by Orders in Council and are noted in the next article of this issue:

Printing Trades, Chicoutimi.

Fur Workers, Montreal (Amendment).

### Industrial Standards Act of Ontario

The following schedules have been made binding by Orders in Council and are summarized in the article beginning on page 1080 of this issue:

Plumbers and Steamfitters, Hamilton.  
Bricklayers and Stonemasons, Ottawa.  
Electrical Workers, Ottawa.  
Painters, Paperhangers and Glaziers, Ottawa.  
Building Labourers, Ottawa.  
Millinery Workers, Province of Ontario.

### Industrial Standards Act of Alberta

The following schedule has been made binding by an Order in Council and is summarized in the article beginning on page 1082 of this issue:

Plumbers and Steamfitters, Edmonton.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension by Order in Council of an agreement affecting printing trades at Chicoutimi and an amendment to the Order in Council affecting fur workers in Montreal. In addition, requests for amendment to the Order in Council affecting glove cutters (fine gloves) throughout the Province and printing trades at Montreal was published in the *Quebec Official Gazette* of October 10, and for amendments to the Order in Council affecting building trades in Montreal and the men and boys' clothing industry throughout the Province in the issue of October 31.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issues of June, 1935, page 526, and July, 1936, page 697. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, ob-

jections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

PRINTING TRADES, CHICOUTIMI.—An Order in Council, approved September 25 and published in the *Quebec Official Gazette* October 3, makes obligatory the terms of an agreement between certain newspaper and job printers and Le Syndicat Catholique et National des Im-

primeurs de Chicoutimi (The National Catholic Union of Printers of Chicoutimi). The territorial jurisdiction comprises the counties of Chicoutimi, Lake Saint John, Roberval and Charlevoix-Saguenay.

The Order in Council is similar to the one formerly in effect and summarized in the *LABOUR GAZETTE*, September, 1935, page 867, with these exceptions:

Double time is to be paid for any work on Sundays and eight specified holidays.

The regular wage rate for journeymen typographers, pressmen, bookbinders or stereotypers remains at 52 cents per hour with a 40 hour week, but it is now provided that the Joint Committee may fix a lower rate for any handicapped worker.

One apprentice allowed for the first three journeymen typographers or pressmen or fraction thereof and one apprentice for any additional three journeymen or fraction thereof.

**FUR WORKERS, MONTREAL.**—An Order in Council, approved September 25 and published in the *Quebec Official Gazette* October 3, amends the previous Order in Council for this industry (*LABOUR GAZETTE*, June, page 548) by providing for wages and hours in Zone II, that is that territory of the jurisdiction which is 40 miles around and beyond Zone I. (Zone I consists of the Island of Montreal and ten miles from its limits).

All establishments in Zone II employing more than three workers to be governed by the same conditions as in Zone I. All establishments in Zone II with three or less workers may work 48 hours per week, with time and one half for overtime and the same weekly wage rates as in Zone I.

Lining makers shall be considered as second class female operators.

Female apprentices to be paid according to the Orders of the Women's Minimum Wage Commission.

## INDUSTRIAL STANDARDS ACT OF ONTARIO

### Schedules of Wages and Hours Recently Approved by Orders in Council

**THE** Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, 1935, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedules shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the *LABOUR GAZETTE*, summaries are given in this article of the schedules which have thus been approved.

**PLUMBERS AND STEAMFITTERS, HAMILTON.**—An Order in Council, dated October 8, and published in *The Ontario Gazette*, October 17, makes obligatory the terms of a schedule affecting the plumbing and heating trades in a zone which includes the City of Hamilton and surrounding district as defined in the Order in Council.

The Order in Council is in effect from October 27, 1936, "during pleasure."

The provisions of the Schedules do not apply to regular employees of industrial or manufacturing plants or establishments, who are engaged in manufacturing processes, or in the repair servicing or upkeep of the plant or equipment or on new installations, alterations or extensions of a minor nature in or to the plant or its equipment, nor does it apply to sprinkler fitting.

Hours: 8 per day (from 8 a.m. to 5 p.m. with one hour for lunch or from 8 a.m. to 4.30 p.m. with one-half hour for lunch, from Monday to Friday inclusive, a 40-hour week. In case of shift work, the night shifts to consist of 7 hours for which time and one-seventh the regular rate to be paid; no overtime allowed on shift work.

Work on Saturday before noon which is required for the protection of life or property and the setting of sleeves and inserts to be paid for at regular rates. All other work done outside the regular hours noted above and between 1 a.m. Monday and 8 a.m. Saturday to be paid at time and one-half. Work on Saturday except as above noted, and on Sundays and eight specified holidays, double time.

Minimum wage rate for journeymen: 80 cents per hour.

Apprentices to be governed by the Ontario Apprenticeship Act, but whenever the Act does not govern the employment of fifth year junior mechanics, they shall be governed by this schedule except that the minimum wage rate is two-thirds of the journeymen's rate.

**BRICKLAYERS AND STONEMASONS, OTTAWA.**—An Order in Council, dated October 8 and published in *The Ontario Gazette*, October 17, makes obligatory the terms of a schedule affecting the bricklaying and stonemasonry trades in a zone which includes the city of Ottawa and surrounding district which is defined in the Order in Council.

The Order in Council is in effect from October 27, 1936, "during pleasure."

The schedule does not apply to regular employees of industrial or manufacturing plants or establishments engaged in work in connection with repairing and maintaining the buildings of such plants, or on new structures, alterations or extensions of a minor nature in or to such plants or their equipment. The schedule does not apply on work contracted for and accepted before August 25, 1936.

Hours: 8 per day (from 8 a.m. to 5 p.m. with one hour for lunch, or from 8 a.m. to 4.30 p.m. with one-half hour for lunch) from Monday to Friday inclusive and from 8 a.m. to 12 noon on Saturdays, a 44 hour week. Night work of not more than 8 hours duration, which cannot be done during a regular day to be paid regular rate. Whenever shift work is being done, any 8 hours to be a regular working day, but work on the night shifts to be paid for at the rate of 8 hours' pay for 7 hours' work or 97 cents per hour. No overtime permitted when there is shift work.

Overtime: Work on Saturdays after 12 noon required for the pouring of concrete or on work necessary for the protection of life or property to be paid at the regular rate. Other overtime between 5 p.m. and 10 p.m. on Mondays to Fridays inclusive and between noon and 5 p.m. Saturdays, time and one-half. All other overtime, including work on Sundays and five specified holidays, double time.

Minimum wage rate for journeymen bricklayers and stonemasons: 85 cents per hour. A special minimum rate may be established by the Advisory Board for any handicapped person.

Apprentices to be governed by the Ontario Apprenticeship Act.

**ELECTRICAL WORKERS, OTTAWA.**—An Order in Council, dated October 8 and published in *The Ontario Gazette* October 17, makes obligatory the terms of a schedule governing the electrical repair and construction trade in a zone which includes the city of Ottawa and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from October 27, 1936, "during pleasure."

The schedule does not include regular employees of industrial or manufacturing plants or establishments engaged in manufacturing processes, in the repair, servicing or upkeep of the plant and equipment used in the operation of such plant or establishment, in work in connection with new installations, alterations or extensions, of a minor nature in or to such plant or its equipment, nor to those engaged in repairing or servicing electrical machines or appliances when the work is done in commercial establishments or when done by regular employees of manufacturers or their agents pursuant to the terms of a guarantee or contract accompanying the sale or installation of

such machines or appliances. The schedule also does not apply on work contracted for and accepted before August 26, 1936.

Hours: 8 per day (from 8 a.m. to 5 p.m. with one hour for lunch or from 8 a.m. to 4.30 p.m. with one half hour for lunch) from Monday to Friday inclusive, a 40 hour week. Work on Saturday mornings that is immediately necessary for the protection of life or property to be considered as regular working hours. Work which cannot be done during regular working hours may be done at night at regular rates for 8 hours. Whenever shift work is being carried on, any 8 hours will be considered a regular working day, but those working on the night shifts to be paid 8 hours' pay for 7 hours' work or 80 cents per hour; no overtime permitted on shift work.

Overtime: overtime work after 5 p.m. on Mondays to Fridays inclusive and after noon on Saturdays to be paid at time and one-half. All work on Sundays and eight specified holidays, double time.

Minimum wage rate for journeymen electrical workers: 70 cents per hour. A special minimum rate may be established by the Advisory Board for any person who is handicapped.

Apprentices to be governed by the Ontario Apprenticeship Act.

**PAINTERS, PAPERHANGERS AND GLAZIERS, OTTAWA.**—An Order in Council, dated October 8 and published in *The Ontario Gazette* October 17, makes obligatory the terms of a schedule governing the painting, decorating, paperhanging and glazing trades in a zone which includes the city of Ottawa and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from October 17, 1936, "during pleasure."

The schedule does not include regular employees of manufacturing plants while engaged in manufacturing processes or on the repair, servicing or upkeep of the plant and equipment of such establishment, or on new installations or alterations of a minor nature.

Hours: 8 per day (from 8 a.m. to 5 p.m. with one hour for lunch or from 8 a.m. to 4.30 p.m. with one-half hour for lunch) from Monday to Friday inclusive, 4 hours on Saturdays (from 8 a.m. to 12 noon), a 44 hour week. Night work of not more than 8 hours' duration, which cannot be performed during a regular working day, will be considered as if performed during regular hours. Spray painting in industrial or manufacturing plants which cannot be done during the regular working periods without interfering with the operation of such plant, may be done on Saturday afternoon at the regular rate of wages provided that the hours of any painter on such work do not exceed 44 hours in the next week including such Saturday afternoon work. In case of shift work, any 8 hours is considered a regular day's work, and no overtime is permitted on shift work.

Overtime work between 5 p.m. and 6 p.m. from Monday to Friday inclusive, time and one-half, except that no person may work more than 5 hours' overtime in any week. All other overtime, including work on Saturday afternoons, Sundays and eight specified holidays, double time.

Minimum wage rate for journeymen: 65 cents per hour; spray painting 80 cents per hour.

A special minimum rate of wages may be established by the Advisory Board for any person who is handicapped.

Apprentices to be governed by the Ontario Apprenticeship Act.

**BUILDING LABOURERS, OTTAWA.**—An Order in Council, dated October 8 and published in *The Ontario Gazette* October 17, makes obligatory the terms of a schedule governing common labourers in the building trades in a zone which includes the city of Ottawa and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from October 27, 1936, "during pleasure."

The schedule does not apply on work contracted for and accepted before August 25, 1936.

Hours: 50 per week. In case of shift work, no person may work on more than one shift of 9 hours in any 24 hours.

Minimum wage rate for common labourers in the building trades: 40 cents per hour. A special rate may be established by the Advisory Board for any handicapped person.

**MILLINERY WORKERS, PROVINCE OF ONTARIO.**—An Order in Council, dated October 22 and published in *The Ontario Gazette* October 31, makes obligatory the terms of a schedule affecting the millinery industry throughout the Province of Ontario.

The Order in Council is in effect from November 10, 1936, "during pleasure."

The schedule does not apply to persons employed or engaged in any retail establishment on making alterations required in connection with the sale of headwear to individual customers, or in making up hats to the order of individual customers in retail custom millinery shops unless more than eight persons are employed in such retail custom millinery shop.

Hours: 8 per day (from 8 a.m. to 5 p.m. or from 8.30 a.m. to 5.30 p.m., with one hour for lunch) from Monday to Friday inclusive, a 40 hour week. Sample makers may work 4 hours Saturday morning, but not more than four employees, including not more than one operator and one blocker may be so employed in any one establishment.

Overtime: no overtime permitted except that the Minimum Wage Board may issue to each

employer forty overtime permits during each twelve month period from the date this schedule comes into force, each of such permits to be for one day only for a maximum period of 3 hours and the permits shall not be issued so that any employer may operate his establishment for more than 10 hours' overtime in any one week and 100 hours in the year. All overtime to be paid at time and one-half.

Minimum wage rates per week in Toronto and within 50 miles of its limits: class A (hand blockers) \$32, class B (blockers, pouncers and buffers, operators, cutters) \$19, class C (drapers) \$19, class D (trimmers and preparers) \$15. For establishments situated more than 50 miles from the limits of the city of Toronto, these minimum rates may be reduced by 12½ per cent. A special wage rate may be fixed by the Advisory Board for any employee whose skill and ability is found by the Board to be below the average. The Board may also fix a special wage rate for any employee performing more than one operation or who does work partially covered by this schedule and partially not so covered.

"Nothing in or concerning this schedule shall be so construed or applied as to imply the right of any employer, during the period in force hereof, to reduce or lower the scale of wages now being paid to any specific worker, nor to prejudice or affect any rights legal or equitable of any worker or group of workers under any collective bargain or other arrangement or agreement, whether now prevailing or later to be concluded, or in respect to any acts or conduct seeking to secure any such collective bargain, arrangement or agreement other than to the full extent to which any such collective bargain, agreement or arrangement purports to provide for lower wages or more or different hours of work than as herein set out and provided."

"Whenever any person, or firm, or corporation, whether retailer, jobber, contractor or manufacturer, shall give work to other persons, firms or corporations, whether to outside shops or otherwise, such person, firm or corporation so supplying work shall be deemed an employer of and shall be responsible for the paying of wages (according to the minimum standards provided by this agreement) to any person performing any of the operations covered by this agreement."

## INDUSTRIAL STANDARDS ACT OF ALBERTA

### Schedule of Wages and Hours Recently Approved by Order in Council

**THE** Industrial Standards Act of Alberta, 1935, is similar to the Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, 1935, page 534, where are also noted the minor differences between the Ontario and Alberta Acts. The Act provides that the Minister of Trade and Industry for Alberta, may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in any industry in any zone or zones, to investigate the conditions of

labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry and district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation the Lieutenant Governor in Council may declare such

schedule to be in force for a period not exceeding twelve months, and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after the publication of the Order in Council in *The Alberta Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Previous schedules under this Act have been summarized in the LABOUR GAZETTE, September, 1935, April, July and September, 1936.

**PLUMBERS AND STEAMFITTERS, EDMONTON.**—An Order in Council, dated October 9 and published in *The Alberta Gazette* October 15, makes obligatory a schedule of wages and hours for all employees and employers engaged in the plumbing, steamfitting, gas fitting and pipe fitting industry in a zone which includes

the City of Edmonton and surrounding district.

The Order in Council is to be in effect from October 25, 1936, to October 24, 1937.

Hours: 8 per day (from 8 a.m. to 5 p.m.) with one hour for lunch from Monday to Friday inclusive; not more than 40 hours per week except in cases of emergency.

Overtime: time and one half until midnight; after midnight, double time. Jobbing work and emergency work on Saturday mornings, however, to be paid for at single time. Saturday afternoons to 5 p.m., time and one half; all other work on Saturdays and all work on Sundays and six specified holidays, double time.

Minimum wage rate for plumbers and steamfitters: 95 cents per hour.

For work out of town, transportation both ways and pay for travelling time for all journeymen to be paid by the employer. If when travelling at night a sleeping berth is provided, however, only the time of the ordinary working hours to be paid for. In addition, the employer will provide board for one journeyman plumber and one journeyman steamfitter on each out of town job.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was slight, both the cost of the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being however somewhat higher than in September.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was \$8.24 at the beginning of October as compared with \$8.28 for September; \$7.93 for October, 1935; \$6.67 for March, 1933 (the low point in recent years); \$11.68 for October, 1929; \$11.48 for October, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.99 for October, 1914. The cost of potatoes was substantially lower in October, 1936, than in the previous month and there were less important decreases in beef, mutton and pork. Advances were recorded in the cost of eggs, milk, butter, cheese, bread, flour and rolled oats. Including the cost of fuel and rent with that of foods the total budget cost \$16.87 at the beginning of October and \$16.84 at the beginning of September. A seasonal advance occurred in the cost of United States anthracite coal and increases in rent were reported from several cities. Comparative figures for certain earlier dates are \$16.42 for October, 1935; \$15.41 for June, 1933 (the low point in recent years); \$21.96 for October, 1929; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.48 for October, 1914.

In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was

slightly higher week by week than in September. The high point since the recovery in prices began in 1933 was reached in the second week of the month under review, since when a slight decline has occurred. Figures for the index number are 76.8 for the week ended October 30; 76.9 for the week ended October 23; 77.1 for that of October 16; 76.7 for that of October 9; and 76.7 for that of October 2. The latest figures available on a monthly basis are for September, when the index was 76.4 as compared with 73.1 for October, 1935; 71.3 for October, 1934; 63.5 for February, 1933 (the low point in recent years); 96.8 for October, 1929; 99.6 for October, 1921; 164.3 for May, 1920 (the post war peak); and 66.8 for October, 1914. The movement in grain prices continued to be an important factor in the changes in the index number. Grains advanced in price during the first half of the month, influenced by unfavourable crop conditions in Australia and then declined in the last half when export demand for Canadian grain became less. Non-ferrous metals also were substantially higher in price, copper being prominent in the movement in this group. In textiles the price of raw silk was considerably higher in both Japanese and American markets. In the animal products group live stock and meats were lower.

### Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of October of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed

houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climate conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed

houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since

(Continued on page 1092)

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 30, 1936, monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1084)

1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

The movement in meat prices was slight but the tendency was downward, the principal decreases being in fresh pork roast which declined from an average of 22.4 cents per pound in September to 21.7 cents in October, mutton which declined from 22.3 cents in September to 21.1 cents in October and in sirloin steak which declined from 23.4 cents per pound to 23.1 cents. Egg prices were higher in most localities, fresh averaging 35.5 cents per dozen in October and 33.5 cents in September, and cooking averaging 29.6 cents per dozen in October as compared with 28.5 cents in September. Milk averaged fractionally higher, seasonal increases being reported from several localities. The price of creamery butter averaged lower in many cities, chiefly in Ontario, the Dominion average being down from 29.6 cents per pound to 29.3 cents, while dairy butter advanced from 25.4 cents per pound to 25.8 cents. Cheese averaged one-half cent per pound higher at 22.4 cents per pound. In-

creased bread prices were reported from several cities and the Dominion average price was 6·5 cents per pound in October as compared with 6·4 cents in September and 6·2 cents in August. Flour has advanced gradually from an average of 3·4 cents per pound in July to 3·8 cents in October. Canned tomatoes also advanced over this same period from 11·4 cents per tin in July to 12·3 cents in October. Dried beans again advanced in most cities, the Dominion average being about one-half cent per pound higher, while onions declined from 4·2 cents per pound to 3·6 cents. Potatoes were generally lower decreases being greatest in Ontario and the Prairie Provinces. Prices were, however, considerably lower in the Maritime Provinces and in Quebec than in other parts of the Dominion. The average

price was \$1·58 per ninety pounds in October as compared with \$1·87 in September and \$2·17 in August. United States anthracite coal was higher in several cities and the Dominion average price increased from \$14·53 per ton in September to \$14·65 in October.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$14·50; Charlottetown, \$12·90; Moncton, \$16; Saint John, \$13; Quebec, \$13·50; Three Rivers, \$15; Sherbrooke, \$15·85; St. Hyacinthe, \$13; Montreal, \$14; Ottawa, \$15·25; Kingston, \$14·50; Belleville, \$15; Peterborough, \$16·75; Oshawa, \$14·75; Toronto, \$14·50; St. Catharines, \$15; Hamilton, \$14·50; Brantford, \$16·50; Galt, \$16; Sudbury, \$17·50; Cobalt, \$18; Timmins, \$18; Sault Ste. Marie, \$14; Port Arthur, \$17·25; Fort William, \$17·25; Winnipeg, \$20.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 96·1 for September, an advance of 0·9 per cent for the month. Except for slight decreases in cotton and other textiles except wool, all groups showed small advances over the August level.

The *Statist* index number, on the base 1867-1877=100, was 90·1 at the end of September, an increase of 1·6 per cent for the month. The principal advances were in the vegetable food and the minerals groups.

COST OF LIVING.—The Ministry of Labour's index number, on the base July, 1914=100, was 148 at October 1, an increase of one point for the month. There was a slight increase in the food index due to higher prices for milk and eggs. The fuel and light group also was slightly higher.

### France

WHOLESALE PRICES.—The index number of the General Statistical Office, on the base 1914=100 (gold index) was 83 for September, an advance of 2·3 per cent for the month.

Increases were recorded in all the component groups except animal foods which declined.

### Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 104·4 for September, a decrease of 0·2 per cent for the month due to a decline in agricultural products, chiefly vegetable foods. All the other 12 groups were either higher or the same as the previous month.

COST OF LIVING.—The official index number on the base 1913-1914=100, was 124·4 for September, a decrease of 0·8 per cent for the month. A decrease in food prices was partly offset by slight advances in heat and light, clothing and sundries.

### United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 81·6 for August, an increase of 1·4 per cent over the July level. Every one of the ten main groups contributed to the general advance for the month.

COST OF LIVING.—The index number of the National Industrial Conference Board, on the base 1923=100, was 85·9 for September, an increase of 0·4 per cent for the month. "Living costs in September were 3·9 per cent higher than a year ago, and 19·8 per cent higher than in April, 1933, the low during the depression. They were, however, still 15·0 per cent below the level of September, 1929."

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1936

The number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1936 was 288, there being 107 in July, 101 in August and 80 in September.

The report for the second quarter of 1936, showing 235 fatalities, was given in the Labour Gazette, August, 1936, page 762. In the third quarter of 1935, 262 fatal accidents were recorded (Labour Gazette, November, 1935, page 1078). The supplementary lists of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contains 14 fatalities for the first half of 1936, and 2 fatalities for 1935.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the Labour Gazette. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the third quarter of 1936 were as follows: agriculture, 47; logging, 18; fishing and trapping, 13; mining, non-ferrous smelting and quarrying, 46; manufacturing, 32; construction, 37; electric light and power, 3; transportation and public utilities, 49; trade, 9; service, 34.

Of the mining accidents 30 were in "metalliferous mining," 14 in "coal mining," 1 in "non-metallic mineral mining and quarrying, n.e.s.," and 1 in "structural materials."

Of the accidents in manufacturing, 3 were in "vegetable foods, drink and tobacco," 1 in "animal foods," 3 in "leather, fur and products," 7 in "saw and planing mill products," 1 in "wood products," 6 in "pulp, paper and paper products," 1 in "printing and publishing," 3 in "iron, steel and products," 2 in "non-ferrous metal products," 3 in "non-metallic mineral products," and 2 in "chemical and allied products."

In construction there were 14 fatalities in "buildings and structures," 2 in "railway construction," 15 in "highway and bridge," and 6 in "miscellaneous construction."

In transportation and public utilities, there were 21 fatalities in "steam railways," 1 in "street and electric railways," 16 in "water transportation," 9 in "local transportation," and 2 in "storage."

### FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1936 BY GROUPS OF INDUSTRIES AND CAUSES

CAUSE	Agriculture	Logging	Fishing and Trapping	Mining, Non-ferrous Smelting and Quarrying	Manufacturing	Construction	Electric Light and Power	Transportation and Public Utilities	Trade	Finance	Service	Unclassified	Total

Total.....	47	18	13	46	32	37	3	49	9		34		288

In trade there were 3 fatalities in "whole-sale," and 6 in "retail."

Of the fatalities in service, 23 were in "public administration," 5 in "recreational," 2 in "personal, domestic and business," and 4 in "professional establishments."

There was no serious disaster resulting in a very large number of fatalities during the period under review. Accidents causing the loss of two or more lives were as follows:

When a burning building suddenly collapsed following an explosion, four firemen lost their lives at Montreal, on August 16.

On August 15, a shift boss, a drill operator and a helper were killed when buried by a cave-in of a stope in a mine at Kirkland Lake, Ontario. Another three miners were drowned in Beresford Lake, Manitoba, on September 9, when a canoe upset.

A conductor and two brakemen were killed in a collision of a passenger train with a work train, at Novar, Ontario, on September 16.

Two fishermen were drowned when a gasoline fishing launch caught fire, near Michipi-

coten, Ontario, on August 7; and another two fishermen were drowned when a boat overturned on Isaac's Lake, Nova Scotia, on September 12.

Two miners were killed in a premature blast at Swastika, Ontario, on September 15.

### Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1936 has been compiled which contains 14 fatalities, of which 1 was in agriculture, 2 in logging, 2 in mining, non-ferrous smelting and quarrying, 3 in manufacturing, 2 in construction, 2 in transportation and public utilities, 1 in trade and 1 in service. One of these accidents occurred in January, 1 in February, 3 in May and 9 in June.

A further supplementary list of accidents occurring in 1935 has been made. This includes 2 fatalities, of which 1 was in manufacturing and 1 in transportation and public utilities. One of these accidents occurred in May and 1 in August.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Appeal Against Decision of New Brunswick Workmen's Compensation Board Dismissed

Under the Workmen's Compensation Act of New Brunswick an appeal from a decision of the Workmen's Compensation Board may be made to the Supreme Court of the province with the permission of a judge of the Supreme Court upon any question as to jurisdiction of the Board or on any question of law. In a recent case, an appeal from the disallowance of a claim for benefit on account of the death of a workman employed in radio broadcasting was dismissed by the Court. The claim had been rejected by the Workmen's Compensation Board on the ground that radio broadcasting was not an industry within Part I of the Act under which compensation was payable in most industries.

The workman was employed as a radio electrician by a company engaged in a whole-sale and retail hardware business. In the evenings he worked in the transmitter room of a broadcasting station operated by the employing company and it was there that he was killed. The company was assessed for purposes of compensation only on its hardware business and the Workmen's Compensation Board had no knowledge that it operated a radio broadcasting station. Since, in the opinion of the Court, broadcasting is not incidental to or immediately connected with the hardware business and had not been included

within Part I of the Act, it followed that the deceased was employed at the time of his death in an industry outside the scope of that Part of the Act as the Workmen's Compensation Board had decided and as it was authorized to decide.

*Gilman v. Workmen's Compensation Board*  
(1936) 3 Dominion Law Reports 761.

### Assessment on Employer for Workmen's Compensation a First Lien on Property

In an appeal from the judgment of the Nova Scotia Supreme Court on a stated case involving the question of the priority of a lien under the provincial Workmen's Compensation Act over a security held by the Royal Bank, the Supreme Court of Canada affirmed the judgment on June 17, 1936, holding that an assessment levied on an employer under the Workmen's Compensation Act is a first lien on all property of the industry and has priority over security to a bank.

The employing company in the case made an assignment of all its property to the Royal Bank on March 30, 1931. Later, the company entered into a logging contract and the contractor was assessed by the Workmen's Compensation Board for the amount due on his payroll under the Workmen's Compensation Act. When nothing was realized from an execution against the contractor, the Board took action against the company and obtained

judgment for the amount of the assessment. The Royal Bank undertook to pay the amount due if the Court should determine that the Board's claim had priority over that of the Bank.

Counsel for the plaintiff contended that the Bank Act, under which a bank may lend money on the security of industrial products, was a Dominion statute and, therefore, such security should rank before a tax levied under a provincial statute. On this point, it was held that there was no conflict between the two statutes. The Bank Act "itself creates no lien" unless by agreement between the bank and its customer. On the other hand, the Workmen's Compensation Act "directly creates a lien for a public tax or charge" for provincial purposes, which is a valid enactment by a province under the British North America Act.

*Royal Bank v. Workmen's Compensation Board of Nova Scotia* 1936, 4 Dominion Law Reports 9.

#### **Collective Agreements Act Gives Right Against Employer But Not Against Owner of Property**

In an action for the difference in the amount of wages paid and the amount due in accordance with an agreement legalized under the Collective Labour Agreements Extension Act of Quebec, the defendant employer, Valiquette, did not appear and his whereabouts were un-

known. The plaintiffs claimed, however, that they had a privilege for the amount of their claim against the buildings constructed under the agreement by the employing contractor.

The plaintiff workmen had entered into a "partnership" with the defendant authorizing him to represent them in all contracts, etc. Valiquette, thereupon, made a contract to do certain construction work for the fixed sum of \$125. The amount was paid and the workmen were remunerated as had been agreed but at a lower wage than was stipulated in the building trades agreement from Montreal.

Chief Justice Greenshields of the Superior Court of Montreal gave judgment against the defendant, Valiquette, for the amounts claimed but held that the plaintiffs had no privilege upon the property of the owner. On the latter point, the court pointed out that a privilege is a creation of the law not of a contract, that the Collective Labour Agreements Extension Act on which they based their action gave them a personal claim against their employer for an amount in excess of that stipulated in their contract but the Act does not declare a privilege in their favour on the property of the owner who was not the employer. The costs of the claim against the owner were charged to the plaintiffs.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

Contrary to the movement indicated in industrial employment, on the average, during the last fifteen years, there was a further improvement in the general employment situation at the beginning of November, when the 10,054 firms furnishing returns to the Dominion Bureau of Statistics reported 1,052,985 employees, as compared with 1,044,380 at October 1. Each of these firms ordinarily employs a minimum of 15 workers. Reflecting the advance, the index (based on the average for the calendar year 1926 as 100) increased from 110.1 in the preceding month to 111.0 at the date under review, as compared with 107.7 at November 1, 1935. At that date in the preceding fourteen years the index was as follows: 1934, 100.2; 1933, 91.3; 1932, 84.7; 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0; and 1921, 91.3.

At the beginning of November, 1936, reports were furnished to the Department of Labour by 1,822 local trade unions with a membership aggregate of 184,259 persons. Of these, 20,322, or a percentage of 11.0, were out of work as compared with percentages of 10.9 at the beginning of October, 1936, and 13.3 at the beginning of November, 1935.

Reports received from the Offices of the Employment Service of Canada showed an increase in the work transacted during October, 1936, when a comparison was made with September, but a decline from that recorded during the corresponding month a year ago, with the exception of the number of applicants registered, which was slightly higher than in October, 1935. The industrial groups showing the most marked changes under the yearly comparison were farming, which registered a substantial gain, and construction and maintenance, which recorded a heavier loss. Vacancies in October, 1936, numbered 34,615, applications 73,390 and placements in regular and casual employment 32,266.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$16.96 at the beginning of November as compared with \$16.87 for October,

the increase being due mainly to a seasonal advance in the cost of foods. Comparative figures for certain earlier dates are \$16.54 for November, 1935; \$16.03 for November, 1934; \$15.41 for June, 1933 (the low point in recent years); \$22.03 for November, 1929; \$21.60 for November, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.36 for November, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 77.2 for each of the last two weeks in November as compared with 76.8 for each of the preceding three weeks. On a monthly basis the index was 77.1 for October, the latest available; 72.7 for November, 1935; 71.1 for November, 1934; 63.5 for February, 1933 (the low point in recent years); 95.7 for November, 1929; 98.3 for November, 1921; 164.3 for May, 1920 (the post war peak); and 67.2 for November, 1914.

The table on page 1098 gives the latest information available reflecting industrial conditions in Canada. The index of the physical volume of business again advanced, being nearly four per cent higher in October than in the preceding month and sixteen per cent higher than in March, the low point since the beginning of 1936, while as compared with October, 1935, the advance was ten per cent. Of the principal factors used in the construction of the index, mineral production, manufacturing, electric power output and imports were considerably higher in October than in September, while construction, carloadings and exports were lower. All of these factors were higher in the month under review than in October, 1935. Information available for November shows continuing improvement in employment, carloadings and in sugar manufactured, both as compared with the preceding month and with November, 1935. Contracts awarded were lower than in October, 1936, but higher than in November, 1935.

The number of strikes and lockouts recorded for November was 14, involving 1,264 workers and causing time loss of 11,327 man working days. A strike of coal miners at Cadomin, Alberta, which commenced in October was the only dispute causing considerable time

\*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

†For the week ended November 27, 1936.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations.

(4) Figures for end of previous month.

(5) Figures for four weeks ending November 23, 1936, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending October 31, October 3, and September 5, 1936; November 2, October 5 and September 7, 1935.

(7) MacLean's Building Review.

loss. In October there were 17 disputes, involving 2,222 workers and a time loss of 12,733 days. In November last year there were 16 disputes, involving 1,113 workers and time loss of 8,781 days, the most important dispute being that involving longshoremen, etc., at Vancouver, B.C. Of the fourteen disputes recorded for November, eight were recorded as terminated, one resulting in favour of the workers involved, one in favour of the employer affected, two being partially successful, while compromise settlements were reached in two cases and the result of two recorded as indefinite. Six disputes, involving approximately 640 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

#### **Industrial Disputes Investigation Act**

During the past month the Department has received reports from two Boards of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act. One application for the establishment of a Board was also received. The text of the Board reports and other information pertaining to proceedings under the Act are given in the section commencing on page 1104.

#### **Placements Under Farm Improvement and Employment plan**

On December 5, placements under the Dominion-Provincial farm improvement and employment plan totalled 22,361. This total is divided provincially as follows: British Columbia, 73; Alberta, 3,484; Saskatchewan, 14,926; Manitoba, 2,878; Quebec, 1,000.

The plan has been adopted by New Brunswick and Prince Edward Island, but in Nova Scotia and Ontario the problem of the single unemployed is not considered of such urgency as to warrant participation.

As outlined in the LABOUR GAZETTE for October (page 855), the arrangement between the Dominion and provincial governments provides that each unemployed single man placed on a farm will receive \$5 a month plus a bonus of \$2.50 a month if he remains on the farm until March 31, 1937.

#### **Establishment of local Home Improvement Plan Associations**

Initiating a movement having as its objective the establishment of local committees to stimulate interest in the Dominion Government's Home Improvement Plan (LABOUR GAZETTE, November, 1936, page 988-89) a meeting was held on December 3, 1936, in Ottawa, for the

purpose of selecting a local body to co-operate with the National Employment Commission.

Addresses were delivered, which were broadcast over a national network of the Canadian Broadcasting Corporation, by the Hon. C. A. Dunning, Minister of Finance; Hon. Norman McL. Rogers, Minister of Labour; Hon. Ernest Lapointe, Minister of Justice; Mr. Arthur B. Purvis, Chairman of the National Employment Commission, and Professor W. A. Mackintosh, a member of the Employment Commission.

Announcing the details of the Committee organization, Mr. Purvis stated that throughout Canada Provincial Committees are being established with prominent citizens as chairmen.

The chairmen appointed were announced as follows: Edmund I. Higgs, Charlottetown; Ralph P. Bell, Halifax; A. H. Wetmore, Saint John; C. E. Gravel, Montreal; W. H. Carter, Winnipeg; A. E. Whitmore, Regina; H. M. E. Evans, Edmonton; and George Kidd, Vancouver. The duties of these provincial chairmen will involve the organizing of local committees to be entrusted with the duty of actively promoting the adoption of the plan in their respective districts.

Hon. C. A. Dunning, recapitulated the financial details of the plan and indicated the facility with which loans could be obtained from local chartered banks. Commenting on this phase of the plan, Hon. Mr. Dunning observed:—

"Already the banks and other approved lending institutions have given many concrete evidences of their real desire to co-operate. Despite winter conditions and the fact that the details of the Plan were not widely familiar, the banks have reported to us that in the first two weeks the Plan has been in operation—that is to say, during the first half of November—not less than 865 loans for an aggregate value of \$325,000 were made by them. As the Plan becomes better known and as local community effort is increasingly organized, the number and volume of these loans will show a rapid increase, and I have every confidence that by the end of another year we will have reached the objective which the sponsors of the Plan had in mind."

The Hon. Mr. Lapointe emphasized that "the Home Improvement Plan has been arranged in order to help the small owners so hard hit by the depression." Continuing, he added "we must put to work organized means to create work. That is why the National Employment Commission has been created." The Minister commended the Commission and urged the co-operation of all concerned in contributing to the success of this plan.

"The plan provides Canadian citizens with an obligation as well as an opportunity," declared Hon. Norman McL. Rogers, Minister of Labour.

"Our opportunity as home-owners is matched by our obligations as citizens. In every city, town and village of Canada there are men on relief or unemployed who are able and anxious to use their idle hands in the improvement of our homes. These men are our neighbours and our countrymen. Many of them are skilled mechanics.

"Their craftsmanship and experience are a national asset which must not be wasted," Mr. Rogers emphasized. "Most of them have families dependent on them. Many of them have had no work for the entire period of the depression.

"An opportunity was owed these unemployed workers in the building trades to re-establish themselves in their chosen calling.

"Our opportunity to improve our homes is their opportunity to recover independence, self-respect and a livelihood. To the extent that work is created by the home improvement plan, relief rolls will be reduced, the tax burden will be lessened and, most important of all, the welfare and happiness of our people will be increased beyond measure."

Professor W. A. Mackintosh, a member of the National Employment Commission, outlined the duties of local committees and emphasized the necessity of their doing everything possible to facilitate wide adoption of the scheme.

Although he had expected to be present at the meeting, the Rt. Hon. W. L. Mackenzie King, Prime Minister, at the last moment, found it impossible to attend. A letter from the Prime Minister was read, endorsing the plan as a means of affording employment to many workers and an opportunity for Canadians to rehabilitate their homes.

As a result of the keen interest at this representative meeting, which was presided over by His Worship Mayor Stanley Lewis, a local committee was formed to work in co-operation with the National Employment Commission.

#### **Re-organization of provincial services in Alberta**

Changes in the administration of certain acts in Alberta were made effective by Orders in Council published in the November 14 issue of the Alberta Gazette.

Administration of The Bureau of Labour Act, The Minimum Wage Act, The Factories Act, The Boilers Act, The Labour Disputes Act, The Employment Offices Act, The Trade Schools Regulation Act, and the Theatres Act (concerning inspection and licensing)—all

formerly assigned to the Commissioner of Labour—has been allocated among other departments and services. This transference of administration, together with the resignations of three senior officers—Mr. Walter Smitten, Commissioner of Labour; Mr. E. F. Howard, Industrial Standards Officer; and Mr. G. W. Keddy, Chief Clerk—practically results in the abolition of the Provincial Bureau of Labour.

The Factories Act was amended at the special session of the Legislature (LABOUR GAZETTE, November, page 997) whereby the section dealing with hours was deleted, and such regulations now are under the new Hours of Work Act (LABOUR GAZETTE, November, page 995).

It is understood that all mechanical inspection activities under The Factories Act and The Boilers Act are transferred to the Workmen's Compensation Board, and that the two minimum wage acts, the Industrial Standards Act and the Labour Disputes Act are now to be administered by the new Industrial Relations Board.

The Male Minimum Wage Act, enacted during the first session in 1936 (LABOUR GAZETTE, June, page 998), and the Minimum Wage Act (applying to women) were proclaimed in effect from November 2, 1936.

Other changes involve the transference of the inspection of theatres to the Department of the Provincial Secretary; the administration of the Employment Offices Act by the Department of Public Health; and the administration of the Tradesmen's Qualification Act and all licensing regulations by the Department of Trade and Industry.

#### **Personnel of Alberta Board of Industrial Relations**

The personnel of the Board of Industrial Relations of Alberta was announced in the Alberta Gazette of November 14 to comprise:

Mr. Clayton Adams, chairman; Mr. W. D. King, Deputy Minister of Trade and Industry; and Dr. Victor Wright, chairman of the Workmen's Compensation Board.

Under the provisions of the Hours of Work Act (LABOUR GAZETTE, November, page 995) the Board is authorized to inquire into and fix hours of Labour, but the Act does not apply to farm labourers or domestic servants.

#### **Commission to make survey of Workmen's Compensation in Nova Scotia**

Announcement was made recently of the appointment of a commission by the Government of Nova Scotia to make a survey of the operations of the Workmen's Compensation Act in the Province. The Commissioners appointed

are: J. A. Hanway, K.C., of Amherst; Dr. W. D. Forrest, Halifax, and Howard Cunningham, Mining Engineer, Bear River. The purpose of the Commission will be to review and if found necessary, recommend revisions of the Workmen's Compensation Act. The Commissioners will be required to study what methods are being used in other provinces and compare them with those in Nova Scotia.

According to a statement made by the Hon. Michael Dwyer, Minister of Labour "the Commission will give attention to the manner in which the present Act affects both employer and employee in all classes of labour coming within its jurisdiction. They will investigate the rates of compensation now paid and the ability of industry to pay, and they will consider also the question of administration from the standpoint of efficiency and economy."

#### **New York State Unemployment Insurance Act declared valid**

On November 23, 1936, the Supreme Court of the United States, upheld the constitutionality of the New York Unemployment Insurance Act. (LABOUR GAZETTE, January, 1936, page 5, and November 1936, page 981). The New York Act is designed to supplement the federal social insurance statute, and has been used as a model for similar legislation enacted in other states.

It has been estimated that in New York State alone, 76,000 employers have contributed to a fund covering more than 2,500,000 employees, and that to date about \$22,000,000 has been paid in to this fund.

Under the New York Unemployment Insurance Act employers of more than four persons, with certain exceptions, pay 1 per cent of their pay rolls into the fund during 1936, 2 per cent in 1937 and 3 per cent thereafter. Benefits go from the fund to the unemployed workers, on a basis of 50 per cent of the full-time weekly wage, with a minimum of \$5 and a maximum of \$15 weekly, up to sixteen weeks.

Unemployment compensation laws are now operating in sixteen states and the District of Columbia, it being estimated that about 8,000,000 workers are affected by these laws.

#### **Unemployment insurance statistics in Great Britain**

The total number of persons insured (aged 14 and under 65 years) against unemployment under the Unemployment Insurance Act of Great Britain is estimated in the November issue of the British Ministry of Labour Gazette, at approximately 13,980,000. This figure does not include those insurable under the Agricultural Scheme. The corresponding total for Great Britain and Northern Ireland is esti-

mated at 14,285,000, at July 6, 1936, compared with 14,002,500 in July, 1935, an increase of over 282,000. Of this increase, over 207,000 was accounted for by boys and girls of 16 and 17 years of age, and is considered a reflection of the sharp rise in the birth rate since the war.

Benefits recently became payable under the British Agricultural unemployment insurance scheme which was introduced by the British Government early this year. Details of this scheme were reviewed in the LABOUR GAZETTE for March, 1936, page 222.

Since May of this year, masters and men in the farming industries have been paying contributions at the rate of 4½d. each week and now those men who are unfortunate enough to be unemployed can claim benefit under the scheme. It is reported, however, that there will not be much unemployment in the farming communities of England this winter, and that the difficulty in most districts has been to get enough men to keep pace with seasonal harvesting activities.

#### **Old Age Benefits to be paid Under U.S. Social Security Act**

The setting up of initial wage records and the assignment of social security account numbers to an estimated 26,000,000 American workers, for whom federal old-age benefits will begin to accrue in January under the Social Security Act (LABOUR GAZETTE, September, 1935, page 801) was carried out by the Post-office Department in co-operation with the Social Security Board during November. The Social Security Act provides for old-age benefits in the form of retirement payments to workers qualifying at 65. The setting up of wage records and the assignment of social security account numbers involved the filling out of an application form by the individual employee, the making of a permanent office record based on the application, and the returning to the individual worker of a card certifying that an account has been set up in his name.

It has been estimated that pension collections will amount to 14,000 million dollars within 15 years, and 45,000 million dollars by 1975. On January 1, 1937, a two per cent tax on all payrolls becomes effective. This tax is to be met equally by employers and employees at one per cent each. Through a period of several years the collection will increase gradually to six per cent.

Pensions ranging from \$10 to \$35 a month after January 1, 1942, will become payable by the Social Security Board. In the meantime contributions will be allowed to accumulate

in the Treasury in a special "old age reserve account," the Treasury secretary, as set out in the pension law, investing "such portion of the amounts credited to the account as is not in his judgment required to meet current withdrawals." Such investments "may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States."

**Compensation  
Regulations  
Governing  
Employees of  
U.S.A. on  
Security Wages**

Rules and regulations governing compensation and medical expenses for employees of the United States receiving security payments have recently been published in a bulletin issued by the United States Employees Compensation Commission. As pointed out in the bulletin Section 2 of the Emergency Relief Appropriation Act of 1935 provides compensation for the disability or death of a person receiving from that appropriation security payment (wages) for services rendered as an employee of the United States, provided such disability or death results from traumatic injury sustained while in the performance of duty. The compensation benefits authorized by the Federal Employees' Compensation Act of 1916 are extended to such persons subject to the limitations and conditions specified in the Act approved February 15, 1934.

As defined in the regulations, "employee" includes only persons receiving from funds made available by the Emergency Relief Appropriation Act of 1935 for services rendered as employees of the United States, security payments (wages) in accordance with schedules established by the President.

The term "injury" means only traumatic injury by accident causing harm or damage to the physical structure of the body and shall not include disease in any form except as it shall naturally result from such injury.

The regulations stipulate that the total aggregate compensation in any individual case shall not exceed \$3,500, and that the monthly compensation "shall not in any event exceed the rate of \$25, both exclusive of medical costs." A special schedule of compensation for death or injury ("in lieu of all other compensation in such cases") is to be established by the United States Employees Compensation Commission.

**March of  
Recovery  
Reviewed by  
International  
Labour Office**

Industrial production is rapidly improving in the great majority of countries and unemployment is being reduced without any marked rise in prices, according to the latest review of the world economic situation by the International Labour Office. This is stated in a report on economic developments in 1936 which the Office submitted to the Seventy-seventh Session of the Governing Body held at Geneva in November.

Other features to which the report calls attention are: unemployment has not been reduced to the extent that industrial production has recovered, nor is there any comparable improvement in international trade; recovery closely coincides with the adoption of expansionist measures; and to a great extent the improvement in production is due to an increase in the output of investment rather than of consumption of goods.

After examining the indices of industrial production for 12 representative countries, the report concludes that industrial production, which during the depression declined more than 30 per cent, is now running at a higher level than in the corresponding months of 1935 and is above the 1929 level.

In the United States, the production of investment goods is rapidly recovering and the movement of the consumption goods index is likewise upwards, although there is still some distance to go for the 1929 level to be attained in either category.

The production of consumption goods in Japan is some 30 to 40 per cent above the 1930 level and at present almost stationary. But the production of investment goods is approximately twice what it was in 1930, and continues to rise rapidly.

The unemployment index shows a steady decline, but is still some 50 per cent above what it was in 1929. The situation in 1935 was already better than that in 1934, and there has been a further advance in the current year. The progress made in Australia, Great Britain, Canada, Germany and the United States is particularly noticeable.

Except in France, the changes in the cost of living and wholesale prices in 1936, as compared with the previous year, are insignificant.

Finally, the quantum of world trade, says the report, is still some 20 per cent short of the 1929 position. An upward trend is discernible in Japan, the United States and Canada, but in Japan the rapid rise in the value of exports over the last few years appears to be tailing off.

In addition to surveying recovery in industry the I.L.O. deals similarly with the advance in agriculture stating that "in agriculture there are evident signs of recovery" and that "in recent months agricultural income has risen in most countries and for all kinds of products."

According to a press report, the Western Clock Co., of Peterboro, Ontario, planned to distribute approximately \$20,000 in wage bonuses to 461 employees on December 15. It was planned that the bonus should take the form of two weeks' pay at the hourly rate for each employee who has been with the company one year or more and all others who have worked less than one year were to be given a bonus in proportion to the number of calendar months' service. The bonus payment is in keeping with the wage payment principles of the company. Other benefits

long established are group life insurance, vacations with pay, and athletic club privileges.

The ship and boat building industry, including alterations and repairs, and the trade of servicing and repair of current-consuming electrical appliances have been added to Schedule A of the Apprenticeship Act of British Columbia, according to a notice published in the British Columbia Gazette of November 5, 1936.

A wage increase of approximately 7½ per cent was announced recently by the Proctor Gamble Company, to take effect December 1, 1936. A bonus to factory workers and clerks amounting to 4 per cent of their 1936 earnings, to be distributed soon after January 1, 1937, was also announced.

### Report of Department of Pensions and National Health, 1935-36

According to a report for the fiscal year 1935-36 issued by the Department of Pensions and National Health including the reports of the Canadian Pension Commission, the Pension Appeal Court and the War Veterans' Allowance Committee, pensions and associated expenditures for the fiscal year ending March 31, 1936, amounted to \$53,741,996.

Net cash payments for Great War pensions were \$41,521,576, a reduction as compared with \$41,953,036 in the preceding 12 months.

War veterans' allowances of \$2,531,489, unemployment assistance of \$2,365,579 sheltered employment costing \$52,132, and hospital allowances amounting to \$1,315,347 brought the total cash payments to \$47,786,123.

Indirect payments by way of hospital treatment amounting to \$2,760,866 and other charges for transportation and otherwise amounted to \$2,982,348.

Expenditures including returned soldiers' insurance, militia pensions and other items amounted to \$2,973,525.

#### Canadian Pension Commission

A statement of operations of the Canadian Pension Commission indicated there were 97,299 pensions in force at the end of the fiscal year, compared with 96,645 on March 31, 1935. These were divided into 79,124 disability pensions and 18,175 pensions for dependents. During the fiscal year, 1,233 pensions were awarded, 709 reinstated and 1,041 discontinued.

Examination of a table of ages for disability pensioners draws attention to the passage of years since the war. The great majority of pensioners are now over 40 years of age. There are a few as young as 34, and one is 91. The

largest group is listed as 40 years old, the number being 4,440. The average age is 48.75 years.

Cost of administration in the pensions section of the Department was \$2,242,098, divided among departmental salaries and general expenses, \$1,065,497; Canadian Pension Commission, \$538,196; Veterans Bureau, \$185,072; Pension Appeal Court, \$38,223; and payments to the comptroller of the treasury, \$415,110.

#### Pensioners' Workmen's Compensation

The provisions under which the Department assumes responsibility in respect of accidents sustained by pensioners of 25 per cent and upwards while engaged in industry was continued during the year under review. During the fiscal year 1935-36, there were 279 claims made in comparison with 180 during the previous year. The expenditure however, was only \$27,138.47 compared with \$36,419.

The report of the National Health Division gives a comprehensive account of the work involved in the analysis of food and drug products. Tabular summaries are given of the results of the examination of the more important foods and the ultimate disposal of imports of food shipments examined.

The Narcotic Division section of the report deals with the campaign waged against illicit drug trafficking, detailing the important prosecutions.

Reports are also presented with reference to the Public Health Engineering Service, engaged in the protection of the health of tourists and the travelling public, and the marine hospital service for sick and injured sailors.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

ON November 30 a Board of Conciliation and Investigation was established by the Minister of Labour under the provisions of the Industrial Disputes Investigation Act to deal with a dispute between the Cadomin Coal Company, Limited, at Cadomin, Alberta, and its employees being members of Cadomin Local No. 7296, United Mine Workers of America. This dispute relates to the interpretation of a clause in the wage agreement entered into on April 1, 1936, providing for equalization of work for the miners, approximately 350 men being directly affected by the controversy. In accordance with the terms of the agreement, the dispute was dealt with in the first instance by a joint committee of miners and officials. The efforts of this committee proving ineffective, the dispute was then referred to an independent chairman who was named by the Minister of Labour at the request of the disputants. The decision of the independent chairman did not prove acceptable to the employees, and a strike occurred on October 28. Both parties to the dis-

pute requested the conciliation services of the Western Representative of the Department of Labour, who proceeded to Cadomin and conferred with the executive committee of the local union. It was finally agreed to refer the dispute to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, the decision of such Board, it is understood, to be final and binding upon both parties during the term of the present wage agreement. The employees resumed work immediately and both the employer and employees applied for the establishment of a Board of Conciliation and Investigation towards the end of November. The personnel of the Board is as follows: Dr. A. E. Cameron, Professor of Mining Engineering in the Faculty of Applied Science, University of Alberta, Edmonton, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other board members; Mr. George Kellock, of Coleman, Alberta, nominated by the company; and Mr. Angus J. Morrison, of Calgary, Alberta, nominated by the employees.

### Report of Board in Dispute Between the Hamilton By-Product Coke Ovens, Limited, and Its Stationary Engineers and Operators

The Board of Conciliation and Investigation established to deal with a dispute between the Hamilton By-Product Coke Ovens, Limited, and its stationary engineers and operators, members of Local Union No. 700, International Union of Operating Engineers, presented to the Minister of Labour on November 21 a unanimous report, to which was attached a signed agreement between the parties concerned. The agreement reached as a result of the efforts of the Board provides for a wage increase of 5 cents an hour to twenty-four different classifications of labour. The members of the Board were as follows: Mr. H. H. Ward, of Ottawa, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. L. B. Spencer, K.C., of Welland, Ontario, and Fred Bancroft, of Oakville, Ontario, nominees of the company and employees respectively.

The text of the report of the Board and of the agreement follows.

#### Report of Board

The Honourable Minister of Labour,  
Ottawa, Ontario.

Sir:

*Re Industrial Disputes Investigation Act  
and*

*Re Difference between the Hamilton By-Product Coke Ovens, Limited and certain of its employees, being stationary engineers and operators, members of Local 700, of the International Union of Operating Engineers.*

The Board of Conciliation and Investigation appointed by you to inquire into the dispute between the Hamilton By-Product Coke Ovens Limited and their employees met in Hamilton on November 11 and continued their sittings until November 19. The parties to the reference were represented by:

For the Company.—T. P. Pinckard, General Manager; H. G. Henry, Assistant Comptroller; L. A. Miller, General Superintendent.

For the Employees.—Frank H. Healey, International Vice-President; W. J. Burr, Business manager of Local 700; John Cauley, Secretary of Local 700; E. L. Moore, one of the employees.

At the beginning of the inquiry, and after reading the reference, and having an informal discussion with both parties, the members of the Board felt that this was a case in which the conciliatory features of the Industrial Disputes Investigation Act should be largely followed. The efforts of the Board were directed along these lines.

At first it did not seem possible to bring the parties together, but after listening to each side present their arguments in a more formal manner, during which written documents were filed, the Board, at an opportune moment, again suggested that the parties meet together and see if they could arrive at a settlement.

The first attempt at a settlement in which an offer was made, was unsuccessful, but later new offers were made with the result that both parties agreed, and finding themselves in agreement, found a successful formula which they reduced to writing in the form of an agreement.

The representatives of both parties presented their side of the argument with vigour and forcefulness, but at all times friendly, which shows that the relations between employer and employee have been and are very friendly. The members of the Board received the agreement which was signed, and herewith attach the agreement between the parties to this report.

All of which is respectfully submitted.

Dated at Hamilton, Ontario, this 19th day of November, A.D. 1936.

(Sgd.) H. H. Ward,  
Chairman.  
(Sgd.) Lynn B. Spencer,  
Member of Board.  
(Sgd.) Fred Bancroft,  
Member of Board.

#### TEXT OF AGREEMENT

November 18, 1936.

This is an Agreement between the Hamilton By-Product Coke Ovens Limited, of Hamilton, Ontario, and the International Union of Operating Engineers, Local 700, of Hamilton, Ontario, which shall be effective beginning October 1, 1936, and ending October 1, 1937. If either party does not notify the other party in writing at least thirty days previous to October 1, 1937, of its intention to terminate this Agreement on October 1, 1937, this Agreement shall remain in force until October 1, 1938.

In this Agreement, "employee" shall mean a skilled workman permanently employed upon plant operation at a wage rate per hour and shall not include a foreman, an unskilled workman, a temporary employee or an employee who is paid wages at other than a wage rate per hour.

#### Section 1

The company shall not require an employee to work more than eight hours in one period of twenty-four hours, except:

- (a) Where such employee is required to work overtime owing to the failure of the relief employee.
- (b) Where such employee requests of the company and is granted a definite period of time off and his fellow employee or employees consent to work in his place.
- (c) Where such employee is allowed a relief of at least eight hours before he is required to report for work, after he has already worked one period in that day.

#### Section 2

The company shall not require an employee to work more than six days in any one period of seven consecutive days, except:

- (a) Where such employee is required to work overtime owing to the failure of the relief employee.
- (b) Where such employee requests of the company and is granted a definite period of time off and his fellow employee or employees consent to work in his place.
- (c) Where such employee is allowed a relief of at least eight hours before he is required to report for work after he has already worked one period in that day.

#### Section 3

The company may require an employee to work more than eight hours in any one period of twenty-four hours at a time other than those hereinbefore mentioned and for such other times, the company shall pay the standard or regular wage rate of the company for that kind of work, plus 50 per cent of that standard or regular wage rate.

#### Section 4

The company shall not permanently increase the amount of work which an employee is normally required to do without first discussing the matter with the employee and the Grievance Committee.

#### Section 5

No cessation of labour to take place until the highest authority in the company and the Grievance Committee have met and endeavoured to reach an amicable settlement.

#### Section 6

A Grievance Committee shall be formed from the employees covered by this Agreement and officials of Local 700 to adjust any misunderstandings between the employees and the company which may present themselves. This committee shall first discuss any grievance with the plant superintendent before discussing it with any higher executive of the company.

#### Section 7

The company shall not directly or indirectly discriminate against any member of the Union and the Union shall not discriminate in any way, shape or form, against the company.

In the event of dismissal or shifting of a member of Local 700 to a less remunerative position, an investigation may be conducted jointly by the Grievance Committee and officials of the company.

#### Section 8-A

An increase of 5 cents per hour over their present hourly wage rates shall be paid to the employees who are members of the International Union of Operating Engineers, Local 700, and

employed in the following company classifications of labour:

1. Relief flueman and pusherman.
2. Assistant benzol operator.
3. Circulation operator.
4. By-product engineer.
5. Back door machine operator.
6. Sulphate operator.
7. Crane operator.
8. Quenching engineer.
9. Relief electrician and helper.
10. Electrician.
11. Pusherman.
12. Gas holder engineer.
13. Relief by-product engineer and circulation operator.
14. Yard locomotive engineer.
15. Relief yard locomotive engineer, yard switchman and quenching engineer.
16. Main boiler house engineer.
17. Relief holder engineer and main boiler house engineer.
18. Oven charging car operator.
19. Coal mixing bin operator.
20. Coal mixing table operator.
21. Relief back door machine operator and charging car operator.
22. Relief coal mixing table, coal mixing bin, and coke screen operator.
23. Yard locomotive switchman and locomotive fireman.

#### Section 8-B

An increase of 4 cents per hour over his present hourly wage rate shall be paid to the  
1. Plant oiler.

#### Section 8-C

An increase of 5 cents per hour over his present hourly wage rate shall be paid to the  
1. Relief switchman and fireman on the crane and locomotive  
while he is employed as a skilled workman and he shall be paid the hourly wage rate applying to an unskilled job while he is employed as an unskilled workman.

### Report of Board in Dispute Between the Canadian National Railways and its Pursers and Stewards Staffs Engaged in Pacific Coast Steamship Service.

A unanimous report was received by the Minister of Labour on December 3 from the Board of Conciliation and Investigation established to deal with a dispute between the Canadian National Railways and its pursers and stewards staffs engaged in Pacific Coast Steamship Service, members of the Canadian Brotherhood of Railway Employees. The Board, which was composed of Mr. R. O. Campney, formerly of Vancouver, B.C., and now of Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members, Captain B. L. Johnson, of Vancouver, nominated by the company, and Rev. C. D. Clarke, of Prince Rupert, nominated by the men, was successful in bringing about an adjustment of the dispute respecting wages and working conditions, agreements based generally on the recommendations formulated by the Board being reached covering employees in the Stewards Department, as well as the supervisory officers of the Pursers and Stewards Departments.

#### Report of Board

*Report of Board of Conciliation and Investigation (Industrial Disputes Investigation Act, R.S.C. 1927, Cap 112) in the matter of a dispute between the Canadian National Railways (employer); and its pursers and stewards staffs engaged in Pacific Coast Steamship Service, members of the Canadian Brotherhood of Railway Employees (employees).*

Application having been made pursuant to the provisions of the Act by the members of the Pursers and Stewards Staffs of the Canadian National Pacific Coast Steamship Service on the 6th day of March, A.D. 1936, for the establishment of a Board of Conciliation and Investigation, and a statement in reply having been transmitted by the Canadian National Railways to the Registrar on the 20th day of March, A.D. 1936, a Board was duly established on the 1st day of June, A.D. 1936, consisting of the following members:

R. O. CAMPNEY,

Chairman,

Capt. B. L. JOHNSON,

Nominee of Employers,

Rev. C. D. CLARKE,

Nominee of Employees.

Immediately after appointment the Board met, organized, laid down the procedure it proposed to follow, and on June 10 met the representatives of the parties and commenced its hearings.

Objection was taken by the employer to the presence of representatives of the Canadian Brotherhood of Railway Employees on the Employees' Committee and to the fact that the Employees' Committee was a joint committee made up of and representing both Supervisory Officers and Ratings.

In support of these objections the employer stated that it was quite willing to discuss at any time with committees composed of supervisory officers actually in service any grievances which those officers might have and with committees representing ratings actually in service any grievances which the ratings might have. It maintained, however, that to deal with joint committees of supervisory officers and ratings and to seek to adjust differences by common agreement or schedule affecting both groups was impracticable and undesirable as being prejudicial to the maintenance of proper discipline aboard ship. The employer also took the ground that representation of the employees before the Board should be drawn from men actually in service, and should not include representatives of labour organizations not being employees engaged in the employer's steamship service.

After hearing representations on behalf of both parties and giving the matter careful consideration the Board pointed out that under Section 40 of the Act it was open to the employees to select such representatives as they might desire within the limitations to that section and that in selecting representatives who were known to be officials of labour organizations they were acting quite within their rights. The Board further suggested that, so far as the Board and its proceedings were concerned, and so far as the employer's objection was concerned, the presence of any such persons on the Employees' Committee was to be construed, not as a recognition of their presence as representing a labour organization, but rather as the direct representatives of the employees concerned with the matters in dispute. The Board's views on this point were finally accepted by both parties.

As to the second objection of the employer, namely, that the employer should not be compelled to consider grievances affecting supervisory officers and those affecting ratings with a joint committee representing both groups, the representatives of the employees voluntarily expressed their willingness to agree, for the purpose of facilitating negotiations, to the principle of two committees, each committee

to deal with the matters in dispute as affecting its respective group. This preliminary point was thus amicably settled without necessitating a finding by the Board. A committee representing the supervisory officers, that is to say pursers and their assistants, chief and second stewards, and chief cooks, and a committee representing the ratings, that is to say store-keepers, printers, night saloonmen, waiters, bedroom stewards, stewardesses, bellmen, messmen, porters, page-boys and galley staff were accordingly appointed. The employer then expressed a desire to meet such committees immediately, apart from the Board, in an endeavour to work out directly an amicable settlement of the points in dispute.

The Board thereupon adjourned to permit the carrying on of direct negotiations and on the understanding that daily reports would be made by the parties to the Board as to progress made.

Direct negotiations continued during the week following June 10, and on June 17, the parties having indicated that they had progressed as far as they believed possible without the assistance of the Board, the Board again resumed its sittings.

At the resumed hearings it was found that, while many matters had been adjusted and so removed from the field of controversy, little or no progress had been made in respect of many of the important points at issue.

To clarify the situation therefore the Board directed the Employees' Committees to prepare draft schedules for submission to the employer and adjourned until June 24 when the parties were directed to again appear before the Board for the purpose of indicating the points on which agreement had been reached, and of submitting full representations on the points on which agreement might be found to be impossible.

Hearings were resumed on June 24 and continued for some days during which all points in dispute were thoroughly investigated by the Board and full representations submitted by both parties. As a result agreement was reached on a number of outstanding matters but a substantial number of points still remained on which mutual agreement seemed entirely unlikely.

The Board therefore deemed it advisable to consider such matters privately and after giving careful consideration to the representations at a number of private sittings, the Board was able to formulate unanimous recommendations to the parties as to the settlement of the disputed points.

These recommendations, as well as those matters on which the parties had themselves reached agreement, were embodied in two

schedules prepared by the Board covering the supervisory officers and the ratings respectively and were submitted to both parties for consideration, with a request that the parties indicate their acceptance or rejection by July 27, 1936.

In accordance with the Board's request the ratings prior to July 27 indicated their acceptance of the Board's recommendations as did the supervisory officers subject to a request for further consideration of a number of minor matters. The employer asked for and was granted further time in which to consider the draft schedules, and subsequently asked leave to meet the Board with the Employees' Committees to discuss the draft schedules in detail. Further hearings were accordingly arranged and the Board resumed sittings on August 17 and continued its hearings until August 21. As a result of these sittings the parties were finally brought together and agreement reached on all outstanding matters.

A schedule was accordingly prepared by the Board embodying the agreement between the employer and the ratings, which schedule was duly executed by the parties in the presence of the Board on September 1st, 1936. A copy of the schedule thus adopted is appended hereto.

The Committee representing supervisory officers and the employer, having agreed to adjust their differences amicably without embodying the terms of their agreement in a formal schedule, on September 2 filed with the Board a letter signed by representatives of both parties certifying that all matters in dispute had been amicably adjusted and that the services of the Board were no longer required. A copy of said letter is appended hereto.

The Board is therefore pleased to be able to report that it has succeeded in bringing the parties together and amicably adjusting their differences by mutual agreement.

Twenty-four sittings in all were held by the Board in connection with the adjustment of this dispute.

In conclusion the Board wishes to express its deep appreciation of the straightforward manner in which each party presented its case, of the willingness with which all material requested by the Board was prepared and submitted and of the general desire evidenced by both parties at all times to be helpful to the Board. The Board also wishes to commend the sympathetic attitude shown by the employer's representatives towards the welfare of its employees and the conciliatory spirit and loyalty to their employer evidenced by the

Employees' Committee throughout the proceedings.

Dated at Vancouver, B.C., this 30th day of November, A.D. 1936.

Respectfully submitted,

(Sgd.) R. O. CAMPNEY, *Chairman.*

B. L. JOHNSON, *Member.*

C. D. CLARKE, *Member.*

AGREEMENT BETWEEN THE CANADIAN NATIONAL STEAMSHIPS (PACIFIC) AND THE EMPLOYEES OF THE STEWARDS' DEPARTMENT, C.N.S.S. AS ENUMERATED HEREIN.

#### Article 1

##### SCOPE

The following rules shall govern the service of employees, Canadian National Steamships (Pacific) as set forth in this article.

- (a) Storekeepers, Linenkeepers, Printers and Night Saloonsmen.
- (b) Waiters, Bedroom Stewards, Stewardesses and Bellmen.
- (c) Messmen.
- (d) Porters.
- (e) Page Boys.
- (f) Galley Staff.

#### Article 2

##### PROMOTION AND SENIORITY

- (a) Seniority will be established from the date an employee first entered the service, and in the filling of vacancies and permanent new positions, including those of more than two months' duration, merit and ability being sufficient, seniority shall govern. Seniority will date from the expiration of six months accumulative service, provided such accumulated service does not extend beyond the third year from date of first employment.
- (b) Employees who have been discharged shall if not re-employed within one year be regarded as new employees, and employees who have resigned from the service of the Company shall lose all previous seniority.
- (c) Employees now filling or promoted to official positions with the Company will retain their seniority rights and rank, and continue to accumulate seniority provided that same are asserted within thirty days after release from such employment.
- (d) Seniority lists will be supplied to employees' committee on request.
- (e) Employees enumerated herein will be given consideration in filling official positions with the Company.
- (f) Employees laid off on account of reduction of forces shall be given preference if available to re-employment on the same staff when force is again increased. Employees failing to report for duty, or to give satisfactory reason for not doing so, shall be considered as out of the service.

#### Article 3

##### DISCIPLINE AND GRIEVANCES

- (a) Should any employee consider he has a grievance he shall have the right to appeal to the officers of the ship in order of their rank, and failing adjustment thence in

writing to the higher officers of the Company in their regular order. An employee may have the assistance of a fellow employee in the presentation of his grievance.

- (b) No discrimination will be made in the employment, retention in the service or conditions of employment of employees covered by this agreement because of membership in employees' organization.

#### Article 4

##### TRAVELLING AND TRANSFER TIME

- (a) An employee appointed to a position necessitating travelling from one point to another on the British Columbia Coast to assume that position, shall be provided board and living quarters, and shall be on full pay from the time of leaving the starting point. This shall not apply to new employees or to employees exercising their seniority right.
- (b) When, due to steamer going out of commission, employees are signed off ship's articles in any other port in British Columbia than Vancouver, these employees shall be deadheaded or worked to Vancouver at the expense of the Company, and shall be on full wages and sustenance until arrival at Vancouver.
- (c) When employees are transferred from one ship to another at the Company's convenience, where such necessitates a lay-over period awaiting ship, such employees shall be compensated at their regular rate of wages during such lay-over.
- (d) Employees assigned to duty on a vessel in drydock at North Vancouver shall be provided with the necessary Ferry tickets.

#### Article 5

##### TRANSPORTATION AND LEAVE OF ABSENCE

- (a) Employees will be granted free transportation (in accordance with the Company's regulations) and leave of absence without pay to attend their meetings and conventions, such leave will only be granted when it will not interfere with the requirements of the traffic and the service, and provided the Company is not put to any additional expense.

#### Article 6

##### OVERTIME

- (a) During the summer season employees mentioned in Article 1 hereof shall be paid 2½ hours overtime per day at a rate computed pro rata to the monthly rate of pay of each of said respective employees based on 9 duty hours per day within 16 consecutive hours.
- (b) Overtime outside of summer service, when worked, will be paid in addition by time off or otherwise.

#### Article 7

##### TIME OFF

All employees shall be granted twenty-four consecutive hours clear of the ship in each week, in the employees home port, where ship calls at such home port, and where the ship does not call at such home port, then the port of Vancouver, B.C., shall be considered as the home port, providing that home port of Vancouver, B.C., shall only apply to ships in service. Where sailing schedules and ships requirements do not allow twenty-four consecutive hours free of the ship as provided

above, then this time shall accrue to the employee, and be accorded him as and when opportunity offers.

#### Article 8

##### PRESERVATION OF RATES

Employees will be paid the rate applicable to the position they occupy.

#### Article 9

##### UNIFORMS

- (a) All employees with established seniority having 5 years or more accumulated service, required to wear uniforms, shall be provided with same (not to exceed 1 per year) by the company free of cost.

All employees with established seniority having less than 5 years accumulated service, required to wear uniforms, shall be provided with same (not to exceed 1 per year) by the company and the employee shall pay to the company 50 per cent of the cost thereof.

All employees without established seniority required to wear uniforms shall be provided with same by the company at the expense of the employee.

- (b) Butchers will be supplied with freezer coats of heavy material for use when working in refrigeration chambers, at the company's expense. These coats will remain the property of the company.
- (c) All company whitewear to be laundered at the company's expense.
- (d) Present practice not to be disturbed except as aforementioned.

#### Article 10

##### APPLICATION OF MARINE LAW

It is understood that nothing in this agreement shall conflict with Marine Law as set out in the Canada Shipping Act and in case of conflict the provisions of said Act shall govern.

#### Article 11

##### CRUISES

When extra hands are employed on cruises they shall receive one day's pay for each day on which they work.

#### Article 12

The following wage scales shall be in effect:

##### SS. Prince Robert

Supt. of Steamships.

Dated at Vancouver, B.C., September 1, 1936.

*In the Matter of the Industrial Disputes Investigation Act and of a Dispute between the Supervisory Officers of the Purser and Stewards Departments of the Canadian National Steamships (Pacific) and the Canadian National Railways.*

VANCOUVER, B.C.,

September 2nd, A.D. 1936.

*To the Chairman and Members of the Board of Conciliation and Investigation:*

The Supervisory Officers of the Purser and Stewards Department of the Canadian National Steamships (Pacific), i.e., the Purser and their Assistants, Chief and Second Stewards, and the Chief Cooks, and the Management of the Canadian National Railways desire to advise the Board that since the parties last met with the Board they have as suggested by the Board held meetings together privately in an effort to amicably adjust their differences.

The parties are now pleased to be able to advise the Board that as a result of said conferences all outstanding matters have been adjusted and settled and the further services of the Board are therefore not required.

The parties wish to thank the Board for the assistance rendered throughout the proceedings which have resulted as above indicated in an amicable settlement of the issues involved.

Signed on behalf of the Supervisory Officers of the Purser's and Stewards Departments, Canadian National Steamships (Pacific):

(Sgd.) F. H. CORAM,  
A. HARTLEY,  
J. BARROWCLOUGH.

For the Management, Canadian National Steamships (Pacific):

(Sgd.) THOS. LOUDEN,  
Supt. of Steamships.

## CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

### Summary of Recent Decisions

**R**EPORTS have been received of two cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the *LABOUR GAZETTE*, May, 1936, page 396, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award.

#### Case No. 174—Operating Department (Atlantic Region)

This case concerned the dispute in regard to the change in classification and rate of pay of three employees on the relief car ferry S.S. Scotia No. 1, Mulgrave, N.S., which is tied up in dock except when the regular car ferry is undergoing annual repairs.

Prior to January 1, 1936, three men classified as firemen at a rate of 54 cents per hour were employed on Scotia No. 1, in dock, but at that time the classification of one of the firemen was changed to handyman at 69 cents per hour and the classification of the other two firemen to watchmen at 42 cents per hour.

The employees contended that the management had violated the spirit and intent of Article 11, Rule (d) of the Schedule by arbitrarily changing the classification and rate of pay for these employees. The employees also contended that the changes made did not bring about any improvement in so far as the proper maintenance of the Scotia was concerned; and further that the changes were prompted by the desire of the supervising officer to retain the services of a certain junior employee, classified as handyman. In order to prevent this particular employee "from being displaced by a senior fireman" the supervising officer was alleged to have recommended that his classification be changed from fireman to handyman and this was done. The employees claimed that such procedure was contrary and irregular to the rules governing seniority and promotion.

After reviewing the circumstances under which the handyman was appointed and the allocation of duties among the three employees involved in the dispute, it was finally contended "that the classification of fireman should be re-established at the schedule rate of 54 cents per hour, and the employees whose rates were improperly reduced paid in full the difference between 42 and 54 cents per hour since January 1st the date on which the change became effective.

"In conclusion we submit that the setting up of the classification of handyman is irregular and improper inasmuch as it is used to deprive employees the right to employment at work they have performed under the classification of fireman for a period of years. Under the circumstances the classification of fireman should be re-established and the senior qualified employee assigned to the position."

The railways contended that prior to February 1934 the three employees were classified and paid as fireman. "At that time connections were made with the boiler in the power house at the Ferry dock and since then the boat has been heated from the power house except during periods of very cold weather when one boiler on the boat was used. It has not been necessary this winter to use the boiler at any time as the heating system has been increased to avoid the necessity of this. Inasmuch as the services of those employees are not required as fireman their classification as such was changed. Effective January 1, 1936, one position of handyman was created and rate of pay increased from 54 cents to 69 cents per hour. This employee is a qualified mechanic with many years marine experience and assists the machinist who is employed on the day shift making repairs. The classification of the other two firemen was changed to watchmen and their rate of pay reduced from 54 cents to 42 cents per hour which is the schedule rate for watchmen. These two employees are used on the other two shifts and work eight hours. Besides acting as watchmen they do other work which they have heretofore performed, such as scaling, cleaning and painting, shovel snow off dock, sponge boiler tubes once, turn main engine over by hand once a week, and adjust heaters. They are not required to do any firing and the work they perform is that of common labourers."

The case was heard on March 17, 1936, additional evidence being submitted by both parties to the dispute, and as no decision could be reached the case was referred to an Arbitrator under Clause 6 of the Agreement constituting the Board. The decision of the Arbitrator was that the claim of the employees be sustained.

#### **Case No. 181—Operating Department (Central Region)**

This dispute concerned the grievance of passenger station employees, Montreal, with respect to the filling of the position of Assistant Depot Master. During the summer of 1935 a certain employee was assigned to supervise the Red Caps employed at Bonaventure Station, Montreal, and when he was assigned to this position he was placed on the payroll as a station cleaner at 42 cents per hour. At the same time a station cleaner covered by the schedule was laid off. Action was taken by the employees and an investigation made, resulting in the reclassification of the position on the payroll as Assistant Depot Master at \$115 per month. Two employees other than the one mentioned above, submitted written applications for the position. The

employees maintained that the placing of an employee other than one of these two men represented an infraction of the "letter, spirit and intent of Item No. 6 of the Memorandum" being that the position should have been filled by the senior qualified applicant.

The officers of the Central Region did not submit any contention claiming that as the position of Assistant Depot Master, Bonaventure, was an excluded one, the case did not properly come before the Board. However, both parties appeared before the Board and gave oral evidence in support of their respective contentions. The evidence submitted failed to show that there had been a violation of the schedule in the appointment of the first mentioned employee to the position of Assistant Stationmaster, as the other applications were given due consideration.

The claim of the employees was denied.

#### **The Furniture Industry in Canada**

A preliminary report dealing with "The Furniture Industry in Canada, 1935," indicates that the industry is centred in south-western Ontario. Out of a total of 404 establishments in 1935, 215 were located in Ontario. The distribution for the remaining provinces being as follows: Quebec, 90; British Columbia, 48, Manitoba, 32, Alberta, 10, Nova Scotia, 5, and New Brunswick, 4.

Capital employed in these concerns in 1935 was reported at \$26,060,887, a slight decrease from the previous year. The value placed on lands, buildings, fixtures, machinery and tools was \$15,287,117; materials, stocks in process and finished products on hand were valued at \$6,182,854; and cash, trading and operating accounts totalled, \$4,590,916.

The average number of employees in 1935 was 8,827 as compared with 8,423 in 1934. The number of salaried employees was 1,320 and the payments for salaries during the year totalled \$1,789,353. The monthly average number of wage-earners was 7,507 while the wage payroll amounted to \$5,164,744.

Under section 6 of the Workmen's Compensation Act of New Brunswick, the Board has power to exclude any establishments from coming within the scope of the Act when not more than a stated number are employed. Under the authority of this section the Board made regulations published in the October 21 issue of the Royal Gazette, New Brunswick. Earlier regulations of the Board were given in the LABOUR GAZETTE for January, 1933, page 40.

## STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1936

THE following table shows the number of disputes, workers involved, and time loss for November, 1936, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Nov., 1936.....	14	1,264	11,327
*Oct., 1936.....	17	2,222	12,733
Nov., 1935.....	16	1,113	8,781

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

In the number of strikes and lockouts, the number of workers involved and in the time loss for November, decreases appear when compared with figures for October, but except in the number of disputes the figures were somewhat greater than in November last year. The only dispute involving a large number of workers for a considerable time was a strike of 340 coal miners at Cadomin, Alberta, which commenced in October and lasted until November 21. In October there were no disputes causing considerable time loss, and in November last year the most important disputes involved longshoremen and certain other water transport workers at Vancouver, B.C., and at neighbouring ports.

Five disputes, involving 517 workers, were carried over from October, and nine disputes commenced during the month. Of these fourteen disputes, eight terminated during the month; one resulting in favour of the workers affected, one in favour of the employer involved, two were partially successful, while compromise settlements were reached in two cases and the results of two were recorded as indefinite. At the end of November, therefore, there were on record six disputes recorded as strikes or lockouts, namely: fur factory

workers, Winnipeg, Man., coal miners, Naemine, Alta., furniture factory workers, Listowel, Ont., longshoremen, Vancouver, B.C., longshoremen, Point Edward, Ont., and restaurant employees, Hamilton, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to two such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; and moulders, Peterborough, Ont., February 27, 1934, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A strike of glass workers at Wallaceburg, Ont., commencing on August 20, was reported in the LABOUR GAZETTE as having terminated on August 26, the strikers being replaced. Information received subsequently indicates that the establishment has been picketed and that nine of the pickets have been arrested on charges of intimidation, assault, etc., and released on bail pending trial. A number of workers are reported by the union to be still on strike against the same company at Hamilton, Ont., and at Redcliff, Alberta, as well as at Wallaceburg, Ont.

A strike of coal miners at River Hebert, N.S., on October 23 was recorded in the LABOUR GAZETTE for November as terminated on October 26, a dispute as to cutting bars having been settled and negotiations as to an increase in wages having been arranged. Later information indicates that the negotiations did not result in a settlement and the mine has been closed and the equipment removed. The Minister of Mines for Nova Scotia and officials of the provincial Department of Labour have met the parties to the dispute but a settlement has not been reported.

A dispute involving two employees of one hotel at Regina, Sask., at the beginning of November has been reported, the establishment being picketed. The union claims that the employees were dismissed for union activity but the manager stated that they were dismissed for cause and that it was not known that a union had been organized.

A minor dispute, causing a cessation of work for one hour by ten truck drivers engaged in connection with road construction at Kaministiquia, Ont., occurred on November 12. The men demanded an increase in wages from \$1.25 per hour for two ton trucks to \$1.50 and this was conceded.

A minor dispute occurred in one cleaning and dyeing establishment at Toronto, Ont., resulting in a cessation of work by twenty-five employees for two hours on November 21. On the previous day one employee had been dismissed and when two members of the union requested reinstatement they were dismissed also. As a result of the strike all three were reinstated.

A cessation of work by thirty coal miners at a mine near River Hebert, N.S., on November 30 has been reported in the press but particulars have not been received.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**COAL MINERS, CADOMIN, ALTA.**—This strike of employees in one colliery on October 26 against the acceptance of an arbitration award regarding equal distribution of work, as provided for in the agreement in force, was terminated through the mediation of the western representative of the Department of Labour on November 23, work being resumed next day. It was arranged that the dispute would be referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.

**FUR FACTORY WORKERS, WINNIPEG, MAN.**—In connection with this dispute, which began on August 11, owing to the refusal of certain fur manufacturers to negotiate for agreements with the fur workers' union, the provincial government on November 13 appointed a commissioner under the Manitoba Evidence Act to inquire into the dispute. During the strike, a number of employers signed agreements with the union and work was resumed in their establishments. The investigation began on November 23 and the attempts of the union to enter into negotiations with the employers before the strike were reviewed. At the end of the month a settlement of the dispute had not been reported. The appointment of the commission is outlined elsewhere in this issue.

**WOMEN'S CLOTHING FACTORY WORKERS (DRESS CUTTERS), MONTREAL, P.Q.**—This dispute involving seven cutters in one establishment, who ceased work on October 12 in protest against the discharge of one worker, alleged to be for union activity, is recorded as having lapsed. It appears that the strikers have been replaced.

**BAG FACTORY WORKERS (COTTON AND BURLAP), WALKERVILLE, ONT.**—As stated in the November issue of the LABOUR GAZETTE a conciliation officer of the Department of Labour mediated, at the request of the Trades and Labour Council of Windsor, early in November. As a result negotiations between the parties were resumed and a settlement was reached on November 19, providing for wage increases for certain classes of work, operations to be resumed on November 23.

**HOTEL EMPLOYEES, WINDSOR, ONT.**—As stated in the LABOUR GAZETTE for November, at the request of the Trades and Labour Council, a conciliation officer of the Department of Labour dealt with the dispute early in November and a settlement was reached. It was agreed that wages paid were not in any instance below the provincial minimum scale and that in many instances the rates were much above it. It was arranged that wage increases would be made in some cases and that employees who were charged for meals should secure them elsewhere in future; also that all on strike would be taken back by December 1.

**COAL MINERS, NACMINE, ALTA.**—Employees in one establishment ceased work on November 25 owing to a dispute as to payment for grey coal. At the end of the month the dispute was not settled as the miners had refused to resume work pending negotiations between union officials and the management.

**BAKERY EMPLOYEES, HAMILTON, ONT.**—A number of bakers and helpers in one establishment ceased work on November 9 in protest against the dismissal of one baker following complaints that they were required to work more than fifty-six hours per week, the maximum permitted under provincial law. Wage increases were also demanded. Officials of the provincial Department of Labour investigated the dispute and, the management having satisfied the union representative that the man was not dismissed for the cause alleged, that the statutory hours would be observed, and that there would be no discrimination against union employees, work was resumed on November 13. Wages for one man were increased and negotiations for an agreement were reported to be in progress.

**MEN'S CLOTHING FACTORY WORKERS, TORONTO, ONT.**—Employees in one establishment ceased work on November 11 when one worker was dismissed for a minor infraction of rules. The management agreed to reinstate him and work was resumed after one-half day.

**WOMEN'S CLOTHING FACTORY WORKERS (CLOAKS AND SUITS) TORONTO, ONT.**—Employees in one establishment were involved in a

## STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1936\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to November, 1936</b>			
MINING, ETC.— Coal miners, Cadomin, Alta.....	340	6,000	Commenced Oct. 26, 1936; against arbitration decision <i>re</i> equal division of work; terminated Nov. 21, 1936; indefinite.
MANUFACTURING— <i>Fur, Leather, etc.</i> — Fur factory workers, Winnipeg, Man.....	100	2,000	Commenced Aug. 11, 1936; for union agreement, increased wages and 40-hour week; untermiinated.
<i>Textiles, etc.</i> — Women's clothing factory workers (dress cutters), Mon- treal, P.Q.....	7	30	Commenced Oct. 12, 1936; against dismissal of one employee; lapsed during November, 1936; in favour of employer.
Bag factory workers (cotton and burlap), Walkerville, Ont.....	36	700	Commenced Sept. 23, 1936; for increased wages and reduced hours; terminated Nov. 21, 1936; partially successful.
SERVICE— <i>Business, etc.</i> — Hotel workers, Windsor, Ont..	34	300	Commenced Oct. 8, 1936; for increased wages and reduced hours; terminated Nov. 12, 1936; partially successful.
<b>(b) Strikes and Lockouts commencing during November, 1936</b>			
MINING, ETC.— Coal miners, Nacmine, Alta.....	140	700	Commenced Nov. 25, 1936; <i>re</i> payment for grey coal; untermiinated.
MANUFACTURING— <i>Vegetable Foods</i> — Bakery employees, Hamilton, Ont.....	6	24	Commenced Nov. 9, 1936; alleged discrimination against union worker <i>re</i> observance of statutory hours; terminated Nov. 12, 1936; compromise.
<i>Textiles, Clothing, etc.</i> — Women's clothing factory workers (cloaks and suits), Toronto, Ont.....	25	100	Commenced Nov. 4, 1936; against contracting out of work; lapsed by end of November; indefinite.
Men's clothing factory work- ers, Toronto, Ont.....	60	30	Commenced Nov. 11, 1936; against discharge of worker; terminated Nov. 11, 1936; in favour of workers.
<i>Other Wood Products</i> — Furniture factory workers, Owen Sound, Ont.....	116	60	Commenced Nov. 5, 1936; for increased wages and recognition of union; terminated Nov. 5, 1936; compromise.
Furniture factory workers, Listowel, Ont.....	85	43	Commenced Nov. 30, 1936; to maintain equal division of work; untermiinated.
TRANSPORTATION— <i>Water</i> — Longshoremen, Vancouver, Victoria, etc., B.C.....	200	1,000	Commenced Nov. 23, 1936; sympathy with strike of longshoremen in U.S.A. and for recognition of union; untermiinated.
Longshoremen, Point Edward, (Sarnia), Ont.....	100	100	Commenced Nov. 30, 1936; for increased wages; untermiinated.
SERVICE— <i>Business, etc.</i> — Restaurant employees, Hamil- ton, Ont.....	15	240	Commenced Nov. 12, 1936; against discharge of worker; untermiinated.

\*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

cessation of work on November 4 owing to a dispute as to contracting out work, alleged to be contrary to the agreement with the union. The employer is reported to have closed the establishment and retired from business.

**FURNITURE FACTORY WORKERS, OWEN SOUND, ONT.**—Employees in one establishment ceased work on November 5, demanding recognition of the union and increases in wages. The management had agreed to negotiate an adjustment of the wage scale with a committee and negotiations were resumed during the strike and resulted in a settlement providing for increases of one cent to five cents per hour for about forty employees. Union recognition was refused. Work was resumed next morning.

**FURNITURE FACTORY WORKERS, LISTOWEL, ONT.**—A number of employees in one establishment ceased work on November 30, demanding the reinstatement of two workers laid off and claiming that this was a violation of a clause in the agreement stipulating that work should be divided equally. Early in December it was arranged that work would be divided as much as possible, and operations were resumed on December 2.

**LONGSHOREMEN, VANCOUVER, VICTORIA, ETC., B.C.**—Members of the locals of the International Longshoremen's Association at Vancouver, Victoria and New Westminster declared a strike on November 23 in sympathy with the strike of water transportation workers on the Pacific Coast in the United States. The members of these unions had been employed to some extent on work for coastal shipping since the strike which terminated in December, 1935, but had very little work for ocean going ships as this was done since the strike by members of independent unions

which have agreements with the Shipping Federation of British Columbia. The unions involved in the strike of 1935 had been affiliated with the Longshoremen and Water Transport Workers of Canada and to a great extent ceased to exist after the strike but the Coastwise Longshoremen's Union at Vancouver and those at Victoria and New Westminster later became locals of the International Longshoremen's Association. From time to time the members of these unions have attempted to obtain a greater proportion of the work in the ports and have been supported by the crews of United States ships, these on some occasions having refused to work the ship if loaded or unloaded by members of other unions. In some cases cargoes were not handled and in other cases compromises were reached. In the present strike the members of these unions are demanding jurisdiction over all longshore work in the ports and have been picketing the docks. Large quantities of cargoes to and from United States ports, carried by the railways, have been handled at British Columbia ports owing to the strike in the United States. The shipping companies have, therefore, been employing about 1,400 longshoremen, almost twice the normal force. Some time ago the coastal shipping employers joined the Shipping Federation and notified the longshoremen to join the unions with which the Federation had agreements. Some of them did so and are not involved in the present dispute.

**LONGSHOREMEN, POINT EDWARD (SARNIA), ONT.**—A number of employees ceased work on November 30 demanding increases in wages from 35 cents per hour to 45 cents for day work and 50 cents for night work. Gradually the strikers were replaced until navigation closed on December 11.

### Appointment of Commission to Investigate Fur Workers' Dispute in Winnipeg

The Government of Manitoba on November 13 appointed by Order in Council, under the Manitoba Evidence Act, a commissioner to inquire into a dispute between the fur manufacturers and fur workers in the Greater Winnipeg area.

As stated from month to month in the *LABOUR GAZETTE*, a strike of employees (reported as numbering 350, in some thirty-five establishments), began early in August, the employers having refused to recognize the local of the International Fur Workers' Union and sign agreements providing for the 40 hour week, increases in the wages, etc. From time to time, it has been reported, several of the employers entered into agreements with

the union and work was resumed in their establishments. The other employers claimed that most of the employees in their establishments did not wish to work under such an agreement and were not on strike to any great extent. Efforts of the provincial Department of Labour, as well as of the municipal and federal authorities, to bring about a settlement were unsuccessful (*LABOUR GAZETTE*, October 1936, p. 876).

The Order in Council (*Manitoba Gazette*, No. 21, 1936) provides for an inquiry into the following:—

- (1) What are the reasons for the strike among workers engaged in the fur industry?

- (2) Did any disputes or differences between employers and employees in the fur industry exist prior to August 2, 1936?
- (3) How many of the workers engaged in the fur industry in Greater Winnipeg were members of the International Fur Workers' Union prior to the time of the strike?
- (4) What was the number of the workers engaged in the fur industry at the time of the strike and what proportion of them was desirous of an agreement being negotiated between the employers and the employees?
- (5) What efforts were made by representatives of workers to secure an agreement with the employers?
- (6) What is the number of employers engaged in the fur industry and what proportion of them entered into an agreement with the representative of the employees?
- (7) What are the terms of said agreement?
- (8) At the time of the strike how many workers were engaged in the plants of the employers who entered into such an agreement?
- (9) What are the reasons offered by employers for refusing to enter into an agreement with the International Fur Workers' Union?
- (10) Has any coercion or intimidation been used by employers or union representatives or others to prevent or compel fur workers joining the union?
- (11) What is the general condition of the fur trade in Greater Winnipeg in respect to:—
  - (a) Seasonal work;
  - (b) Hours of labour;
  - (c) Wages paid;
  - (d) Observance of law regarding minimum wages?

The commissioner, Mr. Robert Jacob, K.C., is to report to the Minister of Labour and to the Attorney General. Mr. D. Grant Potter, K.C. was appointed as counsel.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1936, in the review of Strikes and Lockouts in Canada and Other Countries, 1935. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes reported as beginning in October was 82 and 20 were still in progress from the previous month, making a total of 102 disputes in progress during the month, involving 38,500 workers with a time loss of 148,000 working days for the month. Of the 82 disputes beginning in October, 17 were over demands for increases in wages, 17 over other wage questions, 3 over questions as to working hours, 23 over questions respecting the employment of particular classes

or persons, 11 over other questions of working arrangements, 7 over questions of trade union principle and 4 were due to sympathetic action. Settlements were reached during the month in 76 disputes, of which 18 were settled in favour of workers, 35 in favour of employers and 23 resulted in a compromise. In 7 other disputes, work was resumed pending negotiations.

The longshoremen's strike at Glasgow which was mentioned in the last issue of the LABOUR GAZETTE was terminated October 28 on the employers' terms.

### France

During the latter part of November, a new series of strikes broke out in various districts, in which the strikers occupied the factories, refusing to work or to leave the premises. At Maubeuge and surrounding district, 20,000 metal workers were on strike and at Lille, 8,000 other metal workers were out on strike.

### United States

A strike of 4,000 workers in an automobile accessories manufacturing plant at South Bend, Indiana, for a union closed shop lasted from November 18 to November 25, during the first six days of which time several hundred of the strikers occupied the plant. Negotiations after all the strikers had left the plant brought about the settlement, through which recognition of the union as the bargaining agency for its members was conceded, although closed shop was not granted.

Strikes of over 7,000 workers in plate glass manufacturing plants at Pittsburgh, Pennsylvania, and Ottawa, Illinois, and 1,200 steel products workers at Detroit, Michigan, were seriously affecting the automobile manufacturing industry at the beginning of December.

Following a twenty day strike, 9,000 celanese yarn manufacturing workers at Cumberland, Maryland, were successful early in December in securing a 12½ per cent wage increase and collective bargaining.

The strike of longshoremen which was noted in the last issue of the *LABOUR GAZETTE*, continued into December. Continued efforts by federal government conciliators had succeeded

only in releasing traffic to and from Alaska, but further meetings were being arranged both on the western and eastern coasts. On the east coast and the Gulf of Mexico ports, the strike was begun by seamen who had left the International Seamen's Union and who were later joined by certain other marine unions. Although originally going out on strike in sympathy with strikers on the western coast, the eastern strikers later put forward demands for increased wages, shorter hours and other demands. The International Seamen's Union who have an agreement with ship owners continued to supply crews for certain vessels on the eastern coast.

### Training in Industry

Embodying the results of inquiries conducted between 1931 and 1934 by the Association for Education in Industry and Commerce (Great Britain) a report entitled "Training in Industry" has recently been published by Sir Isaac Pitman and Sons, Limited, London.

As pointed out in the introduction "Early in 1931 the Council of the Association for Education in Industry and Commerce (now a constituent of the British Association for Commercial and Industrial Education) attempted to make some differentiation between what may be called the internal and the external sides of training for business purposes. Much public attention was then being given to such questions as the qualifications of recruits to industry, the methods of training, and the kind of education best suited to develop these recruits for the ultimate occupation of responsible posts."

Along such broad lines, the inquiry was apparently conducted, although "no attempt was made to define the exact type of training being investigated" . . . . . it being understood that "those responsible for the Inquiries had in their minds all forms of training likely to furnish evidence of suitability (or otherwise) for a business career, which are also intended to develop the faculties and create the mental attitude deemed to be essential for the ultimate assumption of business responsibility."

Under a plan now being put into effect by the Dominion Department of Fisheries thoroughly qualified instructors will aid the fishermen in different Atlantic areas in determining how best the principles of various types of economic group action can be applied to the solution of their problems. Arrangements have been made by the Minister of Fisheries, Hon. J. E. Michaud, to have this educational program carried on by the Extension Department of the University of St. Francis Xavier. At the present time this work is being carried out in northeastern New Brunswick.

Approximately 250 employees of the Stratford and Montreal factories of the Kroehler Manufacturing Company, received wage increases recently according to an announcement made by the vice-president and general manager of the company in Canada. It was estimated that approximately 75 per cent of the total day and piece workers in both plants would receive a 10 per cent increase, and the remaining 25 per cent would receive a 5 per cent increase.

In a bulletin entitled "The Leather Industry of Canada, 1935," the Dominion Bureau of Statistics states that the tanning of hides and skins now forms one of the most important manufacturing industries in Canada. In 1935, the number of tanneries in operation in the Dominion was 85; capital investment was valued at \$22,982,210; and the value of production amounted to \$20,497,553. The number of persons employed in the industry during 1935 was 3,967, an increase over the preceding year of 387, the total wages and salaries paid being \$3,920,106 compared with \$3,483,301 in 1934.

A warning that minimum wage regulations applicable to restaurants must be obeyed was reported issued recently by Mr. Gustave Franco, chairman of the Quebec Minimum Wage Board. His statement followed the conviction of one Montreal restaurant proprietor with the further announcement that action will be pressed in several other cases.

## ANNUAL REPORT OF THE DOMINION DEPARTMENT OF LABOUR

### Administrative Activities during Fiscal Year ending March 31, 1936

Reflecting an eventful year, particularly in respect to social and economic measures, the annual report of the Department of Labour for the fiscal year ending March 31, 1936, details the department's activities in connection with the administration of the legislation under its jurisdiction. The Acts administered under the authority of the Minister of Labour during the period covered by the report are: Labour Department Act; Conciliation and Labour Act; Industrial Disputes Investigation Act; Employment Offices Co-ordination Act; Technical Education Act; Combines Investigation Act (first half of the fiscal year); the Relief Act, 1935; and Government Annuities Act.

It should be pointed out that the Department is also charged with the administration of the fair wages policy of the Dominion Government, and with certain duties arising out of Canadian Membership in the International Labour Organization, League of Nations.

As the basic features underlying most of the above measures have been presented repeatedly in similar annual reviews in the LABOUR GAZETTE over a period of years, and since a summary of 1934-35 annual report appeared in the January issue of this publication, it is not the intention in the present article to again cover the entire field of the department's activities.

### Employment and Wage Trends

A statistical summary of the employment trend during the year covered is given by the Deputy Minister, Mr. W. M. Dickson, in a general preface to the report. The deputy's analysis of statistics compiled by the Department of Labour and the Dominion Bureau of Statistics indicated a fairly substantial net improvement in the employment situation during the fiscal year.

The figures of unemployment among members of trade unions reporting to the department show that the percentage of the membership unemployed was 14.5 per cent at March 31, 1936, compared with 16.7 per cent at March 31, 1935, a net decrease of 13.2 per cent between the two dates. A monthly comparison between the two years shows approximately the same situation. The employment index number of the Dominion Bureau of Statistics stood at 97.4 on April 1, 1936, in comparison with 93.4 on April 1 a year earlier. These index numbers are based upon returns submitted by over 9,000 firms

throughout Canada, employing an aggregate of more than 900,000 workers. The index number average for the year ending with March 31, 1936, was 100.7 points, an increase of 3.5 points over that of the preceding year.

The index number of changes in the cost of living maintained by the department showed little variation during the fiscal year, though slightly higher at the end of the twelve months than at the beginning, prices of food having advanced nearly 10 per cent.

Wages rates in 1935 moved generally upward, the increases being slight in metal trades, printing trades, electric railways, and coal mining, and from 2 to 5 per cent in other industries. In building trades and lumbering rates were still about 20 per cent below 1930 levels, while in coal mining they were only 2 per cent lower than the 1930 levels.

Strikes and lock-outs were less numerous in 1935 than during the preceding year and involved smaller number of workers with substantially less time loss. There were 120 disputes, involving 33,269 workers, with a time loss of 288,703 man working days.

### Relief Situation

A further important reference to the social-economic situation was contained in the deputy ministers' summary of relief activities. After referring to the decision of the Dominion-Provincial Conference of December, 1935, in the matter of securing more complete details respecting relief recipients and the subsequent classification, the deputy's statement continues:

"As indicated by tabulations already made from the classification of direct relief recipients submitted by the provinces, 1,326,057 persons on an average were on direct relief administered by the municipalities and/or the province, to which the Dominion Government contributed, during the months December, 1935, to March, 1936, inclusive. Of the total number of relief recipients 69.53 per cent were employable persons over 16 years of age and dependents of employable family heads, i.e., wives, children under 16 years of age and children over 16 years of age at school full time; 4.97 per cent were unemployable persons over 16 years of age and dependents of unemployable family heads; and 25.50 per cent were farmers and their families. The average number of employable persons on relief during the same months was 342,703, these persons being either totally unemployed or under-employed. During the above four-

month period the average number of unemployed persons over 16 years of age was 33,919, and the average number of farmers, 69,806.

Complete details, both of the Dominion disbursements under the Relief Act and the classification of direct relief recipients, are presented in tabular statistics.

### Labour Legislation

At the conclusion of the period, covered by the report (March 31, 1936) two measures, introduced in the House of Commons by the Hon. Norman McL. Rogers, Minister of Labour, were in process of enactment. These were the National Employment Commission Act (LABOUR GAZETTE, July, 1936, page 601) and the Unemployment Relief and Assistance Act (LABOUR GAZETTE, July, 1936, page 601).

Another relief matter that was also then in the transition stage was the closing of the relief camps (LABOUR GAZETTE, March, 1936, page 219, and July, 1936, page 608).

The deputy's prefatory survey also included the social legislation—the Acts implementing Draft conventions of the International Labour Organizations and the Employment and Social Insurance Act—which (at the close of 1935) were referred to the Supreme Court for a judicial determination (LABOUR GAZETTE, July, 1936, page 585). Following the Supreme Court decisions, the measures were appealed before the Privy Council (LABOUR GAZETTE, August, 1936, page 679).

*Fair Wages and Hours Legislation.*—New legislation respecting fair wages and hours of labour in relation to public works and contracts was enacted on June 28, 1935. This measure, entitled The Fair Wages and Hours of Labour Act, 1935, repealed The Fair Wages and Eight Hour Day Act, 1930, but re-enacted a number of sections of that Act and added new provisions to comply so far as possible with certain of the recommendations of the Price Spreads Commission, which had made its report in April, 1935.

The Fair Wages and Hours of Labour Act, 1935, continues the policy set out in the former Act with respect to wage rates and an eight hour day on works of construction, re-modelling, repair and demolition undertaken by the Government of Canada directly or by contract. The new features make provision for a forty-four hour week on such works, and extend the policy of fair wages and a forty-four hour week to works towards which federal aid is granted by way of contribution; subsidy, loan, advance or guarantee.

The Act came into force on May 1, 1936.

### Arbitration and Conciliation

Reporting on the administration of the Industrial Disputes Investigation Act and the conciliation service, the deputy minister observed:

"Although for the first time in seven years a cessation of work occurred despite proceedings under the Industrial Disputes Investigation Act, the strike was not of a serious nature. The industry in which this threatened strike was not averted as a result of board proceedings was coal mining. While ten coal operators and 1,350 miners in the Drumheller, Rosedale, and Wayne districts in Alberta were involved in the dispute, only 370 men employed in three mines went on strike, the board's recommendations being accepted in the case of the seven other mining companies and their employees.

"Thirty applications for the establishment of Boards of Conciliation and Investigation were dealt with during the year. In only seven cases, however, was recourse to formal procedure under the Act necessary.

"Numerous requests were received in the Department of Labour during the year from employers and workpeople for assistance in settling industrial controversies, and the very able efforts of the conciliation officers in this connection were rewarded with an excellent measure of success."

Chapters in the report detail the administrative proceedings under the Industrial Disputes Investigation Act and also the Mediation work conducted under the Conciliation and Labour Act.

### Canadian Government Annuities

A noteworthy feature in connection with the administration of the Government Annuities Act was the outstanding increase in the purchase by the public of this form of security. There were 6,357 contracts issued during 1935-36 as compared with 3,930 in 1934-35, 2,412 in 1933-34, and 1,375 in 1932-33, while purchase money received totalled \$21,281,981.31, as against \$13,376,400.02 in 1934-35, \$7,071,439 in 1933-34, and \$3,547,345.03 in 1932-33. This shows an increase of 362.3 per cent in the number of contracts issued during 1935-36 as compared with 1932-33, and of 500 per cent in the purchase money received.

### Canada Regained Seat on Governing Body of I.L.O.

The most important development during the year in Canada's relationship with the International Labour Organization was the regaining of the Canadian Government's seat

on the Governing Body. This position was lost in the previous year when the revised list of the eight countries of chief industrial importance was adopted at the sixty-ninth session of the Governing Body, the United States and Russia replacing Canada and Belgium. With the resignation of Germany from the League of Nations and the International

Labour Organization, effective in October, 1935, Canada was designated by the Governing Body at its seventy-third session to take the seat previously filled by Germany. At this session, also, Dr. W. A. Riddell, the Canadian Representative, was unanimously elected chairman of the Governing Body.

## NATIONAL RELIEF REGISTRATION

### Numbers of Relief Recipients in Canadian Cities Over Twenty-five Thousand Population

A reduction of 3.97 per cent in the total number of persons receiving direct relief last September in twenty-two Canadian cities, as compared with September, 1935 is shown in preliminary figures issued on November 25, 1936, by the National Employment Commission. Reduction from September, 1934 figures works out at 7.44 per cent.

This announcement included comparative figures of direct relief recipients in all Canadian cities of twenty-five thousand or over, with the exception of Saint John and Moncton, New Brunswick. Owing to the application of Dominion grants-in-aid to public works rather than direct relief in New Brunswick during part of this year, figures were not included for cities in that province.

The figures include only direct relief to which the Dominion and provinces contribute. They are applicable only to relief looked after in the first instance by municipal corporations except in Vancouver, where certain Provincial relief cases are also included.

The twenty-two cities covered in the statement and tabular matter issued by the Commission, have heretofore represented approximately 63 per cent of direct relief, other than farm relief, it is estimated. In September, 1935 the same cities accounted for 51.27 per cent of all direct relief recipients, including those on farm relief. The eight largest cities, Montreal, Toronto, Vancouver, Winnipeg, Hamilton, Quebec, Ottawa and Windsor, returned approximately 82 per cent of those receiving direct relief in the twenty-two cities covered.

These figures are the first to be issued following the September registration of direct relief recipients carried out for the Commission. They are necessarily preliminary and subject to minor revision. As available, additional figures will be given out. It is to be

noted that all heads of families and individual persons on relief from the cities enumerated are included in the table, regardless of whether they are employable or unemployable.

The tabular matter, which includes comparison with figures for the same cities for September, 1935, and September, 1934, is as follows:

COMPARISON OF TOTAL NUMBERS OF PERSONS OF ALL CLASSES ON DIRECT RELIEF IN SEPTEMBER, 1934, 1935 AND 1936

## OCCUPATIONAL TRENDS IN CANADA

### An Analysis of the Distribution of the Gainfully Employed Population, 1881-1931

**D**URING the past half-century the occupational pattern of Canada has undergone a marked transformation. Even for several decades after Confederation, the Dominion remained basically agrarian, and the majority of the population won its living from the land. As late as 1891, the population of Canada was nearly seventy per cent rural. With the turn of the century, however, began the rapid diversification of the national economy which was to bring about so great a degree of urbanization that by 1931 less than half of the Canadian people lived in rural areas. Huge quantities of outside capital flowed in to make possible the exploitation and development of the country's rich and varied natural resources. Great new industries came into importance, while specialization and the increasing use of machinery proceeded apace. Large numbers of workers found employment in entirely new occupations, while older occupational groups showed corresponding declines. As a consequence of these developments, the present distribution of Canada's gainfully occupied population among the various occupational groups differs radically from that which existed in the early days of the Dominion.

Any analysis of occupational trends in Canada must first take into consideration the growth of the total population of the Dominion. In the past seven decennial census years the total population of Canada has been as follows:—

1871..	3,689,257..	100.00%
1881..	4,324,810..	117.23%
1891..	4,833,239..	130.98%
1901..	5,371,315..	145.56%
1911..	7,206,643..	195.30%
1921..	8,788,483..	238.17%
1931..	10,376,786..	281.21%

From the foregoing, moreover, it is obvious that such a study of occupational trends in Canada must be based upon the relation between the total population and the total number gainfully employed. In other words, comparative tables must be on a percentage basis. Otherwise, many occupations would show a continued increase; whereas some have declined considerably in relation to the total population. The accompanying table (I) is based upon Dominion decennial census figures.

TABLE I—TOTAL EMPLOYMENT IN CANADA BY  
DECENNIAL CENSUS YEARS

Year	Population ten years of age and over	Total Employed	Percent Employed
1881.....	3,162,122	1,377,585	43.56
1891.....	3,611,882	1,606,369	44.47
1901.....	4,063,943	1,782,832	43.87
1911.....	5,514,388	2,723,634	49.39
1921.....	6,671,236	3,173,169	47.56
1931.....	8,159,059	3,927,591	48.14

For census purposes, a gainful occupation is an occupation by which the person who pursues it earns money or money equivalent, or in which he assists in the production of marketable goods. Young children helping at home or women doing housework in their own homes without wages, and having no other employment, are not included among the gainfully employed. A gainfully occupied person may be an employer, a worker on his own account, a wage-earner, or an unpaid family worker (such as a storekeeper's or a farmer's son) who fills the place of a wage-earner.

An examination of Table I reveals that the percentage of the Canadian population finding gainful occupations has averaged well over four units higher during the present century than in the closing decades of the preceding century. The average percentage of the population ten years of age and over gainfully employed in 1881, 1891, and 1901 was 43.97 per cent, whereas the average percentage for 1911, 1921, and 1931 amounted to 48.36 per cent. This rise has coincided with the steady increase of the percentage of gainfully occupied females and the progressive decrease in the number of dependents in the average family.

Table II records the distribution of the gainfully occupied population of Canada among the various occupational groups in the decennial census years of the past half-century. Unfortunately, it is impossible to include the figures for 1911 in this table, owing to the fact that the census returns of that year have not been classified and compiled by the Dominion Bureau of Statistics on an occupational basis comparable with the returns of other census years. This omission, however, does not prevent the detection of the occupational trends of Canada through the years, which in the main are unmistakable.

TABLE II—OCCUPATIONAL DISTRIBUTION OF THE GAINFULLY EMPLOYED IN CANADA

Occupation Group	1881	1891	1901	1921	1931
	%	%	%	%	%
Agriculture.....	53.07	45.51	39.85	32.82	28.82
Manufacturing....	12.74	14.73	16.60	12.83	12.10
General unskilled labour.....	7.03	7.22	7.18	9.63	11.13
Service.....	7.27	9.15	9.26	8.12	10.13
Trade.....	5.01	5.26	5.28	8.39	7.99
Transportation...	3.08	3.80	4.61	6.34	7.67
Construction.....	4.96	5.37	4.98	5.11	5.17
Professions.....	3.19	3.68	4.36	5.38	5.63
Clerical work.....	0.34	1.49	3.09	6.87	6.59
Fishing, hunting, and logging....	2.66	2.65	2.44	2.14	2.34
Mining.....	0.51	0.95	2.06	1.52	1.49
Finance and insurance.....	0.14	0.19	0.29	0.85	0.94
All occupations	100.00	100.00	100.00	100.00	100.00

The accompanying chart presents the above material in graphic form.

The first significant point to appear in the above table is the steady decline in the percentage of people who find employment in agriculture. Although agriculture still gives employment to a greater number of workers than any other single occupation, the 1931 percentage had dropped to 54 per cent of the figure of half a century before. Large-scale farming and the mechanization of agriculture have materially contributed to this decline. Within the period under review, the size of the average Canadian farm has more than doubled. In the closing decades of the past century, during which the agricultural industry remained fairly stable, the average Canadian farm occupied slightly less than 100 acres; now it occupies more than 200 acres. Until the turn of the century, moreover, the exportable surplus of Canadian agricultural products was comparatively small. Within three decades of the present century, however, this surplus has increased more than tenfold and has established itself as easily the most important item in the national economy. Fewer farms have tended to produce a continually increasing output; and, moreover, the trend has been for proportionately fewer workers to be required in this operation. Consequently there has been a decreasing percentage of the Canadian population directly engaged in agriculture.

This constant diminution in the percentage of agricultural workers has been a major contributing factor in the urbanization of the Canadian population. The marked shifting of emphasis from the rural to the urban has been accompanied by the complication of the problems of adjustment within the occupational groups other than agriculture. Rural Canada has continually fed a supply of workers to these groups, in many cases a greater

supply than they could absorb. At the same time, technological advance has affected other industries in the same way that it has affected agriculture, that is, by substantially increasing the output of each worker and thus lessening the demand for workers within the industries. It is to be observed that in the period under review the percentage of Canadian workers in the general unskilled labour group has been continually increasing. In preparing Table II, allowance has been made for the fact that in 1881 agricultural labourers were included in the general labour group, and the two percentages involved have been adjusted accordingly in order to put them on a comparable basis. Subsequent to 1881, the general unskilled labour group has consisted mainly of odd job workers and all unskilled labourers other than agricultural, mining and logging workers. This group, its numbers constantly swelled by workers no longer required in the operation of agriculture and other increasingly mechanized industries, constitutes one of the most serious factors in Canada's unemployment problem.

It will be noted that the percentage of the working population finding employment in the fishing, hunting, and forestry occupational group, while registering a slight decline, has remained fairly constant. This group, like agriculture, consists largely of workers who might be termed primary producers.

Mining, the other primary producing occupational group, reached its peak percentage about the turn of the century. In very recent years, however, considerably more attention has been and is being focussed upon the development of the mining industry, and it is highly probable that the trend of the percentage of workers within the mining occupational group is becoming definitely upward once more.

Throughout the years under review, manufacturing (including electric light and power) has on the average ranked second only to agriculture in size as an occupational group. The percentage of workers finding employment in manufacturing industries reached its highest point at the beginning of the present century. Since then, the machine has tended to replace hand labour to an increasing extent, with the result that proportionately less workers have been required, while industrial output has continued to expand. It is perhaps within the manufacturing industries most of all that mechanization and scientific research have increased efficiency and correspondingly reduced man-power requirements. At the same time, however, while research and human ingenuity tend to close certain avenues of employment to the worker, the same forces

are constantly engaged in seeking and revealing new fields of endeavour, new potential industries which will therefore give employment and also further the progress of humanity towards a better standard of living. Thus in the long run a balance, or a partial

balance, may be struck between the conflicting effects upon the employment field of these interacting forces.

The percentage of workers engaged in construction has been close to five per cent in every census year of the period reviewed.

PERCENTAGE DISTRIBUTION BY OCCUPATIONAL GROUPS OF PERSONS GAINFULLY EMPLOYED IN CANADA, CENSUS OF 1881, 1891, 1901, 1921 AND 1931

In the census of 1911 the gainfully employed population was classified mainly by industry

Thus it would appear that this percentage is the maximum proportion of the nation's gainfully occupied population that can find steady employment within this occupational group.

The transportation, trade, and finance-insurance groups all have registered continual and substantial growth throughout the past half-century, growth which is indicative of the diversification and increasing complexity of the Canadian economy. The percentage of workers employed in transportation (including communications, warehousing, and storage) increased continually, and in 1931 was 250 per cent of the 1881 figure. Growth within the trade group was also marked but more uneven, with great acceleration being shown in the first two decades of the present century. The percentage increase of workers in the finance-insurance group has been fairly continuous, and this small but important division in 1931 gave employment to about one per cent of Canada's gainfully occupied population.

Professional pursuits in 1931 gave employment to some 225,000 persons, as compared with some 45,000 in 1881. This was a marked increase, in comparison with the growth of the total population and of the total number of gainfully occupied. Within the period under review the percentage of professional workers, by far the most highly specialized and most highly educated of all the occupational groups, nearly doubled itself, while the actual number of professionals in 1931 was five times the number in 1881.

The trend has also been upward in the service group, which includes domestic and personal service, custom and repair, laundering, cleaning, dyeing, and pressing. It is in this occupational group, which in 1931 gave employment to one-tenth of all Canadian workers, that the problem of an adequate wage is usually most serious. Moreover, the problem becomes still graver in years of depression, as the ranks of the service group (domestic service, especially) are then swelled by workers who cannot find employment in their usual occupations.

The most striking growth was recorded in a strictly urban occupational group, the clerical workers. This group includes office clerks, stenographers, office appliance operators, and bookkeepers. In 1881 only 0.34 per cent of the gainfully occupied population of Canada was engaged in clerical work; by 1931 the percentage had risen to 6.59, an increase of 1838 per cent or nearly twenty-fold. Office work in 1931 gave employment to a quarter of a million Canadians, and it is significant to note that during the most recent depression the "white-collar" worker suffered considerably less unemployment than did the wage-earner

in any other occupational group. On June 1, 1931, for instance, the percentage of all wage-earners out of work in Canada was 18.29; the percentage of clerical workers out of work on that date, however, was only 8.48.

An examination of the distribution of the gainfully occupied women of Canada among the various occupational groups discloses an occupational pattern that differs considerably from that of the gainfully occupied population as a whole. No figures are available for 1881, but in the succeeding decennial census years the occupational distribution of gainfully employed women has been as shown in Table III.

TABLE III—EMPLOYMENT OF WOMEN IN CANADA

Year	Total number of females ten years of age and over	Total number of females gainfully employed	Percentage of females gainfully employed
1891.....	1,770,877	185,990	% 11.07
1901.....	1,981,790	237,949	12.01
1911.....	2,548,743	364,821	14.31
1921.....	3,209,998	490,150	15.27
1931.....	3,906,522	665,919	17.05

It is evident from the above table that the trend of the percentage of gainfully occupied women in Canada has been progressively upward, whereas the peak percentage for the gainfully occupied population as a whole was reached in 1911, as shown in Table I.

There were in 1931, the figures for which year are the latest available, 660,000 gainfully occupied females in Canada. One-third of this total, 220,000, was engaged in domestic and personal service—by far the largest single occupational group for women. Next was the professional group, with 118,000 workers, 18 per cent of the gainfully occupied females. Included among the female professionals were 65,000 school teachers, 33,000 nurses and nurses-in-training, 10,000 nuns and other religious workers, and 5,000 musicians and music teachers. Closely following the professional group was the clerical group, with 116,500 female workers, constituting 17 per cent of all gainfully occupied women. Within this group were 65,000 stenographers and typists, 29,000 office clerks, 21,000 bookkeepers and cashiers, and 1,500 office appliance operators. Manufacturing gave employment to some 85,000 women, about seventy per cent of whom were textile workers. Of 54,000 women employed in the trade group, 45,000 were engaged as saleswomen behind the counters of retail stores. About 24,000 women were following agricultural pursuits, and about the same number was employed within the transportation-communication group. Of the latter

number, over 14,000 were telephone operators and about 8,000 were employed as packers, wrappers, and labellers in the warehousing and storage subdivision. Approximately 9,000 female workers were engaged in laundering, cleaning, dyeing, and pressing, while nearly 12,000 were listed as general unskilled labourers. Practically no women were employed in fishing, hunting, forestry, mining, construction, finance or insurance.

It is apparent, therefore, that women have penetrated many branches of the employment field to an increasing extent. This trend has been so marked in the case of certain occupational groups that women are now in the majority.

Apart from the entry of women into many avenues of employment, several other significant facts are revealed by the preceding analysis. In the first place, the urban worker has come to outnumber the rural worker. Secondly, the proportion of our gainfully occupied engaged in primary production has dwindled, while the percentage of those em-

ployed in secondary production and still more in the auxiliary occupations, has continued to rise.

The paramount fact to emerge from any analysis of occupational trends in Canada is the growing diversification of the national economy; and this development, finding its roots in the increasing use of the machine and the specialization of labour, has been accompanied by a substantial elevation of the general standard of living. Unfortunately, however, the striking advance in technological method which has taken place in the period under review has been offset by widespread unemployment during the depression and these unemployed are as yet denied most of the benefits which should accompany such an improved standard of living, and the betterment of their lot constitutes one of the major problems of government to-day.

NOTE.—The population section of the 1937 *Canada Year Book* will contain a complete occupational analysis of the 1931 decennial census figures.

## OLD AGE PENSIONS IN CANADA

### Financial Summary as at September 30, 1936

The accompanying table gives a statistical summary to September 30, 1936, of the chief factors—numbers of pensioners and amount of Dominion disbursements—in the operation of old age pensions in Canada under the Old Age Pensions Act (Revised Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42), and under concurrent Acts by the provinces participating in the scheme.

In order to avoid the duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

The present summary was prepared in the Department of Finance.

FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT  
SEPTEMBER 30, 1936

## LABOUR LEGISLATION IN QUEBEC AND BRITISH COLUMBIA IN 1936

THE Legislatures of British Columbia and Quebec have both held second sessions in 1936. (The labour legislation enacted at the earlier sessions of their Legislatures was re-

viewed in the LABOUR GAZETTE for May, page 408, and for July, page 606.) A number of laws of labour interest which were enacted are summarized below.

### Quebec

The Quebec Legislature, which sat from October 7 to November 12, passed a law providing for a Department of Health, repealed the Forest Operations Commission Act and amended statutes relating to collective labour agreements, trade unions, workmen's compensation, stationary enginemmen, pressure vessels and old age pensions.

#### Collective Agreements

The Collective Labour Agreements Extension Act was amended to provide that where a joint committee takes action to enforce an agreement several claims against the same employer may be joined in the same suit and that several employees may join in the same suit against the same employer. In such actions the joint committee is to be deemed to be a third party for the purposes of the evidence and not as one subrogated for or as the representative of any employee.

Persons violating the wage terms of an agreement are now brought under the penalty provisions of the Act and in addition to paying to the joint committee, as before, a sum equal to 20 per cent of the wage claim as liquidated damage, they are also liable to a maximum fine of \$10 and costs for a first offence and \$50 and costs for a subsequent offence.

The amending Act adds two clauses relating to the building industry. These amendments are designed to remedy weaknesses revealed by judicial decisions involving the application of the statute.

Subject to the exemptions for workmen permanently employed in the maintenance of religious or charitable institutions or manufacturing establishments, as provided for in the 1935 amendment to the Act, a collective labour agreement made obligatory in the building industry is to be binding not only upon employers and workmen belonging to that industry, but upon every person, association or corporation employing workmen in building either casually or permanently. An agreement must enumerate exceptions where it is not to apply. The Minister of Labour may recommend, however, that the agreement shall not affect work done by members of the same family. Contractors ordinarily engaged in the work of demolition are to be considered members of the building industry and subject to the provisions of a collective agreement.

An Act respecting the Extension of the Collective Labour Agreement ratified by Order in Council No. 1723 of June 28, 1935, and Order in Council No. 1131 of April 15, 1936, validates two agreements affecting longshoremen in Montreal connected with inland and coastal navigation.

#### Professional Syndicates

The Professional Syndicates Act was amended by the addition of a section providing that actions arising out of a collective labour agreement under this statute are prescribed by six months. Actions which have arisen prior to the coming into force of the amending Act (November 12, 1936) are still, as they have been in the past, subject to one year's prescription where the engagement was for less than one year and to two years' prescription in all other cases.

#### Workmen's Compensation

Two Acts amending the Workmen's Compensation Act were passed. One restores a provision, repealed in 1933, giving the workman the right to choose his own physician. The other amending Act permits an injured workman, his dependants or his representatives to take action at common law against any person other than his employer notwithstanding the fact that compensation may have been obtained under the Act.

#### Forest Operations

The Quebec Forest Operations Commission Act passed in 1934 was repealed. This Act required all timber limit holders and contractors cutting timber on Crown Lands, before starting operations, to send to the Commission established under the Act certain information including the wages or salaries of employees, the methods used in their calculation, the mode of payment, particulars of deductions, fines, etc., prices charged for articles sold to employees and for transportation, medical and other services, hours of labour, sanitary conditions, food, and work hazards. The employer was required to keep the above information posted at the camp and an employee paid lower wages than those reported to the Commission might claim the difference in a civil action.

### Miscellaneous Legislation

The Pressure Vessels Act and the Stationary Enginemen's Act were amended to provide for the appointment of the employees necessary for their administration and for the payment of the salaries and expenses of such employees.

The Quebec Old Age Pensions Act was the subject of a number of amendments. The Provincial Government may enter into any agreement with the Government of Canada respecting old age pensions, instead of being restricted to co-operation under the Dominion Old Age Pensions Act with the condition that the Parliament of Canada should contribute 75 per cent of the cost. The payment of a pension to any person legally entitled to it is now made obligatory under the conditions laid down in any Dominion Act or regulations relating to old age pensions. Formerly, the Act provided that the Lieutenant-Governor in Council might authorize the payment of pensions to such persons.

Application for a pension may be made either to the Commission or to the official appointed under the Act for the territory in

which the applicant resides. Prior to the amendment, application was to be made to the municipal council. If the official refuses to investigate a claim for a pension within a reasonable time, the applicant may petition a district magistrate to do so. An applicant may appeal from any decision of the Commission to a judge of the Superior Court, whereas formerly the Commission's decisions were final. No fee may be collected by the prothonotary or clerk in connection with appeals under the last two provisions given above. Decisions of the Commission on applications for pensions are to be based upon the conditions laid down in any Act of the Parliament of Canada respecting old age pensions and the regulations thereunder with consideration for the rules of the Civil Code relating to alimentary pensions. The Minister may take the usual legal proceedings against a pensioner and especially he may take action as provided for under the Dominion Old Age Pensions Act.

Another Act provides for the setting up of a Department of Health and defines the Ministers' powers and duties.

### British Columbia

The British Columbia Legislature which was in session from October 27 to November 20, 1936, enacted new statutes to regulate trade schools and to define "residence" for the purposes of relief, health and welfare services. Amendments were made in the laws relating to workmen's compensation, metalliferous mines, minimum wages, factory inspection, hours of labour for municipal firemen, apprenticeship and unemployment relief.

#### Workmen's Compensation

The Workmen's Compensation Act and Metalliferous Mines Regulation Act were amended by the addition of special provisions relating to silicosis. These new sections of the Workmen's Compensation Act apply only to the metalliferous mining industry which includes work underground or in ore-crushing or rock-crushing operations except where such operations are carried on in water or a chemical solution. The Workmen's Compensation Board, however, is authorized to bring other industries within the scope of the silicosis provisions.

A workman disabled from silicosis, whether complicated by tuberculosis or not, on or after January 1, 1936, is entitled to compensation provided he has been a resident of the Province for at least five years last preceding his disablement and has actually been exposed to dust containing silica in employment in the metalliferous mining industry of

the Province for periods amounting in all to at least five years preceding his disablement. Three months of such employment must have been in the three-year period last preceding disablement. If it can be shown that the workman had silicosis or tuberculosis before being exposed to it in the metalliferous industries of British Columbia, he is not entitled to compensation and if he has been exposed to silica dust elsewhere before his exposure to it in the Province the compensation is to be reduced by the proportion that the period of exposure elsewhere bears to the total period of exposure. A workman who is no longer employed in the metal-mining industry must file his claim for disability within two years from the time of leaving, or within three years from the time when his last examination showed him to be free of silicosis and tuberculosis, or within six months after the passing of the Act, or his claim is completely barred.

The Workmen's Compensation Board is authorized to maintain a separate fund to meet the cost of compensation under these provisions. The "Silicosis Fund" is to be made up by assessments on the pay-rolls of employers in the metalliferous-mining industry and in such other industries as the Board may determine that there is liability for silicosis. The rates of assessment may be varied by the Board according to the hazard in the different kinds of employment in the silicosis class and, where the hazard in any plant or

occupation is considered to be greater than the average of the class a special rate of assessment may be imposed.

The Schedule of industrial diseases to be compensated under the Act is further amended by the addition of infected blisters due to employment in any process involving continuous friction, rubbing or vibration causing blisters or abrasions.

Another amendment to the Act provides that members of the Board may be removed from office on reaching the age of 70 years.

The Metalliferous Mines Regulation Act was amended to require that, unless otherwise permitted by the Workmen's Compensation Board, every workman whose employment takes him into any mine or into any ore-crushing or rock-crushing operation of a mine, must, except where the ore or rock is kept constantly moist, be examined by a physician at the expense of the employer at least once in twelve months. If the physician finds the workman to be free from diseases of the respiratory organs and fit for underground work, he is to give him a certificate to that effect, which, if so required by the manager of the mine is to remain in his custody during the time the workman is in his employ. No workman may be employed in connection with such operations for more than two months unless he has the required certificate or has been exempted by the Board. The Board is to prescribe the nature of the examination and generally make rules for the carrying out of these provisions.

### Minimum Wages

The Male Minimum Wage Act and the Female Minimum Wage Act were amended by the addition of three clauses, the same in both statutes. The first of these clauses defines the term "conditions of labour and employment" as used in the section of the Act giving the Board of Industrial Relations power to inquire into conditions of labour and employment and to regulate them. The term includes all matters affecting employers and employees in respect of the employment relation, including charges made by employers to employees for meals, lodging, accommodation, light, water, fuel, goods or services or for uniforms or other articles of apparel and the repair, laundering or similar service connected with their upkeep, or any other charges, as well as the method of paying wages and all provisions connected with the working of short time and overtime, rest periods and arrangements affecting the health and welfare of employees where such are within the control of the employer. The second clause provides that conclusive evidence of an Order of the Board

may be given by production of a copy of the British Columbia Gazette purporting to contain a copy of the Order. The third clause provides that every person falsely representing himself to be an inspector for the Department of Labour, or a person authorized by the Board of Industrial Relations or its chairman for the purposes of the Act, or making wrongful use of any badge or writing so as to make any person believe that he is an inspector or authorized person, shall be liable, on summary conviction, to a penalty of not less than \$50 or more than \$100.

In addition to the above three clauses, several amendments were made in the Male Minimum Wage Act. The definition of "employee" was amended by striking out the word "adult," thus making it apply to all male persons in receipt of or entitled to compensation for labour or services performed for another. Accordingly, the clause was deleted which enabled the Board to inquire into wages and conditions of labour and employment of persons under 21 years of age and to make orders fixing minimum wages for such persons. In line with this change, the section setting forth the powers of the Board was amended to enable it to prescribe conditions of labour and employment in respect of all or any employees for whom a minimum wage is fixed.

The amendments to the Male Minimum Wage Act, including those common to that Act and the Female Minimum Wage Act, are not to be deemed to render void or affect any Order of the Board made before their enactment.

The list of persons who are ex-officio members of the Board of Industrial Relations no longer includes the chairman of the Economic Council.

### Hours of Labour for Fire Departments

An amendment to the Fire Departments Hours of Labour Act makes that Act apply to any place in which there is a paid fire department whereas formerly it applied only to the municipalities of Victoria, Vancouver, South Vancouver, Point Grey, and New Westminster. In each municipality or place to which the Act applies, officers and employees of the fire department must have two full days off duty in each week in addition to the periods off duty under the Fire Department's Two-Platoon Act. Formerly, only one day off duty was granted.

### Factories

The Factories Act was the subject of a number of amendments. Except with the written permission of an inspector, no factory is to be kept open or person employed on any of the

following holidays: Christmas Day, New Year's Day, Victoria Day, Dominion Day, Labour Day, Remembrance Day, or any day appointed by Proclamation and declared to be a public holiday for the purposes of this provision, nor on Good Friday or Easter Monday. But where a factory is closed on Good Friday or on Easter Monday in any year, the granting of a holiday on the other of those days is at the option of the employer. Formerly it was unlawful for any factory to be open or any person employed therein on a holiday as defined by the "Interpretation Act" which included, in addition to the above, Sundays, the day following Christmas Day, Good Friday, Easter Monday, the birthday or the day fixed by Proclamation for the celebration of the birthday of the reigning Sovereign, any day fixed by Parliament or by Proclamation of the Governor General in Council as a day of fasting or thanksgiving or as a general holiday throughout the Dominion, and any day appointed by the Lieutenant-Governor in Council as a holiday.

Any person employing a young girl or woman so that her health is likely to be permanently injured, is now liable to a fine of not less than \$50 and not more than \$100 and in default of immediate payment of fine and costs, to imprisonment for not more than three months. Formerly the penalty for this offence was a fine of not more than \$100 and, in default of payment of fine and costs, imprisonment for a maximum period of six months.

The clause declaring it unlawful to employ a young girl or woman for more than 8 hours a day or 48 hours a week unless a different apportionment of daily hours was made to secure a shorter day's work on Saturday, was amended to provide that such shorter day's work may be given on some other day of the week.

Part II which is added to the Act and deals with home-work is similar in its provisions to sections added to the Ontario Factory, Shop and Office Building Act in 1936 and given in the LABOUR GAZETTE for May, 1936, at page 411. Both employers giving out work to be done at home and workers must obtain permits from the factory inspector by making written application for them. Permits may be issued only to those employers who satisfy the inspector that they are likely to comply with the Minimum Wage Acts and the Hours of Work Act and only to workers who can meet the conditions as regards health and sanitation. They may be cancelled by the inspector for violation of the Act or of the wages and hours regulations or for reasons of public health. Registers of home-workers must be kept by employers, and inspectors have power to inspect such registers and the workers' homes. If there is any risk to the public

health articles may be seized and premises disinfected. A maximum fine of \$100 may be imposed on any person convicted of violating this part of the Act.

### Apprenticeship

The Apprenticeship Act was amended to provide for the appointment of a Director of Apprenticeship to take over the powers and duties of the Inspector provided for in the principal Act. The definition of "apprentice" was amended to apply to a person at least 16 years of age instead of to a minor 16 years of age or over.

### Unemployment Relief—Residence Qualifications

The Unemployment Relief Fund Act, 1934, was amended to enable the Lieutenant-Governor in Council, on recommendation of the Minister of Finance, to direct the payment from the Consolidated Revenue Fund to the Unemployment Relief Fund of such amounts as may, from time to time, be considered expedient. These sums are to be in addition to moneys appropriated for unemployment relief under any Act or vote of the Assembly and are to be considered either as an appropriation for unemployment relief or as a repayable advance.

The Residence and Responsibility Act, which will come into force on Proclamation, provides that where, under any Act of the Legislature or regulations made pursuant to it, the authority of a local area is required to grant relief, health, or welfare services or to contribute to the cost of these services, such assistance is to be given only to residents of the area and the responsibility of the local authority is to be limited by the terms of the Residence and Responsibility Act. The services include those provided for unemployment, indigency, mothers' pensions and institutional care of various kinds.

An adult who is single or the head of a family is deemed to be a resident of a local area if he has resided in that area for a continuous period of one year or more without receiving relief from any public authority or from a private charitable agency or other source designated by the Board of Arbitration appointed under the Act; or if, being unable to fulfil the above condition, he has resided continuously in the area for three years or more; or if, being unable to fulfil either of the above conditions, he has last resided continuously in the Province for one year or more without receiving relief as aforesaid and has resided in that local area longer than in any other within the preceding year; or if, being unable to fulfil any of the above conditions, he has last resided con-

tinuously in the Province for three or more years and has resided longer in that local area than in any other during that period. Time spent in an institution supported by public funds or in a monastery, convent or similar institution or in a foster home where he is maintained at public expense is not to be deemed to be a period of residence within the area. This last provision does not apply, however, to an employee of an institution nor to the first three months of a period during which such person is a patient in a hospital. A person who becomes a resident of a local area, in accordance with the above provisions, is deemed to remain a resident of that area until he becomes a resident of another local area or until he has resided outside the Province for a period of one year.

The residence of a married woman is that of her husband. If, however, she is separated from him, she is to be deemed a resident of the same local area until she has been separated from him for one year when her residence is determined as in the case of a single adult.

A minor, until he has gained a residence in his own right, is deemed to be a resident of the same local area as his parents or of the surviving parent or the one having his actual custody. Parents by adoption are deemed to be parents of a minor. An illegitimate child is deemed to reside in the same area as his mother. In the case of the death of both parents or of the mother of an illegitimate child or of the temporary or permanent separation from his parents by order of a court under the Infants Act, a minor is to be deemed to be a resident of the local area where he was residing at the time of such death or separation. A minor may become a resident of an area without reference to his parents if a male, by marrying and living apart from his parent or parents for a year or more, when his residence is determined as though he were an adult; or, if a female, by marrying, in which case her residence is deemed to be that of her husband; or by being employed for one year for wages, in which case residence is determined as for an adult unless the minor is serving an apprenticeship or undergoing training or is wholly dependent on his parent or parents for support.

A person who has moved from the local area in which he is a resident to live temporarily or permanently in another area is to be granted relief in the same manner as a resident and the costs and the expenses of his return to his residence are to be payable by the local authority of the area in which he resides. Where a person is an inmate of a mental hospital, tuberculosis institution, hospital, or other public institution or is re-

ceiving public assistance under the Mothers' Pensions Act or the Infants Act and is a resident of a municipality which is liable to contribute to the cost of the services and assistance which such person is receiving, responsibility for contributions in respect of such person is to be based on existing residence.

Provision is made for the appointment by the Lieutenant-Governor in Council of a Board of Arbitration to determine disputes arising under the Act. The Board is to consist of three members, one of whom is to be nominated by the Provincial Secretary, one by the Union of British Columbia Municipalities and the third by the other two members. Nothing in the Act is to affect the jurisdiction of any judge or magistrate to decide any question under the Act arising incidentally in any cause or matter lawfully before him. The Lieutenant-Governor in Council may make regulations not inconsistent with the Act, to define more clearly the residence of any person, and to make provision to discourage the undue removal of destitute persons from one area to another.

### Trade Schools

The Trade Schools Regulation Act which will come into force on January 1, 1937, is similar to the Trade Schools Regulation Act of Alberta enacted in 1931 and amended in 1936. Both Acts require trade schools to be registered and provide for their inspection. Before granting a certificate of registration the Minister of Labour must be satisfied that a school is provided with competent instructors and sufficient equipment for the teaching of any specified trade or trades and is furnishing instruction at reasonable rates. The Lieutenant-Governor in Council may make regulations fixing minimum hours of instruction and maximum fees designating any callings or vocations as trades within the meaning of the Act, providing that in the case of any specified trade school no certificate shall be issued to any person who has not submitted to an examination prescribed by Order in Council for that school or class, and, generally, make regulations as to the conduct of trade schools and examinations to be held.

The British Columbia Act contains some additional provisions. Regulations of the Lieutenant-Governor in Council may prescribe the security to be provided by the keeper of a trade school for the performance of his contracts, the amount to be received for any article produced or for the material used or for the services of any employee or student of a trade school, limiting the articles to be produced to prevent unfair competition with the production of similar articles in a factory

or shop, and fixing the times during which the public may obtain service in a trade school. The provisions of the Act and regulations made under its authority are to be in addition to any requirements of other statutes and are to govern in case of conflict.

### Bills Not Passed

Bills to amend the Trade Unions Act, the Coal Mines Regulation Act and the Weekly Half-holiday Act were introduced but failed to pass.

The Trade Unions Bill to revise the earlier Act was designed to prevent discrimination against trade unionists, to protect pickets and facilitate collective bargaining while re-enacting the provisions of the former Trade Unions Act. Under the terms of the Bill, a strike or lockout would be deemed to exist if, excluding the officials and clerical staff, 50 per cent or more of the workmen employed by an employer within a radius of two and one-half miles from any place of employment or 60 per cent or more of such workmen as are members of any craft or trade ordinarily considered a separate craft or trade, ceased to work or were suspended or prevented from working by the closing of the place of employment or by a refusal of the employer to continue to employ them in consequence of a dispute respecting wages, hours or conditions of employment. An employer who refused to hire or who discharged or discriminated against a workman because the workman was a member of a trade union would have been guilty of an offence against the Act.

Another section, taken from the British Trade Disputes Act, 1906, declared it lawful for one or more persons, acting on their own behalf or on behalf of a trade union in contemplation or furtherance of a trade dispute, to attend at or near a house or a place of business merely for the purpose of peacefully obtaining or communicating information or persuading any person to work or abstain from working. An employer would be guilty of an offence if he neglected or refused to discuss any question of wages, hours or working conditions when requested to do so by representatives of his workmen or of workmen who had been in his employment prior to the occurrence of a strike or lockout. The Bill required employers to report immediately in writing to the Minister of Labour for the province any strike or lockout between him and his workmen stating what steps had been taken to prevent or end such dispute. The Minister was to allow inspection of every such statement by the representative of any trade union or newspaper in the province.

Two Bills to amend the Coal Mines Regulation Act also failed of enactment. The first of these would have raised the minimum age

for employment of boys underground in coal mines from fifteen to eighteen years and the minimum age for employment at the surface from fourteen to sixteen years.

The second Bill was designed to amend the rule prohibiting the taking into a mine of matches, pipes, tobacco, etc., by forbidding any person to search a workman for such articles until such person had himself been searched by two workmen and no prohibited article had been found upon him.

A Bill to amend the Weekly Half-holiday Act would have provided that in the case of certain public holidays the Board of Industrial Relations, on being satisfied that it would be in the public interest or that special circumstances required it, might have allowed any or all shops to remain open on a weekly half-holiday in the week before or the week after or the week in which such public holiday occurred. An employer keeping his shop open on such conditions would have been required to pay the wage-rate fixed for overtime work under the Minimum Wage Acts. The Bill would also have added the day after Christmas to the list of holidays on which shops are required to be closed.

### Resolutions

On November 17, 1936, the following Resolution concerning unemployment was agreed to by the Legislature:—

Whereas the problem of employment for all our citizens is of great concern to the State as a whole; and

Whereas, notwithstanding very decided improvement in business and industrial conditions, a considerable number of our people have been unable to obtain employment;

Therefore be it Resolved, That it is the opinion of this House that a generous program of public undertakings of various character should be undertaken, not only to provide employment for our people, but also to serve the needs and requirements of public service. And that special consideration should be given to the planning of adequate measures to ensure that the youth of our country shall have opportunity for advancement and progress in every avenue of human endeavour—economic and cultural.

On November 18 a resolution relating to fair wages on public works was agreed to in the following terms:—

Whereas it has been the policy of the Department of Public Works to embody into all Government contracts a clause commonly known as the "fair-wage" clause; and

Whereas it has been brought to the attention of the Government that in some cases this clause has not been applied to articles specially manufactured in connection with contracts:

Therefore be it Resolved, That in the opinion of this House the "fair-wage clause" shall be taken as applying to all work in the making, manufacturing, or preparation by artisans of all fixtures, fittings, or furnishings which are all specifically made for work covered by contract.

## MINIMUM WAGE ORDER GOVERNING COMMERCIAL ESTABLISHMENTS IN PROVINCE OF QUEBEC

A new order applying to commercial establishments has been gazetted by the Quebec Minimum Wage Board to become effective on February 6, 1937. The order is a revision of earlier orders governing retail stores, including department and chain stores. The revised order applies also to wholesale establishments. Certain other important changes are made, in particular, a new provision against overtime and one safeguarding the weekly wage of persons working for less than the regular hours.

Minimum wage-rates remain the same for places above 10,000 population. The minimum hourly rates formerly applicable to places between 5,000 and 10,000 are changed to minimum weekly rates applying to a 54-hour week in places between 4,000 and 10,000 and provision is made in the new order for minimum wages in municipalities of less than 4,000 population. As in the old order, minimum rates and the number of working hours to which they apply vary according to the size of the municipality but in the new order punitive rates are fixed for overtime beyond the specified number of hours for women or girls in places with a population of 4,000 or over. Time and a half must be paid for hours worked in excess of the specified number of hours. In cities or towns of over 10,000 population where the punitive rate must begin after 48 hours, it applies only to females earning \$15 a week or less. In places with less than 4,000 population, the minimum rates apply to a maximum of 60 hours a week or to the number of hours usually worked in the establishment if less than 60. Under the Commercial and Industrial Establishments Act of Quebec, 60 hours is the maximum that may be worked by females without a special permit in commercial establishments in places of over 10,000 population.

Another distinguishing feature of the new order is the provision for short time in cities of over 10,000 population. In such places the minimum rates apply to a period of from 40 to 48 hours. In stores employing not more than two female employees, the minimum wage applies to a working week of from 40 to 54 hours and overtime rates begin at the fifty-fifth hour. Formerly, the minimum wage in places of this size applied to a 48-hour week and those employed for a shorter week were paid proportionately less. Under the revised order, part-time employees are those working less than 40 hours per week. As before, part-time employees must be paid a

bonus of 12½ per cent above the regular wage for the hours worked. In municipalities with more than 10,000 population, special provision is also made for "extra employees." The latter are defined as persons who work exclusively on Fridays and Saturdays or occasionally on any other two days in the week. Minimum hourly rates are fixed for "extra employees" and they are entitled to at least three hours' pay for each call to work.

The provisions of the order follow:—

**ORDER No. 18 (REVISED A).—Governing female employees, or males when replacing females, in Commercial Establishments.**

**1. DEFINITION.**—This Order governs the wages of all female employees in Departmental Stores, Chain Stores and all Retail and Wholesale Stores; no matter what their occupation, but it shall not apply to employees who are governed by any other Order of the Minimum Wage Board. Population is the population according to the latest decennial census of the Dominion Government.

**2. MINIMUM.**—No wage shall be less than is set forth in the following schedule:—

**Zone 1—Montreal and Islands of Montreal**  
Regular Staff (full and part time employees)  
10 per cent at not less than... \$ 7 00  
20 per cent at not less than... 10 00  
70 per cent at not less than... 12 50  
Extra Staff not less than 25 cents per hour.

**Zone 2—Quebec, Three Rivers, Sherbrooke, Hull and Cities Over 25,000 Population**  
Regular Staff (full and part time employees)  
10 per cent at not less than... \$ 6 00  
20 per cent at not less than... 9 00  
70 per cent at not less than... 11 00  
Extra Staff: not less than 20 cents per hour.

**Zone 3—Cities and Towns of from 10,000 to 25,000 Population**  
Regular Staff (full and part time employees)  
50 per cent at not less than... \$ 6 00  
50 per cent at not less than... 10 00

(a) These percentages apply to all regular or part-time employees. Extra employees shall not be included in these percentages. The experience of the employees must be considered when they are classified into the different percentage groups: furthermore, an employee can only occasionally be transferred from a superior group to an inferior one. All stores operated in the same zone or city, by the same person, firm or corporation, shall be considered as one unit and the percentages shall apply to the total number of their regular employees.

(b) These minimum rates apply to a period of 40 to 48 hours per week, that is to say, the time during which the employees is at the disposal of the employer, and obliged to be present. All overtime (after 48 hours) must be paid time and a half of the regular wage of the employee. This to apply to all employees whose weekly wage is not over \$15.00.

(c) In stores employing not more than two female employees, these minimum wages shall

apply to a working period of not more than 54 hours per week, but the employee must be paid her full salary when she has reached 40 hours of work in a week. Overtime will be due and payable beginning with the 55th hour.

(d) Employees working less than 40 hours per week may be considered as part time employees, and in this case they shall be entitled to a bonus of  $12\frac{1}{2}$  per cent over and above their regular wage. However, employees losing time of their own volition cannot claim this bonus.

(e) Extra employees are those engaged exclusively on Fridays and Saturdays or occasionally any other two days in the week. These employees shall be paid the uniform rates fixed for each respective zone, without consideration of their experience. They must receive at least, three hours pay for each call to work.

**Zone 4—Cities, Towns and Municipalities of  
From 4,000 to 10,000 Population**  
Regular Staff

50 per cent at not less than . . . . \$6 00

50 per cent at not less than . . . . 9 00

Extra Staff: not less than 16 cents per hour.

In zone 4 minimum rates are for a maximum of 54 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 54 hours. All overtime (after 54 hours) must be paid time and a half of the regular wage of the employee.

**Zone 5.—Municipalities of Less than 4,000  
Population.**  
Regular Staff

50 per cent at not less than . . . . \$6 00

50 per cent at not less than . . . . 8 00

Extra Staff at not less than 14 cents per hour.

In zone 5 minimum rates are for a maximum of 60 hours per week, or for the usual number of hours normally worked per week in the establishment of less than 60 hours.

3. Commercial Establishments where only members of the same family are employed are exempted from this Order.

4. COMMISSION EARNINGS.—The weekly earnings of an employee working on a commission basis or guarantee rate plus commission or bonus, must not fall below the prescribed minimum rate as set forth in the schedule.

5. HOW SALARY SHALL BE PAID.—The employee's wages shall be paid to her a maximum in cash; no deduction being permitted for any cause or purpose whatsoever. Said wages shall be given to her in a sealed envelope on which shall be written: her name, her register number, the dates of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money enclosed in the envelope; same must be initialled by the person who pays the employee.

6. UNIFORMS.—If a special uniform is required it shall be furnished and laundered by the employer without cost to the employee.

7. DEDUCTION FOR ABSENCE.—No deduction below the minimum wage line for absence shall exceed the value of the time lost.

8. WAITING TIME.—Any employee required to wait on the premises shall be paid for the time thus spent.

9. EXEMPTION.—The Board may grant permits of variation or suspension of any of these regulations to meet exceptional conditions.

10. DISCHARGE OF EMPLOYEES.—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act. All complaints are strictly confidential.

11. REFERENCE.—No employer shall refuse to give employees a letter of reference when they leave their employ, if request is made for same.

12. POSTING.—This Order must be posted where it can be easily read by the employees.

13. PENALTIES.—Any violation of any regulation of this order is punishable by fine or imprisonment. (See Section 12 of the Act.)

14. ENFORCEMENT.—This order replaces previous orders No. 18 (*Quebec Official Gazette*, of June 30th, 1934); No. 18a (*Quebec Official Gazette* of February 16th, 1935); No. 18 revised (*Quebec Official Gazette* of March 30th, 1935); and shall be effective from February 6th, 1937.

GUS. FRANCO, *Chairman.*  
OMER BRUNET,  
C. J. GRIFFIN,  
EUG. RICHARD.

To facilitate the application of the Order a table was appended, showing how the number of employees in an establishment may be distributed in the three wage groups.

The appointment of Mr. Arthur MacNamara as deputy Minister of Public Works and Labour is announced in November 21 issue of the Manitoba Gazette.

The Division of Labor Standards, of the United States Department of Labor, has issued a bulletin entitled "Recent Changes in the Painters' Trade." The bulletin contains a study describing the change both in materials and methods that have taken place in the painters' trade during the last twenty years and the effect of these developments upon the health of the workers.

Rules and Regulations relating to the Examination of Masters and Mates of Home-Trade, inland and minor water vessels, are published in the Canada Gazette under date of November 14, 1936. The rules and regulations are divided into various sections under the following headings: general instructions, qualifications for the different grades (inland and minor waters), rules for estimating service, conduct of examination, and fees.

Another Order in Council also published in the same issue of the Canada Gazette sets forth rules and regulations relating to the examination of masters and mates in the mercantile marine for foreign-going certificates of competency.

## MINIMUM WAGES FOR OFFICE EMPLOYEES IN NOVA SCOTIA

The Minimum Wage Board of Nova Scotia has issued a new Order (No. 9) governing employment of women in offices in the cities and towns of the province.

This order, which became effective on November 5, governs all those engaged in Office Work, including stenographers, book-keepers, typists, filing and billing clerks, cashiers, cash-girls, checkers, invoicers, comptometers-operators, auditors, ticket sellers, attendants in physicians' offices, dentists'

offices, and all females employed in similar services.

The provisions of the Order which is subject to annual revision, are as follows:—

1. *Wages.*—No person, firm or corporation shall employ a female worker or suffer or permit a female worker to be employed in the Cities and Incorporated Towns in Nova Scotia, at "Office Work" for less per week, for the recognized working period of the establishment, than is set forth in the following table:—

Group Population	Workers Experienced	Inexperienced adults over 18 years	Inexperienced young girls under 18 years
Cities and towns 17,000 population and over.....	\$11 00	6 months at.....\$ 9 00 6 months at.....10 00 Then.....11 00	6 months at.....\$ 8 00 6 months at.....9 00 6 months at.....10 00 Then.....11 00
All towns under 17,000 population.....	\$10 00	6 months at.....\$ 8 00 6 months at.....9 00 Then.....10 00	6 months at.....\$ 7 00 6 months at.....8 00 6 months at.....9 00 Then.....10 00

No worker who begins as a young girl shall after reaching the age of eighteen years receive less than the wage prescribed for an inexperienced adult. A person shall be deemed to be an experienced worker when such person has been employed in the industry for one year, after attaining the age of seventeen years, and in other cases when such person has been employed in the industry for eighteen months.

2. *Hours of Work.*—(a) The above rates are for a maximum of 48 hours per week, or for the usual number of hours normally worked per week in the establishment if less than 48.

(b) Work in excess of 48 hours will be counted as overtime, and paid for at the hourly rate, fixed by this Order.

3. *Diploma.*—An office worker presenting a diploma from an accredited Business College or the Commercial Department of a High School shall be entitled to work only three months, in order to qualify for the full minimum wage.

4. *Discharge of Employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of the Act. All complaints are treated strictly confidential.

In addition there are the usual provisions respecting penalties, posting, etc.

"Employment Conditions in Department Stores in 1932-33" is the title of a bulletin issued recently by Women's Bureau of the United States Department of Labor. The purpose of the survey was to secure authentic data regarding the employment of women in department and general merchandise stores—their wages and hours, basis of lay-offs, and the practices of spreading employment among women, also personal information as to age, marital status and time with the firm, etc.

In an interim report issued in London, by the Overseas Settlement Board, it is predicted that assisted migration to various parts of the Empire will soon be resumed. The Board was appointed last February to consider and advise the government upon specific proposals for Empire Migration schemes. The report states that a preliminary view of the situation encourages the Board to believe that improvement in economic conditions overseas, and evidence that the idea of Empire migration is being viewed with growing favour in the Dominions points to the probability that certain overseas governments may be prepared to co-operate in the scheme for a gradual revival of assisted migration in the reasonably near future.

## WEEKLY EARNINGS OF EMPLOYEES IN MERCHANDISING AND SERVICE ESTABLISHMENTS IN CANADA, 1935

THE Dominion Bureau of Statistics has issued a report entitled "Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1935," divided into four sections: independent retail stores, chain stores, wholesale trade and motion picture theatres.

The section on independent retail stores covers establishments dealing in the various classes of goods, groceries, clothing, hardware, etc.; also motor vehicles, automobile accessories, tires and batteries, gasoline filling stations, garages, coal and wood yards, brewers' warehouses, taverns and restaurants. Department stores are included in this section. The chain store section includes all companies operating four or more units in the same or similar lines of trade.

Forms of inquiry were sent to each independent retail store shown in the census of 1931 as having had an annual business of \$20,000 or more in 1930, and also to a number of smaller establishments, including some which commenced business since 1930. The number of full-time male employees in all independent retail stores in 1930 was 136,926, with female employees 60,264. The stores covered in the 1935 inquiry reported 74,782 full-time male employees and 33,949 female employees. The figures as to weekly earnings in 1935, therefore, are available for 54.6 per cent of the number of full-time male employees in 1930, and 56.3 per cent of the female employees. As the number employed in this section of trade is estimated to have decreased fifteen per cent between 1930 and 1935, the data for 1935 covers about 65 per cent of those employed.

For the chain stores, reports were secured from all companies in this line of business and included earnings of store managers, clerks, delivery men, cashiers and any other store employees. Head office staff and warehouse and transportation employees were not included.

In the wholesale trade, reports were secured from all the larger wholesale dealers and for a number of sales offices and distribution branches maintained by manufacturers.

For motion pictures theatres, reports were secured from all operators of such establishments in Canada.

The reports were secured during March and April, 1935, each firm being requested to furnish the figures for the latest week for which figures were available. The figures were to be for the actual earnings during a

week, not the wage rate or possible earnings. Data as to proprietors, firm members or partners were not to be included but all employees on salary, on wages or on commission were to be included. The figures were obtained separately for full-time and part-time employees, the latter being defined as those who regularly worked part of the normal day or part of the normal week. The figures were compiled and analyzed to show separately earnings of full time employees and part time employees, male and female, except in wholesale trade where very few part-time employees were reported.

The tabulation shows for each kind of business the percentage of employees whose earnings fell within specified ranges: under \$6, \$6 to \$6.99; etc., up to \$30 and then by \$5 ranges up to \$50. Average earnings for all employees in each class of business are given, as well as earnings by quartile groups. All figures are given for the Dominion and for each province.

In the independent retail store group the average earnings for full-time male employees in the Dominion were \$20.02, the lowest figure being \$13.10 for the fruit and vegetable stores, and the highest \$25.75 for household appliance stores. For restaurants, the average was \$14.12, for filling stations, \$16.96, garages, \$17.60, motor vehicle dealers, \$22.37, department stores, \$24.38; coal and wood yards, \$21.02. For female employees, full-time, the average weekly wage was \$13.52, the lowest figure (\$10) appearing for country general stores and the highest, (\$15.60) for accessory tire and battery establishments. In restaurants the average earnings were \$10.29 and in department stores, \$14.31. Of the full-time employees reported, 68.8 per cent were shown as male and 31.2 per cent as female. Of the part-time employees, 58.2 per cent were male and 41.8 per cent female. Of all male employees 85.1 per cent were full-time and 14.9 per cent part-time. Of all female employees, 78.3 per cent were full-time and 21.7 per cent part time.

In chain stores, the average weekly earnings of full-time male employees were \$20.33. Out of 21,387 employees there were 7,225 in grocery and combination stores, in which the average earnings were \$17.15. In filling stations there were 2,057 whose earnings averaged \$18.85. For 7,908 full-time female employees, earnings averaged \$13.11, and of these 2,785 were in variety stores, their earnings averaging \$12.17. There were also 1,182

in food stores (grocery, combination stores and meat markets), their earnings averaging, \$12.95. Out of 26,268 male employees in chain stores, 81.4 per cent were full-time and 18.6 per cent were part-time, and among 13,052 female employees, 60.6 per cent were full-time and 39.4 per cent were part time. There were 29,295 full-time employees, of whom 73 per cent were male and 27 per cent female, and 10,025 part time employees, of whom 48.7 per cent were male and 51.3 per cent female.

In wholesale trade figures were reported for 28,985 full-time male employees and 5,905 full-time female employees, the average weekly earnings being \$26.86 and \$16.24, respectively. The lowest averages were for waste material establishments, \$18.45 for males and \$8.92 for females. The kind of business

employing the largest numbers was that of petroleum products, 5,747 males, whose earnings averaged, \$32.08, and 701 females, whose earnings averaged \$21.09, these being among the highest for both sexes.

In motion picture theatres there were reported 3,222 full-time male employees, whose earnings average \$24.49, and 909 full-time female employees whose earnings averaged \$11.46. There were also 942 part-time male employees and 493 part-time female employees.

Summary tables of earnings by kinds of business, sex, provinces, etc., it is expected, will be given in the Supplement to the January issue of the LABOUR GAZETTE on Wages and Hours of Labour in Canada for 1929, 1935 and 1936.

### SAFETY CONFERENCE OF QUEBEC ASSOCIATION FOR THE PREVENTION OF INDUSTRIAL ACCIDENTS

THE ninth annual Industrial Safety Conference of the Quebec Association for the Prevention of Industrial Accidents was held in Montreal on November 18 and 19, representatives from leading industrial firms and other provincial safety associations being in attendance.

The conference was officially opened by Acting Mayor McKenna of Montreal who welcomed the delegates, and expressed appreciation of the work being carried on in industry by the association.

The guest speaker at the opening luncheon was Mr. R. B. Morley, General Manager of the Industrial Accident Prevention Associations of Ontario, the subject of his address being "Responsibility." Mr. Morley emphasized the fact that accident prevention in industry has been made a responsibility or function of management, if for no better reason than the effect accidents have on operating costs. If management must accept 100 per cent of other production problems then accident prevention as a management problem must be accepted on the same basis by managers, Mr. Morley contended.

Industrialists from all parts of Quebec attended the luncheon meeting, 364 being present. Various awards of shields and diplomas were made to firms who had established No-accident Records over a period of years.

An Open Forum immediately followed the luncheon and was attended by 417 industrialists in supervisory positions. The subject under discussion was "Supervise for Safety" and was presented under three main headings, "The Need," "The Value" and "The Application of Supervision."

In the evening of the opening day of the conference two Safety Rallies for Workers were held, one in French and the other in English. Total attendance at these two gatherings was 1,782, and programs consisted of safety talks, moving pictures on safety and entertainment.

The second day of the conference was devoted to "First Aid as an Adjunct to Safety." In the morning, practical demonstrations were made of treatments of minor injuries, 207 first aiders taking part in the general discussion.

An All Congress luncheon was held at noon on the second day, with Dr. R. E. Wodehouse, Deputy Minister of Pensions and National Health, Ottawa, as the guest speaker, whose subject was "What is First Aid."

Practical demonstrations in competitive team tests in First Aid were given by teams from The Bell Telephone Company of Canada, the Dominion Textiles team from Magog, No. 51 Brigade and the Nursing Division. The demonstration consisted of treatment of accidents presumably having occurred on a construction job, on the highway, in the plant, and while skiing. An interested group of 85 cadets from the Montreal Police school attended this session of the conference.

The Conference was brought to a close with a Joint Conference dinner attended by 572 representatives of the Quebec Association for the Prevention of Industrial Accidents, the St. John Ambulance Association and the Province of Quebec Safety League. The guest speakers were Mr. W. H. Cameron, Managing Director, National Safety Council, Chicago, and Mr. J. Edouard Labelle, K.C., Montreal.

## UNITED MINE WORKERS OF AMERICA

### District 26

#### Proceedings of Sixteenth Convention

The first biennial and sixteenth convention of the United Mine Workers of America, District 26, was held in Truro, N.S., October 26 to November 7, 1936, with sixty delegates present, representing over 12,000 members. President Morrison introduced the Mayor who welcomed the delegates to the town of Truro.

In the report of the officers, mention was made of the increased membership and of the efforts put forth to maintain wage contracts throughout the district. Under the heading "The Unemployment Problem," the officers recalled the many submissions that had been made to the Government and the number of times representatives had appeared before commissions with the ultimate aim of having coal production stabilized, thereby giving steady employment to coal miners. Reaffirming the organization's former stand, the executive stated "that it is the duty of Governments to provide employment for its people when such can be done, and surely no one will deny that it can be done in the coal mining districts of this province. Canadian statesmanship has no greater task before it, no responsibility so grave, and no duty of more immediate importance than to bend its energies of thought and action towards relieving thousands from wasting in unemployment."

Reference was also made to the presentations made to the Government, in accordance with instructions of the last convention, among which were requests for amendments to the Workmen's Compensation Act and Mothers' Allowance Act, and the enactment of legislation providing for a five-day week and a six-hour day.

It was the opinion of the officers that some form of a tribunal should be established in the district to which unsettled grievances could be referred. This tribunal, according to the report, might be composed of one member representing the district, one representing the Department of Labour of the province, and one representing the operator or operators affected, or an umpire might be agreed upon. If better co-operation was to exist between all concerned the executive felt that some more satisfactory method of adjusting these grievances must be found.

The work carried on by the Extension Department of St. Francis Xavier University was commended.

Special tribute was paid to the leadership of John L. Lewis, president of the organization, and gratitude expressed for the assistance re-

ceived from the international officers. The report expressed the hope that the services of these officers will be made available to the district in the negotiations of a new wage agreement.

In addressing the delegates, Hon. Michael Dwyer, Provincial Minister of Mines, stated that "the mining industry was the most important industry in the province." He was convinced that coal produced here must go farther west in order to provide work for the miners. He would like to see the organization take up the matter of selling coal.

Three members of St. Francis Xavier University, Antigonish—Rev. Dr. M. M. Coady, Professor A. B. McDonald, Dr. D. F. MacDonald—addressed the delegates with reference to various phases concerning the development of study clubs and co-operative organizations. Subsequently the convention endorsed the co-operative movement sponsored by the university.

The committee appointed to deal with matters pertaining to workmen's compensation recommended a number of amendments to the Act. After the adoption of the report a further resolution on the question was adopted which requested the Provincial Government to appoint a commission to investigate complaints on compensation and that the commission be composed of three men, one of whom would be a representative of employees.

The report of the policy committee was taken up clause by clause and adopted after some clauses were amended. One of the recommendations of this committee read as follows: "That the incoming executive would give every assistance to the formation of a broad united labour party for the province of Nova Scotia."

Among the recommendations contained in the adopted resolutions were:—

Inclusion of silicosis and antracosis under the Workmen's Compensation Act.

Requesting the Dominion Coal Company to give free coal to aged ex-employees and widows.

Cancelling of arrears for rent and coal contracted during slack time and sickness.

Discontinuing the practice of burning emery splint.

Amending the Coal Mines Regulation Act to cover underground hoisting engineers.

Paying machine runners for time lost repairing machines.

Approving of the seniority system of employment, and asking that same be enforced.

Demanding same pay for certificated miners working at the same job, thus eliminating the practice of designating one as a helper.

Supplying tools free to carpenters by employer.

Requesting a draeger outfit for River Hebert Joggins district.

Demanding the Government to immediately increase the amount of relief in the district.

Asking the Dominion Coal Company and the Acadia Coal Company to furnish at least two properly equipped motor ambulances, centrally located, and available at short notice when necessary.

Requesting the Provincial Government to establish a central sanatorium in Cape Breton Island.

Adequate pensions for all men retired through age or disability.

Investigation of fatal accidents conducted by a legally appointed coroner and jury.

Demanding that the Coal Company immediately hire enough capable men for house repair work in the district, and that the Provincial Minister of Health send an impartial committee to investigate the housing conditions in and around the various collieries, such committee to be accompanied by the mine committee from each district.

Seeking the displacement, as far as possible of imported anthracite coal by Nova Scotia semi-coke or coalite.

Requesting John L. Lewis, international president to send at least two international executive board members to assist the district executive in negotiating the next wage agreement.

Having the established shift changed so that work period will be from 8 a.m. to 4 p.m. instead of from 7 a.m. to 3 p.m.

Abolishing the collecting of income tax through the colliery office.

Organizing of the steel workers.

Supplying miners with screened coal for domestic purposes.

Urging the members of the government to have the British Empire Steel Corporation open another colliery at Reserve Mines.

Favouring the establishment of trades and labour councils where possible within the province.

Calling for the establishment of a Nova Scotia Federation of Labour, as an integral part of the Trades and Labour Congress of Canada.

Condemning the action of the American Federation of Labor in suspending ten international unions and demanding their reinstatement.

Inviting the coal miners of Minto, N.B., to become part of the United Mine Workers of America.

Requesting the International Union to send a statistician to assist the district officers in negotiating the new wage contract.

Seeking a government investigation into the prices paid for foodstuff by the consumers of the district.

Calling for the support of the membership to prevent the closing of No. 10 colliery and the notifying of the company that abandoning of this colliery will result in the entire membership being called on strike.

Demanding that miners be given the right of handling their money and paying their debts.

Having the Provincial Government assume the responsibility of securing employment for the unmarried in the towns in which they live.

Assisting in organizing the unemployed of Nova Scotia.

Referring the yearly election of district officers to a referendum vote of the membership.

Enactment of an Old Age Pension Act containing the following provisions: Voluntary retirement at 60 years, and compulsory at 65 years; monthly rate of \$50 to married men and widowers with dependents, and \$40 per month to all single men; contributions—by the government of Nova Scotia 45 per cent; employer, 45 per cent; and employee, 10 per cent; property not to be confiscated on receipt of pension.

A large number of resolutions presented dealt with rates of wages and working conditions at various points throughout the district.

Glace Bay was selected as the next place of meeting.

Recent press reports contain the announcement of wage increases of  $7\frac{1}{2}$  per cent for all employees in the Sydney Steel and Coal corporation and subsidiary plants in Eastern Canada and Newfoundland. It is estimated that the increase, which becomes effective on December 16, and which includes salaried employees, will affect approximately 3,600 workers in the Sydney steel plant and 4,200 subsidiary plant employees.

## AMERICAN FEDERATION OF LABOR

### Summary of Proceedings of the 56th Convention

THE fifty-sixth annual convention of the American Federation of Labor, was held at Tampa, Florida, commencing November 16, 1936.

In his annual address Mr. William Green, President, after expressing the opinion that the days of distress were definitely left behind, declared "we are now putting our house in order and American labour stands at the threshold of this new day, strong, erect, courageous, determined to take advantage of the economic improvement, to build a higher wage level and a more tolerable condition of employment in the United States of America." He added that "the steady flow of earnings into the hands of the favoured few must be diverted into the hands and the homes and the lives of the working people of the nation." Dealing with the question of unemployment he considered the shorter work-day and the shorter work-week as the real and practical remedy. Reference was made to the employment of children in industry, and the strong stand taken by the labour movement against this practice. The suggested remedy was to give the Congress of the United States power to prohibit child labour in every state throughout the nation. In dealing briefly with the legislative policy of the Federation, President Green informed the delegates that it was the intention to press for the enactment of legislation designed to make labour free and accord it the widest opportunity to organize and unite its economic strength upon the industrial field, so that it can occupy an equitable position in its bargaining relationship with industry. The president reviewed at some length the controversy which had taken place within the movement and stressed the importance of solidarity and unity. He referred to the policy as laid down at the previous convention and stated "if this executive council has done any one thing during the year 1936, that stands out pre-eminently above every other act, it is that it heroically and courageously carried out the instructions you gave them at the Atlantic City convention of the American Federation of Labor." In closing, President Green called upon the membership of the Federation, in co-operation with sympathetic groups to assist in restoring the morale of the people which had become so greatly impaired during the past few years.

A message expressing his regret at not being able to attend the convention was received from the United States President, Franklin D. Roosevelt.

The report of the credential committee showed that there were 485 accredited delegates present, representing 88 international and national unions, 4 departments, 34 state branches, 125 central bodies, 77 local trade and federal labour unions and 3 fraternal delegates.

### Executive Council Report

In their report, the executive officers reiterated their belief that unemployment must be met through the application of the shorter work day and shorter work week in industry.

The financial statement of the secretary-treasurer showed a balance on hand at the close of the fiscal year (August 31, 1936) of \$569,405.99, although the expenditures for the year exceeded the receipts by \$53,548.54. A deficit was also noted in the defence fund where the amount expended in strike benefits to local unions amounted to \$151,656.02 as against \$125,701.45 credited to this fund. Charters were issued to 3 international unions, 19 central bodies, 175 local trade unions and 41 federal labour unions, the affiliates of the Federation at the close of the fiscal year being 4 departments, which comprise 522 local departments or councils, 49 state federations of labour, 111 national and international unions, 734 city central bodies, 914 local trade and federal labour unions, and 32,906 local unions of national and international unions. The total membership of the Federation at August 31, 1936, was 3,586,567 an increase over the previous year of 541,250 members.

Referring to the formation of the Committee for industrial organization, (LABOUR GAZETTE, December, 1935, page 1088 and August, 1936, page 680) the executive stated that all official correspondence, press statements, charges, declarations and findings of special session of the executive council on charges filed, together with a detailed statement of the present status of the case, had been submitted in an endeavour to clarify the entire controversy. In addition, a review of the efforts made by the special committee appointed for the purpose of conferring with the C.I.O., with the view of restoring peace within the organization was set forth in the report, the whole history of the case being submitted to the delegates for their consideration and action.

Mention was also made to the issuing of charters to the United Automobile Workers International Union and the United Rubber

Workers of America, both of which subsequently accepted membership with the Committee for Industrial Organization.

An explanation of the features of the Social Security Act was given in detail, and the report showed particularly just what groups were eligible under its several provisions. It also detailed the requirements which are stipulated for state participation in federal funds set aside for this purpose; the procedure which must be followed and the several agencies charged with the administration of the law; the amount of appropriations provided, etc. Attention was drawn to the responsibility of Labour to see that required legislation was enacted in the several states in order to assure the participation of the state in the federal social security provisions.

A section of the executive report dealt with the efforts put forth to reach a settlement in certain jurisdictional disputes affecting affiliated organizations.

Under the heading "National Legislation" the report contained a list of measures enacted which were favourable to labour, among which were: Establishing prevailing rates of wages on government contracts and on all relief work; prohibiting the transportation of professional strike breakers in interstate commerce; inclusion of workers employed on public works under state compensation laws; inclusion of employees in the aeroplane industry under the Railway Labour Board; adoption of minimum manning and wage scales by subsidized shipping corporations; development of vocational education and direct work relief on useful projects; extension of the retirement law for railroad employees.

Among other subjects dealt with in the report of the executive were; Minimum wage law; child labour amendment; workmen's compensation; educational qualifications in civil service; Relief; National Labour Relations Board; unemployment health insurance; consumers co-operatives; machine displacement; housing for wage earners; vocational education; international labour organization; Pan-American Federation of Labor.

#### Address of Secretary of Labor

In addressing the delegates, the United States Secretary of Labor, Miss Frances Perkins, stated that the co-operation of organized labour had been of inestimable value in the development of such programs of the administration, which have made for the welfare, happiness and prosperity of all the people of the United States. The secretary further observed that unless the labour group progress, unless they have enough to bring them within the pattern of modern civilization, there will be no

progress for all the other groups that go to make up the modern way of life. Mention was made of the many helpful recommendations that came from the conference of labour officials with the administration held in March 1933, which was later to develop into the "New Deal." The delegates were informed that under the terms of the Walsh-Healey Act, which became effective on September 29, 1936, over \$2,000,000 worth of contracts of the United States Government have already been let since the first of October. Certain complaints had been received concerning the carrying out of the provisions of these contracts, necessitating a hearing to determine if there had been any violations. The full participation and co-operation of the various labour organizations in these hearings was urged by the Secretary. It was further recommended that organized labour continue to study a program for the stability of employment, as well as programs for the stability and continuity of incomes, now that a period of recovery has commenced. Concrete evidence of this recovery was shown by figures quoted by the speaker in regard to employment, there being more than 6,000,000 who were jobless in March 1933, now working in private employment. The assistance and co-operation of the government was proffered to maintain sound and practical standards of apprentice training, so as to avoid flooding the market with half trained workers.

In the opinion of the Secretary of Labor, one of the immediate and important tasks of the Federation was the bringing into line the twelve states which had not yet endorsed and ratified the child labour amendment.

#### Addresses of Fraternal Delegates

After the presentation of informative reports by the Committee of Education and the Committee on organization, the convention received the address of the fraternal delegates.

Messages of greeting from the British Trades Union Congress were delivered by William Kean, J. P., general secretary of the National Union of Gold, Silver and Allied Trades, and by George Gibson, general secretary of the Mental Hospital and Institutional Workers' Union.

Speaking as the representative of the Trades and Labour Congress of Canada, George Brunet, past president of the Montreal Trades and Labour Council, referred to the many industrial and economic problems which were identical in both countries. Mention was made of the perfect harmony and peace that had existed between the two nations for over a century, and the speaker considered that the maintenance of these conditions was due, to

a large extent, to the close relations of the workers through their membership in their respective international unions. Mr. Brunet also referred to the social and labour legislation which had been passed by the Federal Government in 1935, and which had been submitted to the Judicial Committee of the Privy Council for final ruling as to its constitutionality.

### Reports of Committees

*Committee on Industrial Relations.*—To the committee on Industrial Relations was submitted a number of resolutions dealing with industrial disputes involving certain employers, who, it is alleged, have and still are refusing to recognize "collective bargaining" on the part of their employees. The report of the committee drew attention to the fact that "the right of employees in any industry to organize and to bargain collectively through representatives of their own choosing without discrimination or coercion of any sort, is recognized as one of the important principles of our American Government and has been enacted into laws of this country."

*Committee on Legislation.*—In its report, the Committee on Legislation drew particular attention to that part of the executive report dealing with the La Follette resolution which has for its object the investigation of the invasion of free speech and assembly, and of interference with rights of organization. The committee recommended that the executive be instructed to give attention to the whole subject of fair conditions in government contracts, and that it endeavour to strengthen existing legislation and, if necessary, to secure the introduction and enactment of further statutes for this purpose. These recommendations were adopted.

*Committee on International Labor Relations.*—In this report the executive was commended for its report on the work of the International Labour Organization with special reference to the 20th session. The need for the early appointment of a labour delegate to the next annual conference was stressed and the committee's recommendation that President Green be the representative of the American Federation of Labor was unanimously adopted by the convention. Another adopted recommendation was one urging a continuance of conversations with the view of a closer co-operation between the American Federation of Labor and the International Federation of Trade Unions. The convention pledged its continuance of a relentless opposition to the spread of dictatorships through-

out the world. The report of this committee was adopted.

*Committee on Shorter Work Day.*—After reading the report of the executive on this subject and re-affirming the declarations made by previous conventions of the Federation, this committee made a brief survey of the present economic, industrial and general business conditions.

The following recommendations of the committee were adopted:—

Re-affirming endorsement of the five-day week and the six-hour work day without any reduction in the hourly, daily or weekly pay.

Declaring this issue to be the paramount objective of the convention and urging the executive to enlist the widest support possible for this program.

Instructing the executive council to take such action as will result in the introduction of a five-day week, six-hour day bill in the next session of Congress and that they devote their best effort to secure its enactment into law.

*Committee on Resolutions.*—To this committee was referred that part of the executive report dealing with the Committee for Industrial Organization, as well as twenty resolutions on the same subject, submitted by various organizations. After reviewing the whole case at considerable length the committee made the following recommendations:—

1. That this convention approve of all actions taken, decisions reached and rulings made by the Executive Council as hereinbefore noted and referred to. We specifically recommend approval of the suspensions noted, and all actions and decisions and rules relating thereto. Lest there be fear that this recommendation may be interpreted to mean permanent suspension or complete severance, let it be understood that the suspension noted shall remain in effect until the present breach be healed and adjusted under such terms and conditions as the Executive Council may deem best in each particular case or in all cases combined.

2. That the Special Committee appointed to discover a basis of settlement be continued with the full faith and confidence of the convention.

3. In event that by action of the suspended union they make the present relationship beyond bearing and create a situation that demands a more drastic procedure, that the Executive Council be authorized and empowered to call a special convention of the American Federation of Labor, at such time and place it may deem best, to take such further steps and actions as the emergency of the situation may then demand. We counsel this procedure and delegation of authority in the sincere desire to avoid any possible future and permanent severance unless such permanent separation comes as the choice of those who would permanently divide and bring warfare instead of peace and unity into the ranks of labour.

After a discussion which took up the greater part of three sessions, the report, as presented by the Resolution Committee, was adopted on a roll call vote—21,679 in favour to 2,043 against.

### Other Adopted Resolutions

The recommendations contained in some of the resolutions adopted were as follows:—

Endorsing the policy and program of the Federal Committee on apprentice training.

Favouring the manufacture of war munitions and naval vessels in United States arsenals and navy yards.

Opposing displacement of civil service workers by emergency workers.

Calling for investigation of alien situation on the Panama Canal.

Re-financing of farm mortgages.

Re-affirming the previous declarations of conventions, which called attention to the destruction of human liberty and a democratic form of government by Fascism, Nazism and Communism.

Favouring enactment of Federal legislation against lynching.

Insisting on labour representation on all legally created bodies appointed for the administration of laws relating to labour's welfare.

Endorsing the continuation of the several government agencies on work relief until the 30-hour week or its equivalent, with no reduction in wages, is established on a national scale.

Granting voting representation to the residents of the District of Columbia.

Urging the enactment of the Workmen's Compensation Law for District of Columbia.

Proposing amendments to income and other tax laws to exempt investments in home building and renovation.

Undertaking a study of the base and structure of taxation.

Training youth in trade union philosophy.

Condemning the activities of terroristic organizations.

Urging co-operation of international unions in securing affiliation of local unions with central bodies.

Opposing the activities of fraudulent advertising publication.

Favouring Federal legislation to penalize unfair practices of employment agencies.

Supporting legislation to provide:—

1. Medical aid for children.
2. Adequate relief to overcome malnutrition.
3. Facilities for advanced education at public expense.
4. Work opportunities, and relief at union rates for unemployed youth.

Affirming the action of previous conventions in placing a boycott upon Germany because of her continued persecution of the Jews.

Proposing examination board under W.P.A. for skilled workers.

Maintaining of adequate school facilities throughout the nation.

Supporting the organization drives in the mass production industries and to initiate similar action in the food industry.

Favouring a living wage for all public school teachers, and the enactment in the several states of legislation which shall provide that

teachers shall not be dismissed except for just cause and in a manner established by law.

Approving of school training in money management.

Urging an eight-hour day for fire-fighters.

Licensing of business firms and corporations.

Pressing for a Federal food and drugs act.

Protesting policy of bureau of Federal prisons in employing prison labour.

Instructing executive council to make a careful study and prepare a statement on the credit union and its policies, such information to be distributed to affiliated organizations.

Seeking removal of alleged discriminations against agricultural workers in United States Federal Law.

Urging support of labour press.

Protecting labour organizations from application of anti-trust laws.

Endorsing eight-hour day for hospital nurses and attendants.

Favouring expansion of Federal relief for unemployed and elimination of means test.

Opposing residence relief requirements for migratory workers.

Urging permanent works program for unemployed white collar workers.

Re-iterating approval of the child labour amendment and urging affiliates to press for ratification of this legislation by the remaining twenty-four state Legislatures.

Declaring fealty to the democratic principles of government.

Securing of uniform workmen's compensation legislation.

Urging a careful study of the development in consumers' co-operation.

### Election of Officers

The officers elected were: President, William Green, Washington; first vice-president, Frank Duffy, Indianapolis; second vice-president, Thomas A. Rickert, New York; third vice-president, Matthew Woll, Washington; fourth vice-president, John Coefield, Washington; fifth vice-president, Arthur O. Wharton, Washington; sixth vice-president, Joseph N. Weber, New York; seventh vice-president, G. M. Bugniazet, Washington; eighth vice-president, George M. Harrison, Cincinnati; ninth vice-president, Daniel J. Tobin, Indianapolis; tenth vice-president, Harry C. Bates, Washington; eleventh vice-president, Edward J. Gainer, Washington; twelfth vice-president, William D. Mahon, Detroit; thirteenth vice-president, Felix H. Knight, Kansas City; fourteenth vice-president, George E. Browne, New York; fifteenth vice-president, Edward Flore, Buffalo; secretary-treasurer, Frank Morrison, Washington.

Fraternal delegates to the British Trades Union Congress, W. C. Birthright, Journeymen Barbers' International Union, and J. J. Ryan, Sheet Metal Workers' International Association.

Fraternal delegate to the Trades and Labour Congress of Canada, R. A. Heming, International Association of Machinists.

Denver, Colorado, was selected as convention city for 1937.

## EMPLOYMENT CONDITIONS IN CANADA AT END OF NOVEMBER, 1936

### Reports of Superintendents of the Employment Service

The Employment situation at the end of November was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were engaged in general chores, as well as the cutting of firewood. Many were late with fall ploughing and as a result a large acreage of land was left unfinished, for early frosts had handicapped their activities; those along the Miramichi River were preparing for smelt fishing. Logging was progressing slowly, little or no work being available until the arrival of colder weather. Fishing was only fair, due to storms and gales, which drove vessels into port for shelter. Coal mines in the New Glasgow area operated from four to six days per week, while those in Cape Breton and vicinity worked from three to six days, with one mine idle all week. Manufacturing showed little change, nearly all producers reporting a seasonal average. Building construction under way was progressing favourably, while nearly all road work was finished for the season. Transportation was active by rail and water, a particularly heavy flow of freight, both east and west, being noted at Moncton. Trade was becoming more brisk as the Christmas season advanced. A number of requests were received for housemaids and charworkers and placements were made.

A decrease in farm orders was listed in the Province of Quebec. Logging and mining also were quiet. Various manufacturing centres reported as follows: Chicoutimi, volume of business unchanged; Hull, a few orders received and filled; Montreal, slightly more work was recorded in the metal and the boot and shoe industries, with clothing also fairly busy; Quebec City, leather quiet, but clothing and fur factories busier; Three Rivers, favourable situation, with some improvement noted over last year's output. Much activity prevailed in Montreal, as a result of relief works undertaken by the Provincial Unemployment Commission, in co-operation with the Federal Government, nearly 10,000 men, mostly labourers, having been put to work since the beginning of October. Construction and relief works under way in Quebec district, although on a lesser scale, registered an increase, 2,000 persons having been hired there during the past month. Much road construction was also in progress about Hull, but Chicoutimi reported conditions quiet. Three Rivers likewise noted improvement, both in building and repairs. Transportation was more active and trade was better, owing to the approaching

holidays. The call for hotel and restaurant employees was fairly good, with many placements effected in all branches of domestic service.

As fall farm work was about completed in Ontario, the demand for farm labour was slack. Several men were dispatched to husk corn and load sugar beets, but in some districts a good percentage of the applicants placed during the year was still being retained in employment. With the coming of snow and colder weather, the call for bushmen was more centralized, cooks, blacksmiths, hookmen and log makers being supplied to various operators. About Sudbury, vacancies in this line were fewer, as all camps were filled to capacity and not many men were leaving their positions after having obtained them. No calls were listed for miners, although there was noticeable activity in the Long Lac area. Employment in manufacturing concerns remained very steady, the number of persons working being considerably in excess of that of last year, with prospects bright for 1937. Automobile plants, however, were not up to full production, but foundries were busy. Although a number of construction jobs was being completed, the greater amount of work now under way consisting of repairs, renovating and house building, contractors, in general, were in an optimistic mood and felt that more building would be undertaken throughout the coming months than was the case a year ago. Road work was slowing down for the winter, but was still being carried on in some sections. Movement of freight by rail continued brisk and there was also much activity in shipping. Trade was good, with prices firm. Few positions were available for female help in factory or office, although some women found temporary positions as sales clerks during the Christmas rush, but there existed a shortage of good household domestic workers.

The demand for farm help in the Prairie Provinces remained steady, nearly all orders listed being those under the Government Farm Plan. Continued mild weather in some districts had been of great benefit to the farmers, as it enabled them to conserve their feed supply. Logging and mining, both, were rather quiet, with few calls for men, nor was any change expected in this line until the advent of colder weather. Manufacturers at Winnipeg reported activity, but elsewhere quietness prevailed. Building construction was slack and little road or sewer work was being done. Trade was better, due to pre-Christmas shop-

ping. Practically no change was listed in the Women's division, for experienced help was still hard to obtain and farm domestics were scarce.

Farming operations in British Columbia were mostly confined to winter feeding of stock. Numerous unfilled orders were on hand under the Government Farm Plan, but there was difficulty in filling these, as the men preferred to wait for forestry work. A few orchards had started pruning, however no vacancies were listed for this kind of employment. Logging camps and saw and shingle mills were operating steadily, although there did not appear to be much movement of labour in this industry, except that of the usual transient canvassing for work at the various locations. The cutting and shipping of Christmas trees continued. There was no call for miners, nevertheless the few prospec-

tors, who had returned, reported having had an average season. Little building construction, other than repair work, was in evidence and much of the mining trail and road construction was completed for the season, although in some sections of British Columbia, highway work was still being carried on. Drydocks and shipyards were quiet at Prince Rupert and Victoria, with waterfront work also slack at Prince Rupert, but active at Vancouver and Victoria, strike conditions at United States ports having diverted a number of ships to British Columbia harbours. Trade was gradually increasing, owing to Christmas buying. A number of applicants from out of town were registering for domestic service in the Women's division, and those who were experienced were easy to place, but few wished to take positions outside the city.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN OCTOBER, 1936

**T**HE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on November 1 was 10,054, the employees on their payrolls numbering 1,052,985 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,822, having an aggregate membership of 184,259 persons, 11.0 per cent of whom were without employment on

November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) The Employment Situation at the Beginning of November, 1936, as Reported by the Employers

According to reports furnished to the Dominion Bureau of Statistics by leading industrial establishments throughout the Dominion, employment at the beginning of November showed a continuation of the generally upward tendency in evidence during the last six months, the improvement resulting in a higher level of employment at November 1 than in any other month since November 1, 1930. The 10,054 firms making returns reported payrolls aggregating 1,052,985, compared with 1,044,380 at October 1, 1936, while

the index (1926=100) rose from 110.1 in the preceding month, to 111.0 at the first of November, as compared with 107.7 at November 1, 1935. The increase of 8,605 persons at the latest date is larger than that recorded in five of the six previous years in which the indicated trend of employment at November 1 has been favourable; in the remaining Novembers for which statistics are available, industrial activity had declined, in most cases substantially, so that the average change in the index from October 1 to Novem-

ber 1 in the period, 1921-1935, is a moderate reduction. As a consequence of the upward movement at the date under review, the seasonally-adjusted index rose from 105.0 at October 1, 1936, to 106.6 at the beginning of November, when it was higher than in any other month since the opening of 1931.

In the sixteen years of the record, the un-adjusted index at November 1 has been as follows:—1936, 111.0; 1935, 107.7; 1934, 100.2; 1933, 91.3; 1932, 84.7; 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0 and 1921, 91.3.

Particularly important improvement occurred at the beginning of November, 1936, in logging, while mining, shipping, highway construction and trade also afforded greater employment. On the other hand, services, communications, transportation, railway construction and manufacturing showed declines that in most cases were of a seasonal character. Within the last-named division, animal food, pulp and paper and iron and steel plants recorded increased activity, but there were losses in vegetable food, lumber, leather and some other factories.

For November 1 of last year, 9,482 employers had reported staffs aggregating 1,012,103, an increase of 14,803 persons as compared with their October 1, 1935, returns. The additions to the working forces were then most pronounced in logging, but highway and building construction, mining and manufacturing as a whole had also shown improvement.

### Employment by Economic Areas

The tendency was seasonally downward in the Prairie Provinces and British Columbia, while heightened activity was indicated in the Maritime Provinces, Quebec and Ontario. The employment afforded by leading firms in four of the five economic areas was at a higher level than at the beginning of November in any other year since 1930; the exception was the Prairie area, where the index, though lower than at November 1, 1935, was higher than at that date in 1934, 1933 or 1932.

*Maritime Provinces.*—There was a further increase in industrial activity in the Maritime Provinces at November 1, 1936, being the eighth advance in as many months; most of the gain at the latest date took place in logging, but manufacturing, mining, shipping and trade also reported improvement. Within the factory group, additions to staffs were recorded in food, tobacco, and iron and steel plants, while lumber mills were seasonally slacker. Construction also released employees,

the losses being considerable. Returns were received from 706 employers in the Maritime Provinces with 86,051 workers on their pay-rolls, or 1,015 more than at the beginning of October. A decrease had been indicated at November 1, 1935, by the 660 firms whose statistics were then tabulated, and who had reported 79,290 persons in their employ; this was a decline of 1,284 from their October 1, 1935, staffs. The index was then over eight points lower than at the latest date, when it was 119.4.

*Quebec.*—Firms in Quebec showed another large increase; this took place chiefly in logging, which was decidedly more active, while there were also gains in mining, trade, shipping, building and highway construction. On the other hand, manufacturing, railway transportation and construction registered curtailment; within the manufacturing group, the leather, lumber, vegetable food, textile, clay, glass and stone, electric current and other divisions showed contractions, in some cases of a seasonal character. The 2,372 co-operating employers enlarged their staffs by 12,054 persons, bringing them to 305,550 at November 1; the experience of the last fifteen years shows that, on the average, employment has been in rather smaller volume at November 1 than at October 1, so that the substantial increase occurring at the latest date is of particular interest. Employment was brisker than at November 1, 1935, when a gain of 5,393 workers was reported by the 2,244 establishments whose data were received, their payrolls had then included 289,363 persons.

*Ontario.*—Employment in Ontario showed further improvement, which compared favourably with the general decline indicated, on the average, at November 1 in the years since 1920. The tendency had also been upward at the beginning of November of last year, but the index then was lower by between two and three points than at the date under review, when it was 112.8. There was a substantial advance in logging at the latest date; mining, building construction and trade also afforded employment to a considerably larger number of workers than at October 1. On the other hand, manufacturing, transportation and railway construction and maintenance reported curtailment. Within the group of factory employment, pulp and paper, beverages and iron and steel showed heightened activity, the gains in the last-named being marked; lumber, vegetable food and some other divisions, however, released employees. The losses, which were especially pronounced in canneries, were mainly seasonal in character. A combined working force of 437,780 persons was employed by the 4,462 firms whose data

were tabulated, and who had 436,583 on their payrolls in the preceding month.

For November 1, 1935, statistics had been received from 4,190 employers having 421,522 workers, compared with 414,197 at the beginning of October of last year. Expansion had then been indicated in logging, metallic ore mining, highway construction, retail trade and manufacturing.

*Prairie Provinces.*—There was a seasonal decrease in employment in the Prairie Provinces at November 1, 1936, following six

*British Columbia.*—A further contraction in employment was recorded in British Columbia; the staffs of the 1,053 employers furnishing returns aggregated 88,923, compared with 91,250 in the preceding month. The reduction took place largely in manufacturing, there being important seasonal losses in food factories; communications and highway and railway construction also showed declines. On the other hand, logging, shipping and retail trade were rather more active. Employment generally was brisker than at November 1 of

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

months of advancing activity. Returns were compiled from 1,461 firms having 134,681 employees, as against 138,015 at October 1, 1936. Logging, coal-mining, trade and manufacturing afforded considerably more employment, but there were declines in services, transportation and construction and maintenance. Most of the large gain in manufacturing occurred in pulp and paper, textile and food factories. The general curtailment in the Prairies compares unfavourably with the increase recorded at November 1, 1935, when the index was rather higher, standing at 108.1, as compared with 106.0 at the latest date. Statements had been compiled for November 1 of last year from 1,381 employers of 136,640 men and women; this was an increase of 6,842 over their October 1, 1935, staffs.

last year, when 1,007 establishments had reported a total working force of 85,288 persons, compared with 88,761 in the preceding month; the index then stood at 101.8, as compared with 105.4 at the latest date.

Table 1 gives index numbers by economic areas.

### Employment by Cities

Additions to staffs were registered in Toronto, Hamilton and Windsor, while in Montreal, Quebec City, Ottawa, Winnipeg and Vancouver there were reductions. The general situation in most of these centres was better than that indicated by the firms reporting at the beginning of November, 1935.

*Montreal.*—A reduction in employment occurred in Montreal at November 1, when 1,257 persons were released from the staffs of the 1,362 co-operating firms, who employed 142,101. Retail trade and shipping showed heightened activity, but there were losses in manufacturing, construction and railway operation. Within the manufacturing group, there was curtailment in textile, iron and steel and leather factories, while paper and printing, electrical appliance and some other plants reported advances. An increase had been noted at the same date of last year, but the index was then nearly three points lower. Statements had been received for November 1, 1935, from 1,303 establishments providing work for 137,370 men and women.

*Quebec City.*—Employment showed a falling-off in Quebec, according to 172 employers of 12,924 persons, compared with 13,052 at October 1. Manufacturing indicated most of

the contraction, while trade recorded moderate improvement; within the manufacturing group, the largest decrease occurred in leather plants. Employment as reported by employers was in smaller volume than at the beginning of November, 1935, when the 164 co-operating firms had employed 13,176 workers, or 174 more than at October 1, 1935.

*Toronto.*—There was a further increase in the payrolls of 1,501 firms in Toronto, who had 131,249 persons in their employ, a number greater by 609 than in their last report. Most of the expansion took place in trade, services and construction. Printing and publishing and iron and steel plants were also busier. On the other hand, vegetable food, textile, non-ferrous metal and some other factories released employees. A general gain had also been registered at the beginning of November a year ago, but the index then was over four points lower; the 1,400 employers making returns for

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Nov. 1, 1921.....	91.3	102.6	83.4	92.7	101.9	83.7
Nov. 1, 1922.....	97.0	102.9	88.4	101.1	104.3	88.9

Oct. 1.....	106.1	112.9	103.1	108.1	102.7	106.0
Nov. 1.....	107.7	111.1	105.0	110.0	108.1	101.8
Dec. 1.....	104.6	107.5	103.8	107.0	101.3	99.3
Jan. 1, 1936.....	99.1	108.1	95.5	102.7	95.1	92.4
Feb. 1.....	98.4	102.2	95.2	102.4	93.7	94.1
Mar. 1.....	98.9	101.7	95.1	103.8	95.1	92.4
April 1.....	97.4	101.8	91.4	103.4	90.5	95.9
May 1.....	99.5	103.4	96.4	103.4	92.7	99.0
June 1.....	102.0	103.4	99.8	104.7	97.7	102.2
July 1.....	104.6	111.7	101.6	106.2	101.9	104.8
Aug. 1.....	105.6	113.9	101.3	107.1	103.9	107.9
Sept. 1.....	107.1	114.4	103.0	108.1	107.4	109.3
Oct. 1.....	110.1	117.9	106.0	112.6	108.6	108.1
Nov. 1.....	111.0	119.4	110.3	112.8	106.0	105.4
Relative Weight of Employment by Economic Areas as at Nov. 1, 1936.....	100.0	8.2	29.0	41.6	12.8	8.4

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

November 1, 1935, had reported staffs aggregating 124,246, compared with 123,397 in the preceding month.

*Ottawa.*—In Ottawa, curtailment, was shown in manufacturing, particularly in the lumber division; services and construction were also rather slacker, while trade was more active. The changes in the other groups were slight. The 199 establishments furnishing data employed 14,336 workers, as against 14,603 at October 1. Employment was in greater volume than at the same date in 1935, when the trend had also been downward, according to data from 177 firms with 13,403 employees.

*Hamilton.*—Employment in Hamilton increased substantially at November 1, when the 286 co-operating firms had 32,303 employees, or 750 more than at the beginning of October. Manufacturing was decidedly brisker, chiefly in the iron and steel, vegetable food and textile groups; other industries showed little general change. A somewhat smaller

gain had been reported at the beginning of November of last year, but the index then was slightly higher. The November 1, 1935, payrolls of the 274 employers furnishing data had aggregated 32,501.

*Windsor.*—Activity in Windsor showed a further advance; 175 establishments reported 17,194 persons on their payrolls, compared with 16,393 at the beginning of October. The improvement took place largely in the automobile and related industries, while food factories were seasonally slacker. A marked increase had also been indicated at the same date of a year ago, when employment was at a lower level. Statistics for November 1, 1935, had been tabulated from 171 employers, whose staffs totalled 15,633.

*Winnipeg.*—Employment declined in Winnipeg, according to 482 firms employing 40,713 workers at the beginning of November, as compared with 40,874 in their last report. Manufacturing was brisker, the gains occurring

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

(AVERAGE CALENDAR YEAR 1926=100)

Relative Weight of Employment by Cities as at Oct. 1, 1936.....	13.5	1.2	12.5	1.4	3.1	1.6	3.9	3.3

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

mainly in food factories, and trade also showed improvement, while transportation and construction released help. Figures furnished by 460 employers at the first of November of last year showed that their payrolls had included 39,175 men and women, or 170 more than at October 1, 1935; however, employment was then in lesser volume than at the date under review.

*Vancouver.*—There was a downward movement in Vancouver, where 441 establishments had 34,442 persons on their staffs, or 671 fewer than in the preceding month. Manufacturing and construction showed declines, those in the first-named occurring mainly in food factories. On the other hand, shipping and trade afforded more employment. Industrial activity generally was at a higher level than at the beginning of November of last year, when curtailment had also been reported by the 422 co-operating firms, whose employees had numbered 32,238, a decline of 720 from October 1, 1935.

Index numbers by cities are given in Table 2.

### Employment by Industries

*Manufacturing.*—Employment in manufactures showed a contraction, the first to be indicated since the opening of the year. The 5,838 co-operating establishments reported 546,031 employees, or 6,081 fewer than at October 1, while the index declined from 109.0 in the preceding month to 107.7 at November 1. This reduction, which was of a seasonal character, involved a proportion of the aggregate payroll that was smaller than the average loss indicated in the experience of the years since 1920. Accordingly, the seasonally-adjusted index advanced, rising from 106.1 at the beginning of October to 106.6 at the date under review; this seasonally-corrected index was then higher than in any other month since the summer of 1930.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade

Relative Weight of Employment by Industries as at Nov. 1, 1936.....	100.0	51.8	5.6	6.7	2.1	9.9	11.2	2.6	10.1

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

There were large increases at November 1, 1936, in iron and steel plants, these being of more than ordinary interest in that they were contrary to the usual seasonal trend at the beginning of November in the last fifteen years. The animal food, pulp and paper, beverage and chemical industries also afforded more employment than in the preceding month. On the other hand, vegetable food, lumber, leather, rubber, textile, clay, glass and stone, electric light and power, non-ferrous metal and non-metallic factories released employees, the declines being in many cases of a seasonal nature.

The unadjusted indexes of factory employment (calculated on the 1926 average as 100), have been as follows at the beginning of November in the years since 1920: 1936, 107·7; 1935, 103·5; 1934, 92·8; 1933, 86·5; 1932, 81·7; 1931, 88·8; 1930, 104·6; 1929, 117·2; 1928, 115·1; 1927, 104·9; 1926, 102·7; 1925, 96·5; 1924, 91·3; 1923, 98·7; 1922, 94·9 and 1921, 87·8.

The situation in manufacturing continues better than at the same date of 1935; the index was also higher than at November 1 in any preceding year since 1929, when it was, of course, considerably higher than at the latest date. The records show that for November 1, 1935, 5,585 manufacturing establishments had employed 520,601 men and women, as compared with 519,513 in the preceding month. Considerable gains had then been indicated in iron and steel, textile, rubber and some other industries, while the food, lumber and certain other classes had shown seasonal curtailment.

*Animal Products—Edible.*—Meat preserving plants greatly increased activity, but seasonal curtailment was indicated in fish canneries. Statistics were received from 296 manufacturers, employing 25,608 persons, as compared with 25,001 in the preceding month. This advance, in which all provinces except British Columbia shared, compared favourably with the decline registered at the corresponding date

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Nov. 1, 1936	Oct. 1, 1936	Nov. 1, 1935	Nov. 1, 1934	Nov. 1, 1933	Nov. 1, 1932	Nov. 1, 1931

The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

last year, when activity was at a generally lower level.

*Leather and Products.*—There was a falling-off in employment in this group at November 1, mainly in boot and shoe factories in Quebec and Ontario. The 300 firms furnishing data reported 22,195 workers, as against 22,793 at October 1. The index was rather higher than at the same date in 1935, when a larger decline had been noted.

*Lumber and Products.*—Further seasonal reductions, involving slightly more employees than in the autumn of last year, were indicated in the lumber group, in which employment was in greater volume than in November, 1935. The losses at the date under review took place principally in rough and dressed lumber mills, while furniture and vehicle works showed improvement. A combined working force of 43,204 persons was reported by the 859 co-operating manufacturers, as compared with 45,261 at the beginning of October. The most pronounced decreases were in Ontario, but the tendency was generally downward.

*Musical Instruments.*—Little general change was indicated in musical instrument factories, 35 of which employed 1,596 workers, or practically the same number as at October 1. Employment was somewhat more active than at the beginning of November, 1935, although an increase had then been recorded.

*Plant Products—Edible.*—Fruit and vegetable canneries reported very marked seasonal reductions in their payrolls, while sugar and syrup and chocolate and confectionery plants showed small advances. The forces of the 490 co-operating firms aggregated 39,911 persons, or 7,004 fewer than in their last return. Employment declined in Quebec, Ontario and British Columbia, but improvement was noted in the Maritime and Prairie Provinces. The curtailment, on the whole, involved a much greater number of workers than that registered at the corresponding date last year; however, the index number was then over ten points lower than at the date under review.

*Pulp and Paper Products.*—Additions to staffs were reported by employers in this group, 605 of whom had 64,423 workers on their payrolls, as compared with 63,681 at the beginning of October. Improvement was recorded in printing and publishing houses, and in the manufacture of pulp and paper and paper products. The tendency was favourable in Ontario and the Western Provinces, but there were moderate declines in Quebec and the Maritimes. Little general change had been indicated at the beginning of November a year ago, when the index was over seven points lower.

*Rubber Products.*—Employment in rubber goods showed a decrease at November 1; data were compiled from 52 firms with 12,938 employees, as against 13,150 in their last report. The level of activity was higher than at November 1, 1935, although improvement had then been noted.

*Textile Products.*—Hosiery and knitting, cotton and some other textile factories reported heightened employment, but the production of garments, headwear and some other lines showed a falling-off; 1,041 textile manufacturers reduced their payrolls from 104,826 at October 1 to 104,537 at the date under review. The decreases took place chiefly in Quebec. A large gain had been shown at the beginning of November last year, but the index was then a few points lower.

*Tobacco, Distilled and Malt Liquors.*—Little general change was recorded in tobacco works, while improvement was noted in beverage factories, according to the 186 establishments furnishing statistics in this group, which employed 15,517 persons, as compared with 15,262 at October 1. Most of the gain mentioned occurred in Ontario and the Eastern Provinces. An increase had also been indicated at the corresponding date last year, when employment was brisker.

*Chemicals and Allied Products.*—A considerable advance was recorded in this group, in which statements were furnished by 198 plants employing 11,846 persons, or 273 more than in their last report. Activity was decidedly greater than in the autumn of 1935, when the tendency had also been upward.

*Clay, Glass and Stone Products.*—A seasonal falling-off was noted in building material plants in most provinces; employment generally was at a higher level than at November 1, 1935, when rather more extensive losses, on the whole, had taken place. The forces of the 204 employers from whom information was received, declined since October 1 by 358 persons, to 9,278 at the beginning of November, 1936.

*Electric Light and Power.*—Employment in the production of electric current showed a contraction, 266 workers being released from the forces of the 96 co-operating manufacturers, who employed 15,305 persons. Similar declines had been indicated in this industry at November 1 of last year, when the index was rather lower.

*Electrical Appliances.*—No general change was reported in electrical apparatus works, 127 of which had 17,366 employees. A gain had occurred at the same date in 1935, and employment was then in greater volume.

*Iron and Steel Products.*—The personnel of automobile works showed important increases, while the crude, rolled and forged, heating appliance, foundry and machine shop divisions of the iron and steel industry also reported heightened activity. The general additions to staffs were smaller than those indicated at November 1, 1935, but they compare favourably with the declining employment that has been the average change at that date in the fifteen preceding years of the record.

Statements were received from 861 manufacturers whose payrolls aggregated 117,056 persons, as compared with 113,602 in the preceding month. Employment advanced in all provinces except Quebec. As already mentioned, improvement on a larger scale had been indicated at the beginning of November last year, but employment then was rather quieter than at the date under review.

*Non-ferrous Metal Products.*—Data tabulated from 169 firms in the non-ferrous metal group showed that they employed 22,476 workers, or 249 fewer than at October 1. The decrease occurred mainly in the manufacture of lead, tin, zinc and copper products. The situation was decidedly better than at the same date of 1935, although a gain over the preceding month had then been indicated.

*Non-metallic Mineral Products.*—There was a decline in employment in non-metallic mineral product factories, 142 of which released 281 persons, bringing their staffs to 14,411 at the beginning of November. The index was higher than at November 1 of last year, when a similar reduction had been noted.

### Logging

Statistics were tabulated from 339 firms employing 58,706 men, or 18,429 more than in the preceding month. This advance exceeded that noted at November 1 of any other year for which information is available, being, in fact, greater than in any other month on record. The index, at 206·9, was higher than at the beginning of November of preceding years since 1920. There were increases at the date under review in each of the five economic areas, the largest being in Quebec.

### Mining

The mining of coal and other non-metallic minerals and of metallic ores afforded much more employment, according to statements from 405 mine operators, with 70,079 employees, or 1,824 more than in their last report. Of the total employees recorded at the date under review, 25,849 belonged in the coal-mining, 35,016 in the metallic ore and 9,214 in the non-metallic mineral group. A smaller gain, on the whole, had been indicated at the

same date in 1935, and the index then was below its level at the time of writing.

### Communications

Telephones and telegraphs showed moderate seasonal contractions; the companies and branches making returns had 22,010 workers on their payrolls, a loss of 402 since October 1. The index of employment was slightly higher than at November 1, 1935, when a smaller falling-off had been noted.

### Transportation

*Street Railways and Cartage.*—There was a reduction in activity in local transportation, according to 236 firms whose staffs aggregated 27,128 at the beginning of November, as compared with 27,578 in the preceding month. The decline occurred chiefly in Ontario and the Prairie Provinces. Employment was at a higher level than at the corresponding date in 1935, although the loss then reported had been slighter.

*Steam Railways.*—Statistics were tabulated from 101 divisional superintendents and other employers in the railway operation group, whose payrolls were reduced by 1,653 persons, to 60,321 at November 1. The largest contractions were in the Prairie Provinces. Employment was rather brisker than at the beginning of November, 1935, when a smaller decline had been indicated.

*Shipping and Stevedoring.*—An increase was noted in water transportation, 111 companies employing 17,097 workers, as compared with 16,523 in the preceding month. There was improvement in the Maritime Provinces, Quebec and British Columbia. A loss had been shown at November 1 last year, when the index stood at 89·8, compared with 94·8 at the date under review.

### Construction

*Building.*—There was a reduction in building, 172 persons being released from the forces of the 744 co-operating contractors, who had 24,955 employees, a number considerably smaller than that reported by the firms making returns at the beginning of November, 1935; the trend had then been favourable. There were advances at the date under review in Quebec, Ontario, and British Columbia, while elsewhere curtailment was indicated.

*Highway.*—Work on highways and streets decreased in the Maritime and Western Provinces, but there was an important advance in Quebec. Statements were tabulated from 375 employers, whose staffs, standing at 61,689 were larger by 1,896 persons than at October 1, 1936.

The index, at 165.1 at the beginning of November, was much lower than at the same date in 1935, when gains on a considerably greater scale had been made.

**Railway.**—Seasonal curtailment of railway construction work was generally recorded, the most marked reductions occurring in Ontario and the Prairie Provinces. The forces of the 34 companies and divisional superintendents furnishing returns declined from 37,958 persons at October 1, to 31,127 at the beginning of November. This shrinkage was much greater than that registered at the corresponding date in 1935, but the level of employment then was lower.

### Services

Hotels and restaurants and laundries and dry cleaning establishments were seasonally quiet, while the fluctuations in other branches of services were slight, according to 474 firms employing 27,236 persons, or 545 fewer than at the beginning of October. The index, at 124.9, was 7.8 points higher than that of November 1, 1935, when larger declines, on the whole, had been indicated.

## (2) Unemployment in Trade Unions at the Close of October, 1936

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was practically no change in the percentage of unemployment reported by Local Trade Unions in Canada, as a whole, at the close of October when contrasted with the returns for the previous month, though fluctuations were evident in the various provinces and industries. This was apparent from the reports forwarded by 1,822 labour organizations with a total of 184,259 members, 20,322, or 11.0 per cent of whom were unemployed on the last day of the month as compared with a percentage of 10.9 in September. The employment situation was, however, somewhat more favourable than in October, 1935, when

### Trade

The trend of employment in trade was again upward, 2,016 workers being added to the forces of the 1,311 retail and wholesale establishments furnishing returns, whose staffs aggregated 106,606. The increase took place in the retail division, wholesale houses showing little general change in employment. The index stood at 132.0, compared with 124.6 at November 1, 1935, when the reported gains had been on a smaller scale. The advance this year was greater than the average indicated in the years since 1920, partly on account of a general revival in business and partly because the date of the enquiry fell at the week-end. Further pronounced expansion in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

13.3 per cent of the members reported were out of work. Alberta unions showed a gain in activity of nearly 4 per cent from September, the coal mines mainly accounting for this improvement, while in Nova Scotia and Ontario the tendency was upward though the changes were quite small. Some falling off in activity, however, was recorded by Saskatchewan unions, and in Quebec, British Columbia and Manitoba employment was very slightly retarded. From New Brunswick the same percentage of idleness was reported as in September. Apart from Nova Scotia all provinces reflected a better employment volume available during October than in the corresponding month of last year. Quebec, Ontario and British Columbia showing gains of around 3 per cent followed by increases of 2 per cent in Manitoba and Alberta, and improvement of less than one per cent in New Brunswick and Saskatchewan. In Nova Scotia the variation was very slight though adverse.

Each month a separate compilation is made of unemployment in the largest city in each province, with the exception of Prince Edward Island. Of these, Halifax members were considerably better engaged during October than

in the preceding month, and in Edmonton the employment advances recorded were also rather noteworthy. In Saint John, Toronto and Winnipeg the tendency was toward greater activity, though the variations from September were very small. On the contrary Regina unions showed moderate curtailment in work afforded, and in Montreal and Vancouver lesser declines occurred. When compared with the returns for October last year employment gains on a substantial scale were noted by Edmonton, Toronto, Saint John and Montreal unions during the month reviewed, and improvement of somewhat lesser proportions was evident among Halifax, Winnipeg, Regina and Vancouver unions.

of whom were idle at the end of the month as compared with percentages of 10.9 in September and 14.2 in October, 1935. Fur, glass and jewellery workers, whose combined membership was rather small, reported a noteworthy percentage increase in activity over September. Gains of moderate degree were reflected by cigar and tobacco workers, and bakers and confectioners, and a slightly better employment tendency was evident among leather, textile and carpet, and wood workers, and pulp and paper makers. On the other hand, hat, cap and glove, and brewery workers suffered pronounced losses in the employment volume afforded, and activity for general labourers, iron and steel, and

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Appearing with this article is a chart which indicates the unemployment trend by months from January, 1930, to date. The curve at the close of October showed very little variation in level from either of the two previous months, almost stationary conditions being shown. The change noted in the curve from October a year ago was in a favourable direction, employment tending upward during the period surveyed.

In the manufacturing industries activity eased off very slightly during October from the preceding month, though the situation showed improvement over October a year ago. This was evident from the returns received from 511 labour organizations with 62,376 members, 7,206, or a percentage of 11.6,

garment workers, and printing tradesmen subsided slightly. The textile and carpet trades particularly, showed important employment recovery during October from the corresponding month of last year, and among garment, cigar and tobacco, and leather workers improvement of considerably lesser degree, though noteworthy, occurred. Iron and steel, and fur workers recorded more moderate advancement and the trend for bakers and confectioners, printing tradesmen and jewellery workers was also toward increased employment, though the changes were small. On the contrary, hat, cap and glove, and brewery workers were decidedly less active than in October last year. Woodworkers indicated

contractions in available work of much lesser degree, and among pulp and paper makers, glass workers and general labourers employment was but slightly retarded.

Coal mining, on the whole, employed larger working forces during October than in the preceding month, as shown by the reports tabulated from 45 unions including a membership of 14,616 persons. Of these, 673 or 4.6 per cent were idle at the close of the month in contrast with a percentage of 8.8 in September. An almost unchanged employment volume was indicated from October last

year when 4.7 per cent of unemployed members was recorded. The better situation obtaining in the Alberta mining areas during October was the determining factor in the improvement recorded over September, though in Nova Scotia also, a slight rise in activity was noted. There was some falling off in employment, however, among British Columbia miners. Compared with the returns for October, 1935, conditions in both the Alberta and British Columbia mines were more favourable during the month reviewed, but this improvement was almost offset by the recessions evident in Nova Scotia. The changes throughout, however, were slight. A number of miners continued to be reported as working at greatly reduced time.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4
Average 1920.....	1.8	2.0	7.2	3.4	3.1	3.2	2.8	11.2	4.9
Average 1921.....	11.3	8.5	16.6	9.7	8.5	7.8	7.8	23.5	12.7
Average 1922.....	7.1	4.3	8.6	5.0	8.9	5.4	6.1	12.4	7.1

May, 1935.....	5.9	8.4	22.2	19.9	14.1	10.2	23.1	17.2	15.0
June, 1935.....	12.2	8.1	21.9	12.9	13.7	7.5	20.1	15.3	215.9
July, 1935.....	8.1	7.8	19.0	14.3	11.6	7.5	23.2	13.6	15.4
Aug., 1935.....	8.3	8.1	18.3	13.3	10.7	7.9	13.4	13.1	14.1
Sept., 1935.....	6.0	8.7	20.4	10.4	8.1	6.2	13.7	14.0	12.9
Oct., 1935.....	4.7	8.6	21.5	11.3	10.2	8.9	7.9	13.4	12.9
Nov., 1935.....	4.1	8.9	21.0	11.3	10.4	9.9	9.4	13.4	13.2
Dec., 1935.....	7.8	7.5	20.6	13.4	13.1	11.6	9.6	15.6	14.2
Jan., 1936.....	7.4	6.7	19.3	14.0	13.4	13.8	13.3	16.0	14.6
Feb., 1936.....	7.2	6.8	16.3	14.1	12.4	13.1	11.0	17.7	13.8
Mar., 1936.....	7.7	6.6	19.3	12.7	12.5	12.0	17.5	14.0	14.8
April, 1936.....	8.2	8.0	21.2	13.2	11.8	10.2	18.0	12.5	15.5
May, 1936.....	7.4	8.7	19.6	15.0	9.9	7.7	15.7	11.6	14.1
June, 1936.....	6.7	7.8	19.0	13.3	8.4	6.4	17.2	10.5	13.8
July, 1936.....	6.2	6.8	19.2	9.9	8.3	7.4	14.4	9.7	12.9
Aug., 1936.....	6.8	7.7	16.7	8.4	7.8	7.1	10.7	8.3	10.5
Sept., 1936.....	6.2	8.0	17.1	9.0	8.0	5.8	9.5	8.5	10.8
Oct., 1936.....	5.2	8.0	18.3	8.6	8.2	8.2	5.9	9.8	11.9

Employment in building and construction trades was maintained at much the same volume during October as in the previous month, according to the reports received from a total of 203 organizations embracing a membership of 19,719 persons. Of these, 6,436 or a percentage of 32.6 were out of work at the end of the month in contrast with a percentage of 32.3 in September. Improvement in conditions on a substantial scale was reflected from October of last year when unemployment stood at 42.8 per cent. Bridge and structural iron workers, and tile layers and lathers and roofers were decidedly more active than in September, but as their membership was small they did not materially affect the percentage for the group as a whole. Among bricklayers, masons and plasterers, and granite and stone cutters also, moderate employment expansion was noted. Electrical workers showed but a slight gain. There was, however, a noteworthy falling off in activity evident among painters, decorators and paper hangers from September, and among steam shovelmen declines on a somewhat smaller scale occurred. Minor contractions in activity were also recorded by carpenters and joiners, hod carriers and building labourers, and plumbers and steamfitters. The situation for carpenters and joiners, electrical workers, tile layers, lathers and roofers, hod carriers and building labourers, and steam shovelmen was decidedly more favourable than in October, 1935, and among painters, decorators and paper hangers important gains occurred. The level of activity for bricklayers, masons and plasterers was also above that of October last year, though the variation was slight. Considerable increases in slackness, however, were registered by granite and stone cutters, and bridge and structural iron workers, while plumbers, and steamfitters showed a nominal adverse tendency.

From unions in the transportation industries 804 reports were forwarded to the department

TABLE II—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper	Printing, publishing and lithographing	Electric current	Wood products	Fibres, textiles and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay glass and stone products	Mineral products	Miscellaneous manu- facturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop clerks)	Services	Governmental	Miscellaneous	All occupations

during October showing a total membership of 59,241 persons, 3,642 or 6.1 per cent of whom were idle at the end of the month in contrast with percentages of 5.8 in September and 7.2 in October, 1935. Steam railway employees, whose returns included over 78 per cent of the entire group membership reported, showed but a fractional drop in the volume of work afforded from September, and among street and electric railway employees activity was also slightly curtailed. Navigation workers, however, were considerably better engaged than in September and among teamsters and chauffeurs there was a small employment rise. As in the previous comparison, the navigation division showed employment recovery on a substantial scale during the month reviewed, when compared with the returns for October, 1935, and slight gains were apparent among steam railway employees, and teamsters and chauffeurs. Street and electric railway employees alone recorded recessions in activity which were, however, of minor importance.

The situation for retail shop clerks varied slightly during October from either the previous month or October, 1935, though the trend in each comparison was favourable. This was manifest by the returns compiled from 5 associations with a membership aggregate of 1,418 persons, 4.8 per cent of whom were out of work at the close of the month as compared with percentages of 5.3 in September and 5.1 in October, 1935.

Reports were furnished for October by 82 associations of civic employees covering a membership of 8,742 persons, 139, or 1.6 per cent of whom were out of work on the last day of the month contrasted with 2.2 per cent in September and a percentage of 2.7 in October a year ago.

Minor contractions in employment were evident in the miscellaneous group of trades during October from the preceding month as manifest by the reports received from 134 organizations involving 7,200 members. Of these, 707 were unemployed at the end of the month, a percentage of 9.8 contrasted with 8.0 per cent of inactivity in September. Conditions, however, were nominally better than in October of last year when 10.9 per cent of the members reported were out of

work. Increased slackness among stationary engineers and firemen was mainly responsible for the less favourable situation noted in the group as a whole, from September, though barbers and unclassified workers showed fractional recessions. A slightly improved employment trend was, however, noted by theatre and stage, and hotel and restaurant employees. Compared with the returns for October, 1935, in the miscellaneous group of trades, hotel and restaurant employees recorded important advances in work afforded during the period under survey and moderate gains were also reflected by theatre and stage employees. Barbers showed heightened activity on a small scale. There was, however, a noteworthy slackening off in employment among stationary engineers and firemen from October last year, and unclassified workers showed but a nominally adverse trend.

Pronounced curtailment of activity was apparent among fishermen during October from the previous month as represented by the returns received from 3 unions with a membership numbering 588 persons. Of these, 152 were idle on the last day of the month, a percentage of 25.9 compared with 6.3 per cent of idleness in September. Employment gains, on a small scale, were noted from October last year when 28.6 per cent of unemployment was registered.

Among lumber workers and loggers during October a fractional decline in the volume of work accorded was reflected from the previous month but conditions were considerably improved when compared with October, 1935. This was evident from the reports tabulated from 2 unions with a total of 1,165 members, 2.3 per cent of whom were without employment on the last day of the month contrasted with percentages of 1.9 in September and 9.9 in October a year ago.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1935 inclusive, and also the percentages of unemployment by provinces for October of each year from 1919 to 1933 inclusive and for each month from October, 1934, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for October, 1936

During the month of October, 1936, reports from the offices of the Employment Service of Canada showed a gain of 15 per cent in the average daily placements effected over those of the preceding month, but a decline of over 4 per cent from those of the corresponding period last year. Although vacancies and

placements were lower during the month under review than in October, 1935, applications received were considerably higher. In comparison with September, 1936, all industrial divisions, except manufacturing and trade, showed increases, the largest being in farming, construction and maintenance, logging and ser-

vices and the greater decrease in manufacturing. When compared with October, 1935, construction and maintenance recorded a heavy loss, augmented by smaller declines in manufacturing, trade and mining, while farming showed a substantial gain, increased by noteworthy advances in logging and services and a nominal gain, only, in transportation. These expansions, however, were not great enough to entirely offset the contractions recorded above.

The accompanying chart shows the trend of employment since January, 1934, as represented by the ratio of vacancies notified and of placements effected for each 100 applica-

under review were 37.6 and 49.6, as compared with 53.8 and 49.9 in the corresponding month of 1935.

The average number of vacancies reported daily by employers to the Offices of the Service throughout Canada during October, 1936, was 1,332, as compared with 1,173 in the preceding month and with 1,364 in October a year ago.

The average number of applications for employment received daily by the Offices during the month under review was 2,823, in comparison with 2,540 in September, 1936, and with 2,512 during October last year.

#### POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o

tions for work registered at the offices of the Employment Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications declined slightly during the first half of the month, but followed a marked upward trend during the latter half of the period under review and at the close of October, 1936, had attained practically the same level as that shown at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 41.2 during the first half and 52.4 during the second half of October, 1936, in contrast with ratios of 56.8 and 52.2 during the corresponding periods of 1935. The ratios of placements to each 100 applications during the periods

The average number of placements made daily by the Offices of the Service during October, 1936, was 1,241, of which 904 were in regular employment and 337 in work of one week's duration, or less, as compared with a total daily average of 1,080 during the preceding month. Placements in October a year ago averaged 1,298 daily, consisting of 881 in regular and 417 in casual employment.

During the month of October, 1936, the Offices of the Employment Service referred 34,077 persons to vacancies and effected a total of 32,266 placements. Of these, the placements in regular employment were 23,492, of which 18,309 were of men and 5,183 of women, while placements in casual work totalled 8,774. The number of vacancies reported by employers was 24,155 for men and 10,460 for women, a

total of 34,615, while applications for work numbered 73,390, of which 56,088 were from men and 17,302 from women. Reports for September, 1936, showed 29,325 positions available, 63,484 applications made and 26,996 placements effected, while in October, 1935, there were recorded 35,464 vacancies, 65,300 applications for work and 33,737 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment Service, each year, from January, 1926, to date:—

Year	Placements		
	Regular	Casual	Totals
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936 (10 months).....	170,955	97,737	268,692

#### NOVA SCOTIA

During the month of October, positions offered through Employment Offices in Nova Scotia were nearly 27 per cent more than in the preceding month and nearly 12 per cent above the corresponding month of last year. There was an increase also in placements of nearly 33 per cent when compared with September and of over 13 per cent in comparison with October, 1935. The only increase in placements of importance over last year was in services and although the changes in other groups were small, the majority showed improvement. Industrial divisions in which most of the placements were effected during the month were: logging, 60; construction and maintenance, 467, and services, 345, of which 269 were of household workers. There were 362 men and 103 women placed in regular employment during the month.

#### NEW BRUNSWICK

Orders received at Employment Offices in New Brunswick during October called for 14 per cent more workers than in the preceding month, but were 9 per cent less than during the corresponding month of last year. There was an increase of over 16 per cent in placements, when compared with September, but a decrease of over 6 per cent in comparison with October, 1935. Except for a substantial decline under construction and maintenance and a minor loss in trade, all industrial divisions showed gains

in placements over October of last year. These increases, however, were insufficient to offset the reduction in relief placements on highway construction. Placements by industrial divisions included manufacturing, 33; construction and maintenance, 104, and services, 693, of which 456 were of household workers. Placements in regular employment numbered 120 of men and 94 of women.

#### QUEBEC

There was a gain of nearly 69 per cent in the number of positions offered through Employment Offices in the Province of Quebec during October when compared with the preceding month and of nearly 41 per cent in comparison with the corresponding month of last year. There was an increase also in placements of nearly 91 per cent when compared with September and over 47 per cent in comparison with October, 1935. There was a large decrease in bush placements when compared with October of last year and moderate losses in services and trade. Farm placements, however, were higher, but the increase for the province, as a whole, was due to relief work undertaken by the Provincial Government on road construction, parks, sewers, etc. Placements by industrial divisions included manufacturing, 85; logging, 670; farming, 93; construction and maintenance, 4,241, and services, 2,504, of which 2,334 were of household workers. Regular placements numbered 5,145 of men and 1,789 of women.

#### ONTARIO

Opportunities for employment, as indicated by orders received at Employment Offices in Ontario during October, were nearly 16 per cent less favourable than in the preceding month and nearly 18 per cent below the corresponding month of last year. There was a decrease also in placements of over 14 per cent when compared with September and of over 18 per cent in comparison with October, 1935. Placements under construction and maintenance were considerably less than during October of last year and accounted for the decline under this comparison for the province as a whole. There were moderate losses also in farming and manufacturing. The only gain of importance was in logging, but the majority of the remaining groups showed improvement. Placements by industrial divisions included manufacturing, 575; logging, 1,450; farming, 1,334; trade, 283; construction and maintenance, 3,257; transportation, 113, and services, 3,832, of which 2,480 were of household workers. During the month 5,330 men and 1,509 women were placed in regular employment.

## REPORT OF THE EMPLOYMENT OFFICES FOR THE MONTH OF OCTOBER, 1936

### MANITOBA

Positions offered through Employment Offices in Manitoba during October were nearly 37 per cent higher than in the preceding month, but nearly 34 per cent below the corresponding month of last year. Slightly higher percentages of change were shown in placements under both comparisons. A large reduction in placements under construction and maintenance accounted for the decline from October, 1935. This loss was, however, reduced to a considerable extent by increased farm placements. Of the changes in other groups, declines in transportation and mining and gains in logging and services were the most important. Industrial divisions in which most of the placements were effected during the month were: logging, 197; farming, 1,456; construction and maintenance, 259, and services, 759, of which 593 were of household workers. Placements in regular employment numbered 1,894 of men and 349 of women.

### SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during October, were nearly 127 per cent better than in the preceding month and nearly 99 per cent above the corresponding month of last year. There was an increase also in placements of over 104 per cent when compared with September and over 79 per cent in comparison with October, 1935. The large gain over October of last year was due to a substantial increase in farm placements, offset in part by a decline under construction and maintenance. There were also minor losses in manufacturing and trade, but a moderate increase in services. Industrial divisions in which most placements were effected during the month were: farming, 3,232; construction and maintenance, 91, and services, 929, of which 773 were of household workers. During the month 3,256 men and 680 women were placed in regular employment.

### ALBERTA

Orders received at Employment Offices in Alberta during October called for slightly fewer workers than in the preceding month, but over 27 per cent less than during the corresponding month of last year. There was an increase of less than one per cent in placements when compared with September, but a decline of over 28 per cent in comparison with October, 1935. A reduction under construction and maintenance accounted for the decline in placements from October of last year, as moderate losses in mining and farming were more than

offset by gains in logging, services and transportation. Placements by industrial divisions included logging, 77; farming, 1,233; construction and maintenance, 244, and services, 637, of which 485 were of household workers. There were 1,632 men and 367 women placed in regular employment.

### BRITISH COLUMBIA

There was a gain of over 5 per cent in the number of positions offered through Employment Offices in British Columbia during October, when compared with the preceding month, but a loss of over 31 per cent in comparison with the corresponding month of last year. Slightly smaller percentages of change were reported in placements under both comparisons. The only change of importance in placements from October of last year was a decline under construction and maintenance, which accounted for the reduction indicated for the province as a whole. This loss was partly offset by increases in nearly all other groups, the largest of which were in services, logging and trade. Industrial divisions in which most of the placements were effected during the month were: farming, 157; construction and maintenance, 1,130, and services, 792, of which 488 were of household workers. During the month 570 men and 292 women were placed in regular employment.

### Movement of Labour

During the month of October, 1936, the offices of the Employment Service of Canada made 23,492 placements in regular employment 12,714 of which were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 960 were granted the Employment Service reduced transportation rate, 877 going to centres within the same province as the despatching office and 83 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the Railway Companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

In Quebec during October the Hull office was instrumental in transferring 6 bushmen to employment in the Pembroke zone. Offices in Ontario granted 719 reduced rate certificates during October to various centres within the province. On certificates secured at Port Arthur 473 bush workers, 14 construction employees, 6 hotel workers, 3 carpenters, 2 miners and 2 diesel operators journeyed to situations within the Port Arthur zone. The Sudbury

office despatched 100 bush workers and the Fort William office 91 bush workers, 4 restaurant waitresses, one taxi driver and one carpenter within their own zones, the Fort William zone in addition, being the destination of 6 mine employees shipped from Timmins. The balance of this provincial movement was from North Bay, from which centre 14 bush workers, one farm hand and one farm domestic were carried to Timmins. Transfers at the reduced rate in Manitoba during October numbered 144, of which 67 were provincial and 77 interprovincial. The labour movement within the province was from Winnipeg, 44 highway construction workers, 13 bush workers, 8 miners, one clerk and one handy man being conveyed to various sections of the Winnipeg zone. The transfers outside the province were also effected by the Winnipeg office which sent 65 bush workers, 4 teamsters, 2 miners, 2 cooks, 2 farm hands, one farm domestic and one clerk to employment in the Port Arthur zone. Reduced rate certificates issued in Saskatchewan during October were 32 in number, all provincial. Of these, 27 were granted at Yorkton to lumber workers travelling within the same zone. Destined to the Prince Albert zone were 3 bushmen shipped from Saskatoon and 2 bushmen despatched by the Prince Albert office. Business transacted by Alberta

offices during October involved the issue of 51 certificates for reduced transportation, these for points within the province. Receiving certificates at Edmonton, 21 bush workers, 10 mine workers, 5 farm hands, one farm housekeeper, 3 sawmill workers, 3 highway construction workers, 2 hotel employees, one engineer and one town housekeeper proceeded to situations within the Edmonton zone, and one miner to Calgary. The Calgary office was responsible for the transfer of 2 farm hands to Edmonton and one mine cook to Drumheller. The labour movement in British Columbia during October was entirely provincial, and included the transfer of 8 persons. Travelling from Vancouver, one sawmill foreman, one farm hand and one farm domestic were conveyed to Kamloops, one store clerk to Prince Rupert and one miner and one hotel cook within the Vancouver zone. For employment within its own zone the Prince Rupert office transferred 2 bushmen.

Of the 960 persons who secured certificates at the Employment Service reduced transportation rate during October, 379 travelled by the Canadian National Railways, 555 by the Canadian Pacific Railway, 22 by the Temiskaming and Northern Ontario Railway, 2 by the Pacific Great Eastern Railway and 2 by the Northern Alberta Railway.

#### (4) Building Permits issued in Canada during October, 1936

The estimated value of the building authorized by 58 cities during October was \$4,120,416; this was an increase of \$475,856 or 13.1 per cent, as compared with the September total of \$3,644,560, and was also higher by \$90,098 or 2.2 per cent than in October, 1935, when the aggregate value was \$4,030,318.

The value of the building authorized in the first ten months of the present year was \$33,553,743; this was lower than the aggregate of \$40,711,114 reported in the period, January-October, 1935, although it was decidedly higher than in the first ten months of either 1934 or 1933. The cumulative total for the same period in each of the last five years has been very much lower than in any other year on record; the wholesale prices of building materials since 1931 have also been decidedly lower than in preceding years since 1920.

Some 50 cities furnished detailed statistics, showing that they had issued more than 400 permits for dwellings estimated to cost approximately \$1,495,000 and about 2,250 permits for other buildings valued at almost \$2,577,600.

In addition, one city authorized an engineering project valued at \$1,280. During September, authority was granted for the erection of about 360 dwellings and 1,900 other buildings, the estimated cost being approximately \$1,135,000 and \$2,170,000, respectively.

New Brunswick, Ontario, Manitoba, Alberta and British Columbia recorded increases in the value of authorized building as compared with September, 1936, the gains of \$208,650 or 11.2 per cent in Ontario, and \$160,823 or 129.0 per cent in Alberta being greatest. The decreases in the remaining provinces were on a small scale.

In comparison with October, 1935, there was improvement in Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan, Alberta and British Columbia. Manitoba and Alberta reported the most pronounced increases, amounting to \$181,305 or 158.3 per cent, and \$201,251 or 238.8 per cent, respectively.

Toronto and Winnipeg showed increases as compared with September, 1936, and their totals were also higher than in October, 1935:

in Vancouver, there was a small improvement over October, 1935, but a decline as compared with September, 1936, while in Montreal, the total was lower than in either of the comparisons.

Of the other centres, New Glasgow, Moncton, Saint John, Shawinigan Falls, Sherbrooke, Three Rivers, Westmount, Belleville, Chatham, Hamilton, Niagara Falls, St. Catharines, York and East York Townships, Riverside, Calgary, Kamloops, Prince Rupert, North Vancouver and Victoria reported increases over September, 1936, and also as compared with October, 1935.

The following table gives the value of the building authorized by 58 cities during October, and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (average, 1926=100).

Year	Value of permits issued in October	Value of permits issued in first ten months	Index of value of permits issued in first ten months (1926=100)	Average indexes of wholesale prices of building materials in first ten months (1926=100)
	\$	\$	%	%
1936.....	4,120,416	33,553,743	24.9	85.0
1935.....	4,030,318	40,711,114	30.2	81.2
1934.....	2,598,024	22,313,170	16.5	82.8

1932.....	3,170,570	38,196,769	28.3	77.5
1931.....	8,442,627	97,045,622	71.9	82.4
1930.....	12,756,402	139,117,752	103.1	92.0
1929.....	18,073,378	204,084,467	151.3	99.2
1928.....	21,558,085	187,179,719	138.8	96.8
1927.....	18,848,019	160,000,554	118.6	96.2
1926.....	14,738,402	134,902,338	100.0	100.4
1925.....	11,312,644	109,676,825	81.3	103.0
1924.....	13,089,588	109,906,921	81.5	107.6
1923.....	9,999,187	118,319,159	87.7	111.8
1922.....	10,737,525	127,515,975	94.5	108.5
1921.....	10,491,228	99,064,670	73.4	125.2
1920.....	10,401,041	106,547,319	79.0	144.4

The aggregate for the first ten months was lower by 17.6 per cent than in 1935, but was higher than in the same period of either 1934 or 1933. The average index number of wholesale prices of building materials, though higher than in any of the years, 1931-1935, was considerably lower than in any other year since 1920.

The table below gives the value of the building permits issued by each of the 58 cities during September and October, 1936, and October, 1935. The 35 cities for which records are available since 1910 are marked thus "■".

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, November, 1936, summarized the employment situation as follows:—

Employment in October showed a slight improvement, on the whole, as compared with the previous month, and was much better than in October, 1935. There was an increase in employment, between September 21 and October 26, in coal mining, engineering, ship-building, metal goods manufacture, the wool textile, cotton and hosiery industries, textile bleaching, dyeing, etc., most of the clothing trades, the fishing industry, and certain food preparation trades. On the other hand, there was a decline in employment in hotel, boarding house, etc. service, building and public works contracting, and the transport and distributive trades.

It is estimated that, at October 26, 1936, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of agricultural workers, was approximately 11,103,000. This was 21,000 more than at September 21, 1936, and 599,000 more than at October 21, 1935.

Among workpeople, aged 16-64, insured against unemployment (excluding agricultural workers) the percentage unemployed in Great Britain and Northern Ireland, at October 26, 1936 (including those temporarily stopped as well as those wholly unemployed), was 12.1, the same as at September 21, 1936, as compared with 14.5 at October 21, 1935. In Great Britain the percentage at October 26 was 11.9, the same as at September 21, as compared with 14.3 at October 21, 1935.

At October 26, 1936, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,345,789 wholly unemployed, 193,429 temporarily stopped, and 72,592 normally in casual employment, making a total of 1,611,810. This was 12,529 less than a month before and 304,580 less than a year before. The total of 1,611,810 included 1,268,849 men, 48,900 boys, 245,972 women, and 48,089 girls.

The persons on the Registers included 1,360,908 insured persons who were applicants for insurance benefit or unemployment allowances, 136,198 other insured persons (including insured juveniles under 16 years of age and insured agricultural workers), and 114,704 uninsured persons. Of the 1,360,908 applicants for benefit or allowances, 690,863 had claims admitted for insurance benefit, and 586,698 had applications authorized for allowances at

October 26, the balance of 83,347 included 48,528 persons whose position under the conditions relating to contributions paid and benefit received had not been determined, 7,813 persons who had been disqualified for short periods from receiving benefit, and 27,006 persons whose needs had been held not to justify payment of unemployment allowances.

In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at October 26, 1936, was 1,677,127, as compared with 1,689,715 at September 21, 1936, and 1,982,302 at October 21, 1935.

### United States

Further gains in employment and pay rolls were shown in October in the combined manufacturing and non-manufacturing industries surveyed monthly by the U.S. Bureau of Labor Statistics.

Miss Frances Perkins, Secretary of Labor, made the following announcement:—

It is estimated that 220,000 workers were returned to employment in these combined industries between the middle of September and the middle of October. Aggregate weekly pay rolls in October were \$16,300,000 greater than in the preceding month. The employment gain continued the succession of increases which had been shown each month since February 1936.

A comparison of employment and pay-roll totals in these industries in October 1936 with October 1935 shows increases of more than 1,000,000 in number of workers and \$41,800,000 in weekly wage disbursements.

*Manufacturing Industries.*—Factory employment in October reached the highest level recorded since March 1930. In addition to the employment gains in manufacturing substantial seasonal increases were shown in anthracite and bituminous coal mining and smaller gains were reported in the electric-railway and motor-bus operation and maintenance, telephone and telegraph, power and light, hotels, wholesale and retail trade, metal mining, and private building construction industries.

The contraseasonal gain of 1.3 per cent in factory employment between September and October indicates the additional employment of nearly 100,000 workers while the gain of 6.6 per cent in pay rolls represents an increase of more than \$11,000,000 in the amount paid out weekly to factory wage earners. Factory pay rolls normally show a gain from Septem-

ber to October, September pay rolls having been reduced to some extent by the observance of the Labour Day holiday. The increase in the October pay rolls, however, is more pronounced than the percentage gains shown in October in any of the preceding 17 years for which information is available.

The gains in factory employment were widespread, 70 of the 89 manufacturing industries surveyed reporting increased employment over the month interval and 78 industries reporting increased pay rolls. Employment in the durable goods group showed a substantial gain (4.0 per cent), the October employment index (88.9) reaching the maximum recorded since June 1930. Although employment in the durable goods group as a whole is still below pre-depression levels, several of the durable goods industries are employing more workers than in 1929. Employment in October in the blast furnace, steel works and rolling mill industry exceeded the levels of any month since April 1924. In the glass industry employment was above any month since November 1926 and in the stamped and enamelled ware industry the October level was above that of any month over the preceding 13 years for which data are available. Brass-bronze-copper firms employed the maximum number of workers since December 1929; machine tools and furniture showed the highest level since June 1930; electrical machinery and ship-building the highest since September 1930; locomotives the highest since October 1930; and sawmills the highest since November 1930.

The October index of employment in the non-durable goods group (104.6) was 1.1

per cent below the September level, sharp seasonal declines in a number of food industries and smaller losses in the boot and shoe, leather, and men's clothing industries being primary factors contributing to the group decrease. It will be noted that employment in October 1936 in the non-durable goods group is 4.6 per cent above the 3-year average 1923-25 and is higher than that of any other month since the summer and autumn of 1929. The October employment index for the durable goods group indicates that 889 of every 1,000 workers employed in the index base year (1923-25=100) were employed in October 1936 while in the non-durable goods group the index indicates that 1,046 workers were employed in October 1936 for every 1,000 employed during the years 1923-25.

*Non-Manufacturing Industries.*—The net increase of approximately 121,000 workers in the 16 non-manufacturing industries surveyed was due largely to the gains in employment in wholesale and retail trade establishments. Seasonal influences resulted in an increase of 2.3 per cent, or 77,000 workers in retail trade, and an increase of 1.2 per cent, or nearly 18,000 workers in wholesale trade. Anthracite and bituminous coal mines absorbed 17,000 additional workers over the month interval and the combined gains in the remaining non-manufacturing industries reporting increases were estimated to be 17,000 workers. In the six non-manufacturing industries in which losses in employment were reported over the month interval the decrease was approximately 7,000 workers.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions

previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the

execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the

current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's

premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wage conditions have recently been executed by the Government of Canada.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "A" (Construction, Remodelling, Repairs, etc.)*

Construction of alterations to the caretaker's quarters in the Ordnance Compound, Charlottetown, P.E.I. Name of contractor, Mr. Albert T. McKinnon, Charlottetown, P.E.I. Date of contract, November 21, 1936. Amount of contract, \$1,478. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Brick and Hollow Tile Layers.....	\$0 75	8	44
Brick and Hollow Tile Helpers (continuously employed mixing and tempering mortar).....	0 40	8	44
Carpenters.....	0 55	8	44
Cement Finishers.....	0 50	8	44
Driver, horse and cart.....	0 50	8	44
Driver, team and wagon.....	0 65	8	44
Driver.....	0 35	8	44
Electricians.....	0 60	8	44
Labourers.....	0 35	8	44
Lathers—			
Metal.....	0 55	8	44
Wood.....	0 50	8	44
Painters and glaziers.....	0 55	8	44
Plasterers.....	0 75	8	44
Plasterers' helpers (continuously employed mixing and tempering material).....	0 40	8	44
Plumbers and steamfitters.....	0 65	8	44
Sheet metal workers.....	0 60	8	44
Motor truck drivers and trucks—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
4 tons.....	2 40	8	44
5 tons.....	2 90	8	44
Motor truck drivers.....	0 40	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supplying and applying stucco and cement paint to the exterior walls of the buildings at Valcartier Camp, Valcartier, P.Q. Name of contractors, Delphis Caron & Fils, Quebec,

P.Q. Date of contract, November 10, 1936. Amount of contract, \$6,500. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Plasterers.....	\$0 70	8	44
Plasterers' helpers (continuously employed mixing and tempering material).....	0 45	8	44
Carpenters and joiners.....	0 60	8	44
Metal lathers.....	0 55	8	44
Wood lathers.....	0 40	8	44
Labourers.....	0 65	8	44
Driver, team and wagon.....	0 40	8	44
Driver.....	0 45	8	44
Motor truck drivers.....	0 45	8	44
Motor truck driver and truck—			
1 and 2 tons.....	1 45	8	44
3 tons.....	1 95	8	44

N.B.—The wages rates specified above are *minimum rates* only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of additions and alterations to the Armoury at Fredericton, N.B. Name of contractors, New Brunswick Contractors, Ltd., Fredericton, N.B. Date of contract, November 13, 1936. Amount of contract, \$36,657.40. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Asbestos insulation workers.....	\$0 55	8	44
Blacksmiths.....	0 55	8	44
Bricklayers and masons.....	0 75	8	44
Carpenters.....	0 55	8	44
Cement finishers.....	0 55	8	44
Cement mixer operators—gas or electric.....	0 45	8	44
Compressor operators—gas or electric.....	0 45	8	44
Excavator—			
Bear cat.....	0 75	8	44
Gas shovel.....	0 85	8	44
Steam shovel engineer.....	0 85	8	44
Steam shovel crane men.....	0 65	8	44
Steam shovel firemen.....	0 55	8	44
Reinforcing steel rod man.....	0 45	8	44
Fireman, stationary.....	0 40	8	44
Electrician.....	0 60	8	44
Labourers.....	0 35	8	44
Lathers—			
Metal.....	0 55	8	44
Wood.....	0 50	8	44
Tile setters.....	0 75	8	44
Machinists.....	0 60	8	44
Motor truck driver and truck—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
Motor truck drivers.....	0 40	8	44
Ornamental iron workers.....	0 55	8	44

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Painters and glaziers.....	0 55	8	44
Plasterers.....	0 75	8	44
Plasterers' helpers.....	0 40	8	44
Plumbers and steamfitters.....	0 65	8	44
Roofers, felt and gravel.....	0 40	8	44
Sheet metal workers.....	0 60	8	44
Stone cutters.....	0 65	8	44
Structural steel worker.....	0 75	8	44
Driver, team and wagon.....	0 65	8	44
Drivers.....	0 35	8	44
Engineers, operating, steam.....	0 60	8	44
Hoist operator—gas or electric.....	0 45	8	44
Watchman.....	0 30	8	44
Cement mixer operators—steam.....	0 60	8	44

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of water and sewage connections at the Married Airmen's Quarters (two-family terraces) at R.C.A.F. Station, Trenton, Ont. Name of contractors, the Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, November 16, 1936. Amount of contract, \$910. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	\$0 35	8	44
Cement finishers.....	0 55	8	44
Concrete Mixer operators—			
Steam.....	0 65	8	44
Gas or elec.....	0 45	8	44
Plumbers and steamfitters.....	0 65	8	44
Driver, team and wagon.....	0 65	8	44
Driver.....	0 35	8	44
Motor truck driver.....	0 40	8	44
Motor truck driver and truck—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
4 tons.....	2 40	8	44
5 tons.....	2 90	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of water and sewage service connections to five Married Officers' Quarters at R.C.A.F. Station, Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract,

November 18, 1936. Amount of contract, \$695. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	\$0 35	8	44
Plumbers and steamfitters.....	0 65	8	44
Cement finishers.....	0 55	8	44
Carpenters and joiners.....	0 60	8	44
Driver, team and wagon.....	0 65	8	44
Driver.....	0 35	8	44
Motor truck driver.....	0 40	8	44
Motor truck driver and truck—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
4 tons.....	2 40	8	44
5 tons.....	2 90	8	44

N.B.—The above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supply and erection of all toilet, bathroom and shower partitions in the lavatories in Barrack Block No. 3, R.C.A.F. Station, Trenton, Ont. Name of contractors, Dennisteel Corporation Ltd., Ottawa, Ont. Date of contract, November 13, 1936. Amount of contract, \$1,075. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	\$0 35	8	44
Painters.....	0 55	8	44
Sheet metal workers.....	0 65	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supply and installation of one electric oil furnace, radiators, etc., in the Wireless Telegraph Station at Rockcliffe, Ontario. Name of contractors, W. G. Edge Ltd., Ottawa, Ont. Date of contract, November 7, 1936. Amount

of contract, \$980. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Plumbers and steamfitters.....	\$0 83	8	44
Carpenters.....	0 70	8	44
Electricians.....	0 70	8	44
Labourers.....	0 40	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of water and sewage connections in Single Officers' Quarters, R.C.A.F. Station, Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, November 5, 1936. Amount of contract, \$4,660. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	\$0 35	8	44
Cement finishers.....	0 55	8	44
Concrete mixer operator—			
Steam.....	0 65	8	44
Gas.....	0 45	8	44
Plumbers and steamfitters.....	0 65	8	44
Motor truck driver.....	0 40	8	44
Motor truck driver and truck—			
1 and 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
4 tons.....	2 40	8	44
5 tons.....	2 90	8	44
Teamster, team and wagon.....	0 65	8	44
Teamster.....	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supply and application of wood trim and dado in Barrack Block No. 3, R.C.A.F. Station, Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, November 5, 1936. Amount of contract, \$4,905. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Carpenters.....	0 60	8	44
Labourers.....	0 35	8	44
Painters.....	0 55	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Interior painting of Barrack Block No. 3 at R.C.A.F. Station, Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, November 16, 1936. Amount of contract, \$2,705. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Carpenters.....	0 60	8	44
Labourers.....	0 35	8	44
Painters.....	0 55	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Completion of a 25-yard Machine Gun Range at the Royal Canadian Air Force Station, Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, November 9, 1936. Amount of contract, \$4,582. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Labourers.....	0 35	8	44
Carpenters and joiners.....	0 60	8	44
Bricklayers and masons.....	0 80	8	44

### Contracts in Group "B" (Manufacture of Supplies, Equipment, etc.)

The following is a statement of contracts awarded by the Department of National Defence during the month of November, 1936, for the manufacture and repair of various classes of equipment and supplies, which contracts included in all cases the "B" labour conditions above referred to:—

Nature of contract	Contractor
Aviation suits.....	S. S. Holden Ltd., Ottawa, Ont.
Ankle boots.....	Tebbutt Shoe & Leather Co., Ltd., Three Rivers, P.Q.
Moleskin.....	Montreal Cottons Ltd., Montreal, P.Q.
Blue serge jackets.....	Workman Uniform Co., Ltd., Montreal, P.Q.
Flannel.....	Canadian Cottons Ltd., Montreal, P.Q.
Blue serge.....	Paton Manufacturing Co., Ltd., Montreal, P.Q.
Fur (Buffalo) coats and gauntlets	Jay Wolfe Inc., Montreal, P.Q.

Nature of contract	Contractor
Cylindrical buoys.....	Sorel Mechanical Shops Ltd., Sorel, P.Q.
Parachute seats for aircraft...	Irving Air Chute Co., Ltd., Fort Erie, Ont.
Complete overhaul and modification of aircraft engine...	Canadian Pratt & Whitney Co., Ltd., Longueuil, P.Q.
Complete overhaul of aircraft engine.....	Canadian Wright Ltd., Montreal, P.Q.
Reconditioning aircraft engine	Canadian Wright Ltd., Montreal, P.Q.
Engine cowlings for aircraft...	Wells Air Harbour, Vancouver, B.C.
Wireless equipment installed in aircraft.....	Canadian Vickers Ltd., Montreal, P.Q.
Cockpit heaters installed in landplanes.....	Canadian Vickers Ltd., Montreal, P.Q.
Drill jackets and trousers.....	S. S. Holden Ltd., Ottawa, Ont.
Winter caps.....	Jay Wolfe Inc., Montreal, P.Q.
Collars and shirts.....	London Shirt Corporation, Montreal, P.Q.
Drawers and shirts.....	Penmans Ltd., Montreal, P.Q.
Khaki drill.....	Montreal Cottons Ltd., Montreal, P.Q.

### NATIONAL HARBOURS BOARD

#### Contracts in Group "A" (Construction, Remodelling, etc.)

Reconstruction of the upstream face of Alexandra Pier, in the harbour of Montreal, P.Q. Name of contractors, Angus Robertson Ltd., Montreal, P.Q. Date of contract, October 31, 1936. Amount of contract, approximately \$637,272.80. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Axemen.....	\$0 40	8	44
Blacksmiths.....	0 60	8	44
Carpenters and joiners.....	0 70	8	44
Cement finishers.....	0 60	8	44
Cement and concrete mixer operators (steam).....	0 65	8	44
Cement and concrete mixer operators (gas, or electric).....	0 50	8	44
Compressor operators (gas, or electric).....	0 50	8	44
Crane operators (gas, or electric).....	0 50	8	44
*Divers.....	1 75	8	44
Divers' tenders.....	0 50	8	44
Drivers.....	0 40	8	44
Driver, horse and cart.....	0 55	8	44
Driver, team and wagon.....	0 75	8	44
Drill runners.....	0 50	8	44
Electricians (inside wiremen).....	0 70	8	44
Engineers, operating steam, single or double drums).....	0 65	8	44
Engineers, operating, steam (three or more drums).....	0 75	8	44
Firemen, stationary.....	0 45	8	44
Hoist operators (gas, or electric).....	0 50	8	44
Labourers.....	0 40	8	44
Machinists.....	0 65	8	44
Motor truck drivers.....	0 45	8	44

Trades or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Motor truck driver and truck—			
1 and 2 ton.....	1 45	8	44
3 ton.....	1 95	8	44
4 ton.....	2 45	8	44
5 ton.....	2 95	8	44
Painters and glaziers.....	0 60	8	44
Pipe fitters (surface—temporary work).....	0 55	8	44
Pipe layers, caulkers and solderers.....	0 50	8	44
Pile driver engineers.....	0 65	8	44
Pile driver labourers.....	0 40	8	44
Pile driver firemen.....	0 45	8	44
Pile driver derrick engineers.....	0 65	8	44
Pile driver derrick firemen.....	0 45	8	44
Powdermen.....	0 50	8	44
Pumpmen.....	0 50	8	44
Riggers (general).....	0 55	8	44
Steam shovel engineers.....	0 85	8	44
Steam shovel cranemen.....	0 65	8	44
Steam shovel firemen.....	0 55	8	44
Steam shovel oilers.....	0 50	8	44
Shovel operators (gas).....	0 85	8	44
Structural steel workers.....	0 75	8	44
Timbermen and cribmen (using interchangeably such tools as Broad-axe, hammer, X-cut saw, auger, adze).....	0 50	8	44
Watchmen.....	0 35	8	44
Welders and burners (acetylene or electric).....	0 60	8	44
Lock tenders.....	0 55	8	44
Asst. lock tenders.....	0 40	8	44

\*Half day's pay to be allowed for work done in any forenoon or afternoon.

*Men working under compressed air (sand hogs)—*

Normal pressure up to 22 lbs. (Minimum interval— $\frac{1}{2}$ hour.)	\$4.50 per shift of 8 hours.
Pressure from 22 lbs. up to 29 lbs. (Minimum interval—1 hour.)	\$5.00 per shift of 6 hours.
Pressure from 29 lbs. up to 34 lbs. (Minimum interval—2 hrs.)	\$5.50 per shift of 4 hours.
Pressure from 34 lbs. up to 40 lbs. (Minimum interval—3 hrs.)	\$6.00 per shift of 3 hours.
Pressure from 40 lbs. up to 45 lbs. (Minimum interval—4 hrs.)	\$6.50 per shift of 2 hours.
Pressure from 45 lbs. up to 50 lbs. (Minimum interval—5 hrs.)	\$7.00 per shift of 1½ hours.
Shift foreman.	50c. per shift over above rates.

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

The reconstruction and addition to the Imperial Oil Company's wharf in the harbour of Montreal, P.Q. Name of contractors, The Northern Construction Co. and J. W. Stewart Ltd., Montreal, P.Q. Date of contract, November 16, 1936. Amount of contract, approximately \$324,115. A fair wages schedule was inserted in the contract as follows:—

Plasterers helpers (continuously employed mixing and tempering material).....	0 40	8	44
Driver, team and wagon.....	0 70	8	44
Drivers.....	0 35	8	44
Motor truck drivers.....	0 40	8	44
Motor truck driver and truck—			
1 to 2 tons.....	1 40	8	44
3 tons.....	1 90	8	44
Watchman.....	0 30	8	44

NOTE.—In any instance where no rate is quoted for *helpers*, the same must not be less than that of *labourers*.

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Dredging material in Halifax harbour near the wharf of the Department of Transport at Dartmouth, N.S. Name of contractor, Mr. William McFatridge, Halifax, N.S. Date of contract, November 4, 1936. Amount of contract, approximately \$1,700. The general fair wages clause above mentioned was inserted in the contract.

Car loadings for the week ended December 5 amounted to 50,047 cars, increasing from 44,921 cars for the 49th week last year and 49,586 for the 48th week this year, and the index number rose from 70.96 for the previous week to 76.16. Heavier loadings were recorded in both divisions. The eastern division increased from 29,026 in 1935 to 33,830 cars, the index number reaching its highest point since early in 1931 at 84.97. Light loading of grain in the western division affected the total loadings which increased from 15,895 cars to 16,217.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Wood Products

VANCOUVER, B.C.—CERTAIN SHOP AND MANUFACTURING JOINERY, SHOP FITTINGS, DOORS, SASH AND GENERAL MILL WORK AND THE AMALGAMATED BUILDING WORKERS OF CANADA.

Agreement to be in effect from February 1, 1936 to January 31, 1937.

Only union members to be employed and the union grants the use of the union label to employers parties to the agreement.

Hours: 44 per week except kiln firemen and kiln pilers for whom hours are 48 per week.

Overtime: time and one-half; double time on holidays.

Minimum wages per hour: mechanics 55 cents, kiln firemen, 50 cents, door patchers, 45 cents; labourers, kiln pilers and semi-skilled workers over 21 years of age, 38½ cents; helpers and semi-skilled workers from 18 to 21 years of age, 27½ cents, boys under 18 years, 20 cents during first year and 22 cents during second year.

### Service: Hotels and Restaurants

VANCOUVER, B.C.—CERTAIN RESTAURANTS AND THE HOTEL AND RESTAURANT EMPLOYEES INTERNATIONAL UNION, LOCAL No. 28

Agreements to be in effect from August and September, 1936. (Strikes to secure these agreements in two restaurants were reported in the LABOUR GAZETTE, September, page 774 and October, page 881).

Only union members to be employed and they are to be hired through the union office. No discrimination on account of union activity. In the majority of the restaurants, parties to the class "A" agreement, the minimum wage rates are \$12 per week for dining room, \$14 for counter and \$10 for bus girls for an 8-hour day and 6-day week. These wage rates include meals while employed. In class "B" restaurants minimum weekly wage rate is \$15 for waiters and waitresses at counter and dining room and \$21 for cooks.

The employer is to contribute \$1 per month towards the upkeep of uniforms of the staff.

The class "C" agreement is with a hotel and provides that extra waiters at luncheon or dinner functions be paid \$2 for such function and extra bus boys \$1.50 for first function and \$1 for each additional function.

### Quebec Collective Labour Agreements Extension Act

The following amendments to agreements have been made obligatory by Orders in Council and are summarized in the next article:

Furniture Workers, Province of Quebec (Amendment)

Printing Trades, Montreal and District (Amendment).

Glove Cutters (Fine Gloves), Province of Quebec (Amendment).

### Industrial Standards Act of Ontario

The following schedules have recently been made binding and the terms summarized in the article beginning on page 1182 of this issue:

Bricklayers and Stonemasons, Toronto.

Plasterers, Toronto.

Carpenters, Toronto.

Plumbers, Port Arthur and Fort William.

Painters, Hamilton.

Bakers, Ottawa.

### Industrial Standards Act of Alberta

The following schedules have recently been made binding and the terms summarized in the article beginning on page 1184 of this issue:

Bakers, Calgary.

Brewing Industry, Province of Alberta.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include amendments to three previous Orders in Council, as summarized below. A request for the extension of a new agreement for building trades at Chicoutimi and the Lake St. John district was published in the *Quebec Official Gazette*, November 7, an agreement for bakers at Montreal in the issue of November 21 and for plumbers at Three Rivers in the issue of November 28. A request for the amendment of the agreement affecting barbers at St. Hyacinthe was published in the issue of November 7, and of the agreement affecting the cloak and suit industry in the issue of November 21.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issues of June, 1935, page 526, and July, 1936, page 607. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems

that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full.

**FURNITURE WORKERS, PROVINCE OF QUEBEC.—**An Order in Council, approved October 31 and published in the *Quebec Official Gazette*, November 7, amends the previous Orders in Council for this industry (*LABOUR GAZETTE*, November, 1935, page 1064, December, page 1157, January, 1936, page 87, and September, page 834) by the addition of three furniture manufacturing firms to the parties to the agreement.

**PRINTING TRADES, MONTREAL AND DISTRICT.—**An Order in Council, approved November 23,

and published in the *Quebec Official Gazette*, November 28, amends the original Order in Council for these trades (LABOUR GAZETTE, June, page 546) by establishing a new wage scale for printing establishments owning and printing a weekly or semi-weekly newspaper in the territory of Zones II and III. These establishments comprise Zone IV. The hourly wage rates are 2 cents per hour less than in Zone III for journeymen compositors and machine operators; all journeymen pressmen, feeders and helpers (except cylinder press feeders on presses up to and including 22 x 34 inches for which the rate is 1 cent less than in Zone III); journeymen bookbinders, finishers, rulers and cutters (men); journeymen transferers and photolith plate makers (lithograph); the second half of the fifth year of apprenticeship for apprentice pressmen on letter press and lithograph. The minimum for women apprentice bookbinders, finishers, rulers and cutters is \$5.36 per week for first six months, \$6.12 during second six months, \$7.27 during third six months, \$8.42 during fourth six months and \$9.57 during third year. There is no change from Zone III rates in the rate for the first six months, and the third six months for all other apprentices,

in the rate for the first half of the fourth year for apprentice compositors and machine operators, cylinder pressmen, bookbinders, transferers and photolith plate makers and in the first half of the fifth year for apprentice pressmen (letter press and lithograph). All apprentice rates not covered by the above are 1 cent per hour less than the rate for Zone III.

**GLOVE CUTTERS (FINE GLOVES), PROVINCE OF QUEBEC.**—An Order in Council, approved November 20, and published in the *Quebec Official Gazette*, November 28, amends the previous Orders in Council for this industry (LABOUR GAZETTE, June, page 545, and September, page 834) as follows:—

There is no apprenticeship for block cut, clicking machine and knife cut operations, all workmen carrying on such operations to be paid at the established rates. For table cut operations, apprenticeship to be for two years and apprentices to be paid by the manufacturer: \$6 per week for first six months, \$8 during second six months, \$10 during third six months, \$12 during fourth six months. Manufacturers may employ one apprentice for each 20 fine glove cutters or fraction thereof.

## INDUSTRIAL STANDARDS ACT OF ONTARIO

### Schedules of Wages and Hours Recently Approved by Orders in Council

THE Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the

schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the LABOUR GAZETTE, summaries are given in this article of the schedules which have thus been approved.

**BRICKLAYERS AND STONEMASONS, TORONTO.**—An Order in Council dated November 24 and published in *The Ontario Gazette*, November 28, makes binding on the employers and employees in such trades, a schedule of wages and hours governing the bricklaying and stonemasonry trades in a zone which includes the City of Toronto and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from December 8, 1936, to March 1, 1937. It does not apply to regular employees of manufacturing plants or industrial establishments engaged in manufacturing processes, maintenance work or new construction or alterations of a minor nature.

Hours: 8 per day, between 8 a.m. and 5 p.m. from Monday to Friday inclusive, a 40-hour week. Night work of not more than 8 hours duration which cannot be done during a regular

working day may be done at the regular wage rate. When necessary to work two or three shifts on any job, such shifts of not more than 8 hours may be worked between 1 a.m. Monday and 8 a.m. Saturday, with straight time being paid for day shift and time and one-seventh for the second or third shift.

Overtime: time and one-half. Employees required on Saturdays to permit the pouring of concrete may be paid straight time for the morning and time and one-half for Saturday afternoon and evening. No other work on Saturdays and no work on Sundays or eight specified holidays, except in cases of extreme necessity when life or property is jeopardized or except on work in buildings where the employees in other trades will suffer by loss of time. For any such work on these days, double time to be paid.

Minimum wages per hour: 90 cents.

Apprentices to be governed by the Ontario Apprenticeship Act.

**PLASTERERS, TORONTO.**—An Order in Council, dated November 24 and published in *The Ontario Gazette*, November 28, makes binding a schedule of wages and hours of labour on all the employers and employees engaged in the plastering trade in a zone which includes the City of Toronto and the surrounding suburban area.

The Order in Council is in effect from December 8, 1936, "during pleasure." It does not apply to regular employees of industrial or manufacturing establishments who are engaged in maintenance work or on new construction or alteration work of a minor nature.

Hours for all working in the trade except plasterers' labourers: 8 per day between 8 a.m. and 5 p.m. with one hour for lunch or between 8 a.m. and 4.30 p.m. with one-half hour for lunch, from Monday to Friday inclusive, a 40-hour week. Hours for plasterers' labourers: 45 per week with a maximum of 9 hours in any one day.

Whenever work is done in shifts, any 8 hours to be considered a regular day, but those engaged on the night shifts to be paid one and one-seventh times the regular rate. Whenever work is required which cannot be done during a regular work day, such work may be done at night at the regular wage rate providing the employees concerned do not work more than 40 hours per week.

Work on eight specified holidays to be paid at double time. All other overtime is prohibited.

Minimum wage rates: 90 cents per hour, except plasterers' labourers for whom minimum is 60 cents per hour.

Apprentices to be governed by the Ontario Apprenticeship Act.

**CARPENTERS, TORONTO.**—An Order in Council, dated November 24 and published in *The Ontario Gazette*, November 28, makes binding a schedule of wages and hours of labour on all employers and employees engaged in the carpentry trade in a zone which includes the City of Toronto and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from December 8, 1936, to March 1, 1937. It does not apply to regular employees of industrial or

manufacturing plants who are engaged in manufacturing processes, in maintenance work or on new alterations and extensions of a minor nature.

Hours: 8 per day between 8 a.m. and 5 p.m., from Monday to Friday inclusive, a 40-hour week. Whenever work is of such a nature that it cannot be done during a regular working day it may be done at night at the regular wage rate if it does not exceed 8 hours. Where shifts are worked, shifts to be 8 hours, to be worked between 1 a.m. Monday and 8 a.m. Saturday, and time and one-seventh to be paid for the second and third shifts.

Overtime: time and one-half for all work in excess of the regular working periods. Employees required in order to permit the pouring of concrete on Saturdays, may be paid straight time for the morning and time and one-half for Saturday afternoon and evening. No work on Saturdays (except as above noted), Sundays and eight specified holidays except in cases of extreme necessity where life or property is jeopardized or except on work in buildings where the employees in other trades will suffer by loss of time, in which case all such work to be paid at double time.

Minimum wage rate: 80 cents per hour.

Apprentices to be governed by the Ontario Apprenticeship Act.

**PLUMBERS, PORT ARTHUR AND FORT WILLIAM.**—An Order in Council dated November 24 and published in *The Ontario Gazette*, November 28, makes binding a schedule of wages and hours of labour on all employers and employees in the plumbing and heating trades in a zone which includes the cities of Port Arthur and Fort William and surrounding district.

The Order in Council is in effect from December 8, 1936, "during pleasure." It does not apply to sprinkler fitting nor to regular employees of industrial or manufacturing establishments, who are engaged in the manufacturing processes, "in maintenance work or on new installations, alterations or extensions of a minor nature."

Hours: 8 per day between 8 a.m. and 5 p.m. from Monday to Friday inclusive, a 40-hour week. On Saturday morning, work is permitted for the protection of life or property and the setting of sleeves or inserts, at the regular rate. Whenever shift work is being done, work on night shifts to be for 7 hours and be paid \$1.03 per hour.

Overtime: any other work outside regular hours, time and one-half, but no overtime allowed on shift work. Work on Saturdays (except as above noted), Sundays and eight specified holidays, double time.

Minimum wage rate: 90 cents per hour.

Apprentices to be governed by the Ontario Apprenticeship Act. Whenever this Act does not govern the employment of fifth year junior mechanics, they are to be governed by this schedule with a minimum of two-thirds of the regular wage rate.

**PAINTERS, HAMILTON.**—An Order in Council, dated November 24 and published in *The Ontario Gazette* November 28, makes binding a schedule of wages and hours of labour on all those engaged in the painting, decorating,

paperhanging and glazing trades in a zone which includes the City of Hamilton and the surrounding district which is defined in the Order in Council.

The Order in Council is in effect from December 8, 1936, "during pleasure." It does not apply to regular employees of manufacturing plants engaged in manufacturing processes, in maintenance work or on new installations or alterations of a minor nature.

Hours: 8 per day between 8 a.m. and 5 p.m. from Monday to Friday inclusive, 4 hours on Saturday from 8 a.m. to noon, a 44-hour week. Work which is of such a nature that it cannot be done during regular working hours may be done at night, but persons on such work may not work more than 8 hours and they will be paid 9 hours' pay for 8 hours' work. Spray painting in industrial establishments or manufacturing plants which cannot be done during regular working hours, may be done after noon on Saturdays at the regular wage rate providing the painter concerned does not work more than 44 hours in the next week including such work.

Overtime: work done between 5 p.m. and 8 p.m., but not exceeding 8 hours in the week, time and one-half; all other overtime including work on Saturday afternoons, Sundays and eight specified holidays, double time.

Minimum wage rate: 65 cents per hour, spray painting, 85 cents. A special minimum rate may be established by the Advisory Board for handicapped persons.

Apprentices to be governed by the Ontario Apprenticeship Act.

**BAKERS, OTTAWA.**—An Order in Council, dated November 24 and published in *The Ontario Gazette* November 28, makes binding a schedule of wages and hours of labour on all those engaged in the baking industry in a zone which includes the City of Ottawa and surrounding district.

The Order in Council is in effect from December 8, 1936, "during pleasure."

The baking industry includes the manufacture or preparation of bread, pastry and confectionery and the sale or the delivery of the same.

Hours: 56 per week.

Minimum wages per week: class A (cake-makers, dough makers, machine operators, bench hands and ovenmen), \$21; class B (bakers' helpers, bread room checker, bread salesmen or drivers and fourth year apprentices), \$18; class C (third year apprentices), \$16; class D (second year apprentices), \$14; class E (first year apprentices and oven boys), \$12.

## INDUSTRIAL STANDARDS ACT OF ALBERTA

### Schedules of Wages and Hours Recently Approved by Orders in Council

**T**HE Industrial Standards Act of Alberta, 1935, is similar to the Industrial Standards Act of Ontario, the text of which was printed in the *LABOUR GAZETTE*, June, 1935, page 534, where are also noted the minor differences between the Ontario and Alberta Acts. The Act provides that the Minister of Trade and Industry for Alberta may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in any industry in any zone or zones, to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry and district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation the Lieutenant Governor in Council may declare such schedule to be in force for a period not exceeding twelve months, and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which the schedule applies, the schedule not coming

into effect until ten days after the publication of the Order in Council in the *Alberta Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Previous schedules under this Act have been summarized in the *LABOUR GAZETTE*, September, 1935, April, July, September and November, 1936.

**BAKERS, CALGARY AND DISTRICT.**—An Order in Council, dated November 4 and published in *The Alberta Gazette*, November 14, makes binding the terms of a schedule of wages and hours on all those engaged in the baking industry in a zone which includes the City of Calgary and surrounding district.

The schedule is in effect from November 24, 1936 to November 23, 1937.

Hours for all inside employees: 54 per week, with at least 24 consecutive hours rest in each week. On days preceding statutory holidays, 4 additional hours may be worked.

Overtime including time worked during weekly rest day and time worked on eight statutory holidays or the days allowed in lieu thereof, time and one-half.

Minimum weekly wage rates: doughman, ovenman and bench hand, \$21.50, helper, shipper and packer, \$15, wrapper, \$12.50, apprentices, \$8 during first six months, \$10 during second six months, \$12.50 during second year and \$15 during third year, salesman or deliveryman (experienced), \$19.50, salesman or deliveryman (inexperienced), \$16.50 during first three

months. Temporary or part time employees to be paid *pro rata* the above schedule.

One week's holiday with pay to be given each employee after one or more year's continuous service with his employer.

One helper or apprentice to be allowed in small shops. In large shops, one helper or apprentice for the first three journeymen and one additional helper or apprentice for each succeeding two journeymen. Apprentices must be indentured and be between 16 and 21 years of age.

All employers paying a higher rate of wages or employing their employees a shorter number of hours per week than those specified in this schedule may not decrease their wage rates nor increase the hours.

No person engaged in the baking industry shall, by reason of relationship or of any agreement or partnership be exempt from the provisions of this schedule.

**BREWERY INDUSTRY, PROVINCE OF ALBERTA.**—An Order in Council, dated November 18 and published in *The Alberta Gazette*, November 30, makes binding the terms of a schedule of wages and hours of labour in the brewing industry throughout the Province of Alberta.

The schedule is in effect from December 10, 1936 to December 9, 1937.

Hours: 8 per day from Monday to Friday inclusive, 4 hours on Saturday, a 44 hour week. Certain exceptions are made from these hours: first brewhouse man; employees engaged in the bottling process in breweries other than the Lethbridge Breweries, Limited, may be required to work 9 hours per day except Saturday in case of emergency during the summer months, for which extra hour or straight time will be paid; hours in the engineering department to be 8 per day, a 48-hour week.

Overtime: time and one-half except for any work over 16 hours in a day for general mechanics for which double time to be paid. Work on Sundays and eight specified holidays,

double time. Employees to be granted six specified holidays with pay.

Minimum wages in engineering department: chief or acting engineers, \$189 per month, second class engineers, 75½ cents per hour, third class engineers, 73 cents, firemen, 66½ cents, general mechanics, flat rate, 72 cents, mechanic's helper, 62½ cents. Minimum wages in brewery department: first cellar man, \$157 per month, first brewhouse man 81½ cents per hour, first washhouse and fermenting cellar man, 75 cents, cellar, brewhouse and washhouse helpers, 71½ cents.

Minimum wages in bottling department: soaker feeders, 62½ cents per hour, soaker operators, 71½ cents, rinsing machine men with inspection 68½ cents, crowner men, 71½ cents, pasteurizer men, 68½ cents, labeller, 75 cents, labeller assistant, 68½ cents, wrapper men first with inspection, 75 cents, wrapper men second with inspection, 68½ cents, wrapper men no inspection, 62½ cents, packers, 68½ cents, header up and trucker from packers, 68½ cents, relief men, 68½, nailing and sealing machine men, 68½ cents, labourers, after six months' service, 62½ cents, labourers, inside and loading, 62½ cents, labourers, first six months, 57½ cents, first bottle yard men, \$145 per month, shipper (Lethbridge Brewery only), 71½ cents.

Minimum wage in coopering department: tight barrel coopers, 78½ cents, slack barrel coopers (hand work), 75 cents, slack barrel coopers (machine work), 68½ cents.

Minimum wages delivery department: truck drivers, \$135 per month, truck drivers' helpers, \$125 per month, teamsters, \$120 per month.

Minimum wages for special men: apprentices (first year), 43 cents per hour, apprentices (second year), 48 cents per hour.

One apprentice may be employed for each Department who shall serve a term of two years and must not be over 24 years.

Employers to supply suitable boots or clogs and aprons to employees working in water or damp places and also suitable gloves to employees engaged in feeding soakers.

### Electric Railways in 1935

The traffic of electric, street and suburban railways in Canada continued to increase during 1935 although the improvement over 1934 was not as great as the increase of 1934 traffic over 1933.

Total fare passengers carried during the year amounted to 600,728,313, as against 595,143,903 in 1934 and 585,385,094 in 1933. This, however, was less than the 1932 total and also less than for any previous year during the past decade. The outstanding increase was made in Hamilton where the number of passengers increased from 12,413,821 in 1934 and 11,900,637 in 1933 to 17,267,897 passengers in 1935. Improved business conditions in Hamilton, restriction on competing taxis, and a reduction in the cash fare on January 16, 1935, from 7 cents to 5 cents were responsible for this improvement of 39 per cent. The gross revenue and also the net operating revenue were increased.

Of the nine systems carrying over 10 million passengers per annum, however, five reported decreases in passengers carried. Of the

twelve systems carrying between one and ten million passengers, 50 per cent reported gains, the net result being an increase of 3.1 per cent. The remaining eighteen smaller systems showed a net loss of 1.6 per cent.

Total revenues of all systems increased from \$40,048,136 in 1934 to \$40,442,320 and, with a reduction in operating expenses from \$28,036,754 to \$28,009,013, net operating revenues were increased by \$421,925, or from \$12,011,382 to \$12,433,307.

Reflecting a continuation of the generally upward trend in consumer purchasing evident since the spring of 1933, total retail sales in Canada increased by five per cent in 1935 over 1934. Sales totalled \$2,035,817,000 compared with \$1,941,470,000 in 1934 and \$1,775,618,000 in 1933. The gain in 1935, while less pronounced than that of the preceding year, is significant in that the earlier improvement was consolidated, notably in the automotive trade and in other lines of business dealing chiefly in luxury or semi-luxury lines of merchandise.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1936

### Cost of Living, Prices of Staple Articles and Index Numbers

PRICES moved slightly upward during the month, both the cost of the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being at somewhat higher levels than in October. The advance in the former was due mainly to seasonal increases in the cost of certain foods, chiefly eggs, and in the latter to higher prices for non-ferrous metals, textiles, rubber, sugar and live stock.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was \$8.32 at the beginning of November as compared with \$8.24 at the beginning of October. Nine items in this list of foods were higher in cost, ten were lower and ten were unchanged. The most important changes were a substantial seasonal advance in the cost of eggs and a decline in potatoes. Other changes were comparatively slight, the largest being increases in the cost of lard, milk, flour, beans and evaporated apples, and decreases in the cost of beef, mutton, fresh pork, bacon and butter. The cost of the food budget for certain earlier dates was \$8.04 at the beginning of November, 1935; \$7.58 for November, 1934; \$6.67 for March, 1933 (the low point in recent years); \$11.75 for November, 1929; \$11.08 for November, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.96 for November, 1914. Including the cost of fuel and rent with that of foods the total budget cost \$16.96 at the beginning of November as compared with \$16.87 for October; \$16.54 for November, 1935; \$16.03 for November, 1934; \$15.41 for June, 1933 (the low point in recent years); \$22.03 for November, 1929; \$21.60 for November, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.36 for November, 1914. Anthracite coal was slightly higher in the month under review, while rent was unchanged.

In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 77.2 for each of the last two weeks in November as compared with 76.8 in each of the preceding three weeks. The latest figures available on a monthly basis are for October, when the index number was 77.1, as compared with 72.7 for November, 1935; 71.1 for November, 1934; 63.5 for February, 1933 (the low point in recent years); 95.7 for November, 1929; 98.3 for November, 1921; 164.3 for May, 1920 (the post war peak); and

67.2 for November, 1914. Prices of all the principal non-ferrous metals advanced during the month, the movement in Canada keeping pace with that in London and somewhat more rapid than in the United States. Grain prices averaged lower than in October but turned upward at the end of the month. Raw sugar recovered the most of the decline of the previous month and in textiles, raw silk and raw wool both advanced in price. The index of Canadian Farm Products was at the highest point reached since 1930.

### Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of November of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended November 27, 1936, monthly figures not yet available.

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1861)

items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the

quantities required in the various localities owing to climate conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to

1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Changes in meat prices were slight but the movement was in the main downward as in recent months. In beef, sirloin steak declined from an average price 23.1 cents per pound in October to 22.7 cents in November and rib roast from 17.1 cents per pound to 16.8 cents. Fresh leg roast of pork was one-half cent per pound lower at an average of 21.2 cents per pound and sliced bacon declined a like amount to 33.4 cents per pound. Eggs were substantially higher in all localities, fresh grades being up in the average from 35.5 cents per dozen in October to 43.9 cents in November and cooking grades from 29.6 cents per dozen to 34.4 cents. Prices were lower in the prairie provinces than in other parts of the Dominion. Increases in milk prices were reported from several cities and the Dominion average price was fractionally higher at 10.4 cents per quart. The price of creamery butter declined in nearly all cities and the average was down from 29.3 cents per pound in October to 28.4 cents in November. Flour has advanced gradually month by month from an average price of 3.4 cents per pound in July to 3.9 cents in November. Dry beans rose from 6.1 cents per pound in October to 6.4 cents in November, while onions declined from 3.6 cents per pound to 3.3 cents. Potatoes declined in most cities in Ontario and the western provinces but were higher in Quebec and the maritime provinces. The Dominion average price was down from \$1.53 per ninety pounds to \$1.46. United States anthracite coal was again higher in several cities and the average price advanced from \$14.65 per ton in October to \$14.74 in November.

Following are the prices reported for Welsh coal, "cobblestones" and "French nuts"—Halifax, \$15; Charlottetown, \$12.90; Moncton, \$15.50; Saint John, \$14; Quebec, \$13; Three Rivers, \$15 and \$14; Sherbrooke, \$15 and \$15.50; St. Hyacinthe, \$13; Montreal, \$13.25 and \$13.50; Ottawa, \$15.25; Kingston, \$14.50; Belleville, \$15; Peterborough, \$15.75; Oshawa, \$14.75; Toronto, \$14.50 and \$13.50; St. Catharines, \$15; Hamilton, \$14.50; Brantford, \$16.50; Galt, \$16; St. Thomas, \$16; Cobalt, \$18; Timmins, \$18; Port Arthur, \$17.25 Fort William, \$17.25; Winnipeg, \$20.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 97·6 for October, an advance of 1·6 per cent for the month. Of the eleven groups comprising this index number, ten showed advances while the eleventh, "chemicals and oils" was unchanged.

The *Statist* index number, on the base 1867-1877=100, was 91·4 at the end of October, an advance of 1·4 per cent for the month. This is the highest point reached for more than six years. The greatest change in any one group from the previous month was an advance of 4·5 per cent in vegetable food, while textiles showed an advance of 4·4 per cent.

**COST OF LIVING.**—The Ministry of Labour's index number, on the base July, 1914=100 was 151 at the end of October, an advance of 2 per cent for the month, due entirely to the increase in the food group, the principal increases being in the prices of eggs, bread, flour and potatoes. Other groups were unchanged from the previous month.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base

1913=100, was 104·3 for October, a decrease of 0·1 per cent for the month. There were no marked changes in any of the main groups. Decreases in agricultural products and colonial products were partly offset by small advances in industrial raw materials and semi-manufactured goods and manufactured goods.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 124·4 for October, showing no change from the September level. Increases recorded in the heat and light and the clothing groups were offset by a decline in food prices.

### United States

**WHOLESALE PRICES.**—*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the sum total of the prices per pound of 96 commodities of common consumption was \$10·2214 at November 1, a decline of 0·5 per cent for the month. Higher prices recorded for textiles, metals and building materials were more than offset by declines in foods, hides, oils and miscellaneous commodities.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities was \$184·397 at November 1, an increase of 0·7 per cent for the month. The increase in textiles, metals and miscellaneous commodities was partly counter-balanced by decreases in foods and farm products.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 85·7 for October, a decline of 0·2 per cent for the month. Food declined 1·7 per cent, while all the other groups showed small advances.

# *Functions of the Department of Labour*

**Labour Gazette.**—The monthly publication of the "Labour Gazette" containing a review of the industrial situation throughout Canada, a record of proceedings under the Industrial Disputes Investigation Act, statistics of wages and hours, wholesale and retail prices in Canada and other countries, strikes and lock-outs, industrial accidents, summaries of laws and legal decisions affecting labour and other information on current matters of industrial and labour interest.

**Labour Statistics and Information.**—The collection, compilation and publication of statistics of wages, hours, prices, cost of living, strikes and lock-outs, industrial accidents and industrial agreements; also of reports on labour organization and organization in industry, commerce and the professions; the conduct of investigational and research work bearing on industrial relations and labour conditions; the publication of bulletins of information on these subjects.

**Industrial Disputes Investigation Act, 1907.**—The administration of the Industrial Disputes Investigation Act, Chap. 113, R.S.C., 1927, which provides for the establishment of Boards of Conciliation and Investigation in cases of disputes affecting mines and public utilities.

**Conciliation.**—The maintenance of a staff of officers at various points, including a Chief Conciliation Officer with headquarters at Ottawa, whose services are utilized in the adjustment of labour disputes.

**Fair Wages.**—The administration of the Fair Wages Policy of the Government of Canada, which calls for the observance on Government contracts for works of construction, remodelling, repair or demolition, of the wages rates current in the district, provided the same shall be fair and reasonable, and for an eight-hour working day; and on Government contracts for the manufacture of interior fittings and of certain classes of supplies, of the wages rates current in the district and current working hours.

**Employment Service of Canada.**—The administration of the Employment Offices Co-ordination Act, Chap. 57, R.S.C., 1927, under which, in co-operation with various Provincial Governments, free public employment offices are maintained in 66 centres; statistical information relative to employment conditions is also collected and published.

**Technical Education.**—The administration of the Technical Education Act, Chap. 193, R.S.C., 1927, which provides for grants to the provinces for the purpose of promoting technical education; the collection and publication of information in the form of bulletins and otherwise.

**Dominion Government Annuities.**—The administration of the Government Annuities Act, Chap. 7, R.S.C., 1927, whereby provision may be made for old age by the purchase of annuities by individuals, or associations on behalf of their members, or by employers on behalf of their employees.

**Dominion Emergency Relief.**—The administration of the Unemployment Relief Act, 1930 (First session of 17th Parliament of Canada, Chapter 1), Unemployment and Farm Relief Act, 1931 (Statutes of Canada, 1931, Chapter 58), the Relief Act (Statutes of Canada 1932, Chapter 13), the Relief Act, 1933 (Statutes of Canada, 1933, Chapter 18), the Relief Act, 1934 (Statutes of Canada, 1934, Chapter 15), and the Relief Act, 1935, which provide for the granting of aid to the Provinces for relief purposes.

**Labour Legislation in Canada.**—The compilation and publication of reports containing the text of the labour laws of the Dominion and of the Provinces.

**Library.**—The maintenance of a library of publication on labour and economic subjects.

# WAGES AND HOURS OF LABOUR IN CANADA

## 1929, 1934 and 1935\*

THE present bulletin, the nineteenth in the series on Wages and Hours of Labour, contains data for the years 1929, 1934 and 1935, but the tables on building, printing, metal trades and electric railways give figures for 1920, 1926, and 1930 to 1935, while the table on steam railways is for the years 1920 to 1935 inclusive. In the appendices information is given as to minimum wage rates and maximum hours of labour under provincial legislation, also as to the federal government fair wage policy, wages in agriculture in 1934 and certain previous years, average earnings of steam railway employees in recent years with numbers employed in 1934, and also average earnings of coal miners with numbers employed and days worked from 1921 to 1934.

The table of index numbers of rates of wages contains figures showing changes in a number of occupational groups, from 1901 to 1935, and for certain other groups from 1911 to 1935, the base year being 1913. Index numbers for other groups have not been calculated as figures back to 1913 have not been compiled and published.

### Changes in Wages since 1920

It will be seen from the tables of index numbers that by 1920 wages had reached levels almost one hundred per cent higher than in 1913, in some groups the increase being over one hundred per cent while for building and printing trades the increases were appreciably less, being only about eighty per cent. After 1920 all groups showed some decreases, although printing trades and coal mining reached the peak in 1921 instead of 1920, declining somewhat thereafter. The decreases in coal mining in 1925 were comparatively steep and tended to reduce the average for the six groups averaged for the period back to 1901. From 1925 to 1930 the movement was upward in each group.

In 1930 the index numbers for most of the groups were slightly higher but that for lumbering declined slightly. In 1931 all groups were downward except printing trades and coal mining. In 1932 and 1933 all groups were down, the greatest decreases being in lumbering and building trades.

---

\* The first report in this series was issued as a supplement to the *LABOUR GAZETTE* for March, 1921, and contained figures as to wages and hours of labour for certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. It also contained samples of wage rates for common labour in factories, miscellaneous factory trades in a small number of industries, and wages in lumbering from 1911 to 1920, with index numbers. Subsequent reports, in most cases issued as supplements to the *LABOUR GAZETTE* for January each year, brought these figures down to date with extensions from time to time to include additional industries and class of labour.

Certain of these reports, however, contained special features. Report No. 5 (1923) dealt with Hours of Labour in Canada and Other Countries. Report No. 3 (January, 1922) included an appendix with statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts. Report No. 7 (January, 1925) included an appendix with figures for agriculture from 1914 to 1923. Report No. 11 (January, 1928) contained an appendix on wages of employees of steam railways, considerably increasing the information for the years since 1917 with a more extensive record from 1901 to 1927 and also a new series of index numbers. Each report from No. 7 (January, 1925), to No. 14 (January, 1931), contained data not only for the previous year but back to 1920, except that figures for 1922, 1923 and 1924, the years of least change, were omitted from some of the tables owing to lack of space. Report No. 15, issued in January, 1932, contained data for the years 1926, 1930 and 1931, with figures for 1920 also in some cases. Report No. 16, issued in January, 1933, afforded figures for 1930, 1931 and 1932 with figures for 1920 and 1926

also in some tables. Report No. 17, issued in January, 1934, contained data for 1929, 1932 and 1933 with figures for 1920, 1926 and 1930 to 1933 in some tables. For coal mining and steam railways wages for the years 1920 to 1933 were given. Report No. 18 issued in January, 1935, contained data for 1929, 1933 and 1934, with figures for 1920, 1926, and 1930 to 1934 in some tables. For steam railways wages for the years 1920 to 1934 were given.

In Report No. 15 (January, 1932) the number of cities for which data were given in Table I as to building trades and electric railways was increased to approximately forty, and in the case of printing trades to fifteen, and these cities have since been covered in subsequent reports. Previously this table covered only thirteen cities, except that data for building trades in Windsor, Ont., were included, beginning with the report for 1928. Sheet metal workers employed in building and construction have been included with building trades since 1927, while sheet metal workers in factories have been included in the table on manufacturing industries. The section of the table on metal trades previously given was omitted from Reports No. 15 and 16 for 1931 and 1932 but figures for these trades appeared in the tables of sample rates of wages and hours in the sections of Table X on foundries and machine shops and other metal manufacturing industries. This section of Table No. I was, however, included in Report No. 17 with figures for 1920, 1926 and 1930 to 1933 and has been continued in subsequent reports. As in previous reports figures on wages for the metal trades in mines and on railways appear in the tables on those industries. In Report No. 18 (January, 1935) Table No. IX on common labour in factories was enlarged to include a greater number of cities and more samples for each, especially in the larger cities, and this was carried into the present report.

In 1934 lumbering showed substantial increases, factory labour also advanced appreciably and coal mining slightly while the other groups were lower.

In 1935 all groups were appreciably upward.

### *Building Trades*

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10 cents per hour were general and in 1922 decreases of 5 cents per hour were numerous. In 1923, 1924 and in 1925 while there were upward movements in the average it was due to increases in particular trades and in certain cities, and not to a general upward movement for most of the trades and localities. From 1926 to 1930, the upward movement was somewhat more general. During 1931 there were numerous decreases, in some localities the reduction being general while in others it was confined to certain trades. During 1932 and 1933 the decreases were general averaging about ten per cent, while in 1934 there were decreases in some trades in certain cities but no general downward tendency appeared. In some cases there were increases so that the average decrease was about three per cent. In 1935, increases occurred chiefly in Quebec and Ontario, some of them due to agreements which established minimum wages under provincial legislation as outlined in Appendix D.

### *Metal Trades*

In the metal trades the increase in wage rates from 1915 to 1918 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases occurred. In 1923 and 1924 some recovery was experienced, in 1925 there was practically no change, from 1926 to 1930 there were some slight changes upward, but during 1931 the changes were downward, while during 1932 and 1933 the decreases averaged five per cent and three per cent respectively. In 1934 there were comparatively few changes, with some increases, so that the average was down less than one per cent. In 1935 wages recovered, being slightly higher than in 1934.

### *Printing Trades*

In the printing trades up to 1920 increases were about the same as in the building trades, but in 1921 when many of the three or five-year agreements between employers and the unions expired, rates were advanced and hours were reduced in many cases. Increases appeared each year thereafter down to 1931. During

1932 decreases of ten per cent were general in the western provinces and were made in some cities in the east. In 1933 the decreases were general, averaging five per cent. In 1934, while there were further decreases, there were some increases, the average being down less than one per cent. In 1935, there were a few increases.

### *Electric Railways*

In electric railway service, rates had almost doubled by 1920, but declined slightly in 1921 and 1922, recovering somewhat in 1923 and very gradually each year thereafter until 1931 after which reductions occurred each year.

Since 1930, on many of these railways, with reduced traffic, operating costs were lowered to some extent by reducing hours per day, and therefore daily wages, instead of reducing hourly rates. In 1934 very few changes in wages were made so that the index number was practically unchanged. In 1935 there was a slight recovery.

### *Steam Railways*

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921, decreases averaging about twelve per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made, averaging about ten per cent. In 1926, at the end of the year, wages of conductors, trainmen, brakemen, baggagemen, and yardmen were advanced about 6 per cent, that is by half the amount of the reduction in 1921, and during 1927 similar increases were made in rates for other classes. In 1929, increases were secured by shop and maintenance of way employees and by certain classes of train crews on some lines. In 1931, while practically all classes were to a great extent on short time, changes in rates were not made until the end of the year when a ten per cent deduction from each employee's pay was made for train, engine and telegraph service employees from December first. In the early months of 1932 the same deduction was applied to other classes.

In 1933, earnings of employees in engine, train and telegraph service were subjected to a deduction of twenty per cent from May to October, inclusive, and fifteen per cent thereafter. The deduction for most of the other classes was increased to fifteen per cent in December.

Toward the end of 1934 it was arranged that the general deduction of fifteen per cent would be changed to one of twelve per cent on January, 1935 and to ten per cent on May 1, 1935.

*Coal Mining*

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in Nova Scotia and Vancouver Island and in 1923 and 1924 slight decreases occurred in the latter. A substantial decrease occurred in Alberta and southeastern British Columbia in 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia. Slight increases, however, were provided for a number of classes in some of

the mines in Alberta toward the end of the year. In 1926, reductions were effected in Nova Scotia but in the other chief fields were practically unchanged. Slight increases were made in some mines in Alberta in 1928. In Nova Scotia in February, 1930, rates for labourers were changed by increases of 5 cents to 15 cents per day and certain other dotal classes were slightly increased. During 1931 rates of wages were steady but the industry suffered greatly from short time, that is, collieries were operated less than six days per week to a great extent. In 1932 in Nova

TABLE OF INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA 1901-1935

(Rates in 1913=100)

Year	Building Trades (a)	Metal Trades (b)	Printing Trades (c)	Electric Railways (d)	Steam Railways (e)	Coal Mining (f)	Average		Common Factory Labour	Miscellaneous Factory Trades (g)	Logging and Saw-milling (g)	* General average weighted

\*Weighted according to average numbers of workers in each group in 1921 and 1931.

†Including some increases effected near the end of the year.

‡Including a ten per cent decrease for certain classes toward the end of the year.

(a) Seven trades from 1901 to 1920, eight from 1921 to 1926, nine for 1927 to 1935; 13 cities to 1927, 14 cities to 1930, thereafter 31 to 42 cities.

(b) Five trades from 1901 to 1926, four for 1927 to 1935.

(c) Two trades from 1901 to 1920, four for 1921 and 1922, six from 1923 to 1935.

(d) Two classes from 1901 to 1920, five classes 1921 to 1935.

(e) Twenty-three classes.

(f) Four classes 1901 to 1920, twelve classes 1921 to 1935.

(g) The number of samples (and industries) increased each year 1920 to 1930; machine operators, helpers, etc. also included.

Scotia rates were reduced ten per cent in March, except that a minimum of \$3.25 per day was provided for in the principal mines. In the other districts rates were reduced only in a few of the smaller mines. In 1933, wages in the Drumheller district in Alberta were reduced more than ten per cent. In Nova Scotia, rates were unchanged in the principal mines but there were reductions of about fifteen per cent in certain mines of medium size. In 1934 partial restorations of these reductions were made in some of these and some increases occurred in other districts, while decreases occurred in New Brunswick. The index number, therefore, shows a slight increase. The index number for 1901 to 1935 does not include New Brunswick, Saskatchewan and the Princeton district in British Columbia. The inclusion of these figures for 1934, when weighted according to numbers of miners employed, made no change in the result. In 1935, increases of about five per cent were made in Nova Scotia and in Alberta in the Drumheller and Edmonton districts.

#### *Factory Labour*

Factory labour had shown almost the greatest percentage increases up to 1920, both for common labour and for the various trades, but steep decreases appeared from 1921 to 1923 after which the trend was upward until 1931 when a considerable number of decreases occurred. In 1932 decreases in rates were numerous and steep in some cases. There was, however, a pronounced tendency to reduce hours per week or per day or both, frequently on a short time basis, with relatively small reductions in hourly rates. In some cases, where hours per day were reduced more than daily wages, the hourly rate became higher. In 1933, rates were again generally downward but less steeply. In 1934 there were numerous increases in nearly all of the manufacturing industries but comparatively few decreases so that the index number rose by nearly three per cent. In 1935 the upward movement continued. In Ontario and Quebec this was due to some extent to agreements establishing minimum rates in various localities and industries under provincial legislation. These are outlined in Appendix D.

#### *Logging and Sawmilling*

In logging and sawmilling steep increases in wages appeared up to 1920, followed by

particularly steep decreases in 1921, after which substantial increases occurred in 1923 and 1924, with a decrease in 1925 and slight increases each year thereafter until 1930 when more decreases than increases appeared. During 1931 decreases were general, and again in 1932, wage reductions of twenty per cent being quite common. In 1933, wages were still downward but there was a pronounced upward trend toward the end of the year for the ensuing season. In 1934, substantial increases in wages were general both in logging and in sawmills so that the index number rose by about twenty per cent. In 1935 the increases averaged five per cent. (See Appendix D.)

#### **Nature and Scope of Report**

The main object of these reports is to show the changes in wages rates and in hours of labour during the periods covered. The figures given in each report afford a continuous record for the years included, the data being from the same sources as far as is possible. Whenever a new source of information becomes available, the figures for previous years are secured, if possible, and the record is revised accordingly.

Information is compiled from reports of representative employers and of trade unions secured annually, and also from union agreements. Figures are secured from practically all the large establishments in the various industries and from a representative member of the smaller establishments. These reports are supplemented by figures obtained by officers of the Department and by resident correspondents of the *LABOUR GAZETTE* in the principal industrial centres.

Wages in manufacturing are shown by samples numbered one, two, etc., each sample showing the predominant rate in a certain establishment; in some cases, for large establishments two or three samples are given; in other cases where it appears to be preferable, a range of predominant rates is used. For common labour in factories, sample rates are given by localities for the principal manufacturing centres.

For the following industries wages are given in the form of samples as in the case of factory labour: grain elevators, electric current production and transmission, telephones, laundries, logging and sawmilling, and metal mining. The locality in each case is not given as it would in many instances make possible the identification of the particular establishment.

Figures for particular localities are given for building, metal, and printing trades, electric railways and civic employees in Tables I and II, and for trucking and cartage, and longshoremen in Table III, also for common labour in factories in Table IX.

The statistics as to building trades show the prevailing rates of wages and hours of labour for nine classes of labour for the years 1920, 1926, 1930, 1931, 1932, 1933, 1934 and 1935 for the building season beginning in the spring of each year. During the year 1931, however, changes occurred later in the season more extensively than is usual, and the rates in effect at the end of the year were therefore obtained and included. For 1933 a similar survey was made again toward the end of the year in several cities. As in all previous years, changes in rates reported down to the end of the year, from the sources mentioned above, are included. In Quebec, Ontario and Alberta, these include new agreement rates made obligatory on all employers affected under provincial legislation as to collective agreements and industrial standards; in British Columbia they include minimum rates for the construction industry under the Male Minimum Wage Act; and in Manitoba under the Fair Wages Act. Such rates of wages and hours of labour are given in Appendix D.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the employees, members of the organizations of railway employees, the principal railways having the same rates for nearly all the principal classes. The figures published are taken from these agreements.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in some cases represented by unions and in others by committees of employees. The figures published from 1920 to 1933 were taken from such agreements. The figures for average earnings of contract miners, however, were received from representative employers in each district. In some of the mines in these districts the wages of unorganized employees are somewhat lower than the rates in such agreements. For the last report, No. 18, and for the present report, statements as to wage rates and hours of labour have been requested

from the operators of all the larger mines throughout Canada and the figures so secured have been compiled by provinces or districts. The resulting figures include those for many mines not operated under agreements as to wages and working conditions, and cover the mines in New Brunswick, Saskatchewan and the interior of British Columbia for which figures were not previously published.

In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada, secured from representative employers.

In logging, Table VII, the data each year is for the season beginning in the autumn and ending in the spring in Eastern Canada.

#### *Data as to Hours*

In earlier reports the hours of labour shown throughout were the standard or regular hours per week, per day, etc., and did not indicate the hours actually worked either overtime or on short time. During 1931 a number of establishments in many of the manufacturing industries reported operations on a short time basis. In the report covering that year, No. 15, wages for such establishments were given on an hourly basis or brought to a basis of full time earnings per week, per day, etc., the resulting figures as to wage rates being therefore on the same basis with those for 1926 and 1930 in the tables.

In Report No. 16, with figures for 1930, 1931 and 1932, in the tables on manufacturing industries, the hours of labour for these years were those reported by employers, whether short time or regular hours, and the wage rates were brought to an hourly basis, except in certain industries, clothing, bread, cake, biscuit, candy, brewing and paper box making for which regular hours were reported chiefly. The same procedure has been followed in subsequent reports except that wages for boot and shoe manufacturing are given on a weekly basis with the hours shown as reported. In this industry, as in some instances in clothing manufacturing, the hours actually worked by individual piece workers are usually not reported and the hours shown are those on which the department or factory is operated.

## Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the relative changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentage changes in rates from time to time prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers for the six groups the simple arithmetical averages were taken, no allowance being made for the importance of each trade or group by using a system of weighing. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the index numbers of hourly rates from 1901 to 1921 have been reproduced, with figures since 1921 calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily wages in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 has been calculated in the same manner as those for the other groups. The index numbers for metal trades, previously calculated from Section *b* in Table I, omitted for 1931 and 1932, were calculated from the average percentage changes in the samples for such trades in Table X for those years.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering, logging and sawmilling, calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. These figures have been brought down to 1935 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of the index number table for the full period 1901 to 1935 are, in the main, skilled trades; and practically all of these classes, including the unskilled, are organized to a great extent in trade and labour unions. These index numbers, therefore, show the trend of wage rates in a number of organized occupations whose members, except coal miners and steam railway employees, work chiefly in cities. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages in factories show the trend of wages for labour in manufacturing industries in which there are many establishments in small centres as well as in cities. The figures for lumbering cover sawmilling in both large and small centres and logging in the principal districts.

### *Weighted Average Index Numbers*

For the present report, in addition to the simple average for the six groups with figures from 1901 to 1935, weighted averages have been calculated for these six groups and also for all nine groups in those years for which figures are available. The index number for each group is weighted by the average number of wage-earners in the industry represented, as shown by the decennial or the annual industrial census of 1921 and of 1931, the average of the figures for these two dates being taken in each case.

The weights were as follows (in thousands): building trades 143; metal trades 131; printing trades 25; electric railways 18; steam railways 161; coal mining 28; common factory labour 110; miscellaneous factory trades 363; logging and sawmilling 77.

It will be observed that this weighting has most effect in modifying the effect on the general averages of the figures for coal mining and lumbering in which from time to time since 1920 the changes have been quite different from those in the other groups.

Weighting, within groups, although desirable, has not been done. In such groups by occupations or industries weighting makes comparatively little difference as rates of wages for

the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, Common Factory Labour, Miscellaneous Factory Trades, and Logging and Sawmilling, the index numbers, being calculated from samples, the averages are automatically weighted by the number of samples which vary according to the number of workers in the various occupations and industries.

\* During the 1934 building season agreements approved by Order in Council under the Quebec Collective Labour Agreements Extension Act, 1934, established minimum rates of wages for various trades in several localities and surrounding districts. Such rates are given in Appendix "A." The rates of wages in the above table for 1934 include those paid before the agreements came into force. Hours of labour in the building

\*The range of hours shown are full-time weekly hours; since 1931 actual shop hours in many establishments have been on a short time basis as low as 24 hours per week; a 40 hour week has been reported as standard in many cases. Data for metal trades on steam railways and in mines appear in tables for those industries.

\* Maximum rates based on length of service; in most cities bus drivers, on lines operated in connection with street railways, receive the same maximum rates of wages as one man car operators.

† Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

‡ Including armature winders, wiremen, etc.

§ Including troublemen, and groundmen in some cases; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities.

(a) Deduction from earnings, 10 per cent.

(b) Deduction from earnings: 10 per cent in 1932 and 1933; 15 per cent in 1934; 10 per cent in 1935.

(c) Per month.

(d) In summer 54 cents per hour, two men cars, 59 cents, one man cars, 42 hours per week.

(e) Deduction from earnings: in 1932, 5 per cent and up; in 1933, 1934 and 1935, 6 per cent and up.

(f) Deduction from earnings: in 1932, 4 per cent; in 1933, 1934 and 1935, 10 per cent.

(g) Deduction from earnings: in 1932, 4 to 8 per cent and up; in 1933 and 1934, 4 to 10 per cent; in 1935, 4 to 9½ per cent.

(h) Deduction from earnings since Dec. 1, 1932, 1933, 1934, five per cent; 1935 two and one-half per cent.

(j) On October 1, 1920, 65 cents per hour.

(k) On October 1, 1920, 50 cents per hour.

(l) On June 1, 1920, 50 cents per hour.

(m) No two men cars in operation in Regina since 1921; in Calgary very few.

\*Differentials on certain lines or divisions above these rates. Nearly all classes are on the basic 8-hour day with time and one-half for overtime, but in some cases some other consideration has been arranged.

†Machinists; boilermakers; blacksmiths; plumbers, etc.; sheet metal workers; cabinet makers; carpenters, coach, locomotive and bench; welders, etc.

‡Freight car carpenters; freight car painters; car inspectors, car repairers, etc.

§Since 1918 employees are allowed one minute extra, for checking in and out, for each hour actually worked, thereby increasing earnings approximately one cent per hour.

(a) On Western lines Port Arthur and west, until 1929 in addition to these rates boilermakers' helpers received 5½ cents; blacksmiths' helpers, 4 cents, and other helpers 3 cents; since May 1, 1929, the differentials on western lines were boilermakers' helpers 4 cents, other helpers 2 cents.

(b) Deductions from each employee's earnings on basic rates effective as follows: Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1933; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 1, 1933, with certain exceptions. (LABOUR GAZETTE, December, 1933, page 1212.) Deduction amended for all classes effective as follows: Jan. 1, 1935, 12 per cent; May 1, 1935, 10 per cent. (LABOUR GAZETTE, November, 1934, p. 991; December, 1934, p. 1085.)

								Pumpmen.....	Day	3.42	8-9	2.87	8-9	2.87	8-9

\* The figures given for contract miners are the average earnings at piece rates and for some mines the figures include helpers and loaders on piece work; the figures given for machine and hand miners are rates per day.

† Higher rates are paid in two or three mines for some of these classes; also in the large mines for certain positions. In 1935 nearly all surface employers were put on the eight hour day. Deduction, about 5 per cent in some mines in 1934.

\*In Yukon Territory a few hundred tons of coal have been mined each year, employing two to four miners, usually from 50 to 100 days; in 1933 wages averaged \$12.38 per day for 51 days, four miners; in 1934 wages averaged \$7.04 per day for 71 days, three miners. For 1921 the figures were included with British Columbia. In Manitoba, coal mining operations were commenced in 1931, employing 38 men for an average of 23 days, wages averaging \$3.46 per day. In 1932, the average number of miners was 6, averaging \$2.84 per day, 1,128 man working days. In 1933, the average number of miners was 10, average wage \$2.10 per day, 2,056 man working days. In 1934, the average number of miners was 12, average wage \$2.03 per day, 3,132 man working days.

†Prolonged dispute during year.

‡Figures calculated by dividing number of man days worked into total wages paid.

§Prior to 1933 the figures for Nova Scotia included certain employees handling coal at a distance from the mine.

## APPENDIX D

### Wages and Hours of Labour under Provincial Minimum Wage Legislation and on Federal Government Contracts in Canada

Wages and hours of labour are now subject to regulation under provincial legislation in three ways: first, under orders as to minimum wages, and in some provinces maximum hours, issued by Boards appointed under minimum wage Acts in seven provinces, which apply primarily to the employment of females except in British Columbia; second, under legislation in three provinces providing that the wages and hours specified in a collective labour agreement between employers and workmen, through their representatives, may be extended to and made obligatory for all employers and workers in the same trade or industry and the same locality or district, by the provincial government, that is by Order in Council; third, by regulations as to employment conditions in certain industries under legislation applicable only to such industries.

Until 1934 only the first method had been adopted in any of the provinces in Canada. Between 1918 and 1930 statutes providing for the establishment of minimum wage rates for females by boards or commissions had been passed in all of the provinces except Prince Edward Island, which is not to a great extent industrial, the dates being as follows: British Columbia and Manitoba, 1918; Quebec and Saskatchewan, 1919; Nova Scotia, Ontario and Alberta, 1920; New Brunswick, 1930. In Quebec the Act was not put into force and orders issued until 1926, in Nova Scotia not until 1930. The New Brunswick statute comes into force on proclamation and has not yet been proclaimed. In British Columbia a Male Minimum Wage Act was enacted in 1925, but this was replaced by a new statute in 1929 and again in 1934. The Hours of Work Act, 1923, had provided for the eight hour day in industrial undertakings but a new statute, The Hours of Work Act, 1934, replaced this. The Female Minimum Wage Act, 1934, similarly replaced that passed in 1918. A Board of In-

dustrial Relations was appointed to administer these three statutes.

The second method was adopted in 1934 in the province of Quebec through the enactment of the Collective Labour Agreements Extension Act and in 1935 in both Ontario and in Alberta by the passage of an Industrial Standards Act. Some provision of this nature had been made in the Department of Trade and Industry Act in Alberta in 1934 but no action in this respect has been reported.

In 1934, also, the third method was adopted in New Brunswick and Quebec by statutes applying to forest operations. In Quebec and Nova Scotia, statutes of 1933 and 1935, respectively, give the Lieutenant-Governor in Council power to fix maximum hours of work. In Quebec the Act applies to any industry or trade except those in agriculture. In Nova Scotia the scope of the Act is limited to industrial undertakings such as mines, construction, factories, etc. In Quebec, Orders in Council have been passed regulating hours in building and in beauty parlors. The Nova Scotia statute has not yet been proclaimed.

The various provincial statutes as to factories, mines, etc., provide for the limitation and regulation of hours of labour in the respective industries.

In British Columbia, Alberta, Saskatchewan, Manitoba, Ontario and Quebec, the Minimum Wage Acts provide that the minimum rates for females may be made applicable to males in certain respects. In Alberta this is provided for under the Factories Act. In 1934, the Manitoba Fair Wages Act, 1916, providing for minimum wages on building and construction under provincial government contracts was amended to make the rates applicable on private works. The above provisions as to male workers are outlined in footnotes to the tables of minimum wages for females in this section, and also are described in the paragraphs on male workers.

### Minimum Wage Rates on Federal Government Contracts

In accordance with a Resolution of the House of Commons in 1900, the Fair Wages Policy of the Federal Government has provided for the observance of rates of wages generally accepted as current for competent workmen in the district where the work was performed, or in the absence of current rates for fair and reasonable rates. This policy applied to building and construction work and to the manufacture of government supplies.

In 1922 the application of this policy by the various departments of the government was standardized under an Order in Council,

setting forth the labour conditions to be inserted in contracts for building and construction and for the manufacture and supply of fittings for public buildings, harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores.

In 1930, the Fair Wage and Eight Hour Day Act was passed, applicable to all contracts for construction, remodelling, repair or demolition of any Federal work. This statute provides for the observance of current rates

of wages and requires also that wages shall in all cases be such as are fair and reasonable and that the working hours are not to exceed eight a day.

On December 31, 1934, the labour conditions previously applicable to contracts for the manufacture of various classes of Government supplies as listed above, were rescinded and new conditions substituted therefor. (LABOUR GAZETTE, January, 1935, page 24.)

The requirement for the payment of wages not less than current rates or fair and reasonable rates, if there are no current rates, is retained, but it is also provided that males and females under 18 years of age will be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces. In certain of the Maritime Provinces where no minimum wage legislation is in effect, the contractors are required to pay the males and females under 18 years of age wages not less than those provided for women and girls under the Minimum Wage Act of the Province of Nova Scotia.

It is also provided that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents per hour, and for female workers, 18 years of age and over, 20 cents per hour, but in any cases where the Provincial Minimum Wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contract work. For instance for a 50 hour week on

a Federal Government contract a male 18 years of age and over, whether experienced or inexperienced, must be paid not less than \$15 and a female \$10 even if the provincial minimum scale may provide \$6, \$7, \$8, etc., but if the provincial minimum scale is in excess of \$15 in the case of male and \$10 in the case of female workers then the provincial scale must prevail.

### *The Fair Wages and Hours of Labour Act, 1935*

During the 1935 session of Parliament the Fair Wages and Hours of Labour Act, 1935, was passed, to come into effect on May 1, 1936, repealing the Fair Wages and Eight Hour Day Act, 1930. The new statute provides for the forty-four hour week and for other labour conditions in work under federal government contracts for building and construction and on works towards which federal aid is granted by way of subsidy, loan, etc., as before, but extends the list of such works to include those carried out by any provincial and municipal authority if financial aid is given by the federal government "unless the grant or payment is by statutory authority or by agreement with the Government of Canada excepted." It is also provided that regulations may be made to require the furnishing of any necessary information to ensure the enforcement of the statute. Any contract may be exempted from the Act by Order in Council before being entered into.

### **Other Federal Legislation as to Wages and Hours of Labour, 1935**

The Limitation of Hours of Work Act, providing for the eight hour day and forty-eight hour week in mining, manufacturing, construction and transportation industries, with certain exceptions, came into effect on October 5, 1935.

The Minimum Wage Act empowers the Governor in Council on the recommendation of the Minister of Labour, to provide for the establishment of minimum wages in "rateable trades," those for which no effective regulation by collective agreement or otherwise exists and in which wages are exceptionally low.

### **Minimum Wages for Female Employees**

The following tables give data as to minimum rates of wages for females under orders of the various provincial boards in effect at the end of 1935. The figures as to hours are those for which the minimum rates are payable under such orders, subject to certain modifications, or are the maximum hours under the minimum wage or other legislation, as explained in footnotes.

The more important of the rules for the application of the rates under the orders have been

This Act comes into force on proclamation, not prior to April 25, 1936.

The Weekly Rest in Industrial Undertakings Act, assented to April 4, 1935, coming into force three months thereafter, applies to the industries under the Limitation of Hours of Work Act, and requires employers to grant a rest period of at least twenty-four consecutive hours in every seven days.

These statutes were outlined in the LABOUR GAZETTE for July, 1935, pages 620-623, and a further statement appeared in the November issue on page 975.

given in footnotes. For complete information it is necessary to refer to the orders as issued by the various provincial boards. These have been given in summary form in the LABOUR GAZETTE from time to time as issued. In some provinces these orders include regulations as to employment conditions, sanitary conditions, etc. The boards have power to issue licences for lower rates of pay for handicapped workers and to meet special conditions in the nature of emergencies.

## I.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN NOVA SCOTIA\*

Industries and Occupations	Minimum Wages per Week			Hours per Week for which minimum wage rates payable †
	Experienced workers	Inexperienced workers over 18 years †	Young Girls under 18 years †

<i>Employees in Laundries, Dry Cleaning Establishments and Dye Works: (a)</i>				
Halifax.....	11.00	9.00-10.00b	7.00-10.00c	44-50
Sydney and Glace Bay.....	11.00	9.00-10.00b	7.00-10.00c	44-50
All other incorporated towns.....	10.00	8.00- 9.00b	6.00- 9.00c	44-50

\*Minimum wage orders apply to cities and incorporated towns. Permits may be issued for handicapped workers to work for lower wages and also for variation or suspension of the regulations in exceptional conditions.

†Number of inexperienced adults or young girls or both not to exceed 25 per cent of total female working force except where total working force is less than four.

‡Hours for which minimum rates payable to be not less than 44 nor more than 50 per week. Work in excess of 50 hours to be paid at proportionate rates (except in shops and stores); for less than 44 hours deductions may be made at proportionate rates. Employees required to wait on the premises to be paid for such waiting time. Under Nova Scotia Factories Act, there is no restriction on the normal hours for women in factories but in case of emergency the inspector may permit hours up to 12½ a day and 72½ a week for not more than 36 days in the year.

(a) In these occupations, if lodging is furnished, not more than \$2 may be deducted from wage; if board is furnished not more than \$4 per week for board nor 25 cents for each meal may be deducted. In the case of laundries, not more than \$4.50 may be deducted for board and lodging in Halifax and other towns, except in Sydney and Glace Bay where not more than \$1.50 for lodging and \$4.50 for board may be deducted. In the case of shops and stores, the only provision is for a deduction of a maximum of 25 cents per meal.

(b) After one year, minimum rate for experienced adult to be paid.

(c) After 18 months, minimum rate for experienced adult to be paid, but no young girl on reaching age of 18 to receive less than rate for inexperienced adult.

(d) Pieceworkers to be paid minimum wage scale for first six months. For pieceworkers of more than six months' experience it is sufficient if at least 80 per cent receive the minimum established rate.

(e) A probationary period of three months is allowed for which no wages are stipulated.

(f) Seats to be provided in the proportion of at least one seat for every four employees or fraction thereof.

(g) From December 15 to December 31 the hours in shops and stores for which the minimum wage must be paid may be extended up to 60 a week. Hours in excess of 50 per week, except between December 15 and December 31, must be paid for at not less than one and one half times the minimum rate calculated on the basis of a 50 hour week.

\* Minimum Wage Orders apply throughout the Province unless otherwise noted in this table. No male worker may be employed on work ordinarily performed by women at less than the minimum wage fixed for women for such work. Permits may be issued by the Minimum Wage Commission for lower wage rates for girls or women who are physically unable to do the normal amount of work. Wage rates for female workers are also included in certain agreements under the Collective Labour Agreements Extension Act outlined under "Minimum Wages for Male Employees".

† Hours worked less or more per week than those shown below must be paid at proportionate rates, except in fur industry and in stores. Any employee required to wait on the premises shall be paid for the time thus spent. Under the Industrial and Commercial Establishments Act, maximum hours per week in industrial establishments for females are 55 and in commercial establishments in cities or towns of over 10,000, 60 per week (except last two weeks of December) but permits to work up to 65 hours in cases of emergency may be granted by the inspector under this Act for not more than 6 weeks in a year.

‡ Per hour.

- (a) At least one half of the employees must be paid the higher minimum rate.
- (b) After two years apprenticeship, experienced workers' rate must be paid.
- (c) The number of apprentices must not exceed half of the total female force.
- (d) Pieceworkers to be paid the minimum wage rate for beginners during their first six months of apprenticeship. For those pieceworkers of six months experience or more, it is sufficient if at least 80 per cent receive these minimum wage rates.
- (e) The Commission may grant permits of variation or suspension of any of these regulations in exceptional conditions.
- (f) If a special uniform required, it shall be furnished and laundered at the expense of the employer.
- (g) Minimum rates payable for the regular recognized working period of the establishment.
- (h) Overtime to be paid for at one and a half times the regular minimum rates; short time to be paid for *pro rata* of the regular minimum rates.
- (i) At least 65 per cent of employees must be paid the highest minimum rate, another 25 per cent the intermediate rate and the remaining 10 per cent the lowest minimum rate.
- (j) At least 70 per cent of employees must be paid the highest minimum rate, another 20 per cent the intermediate rate and the remaining 10 per cent the lowest minimum rate.
- (k) At least 70 per cent of the employees must be paid the highest minimum rate, another 15 per cent the intermediate rate and the remaining 15 per cent the lowest minimum rate.
- (l) Regular full or part time employees, employed in Montreal and the Island of Montreal and all other municipalities of a population 10,000 or more, for less than 48 hours per week, must be paid 12½ per cent higher than the standard minimum rate if such weekly wage does not then amount to more than the minimum for the 48 hour week. Overtime to be paid at proportionate rates. Extra staff: 25 cents, 20 cents, 18 cents and 16 cents per hour by the zones covered in the Order respectively. This Order does not apply to employees governed by any other order of the Commission. If board and lodging furnished by the employer the following deductions may be made from wages: in Montreal and Island of Montreal, \$2 per week for lodging, 20 cents per meal or \$5 for full board; in the rest of the Province, \$1.50 for lodging, 15 cents per meal or \$4 per week for full board.
- (m) The number of apprentices in any establishment must not exceed 25 per cent of the total female employees, except if less than 4 employees, when one apprentice may be employed.
- (n) At least 65 per cent of the employees must receive the highest rate, another 15 per cent the intermediate rate and the remaining 20 per cent at least the lowest rate.
- (o) At least 65 per cent of employees must be paid the highest rate, another 20 per cent the intermediate rate and the remaining 15 per cent at least the lowest specified rate.
- (p) This revised Order will replace the Orders in effect since 1933, from February 22, 1936.
- (q) This new Order comes into effect February 15, 1936.
- (r) This new Order comes into effect, March 21, 1936.
- (s) This revised Order will replace the Order in effect since 1934, from March 2, 1936.
- (t) This new Order comes into effect March 23, 1936.
- (u) Children's dresses, house dresses, kimono and custom millinery are only included in this Order from March 23, 1936.

\*Minimum wage rates apply throughout the Province unless otherwise stated in the order. No male worker may be employed in a class of employment for which a minimum wage is fixed for women at less than that minimum wage. Special permits may be issued to physically handicapped workers or those over 60 years to work for lower wages. Minimum wage rates for female employees are also included in certain schedules under the Industrial Standards Act outlined under "Minimum Wages for Male Employees".

† No young girl worker on reaching age of 18 years is to receive less than rate fixed for inexperienced adult.

‡ Minimum weekly rates are payable for these hours or for the usual number of hours per week normally worked in the establishment, if less than this number. No deduction below minimum wage for absence is to exceed value of the time lost. Over-time to be paid at proportionate rates. An employee required to wait on the premises to be paid for such time. Under Factory, Shop and Office Building Act, maximum hours for females are 60 per week, but in factories permits to work up to 12½ hours per day or 72½ hours per week in cases of emergency may be given by the factory inspector for not more than 36 days in the year.

(a) For learners, no wage stipulated for first three months, \$6 per week for second three months.

(b) All beginners on piecework to be paid not less than the time work rates for beginners during first six months. For pieceworkers of more than six months' experience, it is sufficient if at least 80 per cent earn the minimum rate.

(c) After one year, full rate for experienced worker to be paid.

(d) After 18 months, full rate for experienced worker to be paid.

(e) Lodging not to be charged at more than \$2.00 per week and board \$5.00 per week in Toronto and at \$1.50 and \$4.50 in the rest of the province, except in the canning industry where not more than \$1.50 for lodging and \$4.50 for board may be charged throughout the province; single meals at not more than 25 cents.

(f) For piecework in the canning industry, it is sufficient if 60 per cent of the pieceworkers earn the minimum rate.

(g) All workers between the ages of 18 and 60 years.

(h) All workers under 18 or over 60 years of age.

(i) Not more than one-third of employees to be apprentices, except when staff is less than four.

(j) An employment of ten weeks or more in any period of six months to be deemed sufficient for that of six months in computing time of apprenticeship.

(k) After 3 years, full rate for experienced worker to be paid.

(l) After 2 years, full rate for experienced worker to be paid.

(m) The number of inexperienced adults or young girls shall in neither case exceed 25 per cent of the total female working force except where the total female working force is less than four.

(n) An employee working less than 40 hours per week to be paid on hourly basis.

(o) A young girl employed in this industry for a year or more before reaching the age of 18 years must be paid rate for experienced adult on reaching the age of 18 years.

(p) After 6 months, full rate for experienced worker to be paid.

(q) Any office worker with a diploma from an accredited business college or commercial department of a high school to be paid experienced worker's rate.

(r) If employed a year or more in an office before reaching the age of 18 years, a worker to receive experienced worker's wage rate on reaching age of 18 years. If working less than a year when reaching age of 18 years, experienced worker's rate to be paid as soon thereafter as the year's experience has been completed.

(s) A learning period of two weeks with no prescribed wage before minimum wage rates applicable.

(t) Number of inexperienced workers not to exceed one-quarter of total females employed if there are four or more female employees.

\*Minimum wage orders apply to women and to boys under 18 in cities only, except where otherwise noted. In the Order re Retail Stores, etc., women workers are covered throughout the Province, but boys under 18 only in Greater Winnipeg and Brandon. (Special rates for boys and men in some industries are shown on page 112.) In any class of industry where a minimum wage is established, no person 18 years or over to be employed at less than 25 cents per hour except where regulations of the Board provide for different rates. The Board may issue a permit granting modification of or exemption from the regulations in case of exceptional conditions.

† Farm and market garden workers and private domestic workers are excepted, and this Order is not effective if a lower rate is permitted by any other regulation under the provisions of the Act.

‡ The hours not to exceed these, except that overtime may be worked on permit from the Bureau of Labour but not for more than 36 days in a year, 6 hours in any week or 8 hours in any day. Payment for such overtime to be at regular rates. Any employee required to wait on the premises, is to be paid for such waiting time.

(a) The number of learners and minors not to exceed 25 per cent of the number of experienced female employees in the case of abattoirs, etc., artificial flowers, etc., departmental and retail stores, laundries, etc., and hotels and restaurants; and not to exceed 25 per cent of the total number of female employees in the other orders concerned.

(b) If board or lodging furnished by employer, the cost to the employee is not to exceed \$2 per week for lodging, \$4.50 for board or \$6 for both; in hotels, restaurants, etc., not more than \$2.50 for lodging and \$4 for board may be charged employees.

(c) After six months, minimum rate for experienced worker to be paid.

(d) After one year, minimum rate for experienced worker to be paid.

(e) After 18 months, full minimum rate for experienced worker to be paid. (In furrier's establishments, if a minor reaches age of 18 years before this period, she is to serve only one half of the remainder of the learning period before receiving experienced worker's rate.)

(f) After 24 weeks, full minimum rate for experienced worker to be paid. Minors to be classed as learners.

(g) After six seasons of at least 10 weeks each, minimum rate for experienced worker to be paid.

(h) If establishment is associated with a shop or store, the same hours to be observed as by the selling staff of the shop or store. In establishments which remain open Saturday evenings, hours may be increased to 11½ for Saturday and 54 per week during December but maximum is 49 hours per week during remainder of year.

(i) After two years, minimum rate for experienced worker to be paid. Minors to be classed as learners.

(j) No minor to work in a rag factory, and no period of adult learning in a rag factory.

(k) Employees who have been working one year or more to be considered experienced adults on reaching the age of 18 years.

(l) This Order covers all departments including manufacturing and special service departments except where another Order of the Board applicable to the same work in other industrial classes exists which is more favourable to the employee, in which case the more favourable to the employee prevails.

(m) From November 1 to December 24, workers in mail order department, and from December 15 to December 24, the sales force may work 9 hours per week overtime; also at stocktaking one additional night may be worked.

(n) Except that 11½ hours may be worked on Saturday.

(o) Uniforms required must be furnished and laundered at the expense of the employer.

(p) No minor (under 18) to be employed. Ticket sellers and ushers working less than 40 hours per week must be paid at least 30 cents per hour.

(q) Or 25 cents per hour.

(r) A probationary period of 3 months with wage rates not stipulated; after 18 months further experience, full rate for experienced worker to be paid.

(s) After three months, full minimum rate for experienced worker to be paid.

(t) Or 20 cents per hour except for the Order for General Employees for whom rate is 21 cents.

(u) Where more than 8 female workers are employed, not more than 25 per cent of the total office staff to be learners or minors. A business course to be equivalent of experience.

(v) Girls of 15 years \$8, of 16 years \$9, of 17 years \$10, of 17½ years \$10.50.

(w) Or 30 cents per hour.

(x) \$12 if employed at press feeding or operating sewing machine.

(y) And in Portage la Prairie from November to April inclusive. In places of a population of less than 1,000, from November to April inclusive, this minimum rate may be reduced by 10 per cent.

(z) Employees of 18 years or over in hotels may work more than 48 hours, with all such overtime to be paid for *pro rata*.

\* The Minimum wage orders apply only to cities, but the Board may extend an order to any other part of the Province, and may also declare any order to apply to male employees in shops and factories.

† Maximum hours per week; longer hours may only be worked with a permit from the Minimum Wage Board except for laundries and factories where such permit must be obtained from an inspector under the Factories Act, and such overtime to be paid at not less than the minimum rate. (Under the Factories Act inspector may permit a 12½ hour day, 72½ hour week in emergencies for 36 days in the year). Overtime must be paid at regular rates. If shorter number of hours worked, weekly wages may be reduced proportionately, but in no case to less than 20 cents per hour.

(a) Where meals are furnished by employer, not more than 20 cents a meal to be charged.

(b) In photographic studios and workrooms, apprentices not wholly employed in film developing may work three months at \$5 per week and the following year at the regular learners' scale. Learners in knitting, hat and wearing apparel factories and book binderies may work six months at \$7.50 per week and a following year at the regular learners' scale.

(c) After one year, full minimum rate for experienced workers to be paid.

(d) After one year, or on reaching age of 18 years, minor learners to be considered adult learners.

(e) For millinery, dressmaking, tailoring, fur sewing and florist establishments, situated in a shop or store, an inexperienced adult female employee to be paid not less than \$3 per week for six months, \$6 per week for next six months and \$7 for next six months, after which they are to be paid at the full minimum rate for experienced workers. A probation period of six months for which no wages are stipulated is allowed in the case of minor learners, after which period, minor learners to be paid the rates for adult inexperienced workers.

(f) Seats must be provided in the proportion of one to every four employees.

(g) After 18 months, full minimum rate for experienced worker to be paid.

(h) Between December 15 and December 31, hours may be increased up to 56 per week.

(i) Where board and lodging furnished by employer, minimum wage rate to be \$5.00 per week for experienced workers and \$4.00 for inexperienced workers and \$3.00 for kitchen help. Where meals only furnished by employer, minimum wage rate \$7.00 for experienced workers and \$6.00 for inexperienced workers and \$5.00 for kitchen help. Where lodging only furnished by employer, minimum wage rate \$9.00 for experienced workers and \$8.00 for inexperienced workers and \$7.00 for kitchen help.

(j) After 3 months, full minimum rate for experienced worker to be paid.

(k) A probationary period of three months with no wages; after which period, two years as learner before being considered an experienced worker. Not more than 25 per cent of total female employees may be apprentices, unless there are less than four female employees when one apprentice may be employed.

## VI.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN ALBERTA\*

\*Minimum wage orders apply to cities, towns and villages with a population of 600 or over and to Banff, Lake Louise, Waterton Park and Jasper, except in case of the Fruit and Vegetable Canning, Drying and Packing Industry in which industry the order applies throughout the province. The Factories Act provides that wherever a minimum wage fixed for female workers in any class of employment, no male worker to be employed for less except indentured apprentices.

†Maximum hours, except that a temporary increase may be made with permission of Minimum Wage Board, any such overtime to be paid at regular rates. The minimum wage rate is payable for these maximum hours or for the usual number of hours worked in the establishment if less than these hours and more than forty per week. If the usual number of hours is less than forty per week, proportionate deductions from the minimum rate may be made.

‡Not more than 25 per cent of total female staff may be apprentices.

(a) After 18 months, full minimum rate for experienced workers to be paid.

(b) After a probationary period of one month with no wages stipulated, 11 months may be worked at apprentice scale.

(c) In some cases full minimum rate for experienced worker to be paid after 9 months apprenticeship and in other cases after one year's apprenticeship.

(d) After two months, full minimum wage for experienced worker to be paid.

(e) After one year, full minimum wage for experienced worker to be paid.

(f) 10½ hours on Saturdays.

(g) The minimum wage order applies to all private telephone exchanges in cities, towns and villages having a population of 600 or over and to all public telephone exchanges where the number of subscribers exceeds 250.

(h) Where meals are furnished by employer, not more than \$5 per week to be deducted from wages for meals; where lodging furnished, not more than \$2 per week to be deducted for lodging.

(i) After 3 months, full minimum rate for experienced worker to be paid.

(j) If working more than 28 hours and not more than 48 hours per week \$14.00 per week. Hourly wages 50 cents per hour.

(k) Minimum rates payable if working more than 28 and not more than 48 hours per week.

## VII.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN BRITISH COLUMBIA\*

Industries and Occupations	Minimum Wages per Week			Hours†

<i>Ushers in theatres, music halls, lecture halls, etc.....</i>	14.25	14.25	14.25		48m
<i>All others.....</i>	14.25	14.25	10.00-13.00e		48

\*Minimum wage orders apply throughout the Province. No male worker over 18 years except indentured apprentices may be employed at a class of employment for which a minimum wage for women is fixed at less than this minimum wage.

†Under Hours of Work Act, maximum hours per week except with permit from the Board of Industrial Relations. Overtime is to be paid pro rata.

‡ Special licences may be granted by the Board for employment of adult learners at wage rates fixed in the licences but the number of such licensed employees not to exceed one-seventh of the total number of female employees in the establishment, except if less than seven employees when one adult learner may be allowed. The aggregate number of female workers with special licences and employees under 18 may not, however, exceed 35 per cent of the total number of female workers in the establishment.

(a) After one year, minimum rate for experienced worker to be paid.

(b) For experienced worker, 27 cents per hour up to 10 hours per day, 40 cents for hours over 10 and up to 12, and 54 cents for any hours in excess of 12. For inexperienced workers, that is those with less than two months' experience, corresponding wage rates are 25 cents, 37½ cents and 50 cents per hour.

(c) For some classes of manufacturing the scale for inexperienced employees is from \$8 to \$12 covering a period of 6 months, in other classes also from \$8 to \$12 but covering a period of one year and in a third class which includes printing and bookbinding, dressmaking, tailoring, manufacture of jewelry, furs, leather goods, boots and shoes, hand-made millinery, and other products the scale is from \$7 to \$13 and covers a period of 13 months. These schedules do not apply to regularly indentured apprentices whose indentures have been approved by the Board.

(d) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 35 cents for experienced workers, 25 cents to 35 cents for inexperienced adults and from 20 cents to 30 cents for young girls under 18 years. For the week ending December 21, 1935, overtime was permitted with time and one quarter to be paid for all time worked over 48 hours in that week.

(e) After two years, or on reaching age of 18 years after a specified length of experience, minimum rate for experienced workers to apply.

(f) After 9 months, minimum rate for experienced workers to apply.

(g) In an emergency, maximum hours may be increased up to 56 per week, and such overtime to be paid at one and one-half times the rate. Employees customarily on duty between 10 p.m., and 8 a.m., may work 10 hours instead of 8 per day.

(h) After one year, minimum rate for experienced worker to be paid.

(i) Apprenticeship of two years and rate of \$12 to continue until reaching age of 18 years. If age of 18 is reached before completion of one year's apprenticeship, rate for experienced worker to be paid as soon thereafter as the year is completed.

(j) If board or lodging furnished by employer, not more than \$3 per week for lodging and \$5.25 for board to be deducted from wages.

(k) After three months, minimum rate for experienced worker to be paid. For minors, this rate to be paid until age of 18 years.

(l) In case of emergency, 52 hours may be worked but time and one-half to be paid for work over 48 hours per week.

(m) \$14.25 for over 36 and not more than 48 hours per week; \$10.80 for over 18 hours and under 36 hours per week. For ushers employed on legal holidays and special matinees, 30 cents per hour with a minimum of 75 cents.

(n) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 37½ cents for experienced workers and 30 cents for inexperienced workers and for young girls under 18 years.

(o) This Order includes janitresses, janitress-cleaners and janitress-firemen. Monthly wage rates are: \$125 for apartment buildings with over 50 residential suites, \$100 for apartment buildings with 25 to 50 suites, \$75 for apartment buildings with 13 to 24 suites and 35 cents per hour for all work in smaller buildings. Maximum rentals which may be charged janitresses for their own apartments are stipulated.

(p) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 37½ cents for experienced workers from 27 cents to 35 cents for inexperienced workers and for young girls under 18 years. On December 31, up to 11 hours may be worked, with payment for all work over 8 hours at time and one quarter.

## Minimum Wages for Male Employees

The following statements and tables afford information as to the rates of wages and hours of labour established under provincial legislation as to minimum wage standards for male workers.

### NEW BRUNSWICK

#### *New Brunswick Forest Operations Act*

The provincial legislature during the sessions in 1934 passed the New Brunswick Forest Operations Act under which was constituted the New Brunswick Forest Operations Commission with powers to make final decisions in labour disputes subject to the approval of the Minister of Lands and Mines and to fix minimum wage scales for the industry. The Act does not apply to work on Christmas trees or firewood operations. The Act permits men inexperienced or physically unfit for a full day's work to be employed at a wage below the minimum rates established if an agreement (approved by the Commission) is signed by the employer and men concerned.

On March 27, 1935, the New Brunswick Forest Operations Commission established, for stream-driving, a minimum rate of \$1.75 per day and board net, or its equivalent in case of piece work. For booming and sorting a minimum rate of 20 cents per hour net was fixed.

Effective April 15, 1935, the Commission set for cutting, peeling, yarding and hauling (summer season) a minimum wage of \$32 per month and board net, or its equivalent in case of piece work.

Effective October 1, 1935, for cutting, yarding and hauling (winter season), a minimum wage of \$27 per month and board net, or its equivalent in case of piece work, was fixed, provided, however, that no employer paying higher rates was to be allowed to reduce such rates without showing good cause to the Commission.

### QUEBEC

The Women's Minimum Wage Act, the orders under which are noted above in the table of minimum wage rates for female employees in Quebec, provides that no male employee may be employed at work which, in the opinion of the Minimum Wage Commission, is ordinarily and by custom performed by women, at a less wage than that fixed by an order of the Commission for such work performed by women.

#### *Quebec Forests Operations Commission Act*

In 1934 a Commission for the Supervision and Control of Forest Operations was set up. Every timber-limit holder having a licence to cut timber on public lands, or any contractor undertaking forest operations for such a timber-limit holder must before starting forest

operations submit to the Commission a report on the wages, hours, supplies, etc., with the prices to be charged employees for goods and services, and any other information required by the Commission. The wage scale and prices so submitted to the Commission must be posted in the camp and if lower wages are paid, any employee may sue for the difference in court. This Commission may investigate forest operations carried on by any timber-limit holder and report to the Minister of Lands and Forests. The Commission has issued regulations applying to all timber-limit holders and contractors carrying on forest operations on Crown lands, in which it is requested that all men employed in the forests on Crown lands should be paid at least \$30 net per month or its equivalent in case of piece work, this wage not however necessarily to apply to men incapacitated through age or infirmity, nor to inexperienced young men.

#### *Quebec Collective Agreements Extension Act*

The text of this Act was printed in the *LABOUR GAZETTE*, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and, on the other hand, employers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The agreements

apply to both male and female employees unless otherwise stated, but many of the agreements provide that in no case may the wage rates for female workers be less than stated in an order of the Minimum Wage Board. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. Beginning with the issue of the *LABOUR GAZETTE* for July, 1935, the terms of agreements have been summarized instead of being printed in full. Summaries of wage rates paid under these Orders in Council in the various industries are as follows:—

**BAKERS.**—Agreements, approved by Orders in Council, as to wages and other working conditions in the baking industry, which have been summarized in the *LABOUR GAZETTE* during 1935, provide for the following minimum weekly wage rates in the following cities and the districts surrounding them: Quebec—bakers \$19 to \$22, apprentices \$6 for beginners, bakers of doughnuts and rolls \$8 to \$20, hours 72 per week; salesmen \$15, salesmen's helpers \$6, deliverymen only (not salesmen) \$10 (*LABOUR GAZETTE*, February, June, July and November, 1935). Sherbrooke—bakers \$13 to \$20, apprentices \$6 for beginners (*LABOUR GAZETTE*, March, 1935). Three Rivers—bakers \$15 to \$22, apprentice bakers \$5 to \$10, salesmen \$9 plus a commission of 7 per cent on collections (*LABOUR GAZETTE*, February, May and October, 1935, and January, 1936). Montreal—bakers, helpers and labourers \$18 to \$22, apprentices \$10 to \$12, salesmen \$15; hours for inside employees 60 per week (*LABOUR GAZETTE*, August and October, 1935, and January, 1936). Hull—bakers and confectioners \$12 to \$28, apprentices \$6 to \$12; hours 60 per week (*LABOUR GAZETTE*, June and September, 1935).

**FUR WORKERS, MONTREAL AND DISTRICT.**—An approved agreement which was summarized in the *LABOUR GAZETTE*, January, 1935, and which was to be in effect until January 1, 1936, provides for the following minimum weekly wage rates in the furriers' trade: cutters—\$35 first class, \$28 second class; operators (male)—\$28 first class, \$20 second class; operators (female)—\$20 first class, \$15 second class; finishers (female)—\$18 first class, \$14 second class; apprentice cutters, trimmers, blockers and nailers—\$20 first class, \$12 second class; examiners—\$24 first class, \$12 second class. Apprentices must be paid in accordance with the Minimum Wage Board Orders.

**SHOE MANUFACTURING, PROVINCE OF QUEBEC.**—This agreement, approved by Order in Council (*LABOUR GAZETTE*, September, 1934, February, 1935, and January, 1936) applies to all male employees in the boot and shoe manufacturing industry throughout the province.

Employees are divided into four trade classes, A, B, C, and D. Classes A and B comprise skilled and semi-skilled workers on certain specified operations and are divided into experienced workers and apprentices. Class C comprises experienced boys working on certain specified operations and their apprentices. Class D comprises helpers and boys not in other classes, such as sweepers, messengers, general assistants and also on certain specified operations. Minimum hourly wage rates are as follows:—

Class	Montreal and within radius of 10 miles of Island of Montreal	Quebec and within radius of 10 miles	Other Municipalities of population of 3,000 or more	Rest of Province
	cents	cents	cents	cents
Class A: Operators..... Apprentices...	40 26	38 25	34 22	32 20
Class B: Operators..... Apprentices...	34 21	32 20	30 18	27 17
Class C: Operators..... Apprentices...	18 15	17 14½	16 14½	16 14
Class D:.....	13	12½	12½	12½

In establishments where the piece work system is in effect, it is sufficient if 80 per cent of the employees in each class (A, B, C and D) receive the minimum rates, except where minimum piece rates are established for specific operations by the joint committee under the agreement.

**MEN'S, BOYS', YOUTHS', CHILDREN'S AND JUVENILES' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.**—This industry throughout the Province is covered by an agreement made obligatory by Orders in Council (*LABOUR GAZETTE*, March, April, August and November, 1935). (The manufacture of work shirts, overalls, mackinaw coats, etc., is not included in the agreement.) Workers are divided into eight classes, A, B, C, D, E, F, G, and H, according to the skill required for the operations, for instance Class A includes skilled cutters and head operators and shape sewers on unbasted coats in the coats department, skilled cutters in the pants department, skilled cutter, tape sewer and pocket maker in the vest department. The province is divided into three zones: Zone I is the Island of Montreal and the area within 10 miles of its limits, Zone II is the area within 75 miles of the boundaries of Zone I, Zone III is the rest of the province. The hours are 44 per week in Zone I and 48 hours in Zones II and III.

The following minimum wage scale must be paid for the manufacture of men's and boys' clothing whether employees are working on the hourly rate system or piece rate system:—

Class	Rate of wages per hour		
	Zone I	Zone II	Zone III
	cents	cents	cents
A.....	68	61	59
B.....	61½	55½	52½
C.....	57	51	48
D.....	50	45	42½
E.....	41	37	35
F.....	33	30	28
G.....	28½	25½	24½
H, 1st 6 months.....	16	12½	11½
2nd 6 months.....	18	16	15
3rd 6 months.....	21½	19	18
4th 6 months.....	25	22	20
After 2 years.....	28½	25	22

In Zone I, an apprentice chopper in the coats department to be paid \$7 per week to start, with increases every six months until \$18 per week after 30 months; an apprentice trimmer in the coats department to start at \$7 per week, with increases every six months until \$15 per week after three years. In Zone II these apprentices may be paid 10 per cent less, and in Zone III 15 per cent less than in Zone I.

For infants' and children's clothing up to the age of 6 years and girls' clothing up to the age of 14 years the following minimum weekly wages must be paid in Zone I: skilled markers \$30; trimmers \$27; tape sewers, off pressers, sleeve hangers \$22; pocket makers, shape makers \$18.04; other classes including apprentices \$7.04 to \$14.52. In Zone II these rates may be 10 per cent less, and in Zone III 15 per cent less.

**WOMEN'S CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.**—The Orders in Council approving agreements for this industry govern conditions throughout the Province in the production, for women and girls over 14 years, of cloaks, coats, suits and of woollen skirts (LABOUR GAZETTE, December, 1935). The hours were 44 per week until December 31, 1935, but are reduced to 40 per week from January 1, 1936.

The following minimum wage rates must be paid employees working by the week:—

Class	Wages per hour	
	Until December 31, 1935	From and after January 1, 1936
	cents	cents
Full skilled cutters.....	77	80
Semi-skilled cutters.....	50	55
Trimmers.....	55	60
Fur tailors.....	60	65
Assistant fur tailors.....	40	44
Button sewers, general hands and examiners.....	31	34

In the following crafts, work may be done on a piece work basis and piece rates are to be computed to yield the following minimum wage rates:—

Class	Wages per hour	
	Until December 31, 1935	From and after January 1, 1936
	cents	cents
Jacket, coat and reefer operators.....	75	80
Top pressers.....	75	80
Machine pressers.....	75	80
Under pressers.....	68	75
Piece pressers.....	42	45
Lining makers.....	38	42
Finishers.....	38	42
Skirt makers.....	38	42
Machine basters, hand basters and special machine operators.....	40	44
Semi-skilled operators.....	50	55

Skilled female operators' rates to be 20 per cent below the skilled male operators' minimum, and female semi-skilled operators 10 per cent below the semi-skilled male operators' minimum, except that if productivity is equal to male operators or if performing the same operation on piece work as a male operator, the same wage rates apply to both male and female operators. Female section operators to be paid the same rates as male section operators.

The Board of Examiners may determine a special rate for employees whose production is under normal.

Apprentices are limited to 5 per cent of the number of those employed in a factory. Apprentice operators, pressers and cutters to start at \$7 per week, with advances every six months to a total of \$22 at the end of three years.

**GLOVE INDUSTRY, PROVINCE OF QUEBEC.**—The agreement approved by the Order in Council for this industry covers the entire province (LABOUR GAZETTE, May and November, 1935, and January, 1936). The hours are limited to 49 per week. The wage rates specified in this agreement are piece work rates. For work in towns of a population of less than 15,000, the standard minimum piece rates are reduced 10 per cent for the majority of operations.

**WOMEN'S AND CHILDREN'S MILLINERY INDUSTRY, MONTREAL AND DISTRICT.**—The agreement approved by Order in Council for this industry (LABOUR GAZETTE, August, 1935) covers the Island of Montreal and an area within a distance of 50 miles from its limits. Hours are 40 per week. Wages per week for qualified operators are: hand blockers \$31; straw operators, fabric operators, blockers and cutters \$28, drapers \$19, trimmers \$14. Workers not yet qualified may be paid at rates fixed by the

Joint Committee until they are qualified, but not more than 25 per cent of employees in a certain class of work in any establishment may be paid at less than the above minimum rates.

**FURNITURE WORKERS, PROVINCE OF QUEBEC.**—The Order in Council making obligatory the agreement in this industry throughout the Province is summarized in the *LABOUR GAZETTE*, November and December, 1935. The province is divided into three zones: Zone I comprises the Island of Montreal, Zone II the province with the exception of Zones I and III, Zone III comprises the county of Chicoutimi and municipalities of a population of less than 3,000 provided the establishments in this zone do not employ more than 50 workers. The minimum wage rates are: for labourers over 21 years of age—25 cents per hour in Zone I, 22 cents in Zone II and 20 cents in Zone III; for boys of 16 years of age and over—12 cents per hour during first year, 14 cents during second year, 16 cents during third year, 18 cents during fourth year and 20 cents during fifth year. For female employees the minimum rate is 16 cents per hour. Lower rates may be paid workmen whose capacity is reduced, but in no case to be less than 80 per cent of the regular minimum rate, and not more than 5 per cent of staff may be paid at rates under the standard rate.

**PRINTING TRADES, QUEBEC AND CHICOUTIMI.**—The Order in Council extending an agreement as to wages and working conditions in the printing trades in the judicial districts of Quebec, Beauce and Montmagny (*LABOUR GAZETTE*, November, 1935) provides for a 48-hour week for day work and a 45-hour week for night work. Minimum wage rates for journeymen typographers, pressmen, stereotypers and bookbinders: \$25 per week for day work and \$27 for night work.

For the judicial districts of Chicoutimi, Lake St. John, Roberval and Charlevoix-Saguenay, the Order in Council (*LABOUR GAZETTE*, September, 1935) provides for a 40-hour week. The minimum wage rate for journeymen typographers, pressmen, bookbinders and stereotypers is 52 cents per hour, with a 10 per cent reduction on this rate for work in municipalities of a population of less than 2,000.

**ORNAMENTAL IRON AND BRONZE WORKERS (SHOPMEN), MONTREAL AND QUEBEC.**—For the Island of Montreal and neighbouring counties, an Order in Council made obligatory an agreement which stipulates a minimum wage rate of 55 cents per hour for mechanics, 45 cents for fitters and 35 cents for helpers, which minimum rates are to be increased by 5 cents per hour from April 1, 1936. Hours are 44 per week (*LABOUR GAZETTE*, September, 1935).

For the judicial districts of Quebec, Beauce and Montmagny, an Order in Council (*LABOUR*

*GAZETTE*, February, 1935, and January, 1936) provides for minimum wage rates of 50 cents per hour for mechanics, 40 cents for adjusters and 30 cents for helpers. Hours are 50 per week.

Wage rates for ornamental iron workers (erectors) in certain localities are shown in the table of building trades rates below.

**GRANITE CUTTERS, PROVINCE OF QUEBEC.**—An Order in Council (*LABOUR GAZETTE*, January, 1935) made obligatory the terms of an agreement governing conditions in granite cutting operations in connection with buildings, bridges, curbings and monumental works throughout the province until December 31, 1935. Hours were limited to 45 per week except for quarrymen and inexperienced labourers who might work 50 hours per week. Minimum wages for granite cutters and surface machine operators who are fully competent granite cutters 50 cents per hour, quarrymen employed in quarries 35 cents, inexperienced labourers in quarries 25 cents, apprentice granite cutters from 10 cents per hour during first year to 30 cents during third year.

**STONE CUTTERS, PROVINCE OF QUEBEC.**—This agreement (*LABOUR GAZETTE*, April and October, 1935) covers wages and working conditions in limestone, sandstone, artificial stone or any other stone quarries except granite and marble quarries, and applies to operations in connection with all buildings, bridges, walls, monumental work and other operations, throughout the whole province. Hours 44 per week for stonecutters and their apprentices and 60 per week for planermen, apprentice planermen and sawyers. Wages per hour: stonecutters 50 cents, apprentice stonecutters from 15 cents during first year to 40 cents during fourth year, planermen 40 cents, apprentice planermen 20 cents during first year, 30 cents during second year, sawyers 35 cents.

**LONGSHOREMEN, MONTREAL.**—An agreement (*LABOUR GAZETTE*, July and August, 1935, and January, 1936) provides that the wages of longshoremen and hourly paid checkers and coopers, engaged in loading and unloading of ships engaged in inland navigation in the Montreal Harbour, be 42 cents for day work and 45 cents for night work for ordinary cargo, also 70 cents for day work and 78 cents for night work for certain classes of cargoes.

An agreement for longshoremen employed in the loading and unloading of ocean-going vessels was made obligatory by Order in Council in 1934 for that year only. The agreement for 1935 (*LABOUR GAZETTE*, June, 1935) was not made obligatory under this Act.

**BARBERS.**—Agreements made obligatory by Orders in Council in the barber or the barber and hairdresser trades cover thirteen districts.

The hours vary in the several localities, each agreement specifying the time shops are to be open with periods off for each employee. Piece or job rates for each piece of work in the barbering, hairdressing, manicuring trades, etc. are specified in the agreements. For barbers employed by the week, the agreements specify a minimum weekly wage and in addition provide that barbers receive a certain percentage of their individual receipts above a specified amount taken in during the week. The following minimum wage rates for barbers and hairdressers are payable in the following centres and in their surrounding districts:

MINIMUM WEEKLY WAGE RATES FOR  
BARBERS AND HAIRDRESSERS

(b) Or \$15 without commission.

(c) One year from signing of contracts, minimum wages to be increased to \$14 plus 50 per cent of receipts in excess of \$20. (Order in Council dated June 27, 1935).

(d) 65 per cent of receipts over this amount.

**BUILDING TRADES.**—The agreements in the building trades in various sections of the province, which have been made obligatory by Orders in Council, have been summarized in the *LABOUR GAZETTE* during 1934 and 1935. In most cases the agreements cover specified sections of the province, comprising several counties as well as the principal city. Building trades agreements which are in effect under these Orders in Council cannot apply to the agricultural industry. The minimum wage rates which were in effect at the end of the year 1935 under Orders in Council are shown in the accompanying table.

The agreements in many cases also specify minimum weekly rates, lower than the standard hourly rates, for workmen permanently employed on maintenance work for churches, chapels, seminaries, colleges, convents, monasteries, hospitals, orphanages, asylums or other charitable institutions or in manufacturing establishments. These weekly rates are not shown in the table. Minimum wage rates for apprentices which are also set in many of the agreements are also omitted from this table.

Hours are governed by Orders in Council under the Hours of Work Act, Quebec, which provide for maximum hours of 8 per day and 40 per week except in the Eastern Townships where a 48-hour week is permitted, and in the counties of Saguenay, Lake St. John, Chicoutimi, Roberval and Charlevoix, where the 48-hour week will be permitted from and after February 1, 1936, and except that on any contract of a total cost of \$20,000 for a municipal or school corporation, "fabrique" or parish trustees or for an institution, association or corporation, the costs of which are paid for or guaranteed by at least 50 per cent by the government of the province or by a municipal corporation or by both, a two-shift system must be established, each shift working 6 hours per day for the period between May 1 and October 1 of each year.

# ONTARIO

Under the Minimum Wage Act it is provided that wherever, as determined by the Board, any male employee replaces any female employee at any class of employment for which a minimum wage is established, such male employee must be paid at least such minimum rate. (The minimum rates established for female employees are shown above in the table of minimum wage rates for female employees in Ontario.)

## The Industrial Standards Act of Ontario

This Act, the text of which was printed in the *LABOUR GAZETTE*, June, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in an industry in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. The following is a summary of the wage rates in force under these Orders in Council at the end of the year 1935:—

**BAKING INDUSTRY, COUNTIES OF WATERLOO, WELLINGTON, PERTH AND HURON.**—A schedule in effect under the Act (*LABOUR GAZETTE*, October, 1935) provides that the hours in the baking industry in these counties be 56 per week. Minimum wages per week: foreman \$22, oven men and table hands \$20, bakers' helpers \$15, pan boys or apprentices \$10, salesmen or bread drivers \$17.

**BREWING INDUSTRY, PROVINCE OF ONTARIO.**—The schedule which is in effect under the Act for the brewing industry throughout the province (*LABOUR GAZETTE*, July, 1935) provided

for a 50-hour week from April 1 to September 30, 1935, and a 45-hour week from October 1, 1935, to March 31, 1936. Minimum weekly wages are: coopers \$30; truck drivers \$25; helpers \$22.50; bottlers operating machines \$24.50; other bottlers \$22.50; watchman, fermenting room and cold storage, brew house, wash house \$24.50.

**WOMEN'S CLOAK AND SUIT INDUSTRY, PROVINCE OF ONTARIO.**—The schedule made obligatory by Order in Council under the Act for the women's cloak and suit industry, that is the manufacture, for females, of cloaks, coats or suits and of woollen skirts of specified weight was summarized in the *LABOUR GAZETTE*, December, 1935. The terms of this schedule relating to working hours and minimum wage rates are the same as in the agreement which is in effect in the Province of Quebec and is summarized above under "The Collective Labour Agreements Extension Act," except that the provisions relating to apprentices are not in the Ontario agreement, and except that the Board set up under the Industrial Standards Act is to determine rates for handicapped workers.

**MILLINERY INDUSTRY, PROVINCE OF ONTARIO.**—This schedule, which applies to the manufacture of millinery, is in force under the Act throughout the province (*LABOUR GAZETTE*, August, 1935). Hours are 40 per week. Minimum wages per week: all round blockers \$32, straw operators, fabric operators, blockers and cutters \$29, drapers \$19, trimmers \$15.

**FURNITURE INDUSTRY, PROVINCE OF ONTARIO EXCEPT TORONTO.**—Under the schedule made binding for this industry, which applies to the manufacture of all wood products known as household, office and school furniture (*LABOUR GAZETTE*, August, 1935), two zones are set up: Zone "A" consists of the whole province except the city of Toronto and an area 15 miles from its limits and except the district bounded by the cities of Hamilton, Kitchener and Stratford; Zone "B" consists of the area bounded by the cities of Hamilton, Kitchener and Stratford. Hours are 47 per week.

Class of employee	Wages per hour	
	Zone "A"	Zone "B"
	cents	cents
Skilled employees.....	45	47
Semi-skilled employees.....	35	37
Unskilled male labour over 21 years:		
From September 1, 1935, to March 1,		
1936.....	28	30
From March 1, 1936, to July 1, 1936..	30	32
Boys.....	17	17

**BUILDING TRADES.**—Schedules governing wage rates and hours in the building trades in various localities, which are in force under the Act, have been summarized in the *LABOUR GAZETTE* during 1935. The schedules apply to

the immediately surrounding district as well as to the city named. The wage rates and hours for journeymen stated in these Orders are given in the table below. (Apprentices are to be employed according to the conditions of the Ontario Apprenticeship Act.)

\*Orders in Council published in *The Ontario Gazette* January 11, 1936, provide, in Kingston, for a rate of 75 cents for carpenters, 85 cents for spray painters, 70 cents for painters, paperhangers and glaziers, with a 44 hour week.

(a) The rate for spray painters to be 80 cents, and for painters, paperhangers, decorators and glaziers 65 cents from February 14, 1936.

(b) The rate for painters, paperhangers, decorators and glaziers (not spray painters) to be 65 cents from May 1, 1936.

(c) The rate for journeymen plumbers to be 80 cents, and for fifth year junior mechanics 60 cents from January 1, 1936.

(d) If done on a yardage basis, not less than 7 cents per square yard.

### MANITOBA

An amendment to the Minimum Wage Act in 1931 included boys under 18 years of age within the scope of the Act, and at the same time provided that all previous Orders and Regulations under the Act should apply to these boys. In 1934, the Act was further amended to include all workers in cities, in the industries under the Act, and at the same time it was provided that when regulations are made in any class of industry, no person 18 years or over may work as an employee in the industry at a wage of less than 25 cents per hour except where the Board has passed specific regulations providing for a different rate. (Certain minimum wage rates established under this Act are shown in the table above under "Minimum Wages for Female Employees.") This same amending Act of 1934 authorized the Lieutenant Governor in Council, in his discretion, to extend the provisions of the Act to any part of the Province although not a city and to extend the provisions of the Act or the regulations to any industry not previously included.

In certain of the regulations separate wage scales are fixed for boys. These wage scales and the special regulations covering only male employees are noted below.

A regulation governing all boys under 18 years working in manufacturing industries in Greater Winnipeg and Brandon (including work in garages and filling stations) provides for maximum hours of 9 per day and 48 per week. Overtime may only be worked on permit from the Bureau of Labour and for not more than 3 hours per day, 6 days per week or 30 days per year. Wage rates are as follows:—

	Per week
First six months.. . . .	\$ 8
Second six months.. . . .	9
After one year.. . . .	10

A regulation governing workers in retail stores in Greater Winnipeg and Brandon provides for the payment of the following minimum wage rates to boys under 18 years:—

	Per week
First six months.. . . .	\$ 8
Second six months.. . . .	9
After one year.. . . .	10

except messenger boys in drug stores for whom the minimum is \$8 per week, and boys working as part time workers at night who must be paid at least 15 cents per hour.

The regulation governing workers in laundries and dyeing and cleaning establishments in Winnipeg and St. Boniface also provides a separate minimum wage scale for boys under 18 years, as follows:—

	Per week
First six months.. . . .	\$ 8
Second six months.. . . .	9
After one year.. . . .	10

A regulation governing the employment of workers in hotels, restaurants, clubs, victualing houses and refreshment stands throughout the Province provides for minimum wage rates for men and boys in the area comprised within the Greater Winnipeg Water District; and in the City of Brandon at any time; and the City of Portage la Prairie during months of May to October, inclusive; and in any summer resort during June, July, August or September as follows:—

Men (over 18 years):

\$12 per week or 25 cents per hour.

Boys (under 18 years):

	Per week
First six months.. . . .	\$ 8
Second six months.. . . .	9
After one year.. . . .	10
Bell boys (any age).. . . .	8

In any other portion of the Province:—

Men (over 18 years):

\$10 per week or 21 cents per hour (except in places with population less than 1,000, where minimum rates 10 per cent less than these rates may be paid during the period from November 1 to April 30).

In addition to the above regulations an Order in Council provides that, except when otherwise provided by a regulation under the Minimum Wage Act, and except if exempted under this Act, and except for employment on a farm or market garden or in private domestic service, no person over 18 years of age is to be employed for less than \$12 per week of 48 hours, or 25 cents per hour in any city, in the municipalities of St. James, St. Vital, Fort Garry, Tuxedo, East Kildonan, West Kildonan, Old Kildonan, Brooklands, Transcona, or at any summer resort during the months of June, July, August or September; or for less than \$10 per week of 48 hours or 21 cents per hour in the rest of the Province. Where board or lodging is furnished by the employer, not

more than \$2.50 per week for lodging, \$4 per week for board or \$6.50 per week for both may be deducted from wages.

On March 1, 1935, an Order was made governing employment of (1) "Men performing work generally done by boys," (2) "Part-time and piece-work," (3) "Employment and apprentices," and the Order applies to all previous Orders of the Minimum Wage Board.

In regard to (1) the occupations are: delivering telegrams and messages, advertising matter, parcels on foot or bicycle; office boys; shining shoes; delivering newspapers; setting up bowling alley pins; similar work when ruled under this Order by an inspector of the Bureau of Labour. The minimum rates for a week of 48 hours are as follows:

	Per week
First six months.. . . .	\$ 8
Second six months.. . . .	9
After one year.. . . .	10

In regard to (2) the employee must be paid at least the minimum rate for all time during which he must be available for duty. He shall be paid for not less than four consecutive hours in any day required for duty.

In regard to (3), wages of indentured apprentices may supersede minimum rates if copy of indenture is filed with and approved by the Board, provided that the wages paid are not less than those established for persons under the age of 18 years in the industry.

#### *Taxicab Act of Manitoba, 1935*

This act applies only to taxicabs in Greater Winnipeg. A minimum wage of \$15 per week is fixed for drivers employed by the week, and \$1.40 per day for drivers employed otherwise. If latter are on duty more than four hours in any one day they are to be paid at least \$1.40 for such day, and not less than 50 cents per hour for each additional hour. Provided the minimum wage is not reduced, the Municipal and Public Utility Board may vary the hours under changed conditions.

#### *Fair Wage Schedule for Public and Certain Private Construction Works in Manitoba*

Under the authority of the Fair Wage Act of Manitoba, 1916, the provincial Minister of Public Works approved a schedule effective June 15, 1935, establishing the minimum rates per hour and the maximum working hours applicable on public works for building construction under contract and on private works as described in the Act.

"Private Works," as defined by the Act "means the building, construction, remodeling, demolition, or the repairing at a cost of all work done irrespective of the number of contracts made exceeding one hundred dollars,

of any building or construction work within the Greater Winnipeg Water District or any city or town which has a population exceeding two thousand, or any other portion of the Province to which the provisions of this Act are extended by the Lieutenant-Governor in Council, but shall not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant thereof if no more than three men

are employed in addition to the regular maintenance staff, if any, and if such work be not undertaken with a view to sale or rental of the property and shall not include work which is done by a maintenance man, or men, employed by the month."

The accompanying schedule has been in effect since June 15, 1935, on "Public Works" and on "Private Works."

Operating engineers on construction—							
(a) Engineers in charge of machines of three or more drums.....	.85	.75	48				

Rule—All men hired in Winnipeg to go into the country to work on buildings shall be paid the city schedule rate excepting where other definite agreements are made.

## SASKATCHEWAN

Under the Minimum Wage Act, an Order in Council may declare that the provisions of the Act apply to male employees in shops and factories.

*The Coal Mining Industry Act* of Saskatchewan which was proclaimed in force on April 15, 1935, empowers the Lieutenant Governor in Council to establish standard hours of labour and minimum wages for the persons employed in the industry.

*The Public Services Vehicles Act* of Saskatchewan was amended granting the Highway Traffic Board the power to regulate the wages and hours of drivers of public service and commercial vehicles.

No action with reference to male employees under these provisions has been reported.

## ALBERTA

The Factories Act, 1926, provides that wherever a minimum wage has been fixed for female workers in any class of employment, no male worker (except indentured apprentices) may be employed in such class of employment at a less wage. (The table on minimum wage-rates for women in Alberta is given above.)

*The Industrial Standards Act of Alberta, 1935*, is similar to the Industrial Standards Act of Ontario which is noted above. The text of the Act was published in the *LABOUR GAZETTE* June 1935, page 534. Under this Act, only one schedule had been made obligatory by an Order in Council up to the end of 1935, as follows:

**PLUMBERS, EDMONTON.**—The schedule in effect under the Act (*LABOUR GAZETTE* September, 1935) provides for an 8 hour day and a 40 hour week and for a minimum wage of 95 cents per hour for journeymen plumbers and steamfitters in Edmonton and surrounding district.

## BRITISH COLUMBIA

Under the Female Minimum Wage Act 1934, it is provided that where a minimum wage has been fixed for employees in any industry, business, trade or occupation, no male person over 18 years of age may be employed in such work usually done by female employees at less than the minimum wage fixed for such female employees. Similarly where such a rate has been fixed for female employees under 18 years of age, no male employee under 18 years may be employed at a less wage. The table showing minimum rates for female employees in British Columbia is given above.

The Hours of Work Act, 1934, continues the provisions of the previous statute for a maximum 8 hour day in specified industries, except in those cases where, by custom or agreement, hours are less than 8 on some days, in which case hours on other days may be increased up to 9, but in no case to more than 48 per week.

Under the Male Minimum Wage Act, 1934 (*LABOUR GAZETTE* June 1934, page 510), minimum rates of wages in various industries and occupations have been established by the Board of Industrial Relations. This Act applies to all employees and their employers in any industry, business, trade or occupation except farm labourers and domestic servants. In the case of handicapped, part-time and apprenticed employees, the Board may authorize the payment of a wage less than the fixed minimum rate, and also may define the number of such employees to whom wages lower than the minimum may be paid. In 1935, an amendment to the Act authorized the Board to establish minimum wages and working conditions for male employees under 21 years of age. The following table shows rates in effect under regulations made under the Male Minimum Wage Act:

## MINIMUM WAGE RATES FOR MALE EMPLOYEES IN BRITISH COLUMBIA

Industry	Wages per hour
	\$
<b>Logging Industry</b> (includes the cutting of poles, ties, shingle-bolts, mining-props and piles, and all operations in or incidental to driving, rafting and booming) (a) (1):	
Grade and track occupations.. . . .	.37½
Cook and bunk-house occupations.. . . .	2.75 per day
Making of shingle bolts (felling, bucking and splitting)..	1.30 per cord
All other employees—	
East of Cascade Mountains.. . . .	.35
Rest of province .. . . .	.40
<b>Sawmill Industry</b> (includes sawmills and planing mills) (a) (b) (3) .. . . .	.35
<b>Shingle Industry</b> (excludes shingle-bolt operations (3) .. . . .	.40
<b>Box Manufacturing Industry</b> (wooden boxes) (b) (2):	
Adult workers.. . . .	.35
Workers over 18 and under 21 years of age .. . . .	.25
<b>Woodworking Industry</b> (includes the making of sash and doors, cabinets, show cases, office and store fixtures, wood furniture and general millwork):	
Adult workers.. . . .	.35
Workers over 18 and under 21 years of age.. . . .	.25
<b>Baking Industry</b> (4):	
Adult workers.. . . .	.40
Workers of 18 years of age.. . . .	.25
Workers of 19 years of age.. . . .	.30
Workers of 20 years of age.. . . .	.35
<b>Fruit &amp; Vegetable Industry</b> (includes all canning, preserving, drying, packing, etc. of any kind of fruit or vegetable) (c) (d):	
Adult persons:	
Up to 10 hours.. . . .	.35
Over 10 and up to 12 hours.. . . .	.52½
Over 12 hours in any one day.. . . .	.70
Male persons under age of 21 years:	
Up to 10 hours.. . . .	.25
Over 10 and up to 12 hours.. . . .	.37½
Over 12 hours in any one day.. . . .	.50
<b>Construction Industry:</b>	
In Vancouver, Victoria, New Westminster, Nanaimo, Prince Rupert, Esquimalt, Oak Bay, Saanich, West Vancouver, Burnaby and North Vancouver:	
Adult persons.. . . .	.45
Male persons over 18 and under 21 years of age.. . .	.35
Rest of province:	
Adult persons.. . . .	.40
Male persons over 18 and under 21 years of age.. . .	.30
<b>Shipbuilding</b> (e):	
Male persons over age of 21 years employed as ship-carpenters, shipwrights, joiners, boat builders, or wood-caulkers..	.67½
Male persons under 21 years of age.. . . .	.50
<b>Transportation Industry</b> (other than by rail, water or air):	
(All employees and every male person under 21 years of age) (f) (6):	
Drivers of motor-vehicles of 2,000 pounds net weight or over and of horse-drawn vehicles (other than bread or milk retail deliverymen):	
Week consisting of not less than 40, not more than 50 hours.. . . .	.40
Week consisting of not less than 40 hours.. . . .	.45
For every hour in excess of 50 and up to and including 54 hours per week.. . . .	.60

## MINIMUM WAGE RATES FOR MALE EMPLOYEES IN BRITISH COLUMBIA—(Continued)

Industry	Wages per hour
	\$
<i>Transportation Industry</i> (other than by rail, water or air)— <i>Concluded</i>	
(All employees and every male person under 21 years of age) (f) (6)	
— <i>Concluded</i>	
Drivers of motor-vehicles of less than 2,000 pounds net weight (other than bread or milk retail deliverymen and motor-cycle drivers):	
Week consisting of not less than 40, not more than 50 hours. . . . .	.35
Week consisting of not less than 40 hours. . . . .	.40
For every hour in excess of 50 and up to and including 54 hours per week. . . . .	.52½
Motor-cycle operators:	
Week consisting of not less than 40, not more than 48 hours. . . . .	.25
Week consisting of less than 40 hours. . . . .	.30
Bicycle riders and foot messengers:	
Week consisting of not less than 40, not more than 48 hours. . . . .	.17
Week consisting of less than 40 hours. . . . .	.20
Swampers and helpers:	
Week consisting of not less than 40, not more than 50 hours. . . . .	.35
Week consisting of less than 40 hours. . . . .	.40
For every hour in excess of 50, up to and including 54 hours per week. . . . .	.52½
Drivers of retail milk or bread delivery vehicles. . . . .	.40
<i>Bus drivers</i> (all employees and every male person under 21 years of age in charge of or driving motor vehicle with seating accommodation for more than 7 passengers used as a public conveyance for which service a charge is made in Victoria, Esquimalt, Oak Bay and Saanich):	
Week consisting of not less than 40, not more than 50 hours. . . . .	.45
Week consisting of less than 40 hours. . . . .	.50
Every hour in excess of 9 hours in any one day or 50 hours in any one week. . . . .	.67½
<i>Taxicab Drivers</i> in Vancouver, Victoria, Esquimalt, Oak Bay and Saanich, (5):	2.50 per day.
<i>Mercantile Industry</i> (Wholesale and retail establishments), (g) (7):	
Employees working 40 or more hours per week. . . . .	15.00 per week
Employees working less than 40 hours per week. . . . .	.40 (minimum 1.60 per day)
Male persons over 18 and under 21 years of age working more than 40 hours per week. . . . .	9.00 per week 1st 3 mos. to
	12.75 after one year
Male persons over 18 and under 21 years of age working less than 40 hours per week. . . . .	.25 1st 3 mos. to .40 after one year (Minimum of 1.25 per day)
<i>Barbering</i> (excludes beauty-parlours or hairdressing shops patronized by women and children only):	
Employees working more than 40 hours per week. . . . .	15.00 per week
Employees working less than 40 hours per week. . . . .	.40
<i>Elevator Operators:</i>	
Every Operator over the age of 18 years. . . . .	.29½ or 14.00 per week

## MINIMUM WAGE RATES FOR MALE EMPLOYEES IN BRITISH COLUMBIA—(Concluded)

Industry	Wages per hour
	\$
<i>Janitors</i> (includes also every employee and every male person under the age of 21 years employed as janitor, janitor-cleaner or janitor-fireman):	
Janitor residing on premises apartment building of over 50 suites ( <i>h</i> ) . . . . .	125.00 per month
Janitor residing on premises apartment building of not more than 50 and not less than 25 suites ( <i>h</i> ) . . . . .	100.00 per month
Janitor residing on premises apartment building of not more than 24 and not less than 13 suites ( <i>h</i> ) . . . . .	75.00 per month
Janitor of apartment building of less than 13 suites for each hour of work actually performed according to a written agreement between employer and janitor . . . . .	.35
All other janitors. . . . .	.35
<i>Stationary Steam Engineers (i) (8):</i>	
With certificate of competency under Boiler Inspection Act. . . . .	.50
With special or temporary certificate. . . . .	.40

## EXCEPTIONS IN MINIMUM WAGE ORDERS

(a) In district known as British Columbia Census Division No. 1, (southeast mountain area) a maximum sum of \$1.25 per day for board and lodging may be deducted from wages paid to all employees.

(b) A number not exceeding 25 per cent of the total number of employees may be employed at less than the minimum rate but at not less than 25 cents per hour.

(c) The number of male persons under the age of 21 years shall not exceed 15 per cent of the whole number of employees.

(d) Employees packing or sorting products damaged by frost where such work is done by the grower, are exempt from the Order.

(e) Number of male persons under 21 years of age shall not be in excess of 10 per cent of total number of all male employees.

(f) If vehicle owned by operator, reasonable costs of operation to be paid in addition to the minimum wage. Uniforms, if required, to be furnished free of charge to the employee. Waiting time to be paid according to the minimum rate.

(g) Persons selling Christmas cards from door to door were excluded from October 17, 1935 to December 31, 1935.

Employees in retail stores working extra hours on certain days in December 1935 as permitted [see footnote (7)] were to be paid for overtime at a rate of one and a quarter the regular wage received.

(h) Not more than \$20 may be deducted as rent for a suite of 2 rooms and bath, not more than \$5 for each additional room. Not more than \$4 may be deducted for electricity and gas if no meters are installed.

(i) Does not apply to steam engineers in apartment buildings who are to receive wages not less than those fixed for janitors.

## EXCEPTIONS IN REGULATIONS UNDER HOURS OF WORK ACT

(1) Persons employed in booming operation, transportation of workmen, logs or supplies, or in operation or upkeep of donkey engines; or in cook or bunk houses, are exempt in case of extraordinary conditions. Watchmen employed in camps where operations are entirely suspended are exempt from minimum wage orders.

(2) Persons employed in the manufacture of wooden containers for fish, fruit and vegetables during June to September inclusive may work such hours in excess of 48 hours as may be necessary to fill urgent orders.

(3) 54 hours per week maximum East of Cascade Mountains except night shifts for which maximum is 48 hours.

(4) Deliverymen may work 54 hours per week.

(5) Not included in the Hours of Work Act or subsequent regulations.

(6) Employees (other than bicycle riders and foot-messengers, motor-cycle riders and retail milk deliverymen) are permitted to work 6 hours in excess of the 48 hour limit, provided that not more than 10 hours are worked in any one day. Retail milk deliverymen are permitted to work 15 hours in excess of the weekly limit, provided that over a period of 7 weeks, not more than 378 hours are worked nor more than 10 hours in any one day.

(7) On the 21st, 23rd and 24th days of December, 1935, persons employed in retail establishments may work 3 hours in excess of the 8-hour day. From November 28, 1935 to December 31, 1935, persons employed in mail order, shipping and delivery in retail establishments may work any overtime required to cope with seasonal demands but in no case, except during the week ending December 21, 1935, may the weekly limit of 48 nor the daily limit of 10 hours be exceeded.

(8) Overtime of  $1\frac{1}{2}$  hours per day may be worked by engineers, firemen and oilers in industrial undertakings using steam as motive power and operated with a single shift.

## PRICES IN CANADA AND OTHER COUNTRIES DURING 1935\*

**A**N upward movement in wholesale prices was recorded in most countries during 1935. In many this was a continuation of the rise which had commenced in 1932 and 1933 following a world-wide decline of several years duration, particularly since 1929. In some countries, notably France, Belgium, Poland and Switzerland, the low point of the decline was reached only during the first half of 1935. Considerable industrial and trade expansion has occurred in most of the principal countries since 1932 except in those countries in Europe with currencies still on the gold basis. This resulted in increased demand for primary products and these have shown the greatest advances in price though other commodity groups have advanced also. The cost of living has been irregularly upward in many countries since 1933, due in large part to the higher cost of foods.

### The Movement of Retail Prices and Cost of Living in Canada during 1935

Table I brings down to the end of 1935 the index number of changes in the cost of living in Canada, based on prices in 1913 as 100, and shows the percentage changes in the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

This index number was practically unchanged during the first half of 1935, the advance of slightly more than 3 per cent during the year being confined almost entirely to the last six months. The increase was

due mainly to advances in prices of foods, though there were increases also in clothing and rent and a seasonal increase in the autumn in fuel. The movement of retail prices as indicated by this index was downward from the beginning of 1930 until June and July, 1933, during which period there was a total decrease of 25 per cent, the index being down from 160 to 120. At the end of 1935 the index was 127 or 6 per cent above the low point of July, 1933.

The food group has been the most important factor in the movement of the cost of living index since the beginning of 1930, the decrease between January of that year and February, 1933, the low point for the group, being 44 per cent, and the subsequent advance to the end of 1935 being 22 per cent. During the early months of 1935 the movement was within narrow limits, decreases in the prices of dairy products being offset by advances in meats, but between May and December there was an advance in the group of 9 per cent, due in large part to higher prices for eggs, butter, lard, and potatoes. Eighteen of the items in the list of twenty-nine foods were higher at the end of the year than at the beginning and nine were lower.

During 1935 the index for fuel and lighting declined in the spring and advanced in the fall due mainly to seasonal changes in the prices of anthracite coal and wood. Gas and electricity showed few changes during the year, which ended with the index for this group at a somewhat lower level than at the beginning.

In rent, the unbroken decline which commenced in 1931, ended in the spring of 1934, a fall of 20 per cent having been recorded and the recovery which commenced in the autumn of that year was continued in 1933, though the increase during the year was slight.

The index for the clothing group was at the same level at the end of the year as at the beginning, there being a slight decrease in the spring and an advance in the autumn. Next to foods, this group has shown the greatest changes, declining 31 per cent between the beginning of 1930 and the summer of 1933, since when the advance has been  $7\frac{1}{2}$  per cent.

Tables II and III show the cost of a weekly family budget of food, fuel and light-

\* The Dominion Bureau of Statistics issues reports on prices with comprehensive figures, as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Price and Price Indexes (Canada and other countries).

\* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

ing, and rent in terms of the average prices for the Dominion and by groups for each province.

Beef prices were somewhat higher month by month during 1935 than in the previous two years but were much below the levels of 1930 and previously. As usual the high price for the year was in the summer, sirloin steak advancing from an average of 20 cents per pound in January to 25·3 cents in July and then declining to 22·5 cents in December. The average price for the year was 23·1 cents per pound as compared with 21·4 cents in 1934, 21 cents in 1933 and 35·6 cents in 1930. The price of leg roast of mutton moved between a low of 19·7 cents per pound in January and a high of 21·7 cents in June, the average for the year being slightly higher than in 1933 or 1934. Pork prices did not show a wide range during 1935, and were slightly higher during most of the year than in 1934, which year had shown a very marked recovery from the low levels prevailing during the early months of 1933. Fresh leg roast was 20·8 cents per pound in December, 1935, 23·1 cents in September, and 19·1 cents in December, 1934, as compared with 12·1 cents in March, 1933. Bacon prices moved within narrower limits than in the two years preceding, the Dominion average ranging between 32·3 cents per pound in January and 30 cents in December, as compared with a range in 1934 of 21·6 cents per pound in January, and 36·2 cents in October, and in 1933 of 17·2 cents in March, and 21·1 cents in December. The price of lard advanced from an average of 14·6 cents per pound in January to 18·3 cents in December as compared with a high price for 1934 of 14·7 cents per pound in December.

Cold storage holdings of eggs were much lower during the last months of 1935 than in the corresponding months of 1934, and prices tended upward toward the end of the year as compared with the last months of 1934. Fresh eggs averaged 40·7 cents per dozen in January, 1934, 22·3 cents in May, and 41·4 cents in December. In 1935 the low price was 22 cents per dozen in May and the high 43·5 cents in December.

Production of creamery butter in 1935 was at the highest level on record, exceeding the output for 1934, the previous record. Prices were lower in the early months of 1935 than in the same period in 1934, but during the autumn the condition was reversed, the Dominion average price of 30·4 cents per pound in December, 1935, being about 5 cents per pound higher than in December, 1934. The price of cheese has shown little improvement during the last four years, the yearly average approximating 20 cents per pound.

The price at the beginning of 1930 was 33 cents per pound.

The price of flour, reflecting the recovery in wheat prices, was at a slightly higher level during 1935 than in the previous year which had shown some advance from the low levels at the beginning of 1933. Bread prices, also, were advanced in some localities during the year, the Dominion average price in December being fractionally higher at 6·1 cents per pound. The yield of potatoes in 1935 has been estimated to be about 19 per cent lower than in 1934. This condition was reflected in the price which averaged \$1·21 per ninety pounds in December, 1935, as compared with 72·3 cents in December, 1934. The Prairie Provinces produced higher yields than in 1934, and prices there at the end of 1935 were much lower than in other parts of the Dominion. The price of sugar was slightly downward at the end of the year at an average of 6·2 cents per pound in December.

In fuel, United States anthracite coal showed a seasonal fall in the spring of about \$1 per ton which was only partially recovered in the autumn, the average price in December being \$14·83 per ton as compared with \$15·21 in January. Rent for workmen's houses averaged slightly higher increases having been reported from several cities during the year.

### Wholesale Prices in Canada, 1935

The accompanying tables, V, VI and VII, show the index numbers of wholesale prices in Canada calculated by the Dominion Bureau of Statistics, the commodities being arranged according to "chief component materials," in table V, according to "purpose," in table VI, and according to "origin," in table VII.

The movement of wholesale prices during 1935 as measured by this index number was slight, the high point reached in October being only 2·4 per cent above the low reached in January. At the end of the year the index was 2·1 per cent higher than in December, 1934, and 14·3 per cent above the lowest level of recent years reached in February, 1933. Both consumers' goods and producers' goods were slightly higher at the end of the year than in December, 1934, the increase in the former group being in foods and in the latter chiefly in producers' equipment and in materials for the furs and leather goods industries, the metal working industries and the meat packing industries. Raw and partly manufactured goods advanced about 5 per cent and fully and chiefly manufactured goods less than 1 per cent.

In the grouping according to chief component materials the Animals and their Prod-

\*\* An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent.

† Kind most sold since October 1922.

ucts group and the Non-Ferrous Metals group were substantially higher, the former being up 10 per cent above the figure for December, 1934, chiefly because of higher prices for live stock, meats, eggs, hides, leather and furs. The latter group was 12 per cent higher at the end of 1935 than in December, 1934, mainly because of higher prices for copper, lead, zinc and their products, and for silver, even in spite of the drastic decline in the price of silver following curtailment of buying by the United States Treasury. The

Vegetable Products group was slightly higher, fruits, vegetables, vegetable oils and rubber and its products being up in price, while grains, flour and other milled products and sugar were lower. The Wood and Wood Products group and the Iron and its Products group were also somewhat higher, the largest increase in the former being in furniture prices and in the latter in the price of scrap iron. The Textile Products group, the Chemicals and Allied Products group and the Non-Metallic minerals group were lower at the end of the

\* Preliminary figures for 1935.

## Prices in Great Britain and Other Countries

The accompanying tables numbered VIII to XXIII give index numbers of retail prices of foods and cost of living and of wholesale prices in several of the principal commercial and industrial countries for 1934 and for preceding dates to show the movements of prices in comparison with those in Canada. The information in the following tables is obtained for the most part from publications of the governmental or other authority compiling the index number, but in some cases from the Monthly Bulletin of Statistics of the League of Nations, Geneva, which bulletin publishes figures for other countries. The quarterly supplement to Prices and Price Indexes issued by the Dominion Bureau of Statistics, Ottawa, also contains index numbers for other countries.

### Great Britain

**COST OF LIVING.**—The index number of the Ministry of Labour (Table X) is "designed to measure the average increase in the cost of maintaining unchanged the pre-war standard of living of the working classes." This index number moved downward during the first months of the year until April, and in June an upward movement began. The index number in November, 1935, was 2 per cent higher than a year previous. The general index number followed closely the movement in food prices, as other groups showed only small fluctuations, rent increasing slightly, clothing and sundries decreasing slightly, while the fuel and light group was at the same level as a year ago.

**WHOLESALE PRICES.**—Except for small reverses in two months, the Board of Trade index number (Table XI) advanced slowly and steadily throughout the year and for November, 1935, the advance was 4.2 per cent over the same month of 1934. In these twelve months, food advanced 2 per cent and industrial materials 5.3 per cent. The most notable advances in this period were in the non-ferrous metal group which increased 16.8 per cent, wool which advanced 13.1 per cent, "other textiles" which advanced 18.1 per

cent due entirely to the large increases in hemp and jute prices, and chemicals and oils which advanced 7.3 per cent.

### France

**COST OF LIVING.**—Table XII shows that the index number of the cost of living in Paris has fallen each quarter from the third quarter of 1933 to the same quarter of 1935. Each of the five groups were also at a lower level than in the same period in 1934.

**WHOLESALE PRICES.**—In contrast with the downward movement in the cost of living, wholesale prices (Table XIII) advanced between November 1934 and November 1935 by 1.7 per cent, due to higher prices for industrial materials, although foods were lower.

### Germany

**COST OF LIVING.**—The cost of living (Table XIV) varied only slightly from month to month during 1935. In November it was 0.5 per cent higher than a year previous, with very slight increases in all groups except heat and light.

**WHOLESALE PRICES.**—Wholesale prices (Table XV) also advanced during the year, a total of 2 per cent up to November, with increases in each of the four main groups.

### United States

**COST OF LIVING.**—Except for slight decreases in the fuel and light group and the miscellaneous group, all groups showed advances and the total index number advanced slightly over 2 per cent between November 1934 and October 1935 (Table XXII). The principal advance was in food prices amounting to 6.7 per cent.

**WHOLESALE PRICES.**—Between October 1934 and October 1935, wholesale prices (Table XXIII) advanced 5.2 per cent. The most notable changes in this period were advances of 10.8 per cent in farm products, 13.6 per cent in foods, 11.7 per cent in hides and leather products and 5.1 per cent in chemicals and drugs.

(a) Average for year. (b) First of month. (c) Middle of month until August, 1933; thereafter this index number is calculated fortnightly and the figure given in this table is for the date nearest to the middle of the month. (d) Cost of weekly family food budget. (e) Figure for previous month. (f) Figure for following month. (g) Quarter beginning in specified month (h), Highest category workmen's household. (i) December. (j) To end of 1931, 13 articles; from 1932, 34 articles. (k) Revised.

## UNEMPLOYMENT AND RELIEF IN CANADA

IN order to give the public as complete a picture as possible of the unemployment and relief situation in the Dominion, and the development of the federal government's program in co-ordinating national effort to meet the challenge, there is published herewith an analysis of the problem as presented in the House of Commons during the debates on Bill 19 (The Unemployment Relief and Assistance Act) and Bill 14 (The National Employment Commission Act), respectively.

The presentation is dealt with under four main sections as follows:—

- I. The legislative measures dealing with employment, unemployment, and relief of distress.
- II. The Minister of Labour's explanatory review of Bill 19 (The Unemployment Relief and Assistance Act).
- III. Analysis by the Minister of Labour of the unemployment and relief situation in Canada and measures underway to cope with it.

### I. Legislative Measures Dealing with Employment, Unemployment and Relief of Distress

The legislative program of the Government for the fiscal year 1935-36 includes three main measures which fall under the general heading of employment and unemployment, and the relief of distress whether due to farming conditions, unemployment or other causes. These three measures are:

- (1) The National Employment Commission Act, 1936.
- (2) The Unemployment Relief and Assistance Act, 1936.
- (3) Appropriations to supplement the commitments authorized under (2).

Prior to the adjournment of Parliament for the Easter recess on April 8, the National Employment Commission Act, 1936, had been advanced through all stages in both House, and receiving Royal Assent, had become law. The Unemployment Relief and Assistance Act, 1936, had been introduced in the House of Commons, and after having been read a second time, stood over for further consideration following the re-convening of the House on April 20. Following the same date, the appropriations necessary for relief and employment purposes are to be presented to Parliament.

IV. Statement by Prime Minister on the functions of the National Employment Commission.

To preserve continuity, the interpolations in debate are omitted.

The present article was prepared following the Easter adjournment of Parliament on April 8. On April 20, the House of Commons reassembled and on April 22 the Bill to provide for the Unemployment Relief and Assistance Act, 1936, was given third reading in the House and at the time of going to press it stands for consideration by the Senate. Likewise, on April 22 the Honourable C. A. Dunning, Minister of Finance, introduced into the House of Commons supplementary estimates which included \$30,418,000 for works already in progress, which had been undertaken for the main purpose of stimulating employment, \$28,430,000 for other projects with a like purpose, and \$26,000,000 for grants in aid to the provinces with respect to direct relief—a total of \$84,848,000 under the heading of employment and relief. These estimates now await the consideration of Parliament.

#### (1) *The National Employment Commission Act, 1936*

The preamble of this Act, after asserting that unemployment has been Canada's most urgent national problem during several years, proceeds to suggest that it is essential that steps be taken to find ways and means of providing remunerative employment, thereby reducing the numbers who are on relief. This purpose may best be accomplished, it is further suggested, by a nation-wide co-operative effort, fostered by a representative national commission, to enlist the co-operation of the provinces, the municipalities and other agencies, including organizations of employees and employers, in the administration of unemployment relief, and in an endeavour to provide work for the unemployed.

To accomplish these desiderata it is provided that there shall be established the "National Employment Commission," consisting of not more than seven members, one member to be chairman, a second, vice-chairman. Three members shall form a quorum, and the headquarters of the Commission shall be at Ottawa.

The Commission is instructed to carry out a national registration and classification of persons on relief, and in addition to study and

report and recommend to the Minister of Labour upon the following:

- (a) The conditions under which the provinces may obtain grants for relief purposes.
- (b) Means of mobilizing and co-ordinating both state and voluntary agencies for relief, and of auditing expenditures where necessary.
- (c) Proposals for programs of public works and other projects aimed at providing employment, whether the works involved are Dominion, provincial, municipal or other.
- (d) Co-operative measures with commercial and industrial groups to maintain or increase employment.
- (e) An apprenticeship system in industry.
- (f) Provision of employment for disabled persons, and in co-operation with the Veterans' Assistance Commission, efforts to secure suitable employment for ex-soldiers.
- (g) Comprehensive measures constituting a long-range plan of national development which may be proceeded with or not, as conditions warrant.

Under the direction of the Minister the Commission may take steps to ensure the publicity necessary in the carrying out of the Act, and to supervise the expenditure of funds voted by Parliament for relief and providing employment, while it may be assigned administrative duties incidental to these matters by the Governor in Council.

The Governor in Council may name a National Advisory Committee to include representatives of industrial, occupational, philanthropic and social service organizations, to assist the Commission. Special sub-committees may be appointed from this Committee to be designated the "Women's Employment Committee" and the "Youth Employment Committee," to report upon the provision of employment for women and young persons, respectively: these two sub-committees are subject to appointment by the Minister of Labour. As a further aid in its work the Commission itself, with the approval of the Minister, may appoint local advisory committees.

While the Commissioners may be paid such fees or compensation as the Governor in Council may fix, the members of the Committees shall be allowed only such travelling and living expenses as their serving may entail. The Governor in Council may make regulations necessary to the carrying out of the Act.

(2) *The Unemployment Relief and Assistance Act, 1936*

As previously mentioned, the Unemployment Relief and Assistance Act, 1936, is still under consideration by the House of Commons as Bill No. 19, and therefore is subject to modification by Parliament.

The Preamble states that it is "in the national interest that the Dominion should co-operate with the provinces of the Dominion and other organizations and individuals in their endeavours to expand industrial employment, to foster agricultural settlement and re-settlement, to conserve and develop natural resources and to construct and to assist in the construction of public works, for the purposes, amongst other things, of further accelerating the recovery of trade, industry and employment and thereby lessening the present governmental burdens consequent upon unemployment"; and proceeding upon this premise the Act proceeds to vest in the Governor in Council authority to:

- (a) Proceed with works and undertakings in the general interest of Canada, giving employment thereon to relief recipients in the province where such works are located. Where any work is under provincial jurisdiction, all contracts shall be approved by the Minister of Labour and work supervised by an engineer of the Dominion Government.
- (b) Make agreements with the provinces for relief purposes, providing for Federal financial assistance.
- (c) Make agreements with corporations, partnerships or individuals engaged in industry respecting the expansion of industrial employment.
- (d) Renew or consolidate loans, advances or guarantees made under previous Relief Acts.
- (e) Make regulations under the Act.
- (f) Appoint such staff as may be necessary.

For purposes of general administration the Act comes under the Minister of Labour.

From 1930 to 1935, Parliament annually passed a Relief Act, for the general purpose, *inter alia*, of assisting in the relief of distress. In so far as the earlier Acts were directed toward this object, namely the relief of distress, the Act of 1936 may be considered as a continuing Act, but a new and important feature has been added in this year's measure in that expenditures are to be limited to specific relief appropriations which Parliament will be asked to approve.

### (3) Appropriations

The appropriations which Parliament will be asked to provide to supplement the commitments authorized under the Unemployment Relief and Assistance Act, 1936, are intended to be ample to cover what the program of the Government foreshadows in the way of relief assistance and the provision of employment, and the amount will become known through the introduction of the legislation. Speaking in the House of Commons, the Prime Minister, the Right Honourable W. L. Mackenzie King, has already indicated that the total figure will run well into millions of dollars.

#### Inter-Relation of Measures regarding Relief and Employment

To understand the relationship among the three measures above described, it is helpful to consider the Unemployment Relief and Assistance Act, 1936, as occupying a middle position between the other two. It is proposed that the Commission shall formulate plans, based upon co-operative effort among the Governments—Dominion, provincial and municipal—as well as quasi-public or private agencies and bodies able to render assistance in combating the conditions which give rise to distress. The appropriations made by Parliament will provide the Federal financial contribution to the planned program. The Relief and Assistance Act, 1936, gives the legal authority to apply the money voted to the purposes devised under the National Employment Commission Act, 1936, subject to the specific approval of the House of Commons where agreements are involved.

#### Grants-in-Aid to the Provinces for Relief Purposes

Under Order in Council P.C. 3903 of December 19, 1935, the Dominion Government substantially increased the amounts of the grants-in-aid paid to each of the provinces to assist them in discharging their responsibilities for the relief of necessitous persons. The Order-in-Council stated that representations had been received from the provinces to the effect that the grants-in-aid previously paid were insufficient, particularly during the winter months, and that representations had been received from the municipalities that the heavy and increasing burden of relief charges had jeopardized their financial position, and in view of these considerations the Dominion Government decided to provide an increased amount to the provinces to enable them to lighten the burden upon their municipalities. The increase amounted to an addition of 75 per cent on the monthly sum

paid to each of the several provinces from the 1st of April preceding, under the Relief Act, 1935. The increase was effective from December 1, 1935, until March 31, 1936, thus raising the amounts to be paid monthly to the provinces to the following figures:

Prince Edward Island.. . . .	\$ 3,718 75
Nova Scotia.. . . .	70,000 00
New Brunswick.. . . .	43,750 00
Quebec.. . . .	875,000 00
Ontario.. . . .	1,050,000 00
Manitoba.. . . .	236,250 00
Saskatchewan.. . . .	350,000 00
Alberta.. . . .	175,000 00
British Columbia.. . . .	262,500 00

Total.. . . . \$3,066,218 75

Otherwise, the terms and conditions upon which the grants were to be paid were not varied in any important particular.

The Relief Act, 1935, was about to expire at March 31, 1936, and the Order in Council, approving the increased grants-in-aid for the four months ending with March, was likewise about to become ineffective after that date. Subsequently, the Minister of Labour announced that the Dominion Government had decided to revise the amounts of the Dominion grants-in-aid to the provinces, which had been fixed upon a winter basis, and it was proposed that the monthly grants commencing with April would be reduced by 15 per cent. The considerations which led to this action were that winter costs of relief are substantially greater than those of the spring and summer; that careful classification of relief recipients had resulted in the elimination of a considerable number of undeserving cases; and that the coming of spring would mean the resumption of relief works which would add opportunities for employment in public and private enterprises.

#### Federal Relief Camp Policy

After a careful and thorough enquiry into the relief camps operated by the Department of National Defence, the special committee which had been appointed for this purpose reported at the middle of January that it was desirable to secure employment as an alternative to the continuances of the camps, but pending the time that employment was available the cash allowance to the men should be increased. This committee consisted of Mr. R. A. Rigg, Director of the Employment Service Branch, Department of Labour; Mr. Humphrey Mitchell, of Hamilton; and Dr. E. W. Bradwin, Principal, Frontier College. Subsequently, it was announced by the Minister of Labour that the Government proposed to close out the camps

at July 1 but that starting with March 1 the men would be paid \$15 a month allowance in addition to board and lodging; this to replace the previous cash allowance of 20 cents a day, with the proviso that one-half of the total due to each man would be temporarily withheld but would be paid to him at the rate of \$4 a week after leaving camp. The Minister further announced that proposals were maturing under which the Canadian railways would engage for track labour 10,000 of the men in the camps, this being about one-half the number who were then

located in them. Further efforts would be made by the Department of Labour, the Minister stated, to find employment for the balance of the men in the camps, particularly in the farming industry and in forestry.

It may be observed that one point which has been emphasized throughout is that the railroad work to be provided for the men from the camps is to be additional to all other work the companies had otherwise proposed to carry out. Hence, no other unemployed person will be without work by reason of these men being employed by the railways.

## II. Minister of Labour's Explanatory Review of Bill 19 (Unemployment Relief and Assistance Act)

The government's program in coping with unemployment and relief (as outlined in the above review of legislation) was dealt with comprehensively in the House of Commons by the Minister of Labour, Hon. Norman McL. Rogers.

While the debate on the two major measures—Bill 14 (The National Employment Commission Act) and Bill 19 (The Unemployment Relief and Assistance Act)—overlapped somewhat, yet the line of demarcation in the intent and purpose of each was clearly defined by the Minister of Labour.

As explained by the Minister, the legislation to assist in the relief of unemployment, the promotion of agricultural settlement and rehabilitation and the development of natural resources (Bill 19) supersedes The Relief Act of 1935 which expired March 31, 1936. The scope of the new enactment was described by the Minister in the House of Commons on March 23, as follows:

"The relief of distress has always been held by the dominion to be primarily a responsibility of the provincial and municipal authorities, with the proviso that where the need for relief has been such as to place a very severe burden upon the provinces and municipalities it is proper and necessary that the dominion government should extend financial aid to the other governmental authorities. This principle we propose should be continued under the present measure. Accordingly, it provides the requisite authority for agreement between the dominion and the provinces with respect to relief measures, unemployment relief works, and loans, advances and guarantees to the provinces. With respect to dominion-provincial agreements the Bill provides the same general subject matter as heretofore. It is also proposed that the Governor in Council may enter into agreements with corporations, partnerships and individuals engaged in industry, respect-

ing the expansion of industrial employment. In addition to the provision for works and undertakings in agreement with others, authority is proposed to give the Governor in Council power to authorize dominion works and undertakings out of moneys appropriated by parliament."

There is, however, this basic difference: that the Bill "in pursuance of a policy of parliamentary control of expenditure" limits expenditures to specifically designated appropriations approved by Parliament. This was made clear by the Minister in the following extract from his presentation of the Bill in the House of Commons:

"We are dealing, after all, not with a static situation but with one that is constantly changing. We must as far as possible provide ourselves with the means of meeting eventualities. At the same time we are anxious to preserve parliamentary control of expenditures. . . . We propose rather to place definite sums in the special supplementary estimates under items which I think will reveal quite clearly the direction in which we propose to proceed now with relief work."

Continuing, the Minister emphasized that in the absence of any formula "by which we may quite suddenly bring about a liquidation of unemployment," progress must be based on "accurate knowledge of the unemployment situation in Canada." As the first step in obtaining such information, he referred to the action initiated in the Department of Labour in January last to secure a break-down of the relief recipients by classes—employables and unemployables—and by age and occupational groups.

*Relief Statistics.*—Hon. Mr. Rogers gave the following summary of those on direct relief in February, 1936.

**Direct Relief:**

Heads of families.. . .	243,003
Dependents on heads of families.. . . . .	786,679
Individual cases.. . .	51,149
Total.. . . . .	<u>1,080,831</u>

Since a distinction is made in the compilation of the statistics between those receiving relief (through the provinces and municipalities) as a result of industrial unemployment and those receiving relief in the dried-out Western areas, the following were given as the February figures for the latter:

**Direct Relief (dried-out areas):**

Heads of families.. . .	31,185
Dependents on heads of families.. . . . .	124,089
Individual cases.. . .	1,670
Total.. . . . .	<u>156,944</u>

In addition, there were listed a number of other relief classifications as follows:

Homeless persons cared for in federally operated camps and by western provinces..	31,911
Number cared for by farm placement plan.	14,169
Number given relief work on wage basis not including dependents.. . . . .	7,982
Those under the relief settlement plan.. . .	18,586

The grand total of all those receiving relief in all of the above categories as at February, 1936, was given as 1,310,423 as compared with 1,431,093 in February, 1935. (Subsequently,

in his speech at the second reading of the Employment Commission Act, the Minister gave the House a tabular analysis of the relief situation, and such statistics are presented elsewhere in this review.)

**Relief Camps.**—During its progress in committee several phases of the Bill were discussed. In particular, information was requested as to the transference of men from relief camps. On this matter Hon. Mr. Rogers observed:

"The house is already aware that under the proposed arrangement some ten thousand men now in relief camps will be taken by the railways and used on deferred maintenance work during the summer and autumn months. In the past there has always been a reduction of the camp population during the spring and summer months. The latest figures suggest that such a reduction has taken place this year, though not by any means to the same extent as during the past summer, that being due without question, I believe, to the larger wage allowance which has been in operation since the first of March, and also to the fact that it has been announced that the relief camps themselves will be closed by the first of July."

He also pointed out that "under the new relief camp policy, these men, whether they go from the camps to the railways or immediately from the relief camps elsewhere, will at least have some stake for their re-establishment." It was further understood that the normal maintenance work on the railways would be continued, and "not interfered with in the slightest degree under this proposed arrangement with the railway companies."

This Bill was still in committee when the House adjourned for Easter.

### **III. Analysis by the Minister of Labour of the Unemployment and Relief Situation in Canada, and Measures Underway to Cope With It**

A complete survey of the major factors comprising the unemployment and relief problem in Canada was given to the House of Commons on March 30, by the Hon. Mr. Rogers in moving the second reading of Bill 14 respecting the establishment of a National Employment Commission.

Introducing his subject,\* the Minister stated:

"In moving the second reading of this bill I am fully aware of my responsibility as a member of the government in commending this legislation to the favourable consideration of the house. The problem of prolonged unemployment in this and other countries is a challenge to the political

intelligence of our generation. No one can have a daily contact with that problem without realizing that upon our ability to deal with it effectively may depend the maintenance of institutions and traditions which have long been established in this country. I have no desire to exaggerate the gravity of the situation. As a matter of fact I shall point out presently that we have strong grounds for confidence as we face the immediate future. Nevertheless, even when it is conceded that there has been a perceptible improvement in economic conditions during the past year, we are still faced with the fact that the problem of unemployment remains unsolved. Moreover the resources of public finance have been impaired in the interval as a result of mounting debts and

\* In order to preserve the continuity of the Minister's statement, the interpolations are omitted.

increasing taxes which have been incurred and imposed as internal measures of defence against want and destitution. This much may be said at the outset in order to emphasize the importance of the question which is now before us for consideration.

"I do not suggest that any member of this house is wanting in a sense of obligation to find a remedy for unemployment. It is well to remember, however, that familiarity sometimes breeds indifference, and our constant companionship with unemployment and relief these past few years may lead us to accept it as a disagreeable but inevitable feature of our social environment in the post-war world. As individuals we must guard ourselves against the complacent acceptance of conditions as we find them to-day. As members of parliament and as a government the placid acceptance of present conditions would be little better than a voluntary declaration of political bankruptcy.

"There is another consideration which no one will wish to overlook at this time. Our experience of unemployment has brought home to us more forcibly than any other feature of government policy that it is the constant purpose of the state to promote the welfare of its members and that the organized power of the state should be used steadfastly towards a realization of that purpose. During the past few years Canada and other countries have suffered incalculable injury as a result of the dislocation of international trade and a very serious contraction of normal industrial activity. The victims of the depression in Canada alone may be counted by the hundred thousand. We often think and speak of this problem in statistical terms; we are compelled to do so for purposes of comparison and analysis; but behind these figures of unemployment and relief there is, as each of us well knows, the harsh reality of human privation and frustration. Even when we deal with it objectively, as we are compelled to do, we must be conscious at all times of the extraordinary patience and fortitude of those whose lot it has been to go in company with fear and pain during a period which now exceeds the duration of the world war. We could ask no higher incentive for our labours here than the remembrance of the manner in which our people generally have endured the conditions which have prevailed during these troubled and trying years. . . ."

## Broad Outline of Policy

The Minister then enumerated and discussed the broad consideration of public policy as follows:

"The principle of this bill may be expressed very briefly. We have to determine whether the abnormal conditions created by unemployment and relief require something more than the normal machinery of government to deal with them effectively. If we are agreed that the normal machinery of government is inadequate to meet the existing situation we must then consider whether a national employment commission as provided in this bill will perform a useful function as an aid to government in attacking this stubborn problem that has defied solution during the past five years.

"May I say at once that we as a government have faced these questions and have answered them in the affirmative, and I hope it may be possible to persuade the house generally that in making this decision and in bringing down this legislation we are taking appropriate measures for an organized effort to meet the most serious challenge that has confronted this country in a time of peace.

"In supporting the proposals set out in this bill, I wish to state and discuss some of the broad considerations of policy which call for the establishment of a national employment commission at this time. May I first state these considerations and then develop them in the order given:

"1. After an experience of five years we are compelled to recognize that unemployment is a persistent condition which does not respond quickly to ordinary legislative methods. This suggests the wisdom of a national survey of the entire problem as a preliminary to the formulation of long range measures to expand employment and thereby reduce the tax burden of relief.

"2. Previous administrative methods have failed to secure and utilize information respecting unemployment and relief which would make it possible to subdivide the problem into its various sections of economic and social significance.

"3. In our federal constitution there is a well established division of responsibility in relation both to the administration of relief and to the maintenance of social services. In order to avoid friction or duplication in the administration of relief it is necessary to secure a more effective and continuous co-ordination of effort in relation to the entire problem. Experience has proved the need

of some kind of nexus, or connecting link, between the various governmental agencies having a responsibility in relation to relief.

"4. The experience of the past five years has also proved beyond question that it is not within the power of government to end unemployment by its own unaided efforts. There is a growing recognition that victory over the depression and unemployment cannot be won by a pitched battle on any front, but only by a sustained campaign along the entire front of our economic life. The success of this campaign requires that the leadership of government should be supported and supplemented by the co-operative effort of organized industry and commerce, financial institutions, labour organizations and social service agencies throughout the entire dominion.

"Those, are the broad considerations of public policy upon which we believe it is possible and desirable to erect at this time a national employment commission as a means of affording advice and also of securing the co-ordination of all governmental agencies in a determined effort to deal constructively, and I trust successfully with this problem of unemployment. . . ."

### Magnitude of Problem

The extent of the problem in the Dominion is detailed by the Minister thus:

"Let me refer now to the persistence and the magnitude of the problem of unemployment and relief as it exists to-day and as it has developed during the past five years. . . .

"I have suggested that this problem of unemployment and relief is a persistent problem, and I should like to support that statement by reference to two tables which with the consent of the house I shall place

upon the pages of Hansard. First I am going to give a comparative statement of the numbers on relief in the month of February in the years 1933, 1934, 1935 and 1936. I shall give the appropriate headings and then carry the numbers across the various years I have mentioned. First I give those on direct relief, not including the dried out areas in western Canada:

#### Heads of Families

February, 1933.. . . .	259,799
February, 1934.. . . .	248,183
February, 1935.. . . .	240,051
February, 1936.. . . .	243,003

I come now to dependents on heads of families on relief.

#### Dependents on Heads of Families

February, 1933.. . . .	1,046,132
February, 1934.. . . .	859,118
February, 1935.. . . .	849,652
February, 1936.. . . .	786,679

It will be noted that there is a substantial decrease in that category. I come next, then, to individual cases on direct relief:

#### Individual Cases on Direct Relief

February, 1933.. . . .	66,760
February, 1934.. . . .	44,541
February, 1935.. . . .	47,137
February, 1936.. . . .	51,149

The totals in this category are as follows—that is, including all those on direct relief exclusive of the dried out areas:

February, 1933.. . . .	1,372,691
February, 1934.. . . .	1,151,842
February, 1935.. . . .	1,136,840
February, 1936.. . . .	1,080,831

I come now to the dried out areas in western Canada, which I think it is very appropriate to treat as a separate category. For the convenience of the house I might now place the entire table on Hansard:

#### The Dominion—Summary of Relief Statistics

	Month of February, 1933	Month of February, 1934	Month of February, 1935	Month of February, 1936*
<b>Direct Relief—</b>				
(Not including dried out areas in west)				
1. Heads of families.. . . .	259,799	248,183	240,051	243,003
2. Dependents on heads of families.. . . .	1,046,132	859,118	849,652	786,679
3. Individual cases.. . . .	66,760	44,541	47,137	51,149
4. Total number.. . . .	1,372,691	1,151,842	1,136,840	1,080,831
<b>Relief in Dried Out Areas in West—</b>	(A)	(A)	(B)	(B)
5. Heads of families.. . . .	16,273	35,491	33,985	31,185
6. Dependents on heads of families.. . . .	73,228	159,709	138,984	124,089
7. Individual cases.. . . .	82	178	5,243	1,670
8. Total number.. . . .	89,583	195,378	178,212	156,944
9. Homeless persons cared for in federally operated camps and by western provinces.. . . .	53,883	40,762	34,748	31,911
10. Number cared for by farm placement plan.. . . .	9,867	14,808	12,009	14,169
11. Number given relief work on wage basis (not including dependents).. . . .	103	74,428	51,055	7,982
<b>Relief Settlement—</b>				
12. Settlers and dependents approved to end of month.. . . .	7,715	13,841	18,229	18,586
13. Total number assisted including dependents (except for line 11) and those receiving partial relief.. . . .	1,533,842	1,491,059	1,431,093	1,310,423

\*Preliminary figures. (A) Saskatchewan only. (B) Manitoba, Saskatchewan and Alberta.

### Disbursements under Relief Acts

Some idea of the cost of relief is indicated in the Minister's financial analysis. In a tabular summary of the expenditures by the Dominion government under the various relief Acts since 1930, it was shown that the total was just under \$200,000,000. He explained

that this amount does not include expenditures under the public works construction Acts and supplementary Acts, nor does it include loans to the provinces: it is only the total expended in disbursements under the relief Acts. The table showing these disbursements (by provinces) under the various relief Acts is as follows:

As at March 24, 1936.

#### Dominion Unemployment Relief

##### Disbursement Summary

All Relief Acts by Provinces (not including Public Works Construction and Supplementary Acts)

Province	Paid to provinces	Federal works in province	Total
Prince Edward Island.. . . .	\$ 764,512 99	\$ 8,296 12	\$ 772,809 11
Nova Scotia.. . . .	5,271,040 61	1,098,246 04	6,369,286 65
New Brunswick.. . . .	3,402,554 24	1,180,664 10	4,583,218 34
Quebec.. . . .	34,247,181 63	3,304,914 32	37,552,095 95
Ontario.. . . .	60,618,808 36	9,403,299 64	70,022,108 00
Manitoba.. . . .	13,847,789 26	2,012,132 88	15,859,922 14
Saskatchewan.. . . .	23,823,352 63	2,119,325 21	25,942,677 84
Alberta.. . . .	10,085,311 08	3,053,334 35	13,138,645 43
British Columbia.. . . .	16,304,749 10	6,308,928 30	22,613,677 40
Total.. . . .	\$168,365,299 90	\$28,489,140 96	\$196,854,440 86
Not allotable to specific provinces.. . . .			2,231,267 36
Administration.. . . .			502,050 79
Grand total.. . . .			\$199,587,759 01

### Trend of Employment

The trend of employment in Canada was next dealt with by the Minister who charted its course from compilations of the Dominion Bureau of Statistics and the Department of Labour. Delving into this factor, the Minister continued:

"There are two statistical indices showing the trend of employment and industry throughout Canada, both of which are now available over a considerable period of years. One is the series of index numbers of employment in industries other than farming, fishing and domestic service, compiled by the Dominion Bureau of Statistics from reports furnished by employers; the other is the series giving the percentages of their members who are unemployed as reported by the trade unions to the Department of Labour.

"Let us consider first the index numbers of employment, and what conclusions we are justified in drawing at this time from a study of those index numbers. The bureau of statistics index numbers are all related to a base of 100 points which represents the average for the months of the year 1926. In other words the average figures of employment for 1926 are taken as the base. The

index for March 1, 1936, stood at 98·9. The pre-depression peak for the same month, March, was reached in 1929 when the figure was 111·4. March, 1930, showed only a slight decline to 110·2. The index therefore shows a net drop on March 1 of this year compared with the same date in 1930 of approximately 10·2 per cent.

"But this does not mean that the drop in employment in the six years has been only 10·2 per cent; for other factors enter. Those factors arise chiefly from two considerations. First, these index numbers do not take into account the normal increase in population. Assuming the percentage of the population seeking gainful employment remains constant, then the number seeking gainful employment increases each year in proportion to the gain in general population. The estimate of population increase over 1930 is approximately eight per cent, so that this factor would indicate the need of adding a minimum of eight per cent to the visible difference between March of 1930 and March of 1936 to measure more nearly the net decrease in employment in that period. The reason for referring to this addition as a minimum is that not all persons were employed on March 1, 1930. If such addition be made it would indicate a net relative

decrease of at least 18·2 per cent in the employment reported upon in the six years up to March 1, 1936.

"A little later I propose to refer to a feature of our economic situation which in our consideration of the problem in the past few years has, I believe, been overlooked. I refer to seasonal unemployment. This country is susceptible in a peculiar degree to seasonal variations of employment. Referring again to the index numbers may I explain that there are included as employed persons some thousands who are on relief works or are in relief camps. The figure for March 1, 1936, is thus supported by this factor, while that for March 1, 1930, was not influenced in like manner. In the nature of things it is proper that we speak of these men on relief works as employed persons. At the same time in our consideration of the implication of these figures it is rather important that we make the necessary deductions. . . ."

### Recovery of Employment

"It is to be noted that the index numbers relate to industrial employment only. Among other industries they exclude farming. Due to crop conditions in recent years the farming industry is now able to absorb substantially fewer men than it did in normal times. This factor is not covered in the index numbers, and figures are lacking on this phase of employment. However, observations lead to the belief that the decrease in farm employment afforded would be at least as great as that in industrial employment. I hope it will be possible presently to obtain further and more accurate information upon this phase of the problem. Thus to indicate the probable decline of 18·2 per cent in general employment from March 1, 1930, to March 1, 1936, is not to overlook the fact that the same index numbers show that material progress has been made in the recovery of employment since the low of the depression. That low was reached on April 1, 1933, to use the same month as we used before, at which time the index stood at 76·9—a very low point indeed in relation to the basal figure of 100, which represents the average of employment in the year 1926. From March 1, 1933, to March 1, 1936, the index moved up 22 points, or approximately 28·6 per cent. I believe we are justified in saying that there is some cause for encouragement in that improvement. This 28·6 per cent improvement upon the low point of March 1, 1933, may be taken to indicate the extent of employment recovery in the last three years, subject to a deduc-

tion of at least four per cent for the assumed increase in the numbers of persons seeking gainful work.

"To sum up, Dominion Bureau of Statistics index numbers of employment in industries other than farming, fishing and domestic services, indicate that at March 1 of this year industrial employment showed an apparent net recovery of not more than 24·6 per cent in relation to March 1, 1933, which was the low point, but a net decrease of not less than 18·2 per cent relative to March 1, 1930. These are the figures after making allowances to compensate for the normal growth in the number of persons seeking gainful employment. In these calculations allowances not made, however, are those for the influence of relief work on the trend of employment. It should also be pointed out that these percentages are not directly comparable one to the other, as they are on different bases, that of the recovery being based on the abnormally low level of 1933. . . ."

"May I add a word in parenthesis at this time to the effect that it is extremely difficult to get an actual computation of the employment created by relief works. For example, on highways immediate employment is afforded to those doing actual construction work, but it has always been the hope of governments in connection with any program of public works that there would be collateral employment created, and that the industries which provide materials used on highways, as a result of such expenditures would be able to expand employment. Indeed I believe it is that criterion which to a great extent ought to guide us in determining the direction of our expenditures on relief works.

"I now come to the figures on employment as revealed by the trade unions. The general trend of employment, as shown by the index numbers, is corroborated in a general way by the Department of Labour figures of unemployment. The recession in employment set in somewhat earlier among trade unions than was indicated by the index numbers of general employment. On February 28, 1930 the percentage of unemployment was 11·5 per cent. For the same date, the last day of February in succeeding years, the heaviest unemployment was reported on February 28, 1933, when it was 24·3 per cent. I might say that when we take the February figures we do bring in prominently the feature of seasonal unemployment in the construction industries. On February 29 of this year there was a net reduction shown in unemployment in the trade unions, the figure standing at 13·8 per

cent. So that in the figure supplied by the trade unions we do find corroboration of the conclusions which would reasonably be based upon study of the index numbers of employment established by the bureau of statistics."

In concluding this part of his survey, the Minister pointed out that in neither of the above two indices is any allowance made for persons in part time employment, *i.e.*—"those working less than the normal working week of whom there were a considerable number at all times during the depression."

### Method of Securing Information

Continuing, he traced the developments arising out of the recommendations of that section of the Dominion-provincial conference (December, 1935) which dealt with unemployment and relief. Accordingly it was decided to classify direct relief recipients on a basis that would resolve the problem into its social and economic elements. Outlining the new method of procedure in securing this new analytical set-up of statistical data, the Minister paid tribute to the co-operation received from the provinces and municipalities. As a result of this co-ordinated effort, he believed that "it is going to assist us to approach in a more scientific and sensible manner the whole matter."

"To what extent actual re-registration of those on relief should be undertaken in order to accommodate the records of the municipalities to the statistical requirements of the Department of Labour was left to the provinces and to the municipalities to determine," the Minister stated, adding that "the criterion in this regard was always the adequacy of the information immediately available on relief cases from existing municipal records. In some cases the municipalities had completed registration of their relief recipients just prior to the inception of the Dominion classification, making further re-registration unnecessary; in other cases municipalities conducted periodic registration; still others had partial information but the deficiencies had been or are being met. However, in the largest group of municipalities, re-registration had been undertaken in order to bring their records into a degree of uniformity with the rest of the country."

The Minister further explained that the actual information is being secured by the municipal and provincial authorities upon the basis of forms supplied by the federal Department of Labour.

"It might be observed" he stated, "that upwards of four thousand local authorities

are distributing relief through the nine provinces, and are furnishing us with the requisite information. The federal authorities distributing direct relief have also been asked to cooperate in supplying information covering their cases on a basis comparable to that used by the provincial and municipal authorities. Under this heading would come the Department of National Defence in respect to the relief camps heretofore operated under that department as well as under the parks branch of the Department of the Interior. There would be the Department of Indian Affairs in respect to the Indian population, the Department of Pensions and National Health in respect to certain war pensioners, and the Department of the Interior in respect to the Yukon and Northwest Territories."

Reporting progress on the functioning of the new system, the Minister considered that in the course of a few weeks it would be possible to commence making a regular monthly tabulation of all phases of the relief situation. In spite of the initial difficulty of adaptation to the new forms, the results "thus far obtained have amply justified the view expressed by the dominion-provincial conference, and strongly held by the Department of Labour, that this information is necessary if we are to take a careful inventory of the unemployment and relief situation at this time. In other words, we wish to test the feasibility of obtaining this information and making the classification. When established, the national employment commission will have this information coming to it regularly and will be able to analyse in relation to particular aspects, not only the relief problem but the problems of production and potential reemployment."

Replying to questions, the Minister explained that the channel of collection was through the provincial governments which in turn collected the information from the municipalities on forms supplied by the Department of Labour. The information thus secured is then assembled by the Department, the objective being "to get the problem into a national focus."

### Classification of Relief Recipients

For the information of the House and the country, the Minister then presented preliminary tabular summaries of the statistics obtained.

Table I was as follows:

Classification of Direct Relief Recipients  
(Preliminary Figures)

Table I

Summary statement of persons in respect of whom direct relief was paid by the municipalities and/or provinces in January, 1936.

Note: only provincial-municipal direct relief in respect of which the federal grants in aid are paid is herein included.

Totals for all Canada				
	Male	Female	Total	Per cent of grand total
Employable Persons,—				
i.e., persons over 16 years, available for immediate employment.. . . .	251,681	80,499	332,180	26.94
Dependents of Employable Persons,—				
i.e., wives, children under 16 and children over 16 at school full time.. . . .	173,863	324,897	498,760	40.44
Unemployable Persons,—				
i.e., persons over 16 years not available for employment because of physical or mental cause.. . . .	27,317	20,951	48,268	3.91
Dependents of Unemployable Persons,—				
i.e., wives, children under 16 and children over 16 at school full time.. . . .	8,839	17,706	26,545	2.15
Farmers on Relief.. . . .	65,235	3,256	68,491	5.55
Dependents of Farmers,—				
i.e., wives, children under 16 and children over 16 at school full time.. . . .	107,885	150,261	258,146	20.93
Transients,—				
i.e., persons resident in the municipality less than 30 days continuously.. . . .	996	4	1,000	.08
Grand total of persons on municipal and/or provincial relief.. . . .	635,816	597,574	1,233,390	100.00

There followed a summary statement (Table II) of employable persons and their dependents, other than unemployable depen-

dents over sixteen years of age in respect of whom direct relief was paid by municipalities and/or provinces in January, 1936.

Classification of Direct Relief Recipients

(Preliminary Figures)

Table II

Summary statement of employable persons and their dependents (other than unemployable dependents over 16 years) in respect of whom direct relief was paid by the municipalities and/or provinces in January, 1936.

Note: Only provincial-municipal direct relief in respect of which the federal grants in aid are paid is herein included.

Totals for all Canada				
	Male	Female	Total	Per cent of grand total in receipt of relief
Employable persons.. . . .	251,681	80,499	332,180	26.94
The above are comprised of:				
Heads of families.. . . .	156,592	18,026	174,618	14.16
Employable dependents.. . . .	49,765	54,464	104,229	8.46
Individual cases.. . . .	45,324	8,009	53,333	4.32

The above are comprised of:				
Wives.. . . .	.....	154,325	154,325	12.52
Children under 16 years.. . . .	162,670	159,107	321,777	26.09
Children over 16 years at school full time.. . . .	11,193	11,465	22,658	1.83
Total of Employable Persons and their dependents.. . . .	425,544	405,396	830,940	67.37

### Employables and Unemployables

Asked as to who decided upon who is employable and who is not, the Minister replied:

"Actually the opinion is expressed and the classification made by those who originally register the applicant for relief, which means the municipality; and I think we may say that under this definition of unemployable the criterion is physical or mental unfitness. There are those who contend, with some ground I think, that a long period of idleness, or advancing age, may produce a condition of unemployability, and it will be desirable as we go along to try to find some more precise definition of unemployability, something that will possibly go beyond the very obvious criterion of physical and mental unfitness. It is not an easy problem to solve. You find very marked unemployment in the age group of sixty to seventy. It is very questionable whether many in that age group are going to be reemployed, and that does raise at least a question as to the attitude that should be adopted in relation to the higher age groups: whether, for example, we may not have to consider

the problems of certain age groups as being somewhat different from those of other age groups. I simply suggest now that the information supplied as to unemployability comes directly from the municipalities, and the dominion has not sought to lay down any hard and fast definition. In many of these matters it seems to me that as we gather this information and analyse it we shall be able to see our way more clearly. And that after all is the desired objective.

"Referring to table II, covering employable persons, a summary statement of employable persons and their dependents, other than unemployable dependents over sixteen years of age, in respect of whom direct relief was paid by municipalities and/or provinces in January, 1936, employable persons total, male, 251,681, female, 80,499, or a total of 332,180, they are subdivided as follows—and remember that we are dealing now solely with employable persons receiving relief. These are the categories: heads of families, male, 156,592, female, 18,026 or a total of heads of families on relief and employable of 174,618."

Tables III and IV were thus presented as follows:

CLASSIFICATION OF DIRECT RELIEF RECIPIENTS  
(Preliminary Figures)

TABLE III

Analysis of Employable Persons in Respect of whom Direct Relief was Paid by the Municipalities and/or Provinces in January, 1936.

Province	Heads of families			Employable dependents			Individual cases			Total of employable persons			Per cent of Dominion total
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total

British Columbia.....	12,468	12,130	11,410	1,373	1,966	39,347	7.9
Dominion Totals.....	154,325	162,670	159,107	11,193	11,465	498,760	100.0

\*Children over 16 years at school full time unreported from the province of Quebec.

## Unemployables on Relief

The Minister next analyzed the situation with respect to those classed as "unemploy-

able." In the accompanying Table (V) the details of this category were given, and the Minister's explanatory analysis continues:

## Classification of Direct Relief Recipients

(Preliminary Figures)

Table V

Summary statement of unemployable persons and their dependents (other than employable dependents over 16 years) in respect of whom direct relief was paid by the municipalities and/or provinces in January, 1936.

Note: Only provincial-municipal direct relief in respect of which the federal grants in aid are paid is herein included.

## Totals for all Canada

	Male	Female	Total	Per cent of grand total in receipt of relief
Unemployable persons.. . . .	27,317	20,951	48,268	3.91
The above are comprised of:				
Heads of families.. . . .	9,647	3,599	13,246	1.07
Unemployable dependents.. . . .	12,412	14,946	27,358	2.21
Individual cases.. . . .	5,258	2,406	7,664	.62
Dependents of unemployable persons.. . . .	8,839	17,706	26,545	2.15
The above are comprised of:				
Wives.. . . .	.....	8,631	8,631	.69
Children under 16 years.. . . .	8,326	8,512	16,838	1.37
Children over 16 years at school full time.. . . .	513	563	1,076	.09
Total of unemployable persons and their de- pendents.. . . .	36,156	38,657	74,813	6.06

"The analysis of unemployable persons is as follows: heads of families, male 9,647; female, 3,599; total, 13,246. You have another class, obviously, of unemployable dependents, not necessarily of course the dependents of the unemployable; they were as follows: male, 12,412; female, 14,946, making a total of unemployable dependents, 27,358

.....

"The 13,246 was the total of unemployable heads of families, male and female, for the dominion. Then individual cases, male, 5,258; female, 2,406; total, 7,664.

"The recapitulation is as follows: total of unemployable persons as revealed so far by this census: male, 27,317; female, 20,951; total, 48,268. That is not a large percentage in relation to the entire number of those who are on relief. As a matter of fact it has been suggested by some of the provincial officials who are closely in touch with this question that unemployability ought to run somewhere in the neighbourhood of fifteen per cent, but I have no doubt that as time goes on the accuracy of these figures will improve. We must remember that we are dealing here only with unemployables actually on the relief rolls.

"That question is of very considerable significance when we remember that prior to the assumption by the dominion of responsibility in relation to unemployment relief, these unemployables would have been recognized as the charges of municipalities or of provinces. It is just an indication, I think, of the manner in which the fences of our federal system have been broken down during these past few years, and it draws

attention to the fact that we must either make a new survey and erect new fences or repair the old ones if we are going to return to a satisfactory system of relationships between the dominion and the provinces. I simply mention that in passing. It is of importance that we should have knowledge of the extent to which unemployables have been transferred to the relief rolls during recent years.

Replying to a query if the survey would yield information regarding unemployed not connected directly or indirectly with relief, Hon. Mr. Rogers said:

"I wish I could answer that question. It is one of the blind spots in the situation. We were faced with that problem in connection with this classification. It is possible to get that information for those who are receiving relief, arising out of their necessity to give the information when they receive relief. But I know of no way in which you could secure accurate information as to the volume of unemployment beyond the relief situation unless we required, possibly by proclamation, a registration for that purpose. I am not certain that this would be desirable; I am not satisfied as yet that it would be feasible, but at any rate that information is not now available in accurate detail."

Continuing with the tabulations of unemployable persons Table VI (an analysis of unemployable persons in respect of whom direct relief was paid by the municipalities and/or provinces) and Table VII (an analysis of dependents of unemployables by provinces) were presented as follows:

## CLASSIFICATION OF DIRECT RELIEF RECIPIENTS

(Preliminary Figures)

TABLE VI

Analysis of Unemployable Persons in respect of whom Direct Relief was Paid by the Municipalities and/or Provinces in January, 1936

Province	Heads of families			Unemployable dependents			Individual cases			Total of unemployable persons			Percent of Dominion total
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total

## Statistics of Relief Camps

Tabular statistics also indicated the number of single, unemployed men in relief camps by provinces, the periods of continuance in the camps, and the age groups. The total number of men in the relief camps of the Department of National Defence as of January 31, 1936, was 20,302. Of this total, 5,798, or 28.6 per cent were in camps in British Columbia; 5,400, or 26.6 per cent in Ontario camps; 2,782 in Quebec; 2,091 in Alberta; 1,369 in Saskatchewan; 1,231 in Manitoba; 1,104 in New Brunswick; and 527 in Nova Scotia. Of the total of 20,302, there were 557 who had been in camps for over three years; 2,772 from two to three years; 4,147 from one to two years; and 12,826 under one year.

Presenting the relief camps situation from another angle, the Minister produced a tabular summary of age groups as follows:

Ages of Men in Camps of Department of National Defence		
	Number	Per cent
18 to 20 years. . . . .	2,136	10.5
21 to 30 years. . . . .	5,686	28.0
31 to 40 years. . . . .	4,986	24.6
41 to 50 years. . . . .	3,847	18.9
51 to 60 years. . . . .	2,818	13.9
Over 60 years. . . . .	829	4.1
Totals. . . . .	20,302	100.0

## Occupational Groups in Camps

As regards their former occupations, the Minister stated:

"I am particularly anxious to place this on Hansard in order to indicate something of the pressure of the unemployment situation upon the various occupations throughout the dominion, and also to indicate something of the reserve capacity which exists in these camps as soon as opportunities for employment may be found:

Department of National Defence			
Previous occupations of men in relief camps—			
Occupation	Number	P.C.	
Labourers . . . . .	9,192	45.3	
Mercantile and office workers . .	1,257	6.2	
Professional . . . . .	712	3.5	
Domestic, hotel, restaurant, etc.	1,009	5.0

Fishing . . . . .	108	.5	
Logging . . . . .	1,014	5.0	
Mining . . . . .	627	3.1	
Manufacturing . . . . .	694	3.4	
Construction . . . . .	1,619	8.0	
Transportation and communication . . . . .	1,027	5.1	
Never regularly employed:—			
under 25 years of age. . . . .	1,058	5.2	
over 25 years of age. . . . .	476	2.3	
	20,302		

## Social Problem of Relief

Proceeding with his survey of the problem, the Minister dealt with its fundamental social and economic elements:

"Now to return to the figures in respect to unemployment and relief. As revealed by these various tabulations it would appear that the large problem of unemployment and relief may be subdivided into three quite distinct sections, which may call for the application of different administrative and remedial policies over a period of years. First I would speak of the social problem of relief. Let me return to the total figures of those who are receiving assistance from the state because of either industrial unemployment or agricultural distress. This total figure for February is 1,310,423. That includes employables and unemployables with their dependents, together with those receiving relief in the drought areas of the wheat producing provinces, both heads of families and their dependents. That is the problem in its largest terms. This grand total of those receiving state assistance may be described as the social problem arising out of the existing economic situation. It has its origin in the elementary obligation of the state to provide for the subsistence of its members—to use the term employed by Jeremy Bentham—and who are in necessitous circumstances through no fault of their own. It is the political expression of the moral principle that we are members one of another and have duties towards our neighbours who are in distress. In our approach to this social problem we must be guided by a number of considerations which have been established in conscience or reason and confirmed by experience. We must for example see to it that a sufficiency of food and shelter and medical attention is provided for those who are in need. . . . Clothing obviously should be included. We must also ensure that our administrative organization for the relief of distress is developed to the highest possible point of efficiency and economy. In a federal state the obligation to care for those in necessitous circumstances rests upon a well established gradation of responsibility, involving first the municipalities, then the provincial governments, and finally the dominion government when the problem of relief has assumed national dimensions. This division of responsibility in relation to relief requires clearly a very careful coordination of effort by governmental authorities and private welfare agencies, if waste and duplication are to be avoided and a reasonable service is to be rendered to those in need."

## Employers and Wages

"There is another consideration which must also be kept in mind as we approach the problem of unemployment and relief in its social aspect. I have suggested that a sufficiency of food and shelter, clothing and medical attention must be provided for those in need. That is not in dispute. In making this provision, however, there is equally an obligation upon governments to see that the arrangements for relief do not encourage the acceptance of voluntary idleness by relief recipients, or permit employers of labour to transfer to the state their obligation to pay a living wage and to conduct their operations with a due sense of social responsibility. I mention that here because some cases have been brought to my attention of employers of labour who have taken advantage of the existing situation and have paid wages upon so low a scale that those receiving those wages were receiving less than they would obtain if they were on relief. And I know it has been the practice in some municipalities to pay part time relief to some of those whose wages fall below the relief scale. Obviously such a situation is intolerable. It does seem to me that if on investigation we find an employer of labour who is taking advantage of this situation, we as a government are entitled to use the weapon of publicity to the fullest possible extent in order to brand that policy as high treason to the state in a time of great emergency. I grant you it should be done only after careful investigation. I have not referred this afternoon to the names of any employers, and I do not do so because I realize that even though the information may have been given to me in good faith it would not be fair to those employers to make the charge until I am fully satisfied as to its validity."

## Conservation of Human Resources

"Finally it must be borne in mind that the relief of distress rests upon practical considerations as well as upon a moral obligation which has been assumed by the state as an association for the promotion of human welfare. The greatest resource of any country consists of its workers with hand and brain. This in the ultimate analysis is the true wealth of nations. Upon its labouring population the state depends for its productivity and its real income in terms of goods and services. This is a truism, but we must not ignore its implications because it is so familiar and self-evident. It is to the interest of the state, quite apart from

the question of obligation, to preserve the health and vigour of its people and as far as possible to prevent the impairment of the technical skill and efficiency of its workers. The provision of unemployment relief has been and is now a heavy financial burden, but any failure on our part to bear this burden would be tantamount to the wasting of an estate by a life tenant, and would mean irreparable injury to those who will inherit from us in years to come. In any long range view of governmental policy a just and reasonable provision of unemployment relief is a measure for the conservation of the human resources of the nation. All of us want our relief administration to come to an end as soon as possible. We realize that it must be surrounded by safeguards, but let us not forget that in its essential character it partakes of a policy of national conservation."

## Segregation of Unemployables

"Apart from the provision of subsistence for those who suffer from involuntary unemployment, the social problem of relief calls for the careful segregation of unemployables from employables, and the formation of special measures to deal with those who will no longer be able to work, even when work becomes available. I believe it is clear from our examination of this social aspect of the wider problem of unemployment and relief that there is a clear necessity resting upon us to study and analyze it along the lines I have indicated, in order that we may develop the appropriate long term measures to deal with it in its various aspects.

"So much for the social problem of unemployment and relief. I have dealt with it inadequately. I do not wish to weary the house with a discussion of the problem, and there will be ample opportunity to develop some of these features when the house is in committee."

## Economic Problem of Relief

Turning to the economic aspects of the problem the Minister of Labour continued:

"I pass now to what may be described as the economic problem of relief. Let me turn to the total figure of adult employables now in receipt of relief. In this connection I find the figure of 332,180 for January, subdivided as follows: Heads of families, 174,618; employable dependents, 104,229 and individual cases, 53,333. Are we not justified in saying that this figure of employables on

relief represents the measure of the economic problem, as distinguished from the social problem? I use those terms for reasons which I believe will become apparent upon reflection or examination. If work can be found for employable heads of families now on relief we would no longer have to be concerned with the provision of state assistance for their dependents. If in addition, or concurrently, work can be found for the individual employables the economic aspect of the relief problem will be under effective control. . . ."

### Basis of Industrial Revival

"When we ask ourselves how we should approach the economic problem it seems to me it is evident that short range and long range measures will have to be applied. It is our view that if we are to secure a proper revival of industry in Canada it must be upon the basis of trade policies which will permit a more satisfactory exchange between this and other countries. It is our further view that the secondary industries in Canada are based essentially upon the prosperity and welfare of our great primary industries. This government has already given indication of its determination to work out a policy of that type, having faith that in due course it will not only assist the primary industries but create a home market in the only sense in which a home market ever exists in Canada, namely by placing purchasing power in the great agricultural areas of Canada, where the potential market for the secondary industries exists. It is not a case of pitting the secondary industries against the primary industries, and of suggesting that these must always be in opposition. Rather it is a question of finding, by experience with and examination of the true interests of Canada how it may be possible to reconcile the true interests of the primary industries and the legitimate interests of the secondary industries.

"I believe it is useless for us to repair the superstructure of our economic life, as represented by our secondary industries, if its foundation as represented by our primary industries is crumbling away. I am not going to speak at length as to what may be done by public employment to meet the economic problem to which I have referred. I may state however that I am quite sure it has been proved by the experience of all countries that public employment of itself is not a solution. I repeat, it is not a solution. It would cost this country somewhere between \$300,000,000 and \$400,000,000 to put at

work the employables in the category to which I have just referred." (In reply to a question, the Minister added that this estimate would be an annual cost.)

"It is conceivable that this country might pursue a policy of that kind this year and the year after, but it is not conceivable that this or any other country could continue a policy of that kind without adopting with all its implications the philosophy of socialism. None of us can see the shape of events to come; it is beyond our powers to know the direction in which we are ultimately tending, but this we do know, that the electorate of Canada is not prepared at the present time to accept a socialist state. We are under an obligation to preserve the foundations of the state as we have it to-day, recognizing at the same time our obligation to provide the maximum of human welfare for those who are members of the state. But surely in our whole attitude toward the provision of relief works, toward the creation of public employment as a solution of this problem, we must remember not only that we are dealing with a situation which exists to-day, but that we are trustees for a nation which has a to-morrow. If in dealing with this situation we, under the insistent demands of the present, are forgetful of our duty to those who will inherit from us in time to come, I think we shall be unworthy of the confidence reposed in us by the Canadian electorate.

"This then should mean that it is the duty of this government, as it is of any government, to try to find the means of using public works for the provision of relief so far as that is possible and reasonable, and at the same time to stimulate private employment by every means within our power. Upon the basis of the improvement that has taken place, upon the basis of the cooperation which I believe can be achieved through the instrumentality of a national employment commission, I believe that we may continue to make steady progress along the lines I have indicated and do so without at the same time impairing the foundations of our economic life. Apart altogether from the question whether sufficient public employment can be created to take up the slack, there is another question whether we are going to develop through government policy an attitude of complete dependence upon the state for the provision of employment. I suggest that upon the basis of the experience that we have had thus far with relief works we are not justified in assuming that the provision of such works upon a large scale would under present conditions

produce that amount of human motivation which would make for the maximum efficiency."

### Necessity of Co-ordinating Body

Dealing with the necessity of a co-ordinating agency the Minister observed: "Under our federal constitution there is a well-established division of responsibility in relation both to the administration of relief and to the maintenance of social services. In order to avoid friction or duplication in the administration of relief, it is necessary to secure a more effective and continuous co-ordination of effort in relation to the entire problem. Experience has proved the need of some kind of nexus, or connecting link between the various governmental agencies having a responsibility in relation to relief. I do not know that it is necessary here to elaborate very fully upon that consideration of public policy. Many of us within these last few years have given more study to the federal constitution than we had done in our lifetime previously. It has been forced upon our attention as a result of problems in relation to it which have arisen during the last few years; but it has seemed to me that in our federal constitution there is potentially a large field of cooperation which has never been explored sufficiently but which, if it were explored, would remove a considerable degree of friction and duplication which now are found in the working of that constitution. . . . .

"I would say further that the problem of unemployment relief is closely bound up with the maintenance of social services, and that large question is in an unsettled condition, due in part to the incidence of unemployment and relief. We find mothers' allowances brought into competition with relief scales in some provinces; we find old age pensions brought into competition with relief scales in other provinces. Surely, in view of the complexity of the problem, in view of the well acknowledged fact that we are working under extraordinary difficulties at this time, we are justified, nay we are compelled to seek some better way of dealing with this unemployment situation than upon a basis of competition between various governmental agencies—because there has been competition in the past—or upon the basis of friction or antagonism engendered as a result of different policies adopted in different parts of the country for dealing with the problem."

With regard to particular local conditions in various parts of the country, the Minister saw in these very factors "a strong argument

for avoiding the complete assumption of responsibility for this problem here in Ottawa.

"Whatever we do we must preserve an opportunity for the adaptation of policies to peculiar conditions in different parts of the country. That I think can be secured more satisfactorily when an opportunity is given someone to review this situation as it has developed in the past few years and to put it into a clear national focus.

"Now I come finally to another consideration of policy which I suggest as a justification of this national employment commission. The experience of the past five years has also proved that it is not within the power of governments to end unemployment by their own unaided efforts. There is a growing recognition that victory over the depression and unemployment cannot be won by a pitched battle but only by a sustained campaign along the entire front of our economic life, upon the basis of the maximum national effort, giving to the problem for a period of years that kind of effort which obtained and dominated during the period of the war. It does seem to me that it ought not to be impossible for a government to ask of the people, in the existing conditions, that same degree of cooperation that was secured in the war for destructive purposes. This after all is a great task of national rehabilitation. It is a task to which we are justified in calling not only other governmental agencies but all corporations or individuals who are affected by a social obligation or who might be expected to respond to an appeal for assistance in a time of national need. I suggest there is growing recognition that this kind of co-operation must be attained and is long overdue..."

In support of his contention that there was an increasing recognition of the necessity for co-ordinated effort under the direction of a national employment commission, the Minister placed on record recommendations and endorsements of such policy by the Dominion-Provincial Conference of December, 1935; the Canadian Welfare Council; the Canadian Chamber of Commerce; the Trades and Labour Congress; and the Confederation of Catholic Workers.

The Hon. Mr. Rogers next explained the reason for the establishing of such a commission distinct from the operation of the Department of Labour. He pointed out that while the Department had initiated action in seeking and obtaining the co-operation of the provinces and ascertaining the feasibility of the information required, and while this information was now ready for immediate use,

yet the situation demanded that "calm appraisal" and "long perspective" which could be more effectively given by a national employment commission than by any government department.

### Trustees of the Future

"I have sought simply to indicate what I felt to be the broad considerations of public policy which supported the establishment at this time of a national employment commission to supplement the efforts of government in dealing with the whole problem of unemployment and relief. In one of his memorable speeches Edmund Burke described the state as a partnership of the dead, the living and the yet unborn. The knowledge of that partnership in the state compels us to recognize a dual

responsibility which embraces to-morrow as well as to-day. Our first and immediate duty is to the living, but it would be an abject repudiation of responsible statesmanship to forget those who some day will stand in the places in which we stand to-day. What happens to us as individuals is of small consequence. What happens to this government is only of relative importance in the long perspective of history. What happens to the morale and future outlook of our people is of supreme importance in the ongoing life of the nation. In this paramount consideration of public policy we find the need and the justification for the measure which is now proposed as an aid and support to the national government in a federal state in dealing with the most serious problem which has ever confronted our country in a time of peace."

## IV. Statement by Prime Minister on Functions of National Employment Commission

In the course of the debate on the second reading of the Employment Commission Bill in the House of Commons on April 3, the Prime Minister, Rt. Hon. W. L. Mackenzie King, emphasized certain features of the measure, and referred particularly to the necessity of establishing the Commission as a separate entity to deal with a national emergency.

"What I want to bring out at the moment," he stated, "is that anyone who understands this problem will realize that, no matter how able and efficient a minister may be, and how able and efficient his staff may be, no single department of government can begin to grapple with this question as it has to be grappled with, in the light of its magnitude at the present time."

As precedents for similar action under compelling circumstances, the Prime Minister drew attention to various bodies established during the war to supplement the work of the departments in the magnitude of the national effort. He pointed out that under different conditions, there was to-day a problem of infinitely greater magnitude in so far as the factors of relief and re-establishment were a part of it.

### Special Supply Bill

The Prime Minister then detailed the Government's policy in dealing with the problem under three inter-related measures—the National Employment Commission Act; the Un-

employment Relief and Assistance Act; and a Special Supply Bill. Referring to this Bill, the Prime Minister said:

"Perhaps I may say at once that, when it does come down, the total appropriation requested for purposes of relief and for providing employment will be seen to amount to over \$50,000,000.\* . . . .

Emphasizing that this expenditure entailed close supervision by the Commission, the Prime Minister continued:

"This \$50,000,000 constitutes only the contribution of the federal government towards the solution of the problem. A corresponding amount or something approximating it will have to be paid out by the provinces and additional amounts by the municipalities. You cannot separate the three in estimating the cost to the country of relief in Canada to-day. The people of Canada have to pay the bill whether it is paid out of the moneys of the municipalities, out of the moneys of the provinces or out of the moneys of the dominion. The people of Canada will never know the cost of relief unless there is some agency to bring together in one report the expenditures of all the agencies involved, government and private alike, nor will there be any substantial lessening in the amounts until they know the manner in which all these different agencies are supervising their expenditures and carrying out the works for which these various expenditures are being made. That is a main purpose of this commission, and I venture to say that no agency other than a body such as we suggest can possibly carry it out."

\* See Prime Minister's subsequent statement of April 6, given at the conclusion of this review on page 31.

### Extent of Duties

Inviting careful study of the duties and powers of the Commission, the Prime Minister made it clear that it was not merely a statistical agency, and indicated that national registration and classification of relief recipients constituted only one phase of its activity.

"The minister and his department" he observed, "have done a quite exceptional bit of work in showing. . . that it is possible to get together statistics calculated to be exceedingly helpful to this parliament as well as to the provincial governments and the municipalities in dealing with the problem. But the department has only begun to gather a fragment of what is necessary if we are to know the true effect and inwardness of the unemployment situation.

Take the second of the powers and duties of the commission as set forth:

Recommend to the minister conditions to be complied with by any province obtaining grants for relief purposes from the government of Canada.

Is it not advisable to have attached to the moneys that are being voted by this federal parliament conditions which shall govern their expenditure? How is it going to be possible to estimate accurately what these conditions should be unless you have some organization that has power to supervise the manner in which the various provinces expend the federal money which is granted to them? What can the Minister of Labour, or any minister of the crown in Ottawa know of the manner in which expenditures are being made in the maritime provinces, in Quebec, in Ontario, in the prairie provinces, in British Columbia? It is impossible for any minister of the crown, or any department of the government here at Ottawa to undertake to secure that information. What is needed is a body, such as this commission will be, which will have on it representatives from different parts of Canada and which will have a staff organized for the purpose of securing full particulars with respect to these matters."

### Cooperation in Reemployment

Continuing, the Prime Minister examined the employment commission Act clause by clause, indicating the comprehensive nature of the commission's duties and pointing out how each entailed supervision over co-ordinated effort to achieve its objective. Drawing attention to the provision whereby

the Commission is empowered to investigate and report on measures of co-operation with commercial and industrial groups in devising means to maintain and increase employment, he observed: "Unless we discover private agencies which will help solve this problem, and unless we can coordinate their effort and bring it into relation with the efforts of the state, there will be no solution at any time of the unemployed problem."

### Policy in Emergency

In concluding the Prime Minister declared in part:

"It is a policy based not upon mere theory, but upon practice which has proved to be an effective and helpful method of administration of public funds in a time of great national emergency. Above all, the plan developed is one which, we believe, will help to solve the problem of unemployment and to meet the needs of relief. It is one which is essentially constructive in its bearing on many projects essential to the future needs of Canada. Whether it will succeed or not, no one can say, but the purpose is the highest; and I believe as a plan of effecting a nation-wide cooperative effort in providing employment and administering relief, is as practical as anything which could possibly be suggested. . ."

### Amount of Supply Bill

Speaking in the House of Commons on April 6, the Prime Minister amended his remarks respecting the supply Bill as follows:

"The other evening I spoke of some \$50,000,000 which might be involved in the various projects for relief and employment. I was thinking, at that time, of the program which the present administration had in mind respecting measures the government itself would initiate, measures which would be related to its own policies, some of which would be a continuation of policies of the previous administration. But when I made that statement I did not take into account an expenditure of something like another \$25,000,000, to which the country is already committed, through projects started by the previous administration either last year or in previous years. These if not continued and brought to completion will now have to be abandoned altogether with consequent loss of all outlays already made upon them."
